LilyPond

Snippets

The LilyPond development team

This document shows a selected set of LilyPond snippets from the LilyPond Snippet Repository (http://lsr.di.unimi.it) (LSR). It is in the public domain.

We would like to address many thanks to Sebastiano Vigna for maintaining LSR web site and database, and the University of Milano for hosting LSR.

Please note that this document is not an exact subset of LSR: some snippets come from input/new LilyPond sources directory, and snippets from LSR are converted through convert-ly, as LSR is based on a stable LilyPond version, and this document is for version 2.20.0.

Snippets are grouped by tags; tags listed in the table of contents match a section of LilyPond notation manual. Snippets may have several tags, and not all LSR tags may appear in this document.

In the HTML version of this document, you can click on the file name or figure for each example to see the corresponding input file.

For more information about how this manual fits with the other documentation, or to read this manual in other formats, see Section “Manuals” in General Information.

If you are missing any manuals, the complete documentation can be found at http://lilypond.org/.

This document has been placed in the public domain.

For LilyPond version 2.20.0
# Table of Contents

## Pitches

- Adding ambitus per voice .................................................. 1
- Adding an ottava marking to a single voice ............................ 1
- Altering the length of beamed stems .................................. 2
- Ambitus with multiple voices ............................................. 2
- Ambitus ................................................................. 3
- Applying note head styles depending on the step of the scale ....... 3
- Automatically changing the stem direction of the middle note based on the melody ......................... 4
- Changing ottava text ...................................................... 5
- Changing the ambitus gap .................................................. 5
- Changing the interval of lines on the stave ........................... 6
- Clefs can be transposed by arbitrary amounts ......................... 7
- Coloring notes depending on their pitch ................................ 7
- Creating a sequence of notes on various pitches ..................... 8
- Creating custom key signatures ......................................... 9
- Forcing a clef symbol to be displayed .................................. 9
- Generating random notes .................................................. 10
- Hiding accidentals on tied notes at the start of a new system .... 10
- Keep change clefs full sized ............................................. 10
- Makam example .................................................................. 11
- Modifying the Ottava spanner slope .................................... 11
- Non-traditional key signatures .......................................... 12
- Numbers as easy note heads ............................................. 12
- Orchestra choir and piano template .................................... 14
- Ottoman text .............................................................. 17
- Preventing extra naturals from being automatically added ......... 18
- Preventing natural signs from being printed when the key signature changes .......................... 18
- Quoting another voice with transposition .............................. 18
- Separating key cancellations from key signature changes ........ 19
- Transposing pitches with minimum accidentals (*Smart* transpose) ............................................................. 20
- Tweaking clef properties .................................................. 21
- Using autochange with more than one voice ......................... 22

## Rhythms

- Adding beams slurs ties etc. when using tuplet and non-tuplet rhythms ......................................................... 24
- Adding drum parts .......................................................... 24
- Adjusting grace note spacing ............................................. 25
- Aligning bar numbers ....................................................... 25
- Alternative breve notes ..................................................... 26
- Automatic beam subdivisions ............................................. 26
- Automatically change durations ........................................ 27
- Avoiding collisions with chord fingerings ............................ 28
- Beam endings in Score context ......................................... 28
- Beams across line breaks ................................................ 29
- Changing beam knee gap .................................................. 30
- Changing form of multi-measure rests ................................. 30
- Changing the number of augmentation dots per note ............. 30
- Changing the tempo without a metronome mark .................... 31

Using alternative flag styles ............................................. 66
Using grace note slashes with normal heads .......................... 67
Using ties with arpeggios ..................................................... 67

Expressive marks ................................................................. 69
  Adding beams slurs ties etc. when using tuplet and non-tuplet rhythms ............................................. 69
  Adding parentheses around an expressive mark or chordal note .............................................................. 69
  Adding timing marks to long glissandi .................................. 69
  Adjusting the shape of falls and doits .................................. 70
  Alternative breve notes ...................................................... 70
  Asymmetric slurs .............................................................. 71
  Breathing signs .................................................................. 71
  Broken Crescendo Hairpin .................................................. 72
  Caesura ("railtracks") with fermata ........................................ 73
  Center text below hairpin dynamics ...................................... 73
  Changing flageolet mark size ................................................. 75
  Changing text and spanner styles for text dynamics ................ 75
  Changing the appearance of a slur from solid to dotted or dashed ......................................................... 75
  Changing the breath mark symbol .......................................... 76
  Changing the number of augmentation dots per note ................ 76
  Combining dynamics with markup texts ................................. 77
  Contemporary glissando ........................................................ 77
  Controlling spanner visibility after a line break ...................... 77
  Controlling the vertical ordering of scripts ............................ 78
  Creating a delayed turn ......................................................... 78
  Creating arpeggios across notes in different voices ................ 79
  Creating cross-staff arpeggios in a piano staff ......................... 79
  Creating cross-staff arpeggios in other contexts ....................... 80
  Creating double-digit fingerings ........................................... 81
  Creating "real" parenthesized dynamics ................................... 81
  Creating simultaneous rehearsal marks ................................... 81
  Creating slurs across voices ................................................ 82
  Creating text spanners ........................................................ 83
  Double glissando ............................................................... 84
  Dynamics custom text spanner postfix ................................... 84
  Dynamics text spanner postfix .............................................. 85
  Glissandi can skip grobs ....................................................... 85
  Hairpins with different line styles ......................................... 86
  Hiding the extender line for text dynamics ............................ 86
  Horizontally aligning custom dynamics (e.g. "sempre pp" "piu f" "subito p") .......................... 86
  How to print two rehearsal marks above and below the same barline (method 1) .................. 90
  How to print two rehearsal marks above and below the same barline (method 2) .................. 91
  Inserting a caesura ............................................................ 92
  Laissez vibrer ties ............................................................ 92
  Line arrows ................................................................. 92
  Making slurs with complex dash structure ................................ 93
  Modifying default values for articulation shorthand notation ....................... 93
  Moving slur positions vertically ........................................... 94
  Moving the ends of hairpins ................................................. 95
  Positioning arpeggios ........................................................ 95
  Positioning text markups inside slurs ..................................... 95
  Printing hairpins in various styles ....................................... 96
  Printing hairpins using al niente notation ............................... 96
  Printing metronome and rehearsal marks below the staff .................. 97
Setting hairpin behavior at bar lines ........................................... 97
Setting the minimum length of hairpins ...................................... 97
Showing the same articulation above and below a note or chord ..... 98
Snap-pizzicato or Bartok pizzicato .............................................. 98
Using a tick as the breath mark symbol ........................................ 99
Using arpeggioBracket to make divisi more visible ......................... 99
Using double slurs for legato chords ............................................. 100
Using the whiteout property ..................................................... 100
Vertical line as a baroque articulation mark .................................. 101
Vertically aligning dynamics across multiple notes ......................... 101

Repeats ......................................................................................... 102
Adding volta brackets to additional staves .................................... 102
Centered measure numbers ....................................................... 102
Changing the default bar lines .................................................... 103
Cross-staff tremolos ................................................................. 104
Engraving tremolos with floating beams ....................................... 104
Isolated percent repeats ......................................................... 105
Measure counter ........................................................................... 105
Numbering groups of measures .................................................. 106
Percent repeat count visibility ................................................... 107
Percent repeat counter ............................................................... 107
Positioning segno and coda (with line break) ............................... 108
Setting the double repeat default for volte .................................... 110
Shortening volta brackets .......................................................... 110
Volta below chords ...................................................................... 111
Volta multi staff .......................................................................... 111
Volta text markup using repeatCommands .................................... 112

Simultaneous notes .......................................................................... 114
Additional voices to avoid collisions ............................................. 114
Changing a single note’s size in a chord ........................................ 114
Changing partcombine texts ....................................................... 115
Clusters ....................................................................................... 115
Combining two parts on the same staff ......................................... 116
Displaying complex chords ........................................................ 117
Double glissando ........................................................................... 117
Forcing horizontal shift of notes ................................................... 118
Making an object invisible with the 'transparent property .............. 118
Moving dotted notes in polyphony ............................................... 119
Suppressing warnings for clashing note columns ......................... 119
Two \partcombine pairs on one staff ............................................. 120

Staff notation .................................................................................. 122
Adding ambitus per voice ............................................................ 122
Adding an extra staff at a line break ............................................. 122
Adding an extra staff .................................................................... 123
Adding indicators to staves which get split after a break ............... 124
Adding orchestral cues to a vocal score ......................................... 128
Adding timing marks to long glissandi .......................................... 130
Alternative bar numbering .......................................................... 130
Centered measure numbers ........................................................ 131
Changing the default bar lines ..................................................... 132
Changing the number of lines in a staff .................................................. 133
Changing the staff size ............................................................................. 134
Creating blank staves .............................................................................. 134
Creating custom key signatures ............................................................... 136
Creating double-digit fingerings ............................................................. 136
Cross staff stems ...................................................................................... 137
Display bracket with only one staff in a system ....................................... 137
Extending a TrillSpanner .......................................................................... 138
Extending glissandi across repeats .......................................................... 139
Flat Ties .................................................................................................... 140
Forcing measure width to adapt to MetronomeMark's width ................. 142
Glissandi can skip grobs .......................................................................... 143
How to print two rehearsal marks above and below the same barline (method 1) 143
How to print two rehearsal marks above and below the same barline (method 2) 144
Incipit ....................................................................................................... 145
Inserting score fragments above a staff as markups ............................... 149
Let TabStaff print the topmost string at bottom .................................... 150
Letter tablature formatting ................................................................... 151
Making glissandi breakable ..................................................................... 151
Making some staff lines thicker than the others ..................................... 152
Measure counter ..................................................................................... 152
Mensurstriche layout (bar lines between the staves) ............................... 153
Modifying the Ottava spanner slope ...................................................... 153
Nesting staves ......................................................................................... 154
Non-traditional key signatures ............................................................... 155
Numbering groups of measures ............................................................. 155
Orchestra choir and piano template ........................................................ 157
Putting lyrics inside the staff ................................................................. 160
Quoting another voice with transposition ............................................. 161
Quoting another voice ........................................................................... 161
Removing brace on first line of piano score ....................................... 162
Removing the first empty line ............................................................... 163
Setting system separators ..................................................................... 164
Tick bar lines .......................................................................................... 167
Time signature in parentheses - method 3 .............................................. 167
Time signature in parentheses .............................................................. 167
Tweaking clef properties ....................................................................... 167
Two \partcombine pairs on one staff ..................................................... 169
Use square bracket at the start of a staff group .................................... 171
Using autochange with more than one voice ....................................... 171
Using marklines in a Frenched score ..................................................... 172
Vertical aligned StaffGroups without connecting SystemStartBar .......... 175
Volta below chords ............................................................................... 183
Volta multi staff ..................................................................................... 184

Editorial annotations .............................................................................. 185
Adding fingerings to a score ................................................................. 185
Adding links to objects .......................................................................... 185
Adding markups in a tablature .............................................................. 186
Allowing fingerings to be printed inside the staff .................................. 187
Alternative bar numbering ..................................................................... 187
Analysis brackets above the staff .......................................................... 188
Analysis brackets with labels ............................................................... 189

### Chords

- Adding a figured bass above or below the notes ..................................................... 279
- Adding bar lines to ChordNames context ..................................................................... 279
- Avoiding collisions with chord fingerings .................................................................... 280
- Bar chords notation for Guitar (with Text Spanner) ..................................................... 280
- Changing chord separator ............................................................................................. 281
- Changing the chord names to German or semi-German notation ................................. 282
- Changing the positions of figured bass alterations ....................................................... 283
- Chord name exceptions ................................................................................................ 283
- Chord name major7 ....................................................................................................... 284
- Clusters ........................................................................................................................ 284
- Controlling the placement of chord fingerings .............................................................. 284
- Cross-staff chords - beaming problems workaround .................................................... 285
- Displaying complex chords .......................................................................................... 286
- Manually break figured bass extenders for only some numbers ..................................... 286
- Showing chords at changes .......................................................................................... 287
- Simple lead sheet .......................................................................................................... 287
- Single staff template with notes lyrics and chords ....................................................... 287
- Single staff template with notes lyrics chords and frets ............................................... 288
- Single staff template with notes and chords .................................................................. 289
- Vertically centering paired figured bass extenders ...................................................... 290
- Volta below chords ........................................................................................................ 290

### Keyboards

- Accordion-discant symbols .......................................................................................... 292
- Accordion register symbols ........................................................................................ 295
- Changing the text for sustain markings ........................................................................ 296
- Clusters ........................................................................................................................ 296
- Controlling the placement of chord fingerings .............................................................. 296
- Creating slurs across voices .......................................................................................... 297
- Cross-staff chords - beaming problems workaround .................................................... 297
- Cross-staff tremolos ...................................................................................................... 298
- Fine-tuning pedal brackets ............................................................................................ 299
- Indicating cross-staff chords with arpeggio bracket ...................................................... 300
- Jazz combo template ..................................................................................................... 301
- Laissez vibrer ties ........................................................................................................ 307
- Piano template (simple) ............................................................................................... 308
- Piano template with centered lyrics ............................................................................. 308
- Piano template with melody and lyrics ......................................................................... 309
- Removing brace on first line of piano score .................................................................. 310
- Using autochange with more than one voice .............................................................. 311
- Vocal ensemble template with automatic piano reduction .......................................... 312

### Percussion

- Adding drum parts ........................................................................................................... 315
- Heavily customized polyphonic time signatures .......................................................... 316
- Jazz combo template ..................................................................................................... 317
- Percussion beaters ......................................................................................................... 323
- Printing music with different time signatures .............................................................. 326
Fretted strings .......................................................... 330

Adding fingerings to a score ........................................... 330

Pitches

Section “Pitches” in Notation Reference

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

\new Staff <<
\new Voice \with { 
\consists "Ambitus_engraver"
} \relative c'' { 
\override Ambitus.X-offset = #2.0 
\voiceOne 
c4 a d e 
f1 
}
\new Voice \with { 
\consists "Ambitus_engraver"
} \relative c' { 
\voiceTwo 
es4 f g as 
b1 
}
>>

Adding an ottava marking to a single voice

If you have more than one voice on the staff, setting octavation in one voice will transpose the position of notes in all voices for the duration of the ottava bracket. If the ottavation is only intended to apply to one voice, the middleCPosition and ottava bracket may be set explicitly. In this snippet, the bass clef usually has middleCPosition set to 6, six positions above the center line, so in the 8va portion middleCPosition is 7 positions (one octave) higher still.

{ 
clef bass 
<< { <g d'>1~ q2 <c' e'> } 
\ 
{ 
r2. 
\set Staff.ottavation = #'8vb" 
\once \override Staff.OttavaBracket.direction = #DOWN 
\set Voice.middleCPosition = #(+ 6 7) 
<b,,, b,,,>4 ~ | 
q2 
\unset Staff.ottavation 
\unset Voice.middleCPosition 
<c e>2 
}
Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the `details` of the `Stem`. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

\relative c' {  
  \override Stem.details.beamed-lengths = #'(2)  
a₈[ a] a₁₆[ a] a₃₂[ a]  
  \override Stem.details.beamed-lengths = #'(8 10 12)  
a₈[ a] a₁₆[ a] a₃₂[ a] r₈  
  \override Stem.details.beamed-lengths = #'(8)  
a₈[ a]  
  \override Stem.details.beamed-lengths = #'(8.5)  
a₈[ a]  
  \revert Stem.details  
a₈[ a] a₁₆[ a] a₃₂[ a] r₁₆  
}

Ambitus with multiple voices

Adding the `Ambitus_engraver` to the `Staff` context creates a single ambitus per staff, even in the case of staves with multiple voices.

\new Staff \with {  
  \consists "Ambitus_engraver"  
}  
<<  
\new Voice \relative c' {  
  \voiceOne  
  c₄ a d e  
  f₁  
  \new Voice \relative c' {
Ambitus

Ambitus indicate pitch ranges for voices. Accidentals only show up if they are not part of the key signature. `AmbitusNoteHead` grobs also have ledger lines.

Applying note head styles depending on the step of the scale

The `shapeNoteStyles` property can be used to define various note head styles for each step of the scale (as set by the key signature or the `tonic` property). This property requires a set of symbols, which can be purely arbitrary (geometrical expressions such as `triangle`, `cross`, and
xcircle are allowed) or based on old American engraving tradition (some latin note names are also allowed).

That said, to imitate old American song books, there are several predefined note head styles available through shortcut commands such as \aikenHeads or \sacredHarpHeads.

This example shows different ways to obtain shape note heads, and demonstrates the ability to transpose a melody without losing the correspondence between harmonic functions and note head styles.

\fragment = {
\key c \major
  c2 d
e2 f
g2 a
b2 c
}

\new Staff {
  \transpose c d
  \relative c' {
    \set shapeNoteStyles = ##(do re mi fa
    #f la ti)
    \fragment
  }
  \break
  \relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f
    mensural xcircle diamond)
    \fragment
  }
}

\begin{music}
\new Staff {
  \relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f
    mensural xcircle diamond)
    \fragment
  }
}
\end{music}

\begin{music}
\new Staff {
  \relative c'' {
    \time 3/4
    a8 b g f b g |
    c b d c b c |
  }
}
\end{music}

Automatically changing the stem direction of the middle note based on the melody

LilyPond can alter the stem direction of the middle note on a staff so that it follows the melody, by adding the Melody_engraver to the Voice context and overriding the neutral-direction of Stem.

\relative c'' {
  \time 3/4
  a8 b g f b g |
  c b d c b c |
}
Changing ottava text

Internally, \ottava sets the properties ottavation (for example, to 8va or 8vb) and middleCPosition. To override the text of the bracket, set ottavation after invoking \ottava.

Short text is especially useful when a brief ottava is used.

\{
\c'2 \\
\ottava #1 \\
\set Staff.ottavation = #'8'
\c''2
\ottava #0
\c'1
\ottava #1 \\
\set Staff.ottavation = #'Text'
\c''1
\}

Changing the ambitus gap

It is possible to change the default gap between the ambitus noteheads and the line joining them.

\layout { \\
\context { \\
\Voice \\
\consists "Ambitus_engraver"
\autoBeamOff \\
\override Stem.neutral-direction = #'() 
\}
\}

\new Staff { \\
\time 2/4
% Default setting \\
c'4 g''
\}
Changing the interval of lines on the stave

staffLineLayoutFunction is used to change the position of notes. This snippet shows setting its value to ly:pitch-semitones in order to produce a chromatic scale with the distance between each space and line of the stave equal to one semitone.

```
\new Staff { 
  \scale = \relative c' { 
    a4 ais b c 
    cis4 d dis e 
    f4 fis g gis 
    a1 
  } 
}
```

```
\new Staff { 
  \time 2/4 
  \override AmbitusLine.gap = #0 
  c'4 g'' 
}
```

```
\new Staff { 
  \time 2/4 
  \override AmbitusLine.gap = #1 
  c'4 g'' 
}
```

```
\new Staff { 
  \time 2/4 
  \override AmbitusLine.gap = #1.5 
  c'4 g'' 
}
```
(cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
(cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
(cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
(cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
(cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))

%(Compare pitch and alteration (not octave)).
#(define (pitch-equals? p1 p2)
  (and
   (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
   (= (ly:pitch-notename p1) (ly:pitch-notename p2))))

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch-equals?)))
    (if color
      (cdr color)))))

#(define (color-notehead grob)
  (pitch-to-color
   (ly:event-property (event-cause grob) 'pitch)))

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
c8 b d dis ees f g aes
  }
}

Creating a sequence of notes on various pitches

In music that contains many occurrences of the same sequence of notes at different pitches, the following music function may prove useful. It takes a note, of which only the pitch is used. This example creates the rhythm used throughout Mars, from Gustav Holst’s The Planets.

rhythm =
#(define-music-function (p) (ly:pitch?)
  "Make the rhythm in Mars (the Planets) at the given pitch"
  #\{ \tuplet 3/2 { $p 8 8 8 } 4 4 8 8 4 #\})

\new Staff {
  \time 5/4
  \rhythm c'
  \rhythm c''
  \rhythm g
}

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```lilypond
\new Staff \with {
    \override StaffSymbol.line-count = #8
    \override KeySignature.flat-positions = #'((-7 . 6))
    \override KeyCancellation.flat-positions = #'((-7 . 6))
    \override KeySignature.sharp-positions = #'((-6 . 7))
    \override KeyCancellation.sharp-positions = #'((-6 . 7))

    \override Clef.stencil = #
    (lambda (grob)(grob-interpret-markup grob
        #{ \markup\combine
        \musicglyph "clefs.C"
        \translate #'(-3 . -2)
        \musicglyph "clefs.F"
        #}))
    clefPosition = #3
    middleCPosition = #3
    middleCClefPosition = #3
}

{\key d\minor
    f bes, f bes,
}
```

Forcing a clef symbol to be displayed

When a clef sign has already been displayed and it has not been changed to a different clef, then repeating the `\clef` command will be ignored by LilyPond, since it is not a change of clef. It is possible to force the clef to be redisplayed using the command `\set Staff.forceClef = ##t`.

```lilypond
\relative c' {
    \clef treble
    c1
    \clef treble
    c1
    \set Staff.forceClef = ##t
    c1
    \clef treble
    c1
}
```
Generating random notes

This Scheme-based snippet generates 24 random notes (or as many as required), based on the current time (or any randomish number specified instead, in order to obtain the same random notes each time): i.e., to get different random note patterns, just change this number.

\score {
  {
    $(let ((random-state (seed->random-state (current-time)))))
      (make-sequential-music
        (map (lambda (x)
          (let ((idx (random 12 random-state)))
            (make-event-chord
              (list
                (make-music 'NoteEvent
                  'duration (ly:make-duration 2 0 1/1)
                  'pitch (ly:make-pitch
                    (quotient idx 7)
                    (remainder idx 7)
                    0))))))
        (make-list 24))))
  }
}

Hiding accidentals on tied notes at the start of a new system

This shows how to hide accidentals on tied notes at the start of a new system.

\relative c'! {\
  \override Accidental.hide-tied-accidental-after-break = ##t\ncis1~ cis~\n  \break\ncis\n}

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with full-size-change.

\relative c' {
  \clef "treble"\nc1}
Makam example

Makam is a type of melody from Turkey using 1/9th-tone microtonal alterations. Consult the initialization file ‘ly/makam.ly’ for details of pitch names and alterations.

% Initialize makam settings
\include "makam.ly"

\relative c' {
   \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
c4 cc db fk
   gbm4 gfc gfb efk
   fk4 db cc c
}

Modifying the Ottava spanner slope

It is possible to change the slope of the Ottava spanner.

\relative c'' {
   \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
   \override Staff.OttavaBracket.bound-details = #`((left . ((Y . 0) ; Change the integer here
      (attach-dir . ,LEFT)
      (padding . 0)
      (stencil-align-dir-y . ,CENTER)))
      (right . ((Y . 5); Change the integer here
      (padding . 0)
      (attach-dir . ,RIGHT)
Non-traditional key signatures

The commonly used `\key` command sets the `keyAlterations` property in the `Staff` context. To create non-standard key signatures, set this property directly.

The format of this command is a list:

```
\set Staff.keyAlterations = #`(((octave . step) . alter) ((octave . step) . alter) ...)
```

where, for each element in the list `octave` specifies the octave (0 being the octave from middle c to the b above), `step` specifies the note within the octave (0 means c and 6 means b), and `alter` is `SHARP`, `FLAT`, `DOUBLE-SHARP` etc.

Alternatively, using the more concise format for each item in the list, `(step . alter)` specifies the same alteration holds in all octaves. For microtonal scales where a “sharp” is not 100 cents, `alter` refers to the proportion of a 200-cent whole tone.

```
\include "arabic.ly"
\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT) (1 . ,SEMI-FLAT) (2 . ,FLAT) (5 . ,FLAT) (6 . ,SEMI-FLAT))
}
```

```
%\set Staff.extraNatural = ##f
re reb \dwn reb resd
dod dob dosd \dwn dob |
dobsb dodsd do do |
```

Numbers as easy note heads

Easy notation note heads use the `note-names` property of the `NoteHead` object to determine what appears inside the note head. By overriding this property, it is possible to print numbers representing the scale-degree.
A simple engraver can be created to do this for every note head object it sees.

```scheme
#(define Ez_numbers_engraver
 (make-engraver
  (acknowledgers
   ((note-head-interface engraver grob source-engraver)
    (let* ((context (ly:translator-context engraver))
           (tonic-pitch (ly:context-property context 'tonic))
           (tonic-name (ly:pitch-notename tonic-pitch))
           (grob-pitch
            (ly:event-property (event-cause grob) 'pitch))
           (grob-name (ly:pitch-notename grob-pitch))
           (delta (modulo (- grob-name tonic-name) 7))
           (note-names
            (make-vector 7 (number->string (1+ delta))))))
     (ly:grob-set-property! grob 'note-names note-names)))))

#(set-global-staff-size 26)

\layout {
  ragged-right = ##t
\context {
  \Voice
    \consists \Ez_numbers_engraver
}
}

**Ottava text**

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

```latex
{  
\ottava #1  
\set Staff.ottavation = #'8
\c''1  
\ottava #0  
\c'1  
\ottava #1  
\set Staff.ottavation = #'Text
\c''1
}
```

\[\text{Text} \quad 8\cdot1\]
Preventing extra naturals from being automatically added

In accordance with traditional typesetting rules, a natural sign is printed before a sharp or flat if a previous double sharp or flat on the same note is canceled. To change this behavior to contemporary practice, set the `extraNatural` property to `f` in the `Staff` context.

```
relative c' {
    asses4 aes ais a
    \set Staff.extraNatural = ##f
    asses4 aes ais a
}
```

Preventing natural signs from being printed when the key signature changes

When the key signature changes, natural signs are automatically printed to cancel any accidentals from previous key signatures. This may be prevented by setting to `f` the `printKeyCancellation` property in the `Staff` context.

```
relative c' {
    \key d \major
    a4 b cis d
    \key g \minor
    a4 bes c d
    \set Staff.printKeyCancellation = ##f
    \key d \major
    a4 b cis d
    \key g \minor
    a4 bes c d
}
```

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using \transpose. In this case, all the pitches (including the quoted ones) are transposed.

```
\addQuote clarinet {
    \transpose bes
    \repeat unfold 8 { d'16 d' d'8 }
}
```

```
\addQuote sax {
    \transpose es'
    \repeat unfold 16 { a8 }
}
```
Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the 'break-align-orders' property of the BreakAlignment grob.

The value of 'break-align-orders' is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving key-cancellation before staff-bar; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

\new Staff {
  \override Score.BreakAlignment.break-align-orders =
    ##((left-edge ambitus breathing-sign clef staff-bar
          key-cancellation key-signature time-signature custos)

          (left-edge ambitus breathing-sign clef key-cancellation
           staff-bar key-signature time-signature custos)

          (left-edge ambitus breathing-sign clef key-cancellation
           key-signature staff-bar time-signature custos))

  \key des \major
c'1
  \bar "||"
  \key bes \major
c'1
}
Transposing pitches with minimum accidentals ("Smart" transpose)

This example uses some Scheme code to enforce enharmonic modifications for notes in order to have the minimum number of accidentals. In this case, the following rules apply:

  Double accidentals should be removed
  B sharp -> C
  E sharp -> F
  C flat -> B
  F flat -> E

In this manner, the most natural enharmonic notes are chosen.

```scheme
(define (naturalize-pitch p)
  (let ((o (ly:pitch-octave p))
        (a (* 4 (ly:pitch-alteration p)))
        (n (ly:pitch-notename p)))
    (cond ((and (> a 1) (or (eqv? n 6) (eqv? n 2)))
           (set! a (- a 2))
           (set! n (+ n 1)))
          ((and (< a -1) (or (eqv? n 0) (eqv? n 3)))
           (set! a (+ a 2))
           (set! n (- n 1)))
          (cond ((> a 2) (set! a (- a 4)) (set! n (+ n 1)))
                ((< a -2) (set! a (+ a 4)) (set! n (- n 1)))
                (if (< n 0) (begin (set! o (- o 1)) (set! n (+ n 7)))
                 (if (> n 6) (begin (set! o (+ o 1)) (set! n (- n 7)))
                  (ly:make-pitch o n (/ a 4))))
    (ly:make-pitch o n (/ a 4)))

(define (naturalize music)
  (let ((es (ly:music-property music 'elements))
        (e (ly:music-property music 'element))
        (p (ly:music-property music 'pitch)))
    (if (pair? es)
        (ly:music-set-property! music 'elements
dl (map naturalize es)))
    (if (ly:music? e)
        (ly:music-set-property! music 'element
                               (naturalize e)))
    (if (ly:pitch? p)
        (begin
          (set! p (naturalize-pitch p))
          (ly:music-set-property! music 'pitch p)))
  music))

naturalizeMusic =
(define-music-function (m)
  (ly:music?))
Tweaking clef properties

Changing the Clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines middleCClefPosition must also be specified, with positive or negative values moving middle C up or down respectively, relative to the staff’s center line.

For example, \clef "treble-8" is equivalent to setting the clefGlyph, clefPosition (the vertical position of the clef itself on the staff), middleCPosition and clefTransposition. Note that when any of these properties (except middleCPosition) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

\{ % The default treble clef
\key f \major
c'1
% The standard bass clef
\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
\set Staff.middleCPosition = #6
\set Staff.middleCClefPosition = #6
\key g \major
c'1
% The baritone clef
\set Staff.clefGlyph = #"clefs.C"
\set Staff.clefPosition = #4
\set Staff.middleCPosition = #4
\set Staff.middleCClefPosition = #4
\key f \major
c'1
% The standard choral tenor clef
\set Staff.clefGlyph = #"clefs.G"

Rhythms

Section “Rhythms” in Notation Reference

Adding beams slurs ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved. For example, when entering a manual beam, the left square bracket has to be placed after the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section. This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

\begin{verbatim}
{ r16[ g16 \tuplet 3/2 { r16 e'8 ] }
g16( a \tuplet 3/2 { b d e'} )
g8{( a \tuplet 3/2 { b d' } e' } ~ }\time 2/4\tuplet 5/4 { e'32\( a b d' e' } a'4.\})
\end{verbatim}

Adding drum parts

Using the powerful pre-configured tools such as the \drummode function and the DrumStaff context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

drh = \drummode {
cymc4."crash" hhc16"h.h." hh hh hh hh
hho hh16 hh
hhc4 r4 r2
}
drl = \drummode {
bd4 sn8 bd bd4 << bd ss >>
bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
timh4 ssh timl8 ssh r timh r4
ssh8 timl r4 cb8 cb
}

\score {
<<
\new DrumStaff \with {
instrumentName = "timbales"
drumStyleTable = #timbales-style
}
Adjusting grace note spacing

The space given to grace notes can be adjusted using the `spacing-increment` property of `Score.GraceSpacing`.

```
graceNotes = {
  \grace { c4 c8 c16 c32 }
  c8
}
```

```
\relative c'' {
  c8
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}
```

Aligning bar numbers

Bar numbers by default are right-aligned to their parent object. This is usually the left edge of a line or, if numbers are printed within a line, the left hand side of a bar line. The numbers may also be positioned directly over the bar line or left-aligned to the bar line.

```
\relative c' { 
```

Alternative breve notes

Breve notes are also available with two vertical lines on each side of the notehead instead of one line and in baroque style.

\relative c'' {  
\time 4/2  
c\breve |  
\override Staff.NoteHead.style = #'altdefault  
b\breve  
\override Staff.NoteHead.style = #'baroque  
b\breve  
\revert Staff.NoteHead.style  
a\breve}

Automatic beam subdivisions

Beams can be subdivided automatically. By setting the property `subdivideBeams`, beams are subdivided at beat positions (as specified in `baseMoment`).

\new Staff {  
\relative c'' {  
<<  
{  
\voiceOne  
\set subdivideBeams = ##t  
b32[ a g f c' b a g  
b32"subdivide beams" a g f c' b a g]  
}
\new Voice {
  \voiceTwo
  b32 \"default\"[ a g f c' b a g \\
  b32 a g f c' b a g]
}

\oneVoice
\set baseMoment = #(ly:make-moment 1/8)
\set beatStructure = 2,2,2,2
b32 \"baseMoment 1 8\"[ a g f c' b a g]
\set baseMoment = #(ly:make-moment 1/16)
\set beatStructure = 4,4,4,4
b32 \"baseMoment 1 16\"[ a g f c' b a g]

Automatically change durations

\shiftDurations can be used to change the note lengths of a piece of music. It takes two arguments - the scaling factor as a power of two, and the number of dots to be added as a positive integer.

\paper { indent = 0 }

music = \relative c'' { a1 b2 c4 d8 r }

\score {
  \new Voice {
    \time 4/2
    \music
    \time 4/4
    \shiftDurations #1 #0 { \music }
    \time 2/4
    \shiftDurations #2 #0 { \music }
    \time 4/1
    \shiftDurations #-1 #0 { \music }
    \time 8/1
    \shiftDurations #-2 #0 { \music }
    \time 6/2
    \shiftDurations #0 #1 { \music }
    \time 7/2
    \shiftDurations #0 #2 { \music }
  }
}
Avoiding collisions with chord fingerings

Fingerings and string numbers applied to individual notes will automatically avoid beams and stems, but this is not true by default for fingerings and string numbers applied to the individual notes of chords. The following example shows how this default behavior can be overridden.

```
\relative c' {
    \set fingeringOrientations = #'(up)
    \set stringNumberOrientations = #'(up)
    \set strokeFingerOrientations = #'(up)

    % Default behavior
    r8
    <f c'-5>8
    <f c'\5>8
    <f c'\-\rightHandFinger #2 >8

    % No tweak needed
    r8
    <f c'-5>8
    <f c'\5>8
    % Corrected to avoid collisions
    \override StrokeFinger.add-stem-support = ##t
    <f c'\-\rightHandFinger #2 >8
}
```

Beam endings in Score context

Beam-ending rules specified in the Score context apply to all staves, but can be modified at both Staff and Voice levels:

```
\relative c'' {
    \time 5/4
    % Set default beaming for all staves
    \set Score.baseMoment = #(ly:make-moment 1/8)
    \set Score.beatStructure = 3,4,3
    <<
    \new Staff {
```
\new Staff {
% Modify beaming for just this staff
\set Staff.beatStructure = 6,4
  c8 c c c c c c c c c
}
\new Staff {
% Inherit beaming from Score context
<<
  { 
    \voiceOne
    c8 c c c c c c c c c
  }
% Modify beaming for this voice only
\new Voice {
  \voiceTwo
  \set Voice.beatStructure = 6,4
  a8 a a a a a a a a a
}
>>
} >>

Beams across line breaks

Line breaks are normally forbidden when beams cross bar lines. This behavior can be changed as shown:
\relative c'' { 
  \override Beam.breakable = ##t
  c8 c[ c] c[ c] c[ c] c[ \break
  c8] c[ c] c[ c] c[ c] c
}
Changing beam knee gap

Kneed beams are inserted automatically when a large gap is detected between the note heads. This behavior can be tuned through the \texttt{auto-knee-gap} property. A kneed beam is drawn if the gap is larger than the value of \texttt{auto-knee-gap} plus the width of the beam object (which depends on the duration of the notes and the slope of the beam). By default \texttt{auto-knee-gap} is set to 5.5 staff spaces.

\begin{verbatim}
\override Beam.auto-knee-gap = #6
\end{verbatim}

Changing form of multi-measure rests

If there are ten or fewer measures of rests, a series of longa and breve rests (called in German “Kirchenpausen” – church rests) is printed within the staff; otherwise a simple line is shown. This default number of ten may be changed by overriding the \texttt{expand-limit} property.

\begin{verbatim}
\relative c'' { 
  \compressMMRests { 
    R1*2 | R1*5 | R1*9 
    \override MultiMeasureRest.expand-limit = #3 
    R1*2 | R1*5 | R1*9 
  } 
}
\end{verbatim}

Changing the number of augmentation dots per note

The number of augmentation dots on a single note can be changed independently of the dots placed after the note.

\begin{verbatim}
\relative c' { 
  c4.. a16 r2 | 
  \override Dots.dot-count = #4 
  c4.. a16 r2 | 
  \override Dots.dot-count = #0 
  c4.. a16 r2 | 
  \revert Dots.dot-count 
  c4.. a16 r2 | 
}
\end{verbatim}
Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempoHideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout { }
  \midi { }
}
```

Changing the tuplet number

By default, only the numerator of the tuplet number is printed over the tuplet bracket, i.e., the numerator of the argument to the `\tuplet` command.

Alternatively, `num:den` of the tuplet number may be printed, or the tuplet number may be suppressed altogether.

```
\relative c'' {
  \tuplet 3/2 { c8 c c }
  \tuplet 3/2 { c8 c c }
  \override TupletNumber.text = #tuplet-number::calc-fraction-text
  \tuplet 3/2 { c8 c c }
  \omit TupletNumber
  \tuplet 3/2 { c8 c c }
}
```

Changing time signatures inside a polymetric section using `\scaleDurations`

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the
ly:make-moment callback. The second argument must be the same as the second argument of \scaleDurations.
\layout {

Compound time signatures

Odd 20th century time signatures (such as "5/8") can often be played as compound time signatures (e.g. "3/8 + 2/8"), which combine two or more unequal metrics.

LilyPond can make such music quite easy to read and play, by explicitly printing the compound time signatures and adapting the automatic beaming behavior.

Conducting signs measure grouping signs

Beat grouping within a measure is controlled by the context property \beatStructure. Values of \beatStructure are established for many time signatures in \texttt{scm/time-signature-settings.scm}. Values of \beatStructure can be changed or set with \texttt{\set}. Alternatively, \texttt{\time} can be used to both set the time signature and establish the beat structure. For this, you specify the internal grouping of beats in a measure as a list of numbers (in Scheme syntax) before the time signature.

\texttt{\time} applies to the \texttt{Timing} context, so it will not reset values of \texttt{\beatStructure} or \texttt{\baseMoment} that are set in other lower-level contexts, such as \texttt{Voice}.

If the \texttt{Measure\_grouping\_ engraver} is included in one of the display contexts, measure grouping signs will be created. Such signs ease reading rhythmically complex modern music. In the example, the 9/8 measure is grouped in two different patterns using the two different methods, while the 5/8 measure is grouped according to the default setting in \texttt{scm/time-signature-settings.scm}:
\time 4,5 \( 9/8 \\
g8 \: \text{g} \: \text{d} \: \text{d} \: \text{g} \: \text{g} \: \text{a( bes g)} \ |
\time 5/8
\text{a4. g4} |

**Consistently left aligned bar numbers**

When left aligning bar numbers, overlapping problems may occur with Staves brackets. The snippet solves this by keeping right aligned the first bar number following line breaks.

```latex
\consistentlyLeftAlignedBarNumbers = { 
  \override \Score.BarNumber.break-visibility = #end-of-line-invisible 
  \override \Score.BarNumber.self-alignment-X = 
    #(lambda (grob) 
      (let ((break-dir (ly:item-break-dir grob))) 
        (if (= break-dir RIGHT) RIGHT LEFT)))
}
```

Controlling tuplet bracket visibility

The default behavior of tuplet-bracket visibility is to print a bracket unless there is a beam of the same length as the tuplet. To control the visibility of tuplet brackets, set the property 'bracket-visibility to either #t (always print a bracket), #f (never print a bracket) or #'if-no-beam (only print a bracket if there is no beam).

```music
\relative c' {
  \tuplet 3/2 { c16[ d e } f8]
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}
```

```new Voice {
\relative c' {
  << \music s4"default" >>
  \override TupletBracket.bracket-visibility = #'if-no-beam
  << \music s4"if-no-beam" >>
  \override TupletBracket.bracket-visibility = ##t
  << \music s4"#t" >>
  \override TupletBracket.bracket-visibility = ##f
  << \music s4"#f" >>

  \new Voice {
    \relative c {
      \tuplet 3/2 { c16[ d e } f8]
      \tuplet 3/2 { c8 d e }
      \tuplet 3/2 { c4 d e }
    }
  }
}
```
Creating metronome marks in markup mode

New metronome marks can be created in markup mode, but they will not change the tempo in MIDI output.

Engraving ties manually

Ties may be engraved manually by changing the `tie-configuration` property of the `TieColumn` object. The first number indicates the distance from the center of the staff in half staff-spaces, and the second number indicates the direction (1 = up, -1 = down).
Engraving tremolos with floating beams

If a tremolo’s total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the `gap-count` property of the `Beam` object, and the size of the gaps between beams and stems is set with the `gap` property.

\relative c'' {
\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #1
\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #2
\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #3
\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #3
\override Beam.gap = #1.33
\repeat tremolo 8 { a32 f }
\override Beam.gap = #1
\repeat tremolo 8 { a32 f }
\override Beam.gap = #0.67
\repeat tremolo 8 { a32 f }
\override Beam.gap = #0.33
\repeat tremolo 8 { a32 f }
}

\time 2/4

\tuplet 3/2 4 \{ c8 '~' \tuplet 3/2 4 \{ ..." c c c c c }
}

Entering several tuplets using only one `\tuplet` command

The property `tupletSpannerDuration` sets how long each of the tuplets contained within the brackets after `\tuplet` should last. Many consecutive tuplets can then be placed within a single `\tuplet` expression, thus saving typing.

There are several ways to set `tupletSpannerDuration`. The command `\tupletSpan` sets it to a given duration, and clears it when instead of a duration `\default` is specified. Another way is to use an optional argument with `\tuplet`.

\relative c' {
\time 2/4
\tupletSpan 4
\tuplet 3/2 { c8~" \tupletSpan 4" c c c c c }

\tuplet 3/2 4 { c8~" \tuplet 3/2 4 \{ ..." c c c c c }
}
Flat flags and beam nibs

Flat flags on lone notes and beam nibs at the ends of beamed figures are both possible with a combination of \stemLeftBeamCount, \stemRightBeamCount and paired [] beam indicators.

For right-pointing flat flags on lone notes, use paired [] beam indicators and set \stemLeftBeamCount to zero (see Example 1).

For left-pointing flat flags, set \stemRightBeamCount instead (Example 2).

For right-pointing nibs at the end of a run of beamed notes, set \stemRightBeamCount to a positive value. And for left-pointing nibs at the start of a run of beamed notes, set \stemLeftBeamCount instead (Example 3).

Sometimes it may make sense for a lone note surrounded by rests to carry both a left- and right-pointing flat flag. Do this with paired [] beam indicators alone (Example 4).

(Note that \set \stemLeftBeamCount is always equivalent to \once \set. In other words, the beam count settings are not “sticky”, so the pair of flat flags attached to the lone 16[] in the last example have nothing to do with the \set two notes prior.)

Generating custom flags

The `stencil` property of the `Flag` grob can be set to a custom scheme function to generate the glyph for the flag.

```scheme
#(define-public (weight-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
         (log (- (ly:grob-property stem-grob 'duration-log) 2))
         (is-up? (eqv? (ly:grob-property stem-grob 'direction) UP))
         (yext (if is-up? (cons (* log -0.8) 0) (cons 0 (* log 0.8))))
         (flag-stencil (make-filled-box-stencil '(-0.4 . 0.4) yext))
         (stroke-style (ly:grob-property grob 'stroke-style))
         (stroke-stencil (if (equal? stroke-style "grace"
                       (make-line-stencil 0.2 -0.9 -0.4 0.9 -0.4)
                       empty-stencil)))
    (ly:stencil-add flag-stencil stroke-stencil)))

% Create a flag stencil by looking up the glyph from the font
#(define (inverted-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
         (dir (if (eqv? (ly:grob-property stem-grob 'direction) UP) "d" "u"))
         (flag (retrieve-glyph-flag "" dir "" grob))
         (line-thickness (ly:staff-symbol-line-thickness grob))
         (stem-thickness (ly:grob-property stem-grob 'thickness))
         (stem-width (* line-thickness stem-thickness))
         (stroke-style (ly:grob-property grob 'stroke-style))
         (stencil (if (null? stroke-style)
                    flag
                    (add-stroke-glyph flag stem-grob dir stroke-style "")))
    (rotated-flag (ly:stencil-rotate-absolute stencil 180 0 0)))
  (ly:stencil-translate rotated-flag (cons (- (/ stem-width 2)) 0)))

    c4. d4 c4. d4. c4 d c2 d4. e4- d4 \break
}

drum = \new DrumStaff \drummode {
    \bar ".|:" bd4.\markup { Drums } sn4 bd \bar ";" sn4.
    bd4 sn \bar ";:" bd sn bd4. sn4 bd \bar ":|." 
}

\new Staff \with {
    instrumentName = \markup { \concat { "B" \flat " Sop." } } 
}

{ 
    \melody 
    \drum 
}
Making an object invisible with the ’transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```
\relative {
  \time 2/4
  <<
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 \noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 \noBeam
  }\n  //
  { b8 g g e }
  >>
}
```

Making slurs with complex dash structure

Slurs can be made with complex dash patterns by defining the dash-definition property. dash-definition is a list of dash-elements. A dash-element is a list of parameters defining the dash behavior for a segment of the slur.

The slur is defined in terms of the bezier parameter t which ranges from 0 at the left end of the slur to 1 at the right end of the slur. dash-element is a list (start-t stop-t dash-fraction dash-period). The region of the slur from start-t to stop-t will have a fraction dash-fraction of each dash-period black. dash-period is defined in terms of staff spaces. dash-fraction is set to 1 for a solid slur.

```
\relative c' {
  \once \override
    Slur.dash-definition = #'((0 0.3 0.1 0.75)
                               (0.3 0.6 1 1)
                               (0.65 1.0 0.4 0.75))

  c4( d e f)
}
```
\once \override Slur.dash-definition = \#'(\(0 0.25 1 1\)
\(0.3 0.7 0.4 0.75\)
\(0.75 1.0 1 1\))

\relative c' {
\time 2/4
% from upper staff-line (position 2) to center (position 0)
\override Beam.positions = \#'(2 . 0)
c8 c
% from center to one above center (position 1)
\override Beam.positions = \#'(0 . 1)
c8 c
}

\relative c' {
\time 2/4
% from upper staff-line (position 2) to center (position 0)
\override Beam.positions = \#'(2 . 0)
c8 c
% from center to one above center (position 1)
\override Beam.positions = \#'(0 . 1)
c8 c
}

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the positions setting of the Beam grob.

\relative c' {
\time 2/4
% from upper staff-line (position 2) to center (position 0)
\override Beam.positions = \#'(2 . 0)
c8 c
% from center to one above center (position 1)
\override Beam.positions = \#'(0 . 1)
c8 c
}

Merging multi-measure rests in a polyphonic part

When using multi-measure rests in a polyphonic staff, the rests will be placed differently depending on the voice they belong to. However they can be printed on the same staff line, using the following setting.

normalPos = \revert MultiMeasureRest.direction

{
<<
{
c''1
R1
c''1
\normalPos
R1
}
\%
{
c'1
R1
c'1
\normalPos
}
Modifying tuplet bracket length

Tuplet brackets can be made to run to prefatory matter or the next note. Default tuplet brackets end at the right edge of the final note of the tuplet; full-length tuplet brackets extend farther to the right, either to cover all the non-rhythmic notation up to the following note, or to cover only the whitespace before the next item of notation, be that a clef, time signature, key signature, or another note. The example shows how to switch tuplets to full length mode and how to modify what material they cover.

\new RhythmicStaff { 
% Set tuplets to be extendable...
\set tupletFullLength = ##t
% ...to cover all items up to the next note
\set tupletFullLengthNote = ##t
\time 2/4
\tuplet 3/2 \{ c4 4 4 \} 
% ...or to cover just whitespace
\set tupletFullLengthNote = ##f
\time 4/4
\tuplet 5/4 \{ 4 1 \}
\time 3/4
2.
}

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be over-ridden by using the prefer-dotted-right property of NoteCollision.

\new Staff \relative c' { 
\override Staff.NoteCollision.prefer-dotted-right = ##f
f2. f4
\override Staff.NoteCollision.prefer-dotted-right = ##t
f2. f4
\}
\f 
\{ e4 e e e e e e e e e e e 
}
Multi-measure length control

Multi-measure rests have length according to their total duration which is under the control of \( \text{MultiMeasureRest.space-increment} \). Note the default value is 2.0.

\( \relative c' { \compressFullBarRests \R1*2 \R1*4 \R1*64 \R1*16 \override \Staff.MultiMeasureRest.space-increment = 2.5 \R1*2 \R1*4 \R1*64 \R1*16 } \)

Multi-measure rest markup

Markups attached to a multi-measure rest will be centered above or below it. Long markups attached to multi-measure rests do not cause the measure to expand. To expand a multi-measure rest to fit the markup, use an empty chord with an attached markup before the multi-measure rest.

Text attached to a spacer rest in this way is left-aligned to the position where the note would be placed in the measure, but if the measure length is determined by the length of the text, the text will appear to be centered.

\( \relative c' { \compressMMRests { \textLengthOn <> \markup { \text { [MAJOR GENERAL] } } \R1*19 <> \_markup { \text { italic { Cue: ... it is yours } } } <> \_markup { \text { A } } \R1*30^{\text{\markup { [MABEL] }}} \textLengthOff c4^\markup { CHORUS } d f c } } \}

\[ \text { [MAJOR GENERAL] 19 A 30 CHORUS} \]

Cue: ... it is yours
Non-default tuplet numbers

LilyPond also provides formatting functions to print tuplet numbers different than the actual fraction, as well as to append a note value to the tuplet number or tuplet fraction.

```lilypond
\relative c'' {
  \once \override TupletNumber.text = #(tuplet-number::non-default-tuplet-denominator-text 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text = #(tuplet-number::non-default-tuplet-fraction-text 12 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      (tuplet-number::non-default-tuplet-fraction-text 12 7) "8")
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      tuplet-number::calc-denominator-text "4")
  \tuplet 3/2 { c8 c8 c8 c8 c8 }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      tuplet-number::calc-fraction-text "4")
  \tuplet 3/2 { c8 c8 c8 c8 c8 }
  \once \override TupletNumber.text =
    #(tuplet-number::fraction-with-notes "4." "8")
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-fraction-with-notes 12 "8" 4 "4")
  \tuplet 3/2 { c4. c4. c4. c4. }
}
```

Partcombine and autoBeamOff

The function of `\autoBeamOff` when used with `\partcombine` can be difficult to understand.

It may be preferable to use

```lilypond
\set Staff.autoBeaming = ##f
```

instead, to ensure that autobeaming will be turned off for the entire staff.

`\partcombine` apparently works with 3 voices – stem up single, stem down single, stem up combined.

An `\autoBeamOff` call in the first argument to `\partcombine` will apply to the voice that is active at the time the call is processed, either stem up single or stem up combined. An `\autoBeamOff` call in the second argument will apply to the voice that is stem down single.

In order to use `\autoBeamOff` to stop all autobeaming when used with `\partcombine`, it will be necessary to use three calls to `\autoBeamOff`.

```lilypond
{%\set Staff.autoBeaming = ##f \%
```
Permitting line breaks within beamed tuplets

This artificial example shows how both manual and automatic line breaks may be permitted to within a beamed tuplet. Note that such off-beat tuplets have to be beamed manually.

\layout {  
\context {  
\Voice  
% Permit line breaks within tuplets  
\remove "Forbid_line_break_engraver"  
% Allow beams to be broken at line breaks  
\override Beam.breakable = ##t  
}  
\relative c'' {  
a8  
\repeat unfold 5 { \tuplet 3/2 { c[ b a] } }  
% Insert a manual line break within a tuplet  
\tuplet 3/2 { c[ b \bar "" \break a] }  
\repeat unfold 5 { \tuplet 3/2 { c[ b a] } }  
c8  
}
Positioning grace note beams at the height of normal note beams

When notes are placed on ledger lines, their beams are usually centred on the stave. Grace note beams are shorter and grace notes on ledger lines may well have beams outside the stave. You can override this beaming for grace notes.

\relative c {
  f8[ e]
  \grace {
    f8[ e]
    \override Stem.no-stem-extend = ##f
    f8[ e]
    \revert Stem.no-stem-extend
  }
  f8[ e]
}

Positioning grace notes with floating space

Setting the property 'strict-grace-spacing makes the musical columns for grace notes 'floating', i.e., decoupled from the non-grace notes: first the normal notes are spaced, then the (musical columns of the) graces are put left of the musical columns for the main notes.

\relative c'' {
  <<
    \override Score.SpacingSpanner.strict-grace-spacing = ##t
    \new Staff \new Voice {
      \afterGrace c4 { c16[ c8 c16] }
      c8[ \grace { b16 d } c8]
      c4 r
    }
    \new Staff {
      c16 c c c c c c c c4 r
    }
  >>
}

Positioning multi-measure rests

Unlike ordinary rests, there is no predefined command to change the staff position of a multi-measure rest symbol of either form by attaching it to a note. However, in polyphonic music
multi-measure rests in odd-numbered and even-numbered voices are vertically separated. The positioning of multi-measure rests can be controlled as follows:

\relative c'' { 
% Multi-measure rests by default are set under the fourth line
R1
% They can be moved using an override
\override MultiMeasureRest.staff-position = #-2
R1
\override MultiMeasureRest.staff-position = #0
R1
\override MultiMeasureRest.staff-position = #2
R1
\override MultiMeasureRest.staff-position = #3
R1
\override MultiMeasureRest.staff-position = #6
R1
\revert MultiMeasureRest.staff-position
\break

% In two Voices, odd-numbered voices are under the top line
<< { R1 } \ { a1 } >>
% Even-numbered voices are under the bottom line
<< { a1 } \ { R1 } >>
% Multi-measure rests in both voices remain separate
<< { R1 } \ { R1 } >>

% Separating multi-measure rests in more than two voices
% requires an override
<< { R1 } \ { R1 } \\ 
\once \override MultiMeasureRest.staff-position = #0
{ R1 }
>>

% Using compressed bars in multiple voices requires another override
% in all voices to avoid multiple instances being printed
\compressMMRests
<<
\revert MultiMeasureRest.direction
{ R1*3 }
\\ 
\revert MultiMeasureRest.direction
{ R1*3 }
>>
}

\relative c'' {
% Multi-measure rests by default are set under the fourth line
R1
% They can be moved using an override
\override MultiMeasureRest.staff-position = #-2

Printing bar numbers at regular intervals

Bar numbers can be printed at regular intervals by setting the property \text{barNumberVisibility}. Here the bar numbers are printed every two measures except at the end of the line.
Printing bar numbers inside boxes or circles

Bar numbers can also be printed inside boxes or circles.

\relative c' {
  % Prevent bar numbers at the end of a line and permit them elsewhere
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)
  \override Score.BarNumber.font-size = #2
  \% Draw a box round the following bar number(s)
  \override Score.BarNumber.stencil
    = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
  \repeat unfold 5 { c1 }
  \% Draw a circle round the following bar number(s)
  \override Score.BarNumber.stencil
    = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
  \repeat unfold 4 { c1 } \bar "|."}

Printing bar numbers with changing regular intervals

The bar number interval can be changed by changing the context function {set-bar-number-visibility}.\relative c' {
Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the direction property of MetronomeMark or RehearsalMark appropriately.

\layout {
  indent = 0
  ragged-right = ##f
}
%
Metronome marks below the staff
\override Score.MetronomeMark.direction = #DOWN
\tempo 8. = 120
c''1
%
Rehearsal marks below the staff
\override Score.RehearsalMark.direction = #DOWN
\mark \default
c''1

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized. The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the Default_barline_engraver and Timing_translator are moved from the Score context to the Staff context.

If bar numbers are required, the Bar_number_engraver should also be moved, since it relies on properties set by the Timing_translator; a \with block can be used to add bar numbers to the relevant staff.

\paper {
global = { \time 3/4 { s2.\*3 } \bar "" \break { s2.\*3 } }

\layout {
\context {  
\Score

\end{example}
Printing the bar number for the first measure

By default, the first bar number in a score is suppressed if it is less than or equal to ‘1’. By setting `barNumberVisibility` to `all-bar-numbers-visible`, any bar number can be printed for the first measure and all subsequent measures. Note that an empty bar line must be inserted before the first note for this to work.

```latex
\layout {
    indent = 0
    ragged-right = ##t
}

\relative c' {
    \set Score.barNumberVisibility = #all-bar-numbers-visible
    \bar ""
    c1 | d | e | f \break
    g1 | e | d | c
}
```

Redefining grace note global defaults

The global defaults for grace notes are stored in the identifiers `startGraceMusic`, `stopGraceMusic`, `startAppoggiaturaMusic` and `stopAppoggiaturaMusic`, which are defined in the file `ly/grace-init.ly`. By redefining them other effects may be obtained.

```latex
startAppoggiaturaMusic = {
    <>(
    \override Flag.stroke-style = #"grace"
    \slurDashed
    }
}

stopAppoggiaturaMusic = {
    \revert Flag.stroke-style
    \slurSolid
    <>)
}
Removing bar numbers from a score

Bar numbers can be removed entirely by removing the Bar_number_engraver from the Score context.

```
\layout {
  \context {
    \Score
    \omit BarNumber
    \%
    \%\remove "Bar_number_engraver"
  }
}
```

Removing connecting bar lines on StaffGroup PianoStaff or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves. This behaviour can be overridden on a staff-by-staff basis.

```
\relative c' {
  \new StaffGroup <<
    \new Staff {
      \once \override Staff.BarLine.allow-span-bar = ##f
      e1 | e
    }
    \new Staff {
      \once \override Staff.BarLine.allow-span-bar = ##f
      c1 | c | c
    }
}
```
Rest styles

Rests may be used in various styles.

\new Staff \relative c { 
  \omit Score.TimeSignature
  \cadenzaOn

  \override Staff.Rest.style = #'mensural
  r\maxima`\markup \typewriter { mensural }
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'neomensural
  r\maxima`\markup \typewriter { neomensural }
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'classical
  r\maxima`\markup \typewriter { classical }
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'z
  r\maxima`\markup \typewriter { z-style }
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'default
  r\maxima`\markup \typewriter { default }
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
}
Reverting default beam endings

To typeset beams grouped 3-4-3-2 in 12/8 it is necessary first to override the default beam endings in 12/8, and then to set up the new beaming endings:

```
\relative c'' {
\time 12/8

% Default beaming
a8 a a a a a a a a a

% Set new values for beam endings
\set Score.beatStructure = 3,4,3,2
a8 a a a a a a a a a
}
```

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians. The standard support for this using \repeat percent is unsuitable here since the first beat has to be an ordinary note or rest. This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the r4 in the definitions with a rest of the appropriate duration).

```
% Macro to print single slash
rs = {
  \once \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
  \once \override Rest.thickness = #0.48
```
% Function to print a specified number of slashes
comp = #(define-music-function (count) (integer?)
  #{
    \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
    \override Rest.thickness = #0.48
    \override Rest.slope = #1.7
    \repeat unfold $count { r4 }
    \revert Rest.stencil
  #}
)

\score {
  \relative c' {
    c4 d e f |
    \rs \rs \rs \rs |
    \comp #4 |
  }
}

Skips in lyric mode (2)

Although skips cannot be used in \lyricmode (it is taken to be a literal “s”, not a space),
double quotes (“”) or underscores (_) are available. So for example:
<<
  \relative c'' { a4 b c d }
  \new Lyrics \lyricmode { a4 "" _ gap }
>>

Skips in lyric mode

The s syntax for skips is only available in note mode and chord mode. In other situations, for
example, when entering lyrics, using the \skip command is recommended.
<<
  \relative c'' { a1 _ a }
  \new Lyrics \lyricmode { \skip 1 bla1 }
>>
Stemlets
In some notational conventions beams are allowed to extend over rests. Depending on preference, these beams may drop 'stemlets' to help the eye appreciate the rhythm better, and in some modern music the rest itself is omitted and only the stemlet remains.

This snippet shows a progression from traditional notation, to beams over the rest, to stemlets over the rest, to stemlets alone. Stemlets are generated by overriding the 'stemlet-length property of Stem, while rests are hidden by setting 'transparent = ##t.

Some \markup elements are included in the source to highlight the different notations.

\paper { ragged-right = ##f }

\{
  c'16[^\markup { traditional }\] d' r f'
  g'16[^\markup { beams over rests }\] f' r d']

  % N.B. use Score.Stem to set for the whole score.
  \override Staff.Stem.stemlet-length = #0.75

  c'16[^\markup { stemlets over rests }\] d' r f'
  g'16[^\markup { stemlets and no rests }\] f'
  \once \hide Rest
  r16 d']
\}

Strict beat beaming
Beamlets can be set to point in the direction of the beat to which they belong. The first beam avoids sticking out flags (the default); the second beam strictly follows the beat.

\relative c'' {
  \time 6/8
  a8. a16 a a
  \set strictBeatBeaming = ##t
  a8. a16 a a
}\}

Subdividing beams
The beams of consecutive 16th (or shorter) notes are, by default, not subdivided. That is, the three (or more) beams stretch unbroken over entire groups of notes. This behavior can be modified to subdivide the beams into sub-groups by setting the property subdivideBeams. When set, multiple beams will be subdivided at intervals defined by the current value of baseMoment
by reducing the multiple beams to the number of beams that indicates the metric value of the subdivision. If the group following the division is shorter than the current metric value (usually because the beam is incomplete) the number of beams reflects the longest possible subdivision group. However, if there is only one note left after the division this restriction isn’t applied. Note that \texttt{baseMoment} defaults to one over the denominator of the current time signature if not set explicitly. It must be set to a fraction giving the duration of the beam sub-group using the \texttt{ly:make-moment} function, as shown in this snippet. Also, when \texttt{baseMoment} is changed, \texttt{beatStructure} should also be changed to match the new \texttt{baseMoment}:

\begin{verbatim}
\relative c'' {
  c32[ c c c c c c c]
  \set subdivideBeams = \##t
  c32[ c c c c c c c]

  % Set beam sub-group length to an eighth note
  \set baseMoment = \#(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  c32[ c c c c c c c]

  % Set beam sub-group length to a sixteenth note
  \set baseMoment = \#(ly:make-moment 1/16)
  \set beatStructure = 4,4,4
  c32[ c c c c c c c]

  % Shorten beam by 1/32
  \set baseMoment = \#(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  c32[ c c c c c c c] r32

  % Shorten beam by 3/32
  \set baseMoment = \#(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  c32[ c c c c c c] r16.
}
\end{verbatim}

\textbf{Three-sided box}

This example shows how to add a markup command to get a three sided box around some text (or other markup).

% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";;" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
         (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
         (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
         (x-rule (make-filled-box-stencil

\textbf{Three-sided box}

This example shows how to add a markup command to get a three sided box around some text (or other markup).

% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";;" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."

(set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))

stencil))

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm

#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
   @code{box-padding} and @code{font-size} properties to determine line
   thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding)))
    (m (interpret-markup layout props arg)))
  (NWS-box-stencil m thickness pad)))

% Test it:

\relative c' {
  c1\markup { \NWS-box ABCD }
  c1\markup { \NWS-box \note "4" #1.0 }
}

\relative c' {
  \relative c'' {
    \override Staff.TimeSignature.stencil = #(lambda (grob)
      (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
    \time 2/4
    a4 b8 c
  }
}

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
  \time 2/4
  a4 b8 c
}

Time signature in parentheses

The time signature can be enclosed within parentheses.

\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
  \time 2/4
  a4 b8 c
}
Time signature printing only the numerator as a number (instead of the fraction)

Sometimes, a time signature should not print the whole fraction (e.g. 7/4), but only the numerator (7 in this case). This can be easily done by using \override Staff.TimeSignature.style = #'single-digit to change the style permanently. By using \revert Staff.TimeSignature.style, this setting can be reversed. To apply the single-digit style to only one time signature, use the \override command and prefix it with a \once.

\relative c'' { 
  \time 3/4 
  c4 c c 
  \override Staff.TimeSignature.style = #'single-digit 
  \time 2/4 
  c4 c 
  \time 3/4 
  c4 c c 
  \% Revert to default style: 
  \revert Staff.TimeSignature.style 
  \time 2/4 
  c4 c 
  \% single-digit style only for the next time signature 
  \once \override Staff.TimeSignature.style = #'single-digit 
  \time 5/4 
  c4 c c c c 
  \time 2/4 
  c4 c 
}

Tweaking grace layout within music

The layout of grace expressions can be changed throughout the music using the functions add-grace-property and remove-grace-property. The following example undefines the Stem direction for this grace, so that stems do not always point up, and changes the default note heads to crosses.

\relative c'' { 
  \new Staff { 
    $(\remove-grace-property 'Voice 'Stem 'direction) 
    $(\add-grace-property 'Voice 'NoteHead 'style 'cross) 
    \new Voice { 
      \acciaccatura { f16 } g4 
      \grace { d16 e } f4 
  } }
User defined time signatures

New time signature styles can be defined. The time signature in the second measure should be upside down in both staves.

```lilypond
#(add-simple-time-signature-style 'topsy-turvy
  (lambda (fraction)
    (make-rotate-markup 180 (make-compound-meter-markup fraction)))))
```

Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the stencil property of Flag. Valid values are `modern-straight-flag`, `old-straight-flag` and `flat-flag`.

```lilypond
testnotes = {
  \autoBeamOff
  c8 d16 c32 d64 \acciaccatura { c8 } d64 r4
}

\score {
  \relative c' {
    \time 2/4
    \testnotes
    \override Flag.stencil = #modern-straight-flag
  }
}
Using grace note slashes with normal heads

The slash through the stem found in acciaccaturas can be applied in other situations.
\relative c'' {
  \override Flag.stroke-style = \#"grace"
  c8( d2) e8( f4)
}

Using ties with arpeggios

Ties are sometimes used to write out arpeggios. In this case, two tied notes need not be consecutive. This can be achieved by setting the tieWaitForNote property to \#t. The same feature is also useful, for example, to tie a tremolo to a chord, but in principle, it can also be used for ordinary consecutive notes.
\relative c' {
  \set tieWaitForNote = \#t
  \grace { c16 [ ~ e ~ g ] ~ } <c, e g>2
  \repeat tremolo 8 { c32 ~ c' ~ } <c c,>1
  e8 ~ c ~ a ~ f ~ <e' c a f>2
  \tieUp
c8 ~ a
  \tieDown
  \tieDotted
g8 ~ c g2
}
Expressive marks

Section “Expressive marks” in Notation Reference

Adding beams slurs ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved. For example, when entering a manual beam, the left square bracket has to be placed after the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section. This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

\{ r16 \( g16 \) \tuplet 3/2 { r16 e'8 } \( g16( a \tuplet 3/2 \{ b d e'\} \) \( g8[( a \tuplet 3/2 \{ b d'\} e'][ \time 2/4 \tuplet 5/4 \{ e'32( a b d' e' \) a'4.\} \}

Adding parentheses around an expressive mark or chordal note

The \parenthesize function is a special tweak that encloses objects in parentheses. The associated grob is ParenthesesItem.

\relative c' { c2-\parenthesize \override ParenthesesItem.padding = #0.1 \override ParenthesesItem.font-size = #-4 <d \parenthesize f a>2 }

Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks, often consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly. glissandoSkipOn = {
\override NoteColumn.glissando-skip = ##t \hide NoteHead}
Adjusting the shape of falls and doits

The `shortest-duration-space` property may be tweaked to adjust the shape of falls and doits.

```latex
\relative c'' { 
  \override Score.SpacingSpanner.shortest-duration-space = #4.0
  c2-\bendAfter #5
  c2-\bendAfter #-4.75
  c2-\bendAfter #8.5
  c2-\bendAfter #-6
}
```

Alternative breve notes

Breve notes are also available with two vertical lines on each side of the notehead instead of one line and in baroque style.
Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

\relative c' \{ 
\stemDown 
\slurUp 
\slurNotes 
\once \override Slur.eccentricity = #3.0 
\slurNotes 
\}

Breathing signs

Breathing signs are available in different tastes: commas (default), ticks, vees and “railroad tracks” (caesura).

\new Staff \relative c' \{ 
\key es \major 
\time 3/4 
% this bar contains no \breathe 
<< \{ g4 as g } \{ es4 bes es \} >> | 
% Modern notation: 
% by default, \breathe uses the rcomma, just as if saying: 
% \override BreathingSign.text = #(make-musicglyph-markup "scripts.rcomma") 
<< \{ g4 as g } \{ es4 \breathe bes es \} >> | 

% rvarcomma and lvarcomma are variations of the default rcomma and lcomma 
% N.B.: must use Staff context here, since we start a Voice below 
\override Staff.BreathingSign.text = 
 \markup { \musicglyph "scripts.rvarcomma" } 
\}
Broken Crescendo Hairpin

In order to make parts of a crescendo hairpin invisible, the following method is used: A white rectangle is drawn on top of the respective part of the crescendo hairpin, making it invisible. The rectangle is defined as postscript code within a text markup.

The markup command \text{	exttt{with-dimensions}} tells LilyPond to consider only the bottom edge of the rectangle when spacing it against the hairpin. The property \text{	exttt{staff-padding}} prevents the rectangle from fitting between the hairpin and staff.

Make sure the hairpin is in a lower layer than the text markup to draw the rectangle over the hairpin.

\begin{verbatim}
\relative c' {
<<
  \dynamicUp
  r2 r16 c'8.pp r4
}
\end{verbatim}
Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

\relative c' {
  c2.
  \override BreathingSign.text = \markup {\once \override Voice.Hairpin.after-line-breaking = #(lambda (grob)
    (let* ((stencil (ly:hairpin::print grob))
      (par-y (ly:grob-parent grob Y))
      (dir (ly:grob-property par-y 'direction))
      (new-stencil (ly:stencil-aligned-to (ly:stencil-combine-at-edge (ly:stencil-aligned-to stencil X CENTER) Y dir))
    )
    \center-align \musicglyph "scripts.caesura.curved"
    \center-align \musicglyph "scripts.ufermata"
  )}
  \breathe c4
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."}

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

hairpinWithCenteredText =
#(define-music-function (text) (markup?)
#
}(\once \override Voice.Hairpin.after-line-breaking =

Changing \flageolet mark size

To make the \flageolet circle smaller use the following Scheme function.

```scheme
smallFlageolet =
  #(let ((m (make-articulation "flageolet")))
    (set! (ly:music-property m 'tweaks)
      (acons 'font-size -3
        (ly:music-property m 'tweaks)))
    m)
```

Changing text and spanner styles for text dynamics

The text used for crescendos and decrescendos can be changed by modifying the context properties crescendoText and decrescendoText.

The style of the spanner line can be changed by modifying the 'style property of DynamicTextSpanner. The default value is 'dashed-line, and other possible values include 'line, 'dotted-line and 'none.

```latex
\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  \(a2< a\)
  \(a2 a\)
  \(a2 a\) \(a\) \(a\) \(mf\)
}
```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```latex
\relative c' {
  \relative c' {
```

Changing \flageolet mark size

To make the \flageolet circle smaller use the following Scheme function.

```scheme
smallFlageolet =
  #(let ((m (make-articulation "flageolet")))
    (set! (ly:music-property m 'tweaks)
      (acons 'font-size -3
        (ly:music-property m 'tweaks)))
    m)
```

Changing text and spanner styles for text dynamics

The text used for crescendos and decrescendos can be changed by modifying the context properties crescendoText and decrescendoText.

The style of the spanner line can be changed by modifying the 'style property of DynamicTextSpanner. The default value is 'dashed-line, and other possible values include 'line, 'dotted-line and 'none.

```latex
\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  \(a2< a\)
  \(a2 a\)
  \(a2 a\) \(a\) \(a\) \(mf\)
}
```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```latex
\relative c' {
  \relative c' {
```
Changing the breath mark symbol

The glyph of the breath mark can be tuned by overriding the `text` property of the `BreathingSign` layout object with any markup text.

\relative c'' {  
c2  
\override BreathingSign.text =  
  \markup { \musicglyph "scripts.rvarcomma" }  
\breathe  
d2  
}

Changing the number of augmentation dots per note

The number of augmentation dots on a single note can be changed independently of the dots placed after the note.

\relative c' {  
c4.. a16 r2 |  
\override Dots.dot-count = #4  
c4.. a16 r2 |  
\override Dots.dot-count = #0  
c4.. a16 r2 |  
\revert Dots.dot-count  
c4.. a16 r2 |  
}
Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a \markup block.

\markup \italic pi` u \dynamic f

\layout { ragged-right = ##f }

\relative c'' {
  c\f c-\piuF
}

Contemporary glissando

A contemporary glissando without a final note can be typeset using a hidden note and cadenza timing.

\relative c'' {
  \time 3/4
  \override Glissando.style = #'zigzag
  c\4
  \cadenzaOn
c\4\glissando
  \hideNotes
c,\,4
  \unHideNotes
  \cadenzaOff
  \bar "|"
}

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the after-line-breaking callback ly:spanner::kill-zero-spanned-time.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

\paper { ragged-right = ##t }

\relative c'' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
Controlling the vertical ordering of scripts

The vertical ordering of scripts is controlled with the 'script-priority property. The lower this number, the closer it will be put to the note. In this example, the TextScript (the sharp symbol) first has the lowest priority, so it is put lowest in the first example. In the second, the prall trill (the Script) has the lowest, so it is on the inside. When two objects have the same priority, the order in which they are entered determines which one comes first.

\relative c''' {
  \once \override TextScript.script-priority = #-100
  a2\prall\markup { \sharp }
}

Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The outside-staff-priority property must be set to #f, as otherwise this would take precedence over the avoid-slur property. Changing the fractions 2/3 and 1/3 adjusts the horizontal position.

\relative c'' {
  c2*2/3 ( s2*1/3\turn d4) r
  <<
Creating arpeggios across notes in different voices

An arpeggio can be drawn across notes in different voices on the same staff if the `Span_arpeggio_engraver` is added to the `Staff` context:

```music
\new Staff \with {
  \consists "Span_arpeggio_engraver"
}
\relative c' {
  \set Staff.connectArpeggios = ##t
  \arpeggio <e' g> 4 \arpeggio <d f> \arpeggio <d f> 2
  \arpeggio <d, f> 2 \arpeggio <g b> 2
}
```

Creating cross-staff arpeggios in a piano staff

In a `PianoStaff`, it is possible to let an arpeggio cross between the staves by setting the property `PianoStaff.connectArpeggios`.

```music
\new PianoStaff \relative c'' <<
  \set PianoStaff.connectArpeggios = ##t
  \new Staff {
```

Creating cross-staff arpeggios in other contexts

Cross-staff arpeggios can be created in contexts other than GrandStaff, PianoStaff and StaffGroup if the Span_arpeggio_engraver is included in the Score context.

\score {
  \new ChoirStaff {
    \set Score.connectArpeggios = ##t
    <<
      \new Voice \relative c' {
        <c e>2\arpeggio
        <d f>2\arpeggio
        <c e>1\arpeggio
      }
      \new Voice \relative c {
        \clef bass
        <c g'>2\arpeggio
        <b g'>2\arpeggio
        <c g'>1\arpeggio
      }
    >>
  }
  \layout {
    \context {
      \Score
      \consists "Span_arpeggio_engraver"
    }
  }
}
Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a \markup block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the make-dynamic-script function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as \dynamicUp or \dynamicDown.

\relative c'' {
  \paren\f c c \dynamicUp c\paren\p
}

Creating simultaneous rehearsal marks

Unlike text scripts, rehearsal marks cannot be stacked at a particular point in a score: only one RehearsalMark object is created. Using an invisible measure and bar line, an extra rehearsal
mark can be added, giving the appearance of two marks in the same column. This method may also prove useful for placing rehearsal marks at both the end of one system and the start of the following system.

\begin{verbatim}
{  
key a \major  
\set Score.markFormatter = #format-mark-box-letters
\once \override Score.RehearsalMark.outside-staff.priority = #5000
\once \override Score.RehearsalMark.self-alignment-X = #LEFT
\once \override Score.RehearsalMark.break-align-symbols = #'(key-signature)
\mark \markup { \bold { Senza denti } } }

% the hidden measure and bar line
% \cadenzaOn turns off automatic calculation of bar numbers
\cadenzaOn
\once \override Score.RehearsalMark.self-alignment-X = #LEFT
\mark \markup { \box \bold Intro } 
\text
\cadenzaOff
\time 1/16
s16 \bar ""
\time 4/4
\once \override Score.RehearsalMark.self-alignment-X = #LEFT
\mark \markup { \box \bold Intro } 
d'1
\mark \default 
d'1
}

\begin{Verbatim}
\begin{music}
\relative c' {
<<
\{ 
 d16( a') s a s a[ s a] s a[ s a]
\} \\
\{ 
 \slurUp
bes,16[ s e]( \\
\hideNotes a)
\unHideNotes f[\hideNotes a]
\unHideNotes fis[\
\end{music}
\end{verbatim}

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using \hideNotes.

This example is measure 235 of the Ciaconna from Bach’s 2nd Partita for solo violin, BWV 1004.

\begin{verbatim}
\relative c' {
<<
\{ 
 d16( a') s a s a[ s a] s a[ s a]
\} \\
\{ 
 \slurUp
bes,16[ s e]( \\
\hideNotes a)
\unHideNotes f[\hideNotes a]
\unHideNotes fis[\
\end{verbatim}
Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }
\relative c'' {
    \override TextSpanner.bound-details.left.text = #'bla
    \override TextSpanner.bound-details.right.text = #'blu
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \override TextSpanner.style = #'line
    \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \override TextSpanner.style = #'dashed-line
    \override TextSpanner.bound-details.left.text = \markup { \draw-line #'(0 . 1) }
    \override TextSpanner.bound-details.right.text = \markup { \draw-line #'(0 . -2) }
    \once \override TextSpanner.bound-details.right.padding = #-2
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \set Staff.middleCPosition = #-13
    \override TextSpanner.dash-period = #10
    \override TextSpanner.dash-fraction = #0.5
    \override TextSpanner.thickness = #10
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan
```
Double glissando

To connect chords with glissando lines, attach a second glissando to a hidden voice.

\relative c { 
\clef bass
<<
  % new voice ( = \voiceOne), hidden
  \hideNotes
  % attach glissando to note heads
  e2\glissando g
} \\
{ 
  % original voice with chords rearranged so that
  % glissando is attached to a & c
  <e a,>2\glissando <g c,>
} >>
}

Dynamics custom text spanner postfix

Postfix functions for custom crescendo text spanners. The spanners should start on the first note of the measure. One has to use -\mycresc, otherwise the spanner start will rather be assigned to the next note.

% Two functions for (de)crescendo spanners where you can explicitly give the % spanner text.
\mycresc = 
#(define-music-function (mymarkup) (markup?) 
  (make-music 'CrescendoEvent 
    'span-direction START 
    'span-type 'text
    'span-text mymarkup))
\mydecresc = 
#(define-music-function (mymarkup) (markup?) 
  (make-music 'DecrescendoEvent 
    'span-direction START 
    'span-type 'text
    'span-text mymarkup))
Dynamics text spanner postfix

Custom text spanners can be defined and used with hairpin and text crescendos. \< and \> produce hairpins by default, \cresc etc. produce text spanners by default.

% Some sample text dynamic spanners, to be used as postfix operators
crpoco =
#(make-music 'CrescendoEvent
   'span-direction START
   'span-type 'text
   'span-text "cresc. poco a poco")

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.
Hairpins with different line styles

Hairpins can take any style from *line-interface* - dashed-line, dotted-line, line, trill or zigzag.

\relative c' {
    c\< c\!
    \override Hairpin.style = #'dashed-line

    c\< c\!
    \override Hairpin.style = #'trill
    c\< c\!
    \override Hairpin.style = #'zigzag
    c\< c\!
    \revert Hairpin.style
    c\< c\!
}
* Shift the dynamic script \once\override \ldots \X-offset = \ldots Drawback: \once\override is needed for every invocation!

* Set the dimensions of the additional text to 0 (using #:with-dimensions '(0 . 0) '(0 . 0)). Drawback: To LilyPond "sempre" has no extent, so it might put other stuff there and create collisions (which are not detected by the collision detection!). Also, there seems to be some spacing, so it's not exactly the same alignment as without the additional text.

* Add an explicit shifting directly inside the scheme function for the dynamic-script.

* Set an explicit alignment inside the dynamic-script. By default, this won't have any effect, only if one sets X-offset! Drawback: One needs to set DynamicText.X-offset, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of pp.

\paper {
  ragged-right = ##f
  indent = 2.5\text{cm}
}

% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown etc. will have no effect

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two ‘rehearsal marks’, one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate ‘break visibility’ as shown in snippet 1 will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

\relative c' { 
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5) 
  \once \override Score.RehearsalMark.baseline-skip = #9

  \once \override Score.RehearsalMark.baseline-skip = #9 
  \override Score.RehearsalMark.break-visibility = #begin-of-line-invisible
How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

  \override TextSpanner.bound-details.right.arrow = ##t
  \override TextSpanner.bound-details.left.text = #'fof
}
Making slurs with complex dash structure

Slurs can be made with complex dash patterns by defining the \texttt{dash-definition} property. \texttt{dash-definition} is a list of \texttt{dash-elements}. A \texttt{dash-element} is a list of parameters defining the dash behavior for a segment of the slur.

The slur is defined in terms of the bezier parameter $t$ which ranges from 0 at the left end of the slur to 1 at the right end of the slur. \texttt{dash-element} is a list \texttt{(start-t stop-t dash-fraction dash-period)}. The region of the slur from \texttt{start-t} to \texttt{stop-t} will have a fraction \texttt{dash-fraction} of each \texttt{dash-period} black. \texttt{dash-period} is defined in terms of staff spaces. \texttt{dash-fraction} is set to 1 for a solid slur.

```
\relative c' {
\once \override Slur.dash-definition = #'((0 0.3 0.1 0.75)
          (0.3 0.6 1 1)
          (0.65 1.0 0.4 0.75))
\once \override Slur.dash-definition = #'((0 0.25 1 1)
          (0.3 0.7 0.4 0.75)
          (0.75 1.0 1 1))
\once \once \once \once \once \once \once \once
\once \once \once \once \once \once \once \once
\once \once \once \once \once \once \once \once
```

Modifying default values for articulation shorthand notation

The shorthands are defined in \texttt{'ly/script-init.ly}, where the variables \texttt{dashHat}, \texttt{dashPlus}, \texttt{dashDash}, \texttt{dashBar}, \texttt{dashLarger}, \texttt{dashDot}, and \texttt{dashUnderscore} are assigned default values. The default values for the shorthands can be modified. For example, to associate the \texttt{->}
Expressive marks

(dashPlus) shorthand with the trill symbol instead of the default + symbol, assign the value trill to the variable dashPlus:

\relative c'' { c1+- }
dashPlus = "trill"
\relative c'' { c1+- }

Moving slur positions vertically

The vertical position of a slur can be adjusted using the positions property of Slur. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

\relative c' {
    \stemDown
    e4( a)
    \override Slur.positions = #'(1 . 1)
e4( a)
    \override Slur.positions = #'(2 . 2)
e4( a)
    \override Slur.positions = #'(3 . 3)
e4( a)
    \override Slur.positions = #'(4 . 4)
e4( a)
    \override Slur.positions = #'(5 . 5)
e4( a)
    \override Slur.positions = #'(0 . 5)
e4( a)
    \override Slur.positions = #'(5 . 0)
e4( a)
    \stemUp
    \override Slur.positions = #'(-5 . -5)
e4( a)
    \revert Slur.positions
    e4( a)
}
Moving the ends of hairpins

The ends of hairpins may be offset by setting the `shorten-pair` property of the `Hairpin` object. Positive values move endpoints to the right, negative to the left. Unlike the `minimum-length` property, this property only affects the appearance of the hairpin; it does not adjust horizontal spacing (including the position of bounding dynamics). This method is thus suitable for fine-tuning a hairpin within its allotted space.

```
{ 
  c'1\<<
  c'2\<<
  \once \override Hairpin.shorten-pair = #'(2 . 2)
  c'1\<<
  c'2\<<
  \once \override Hairpin.shorten-pair = #'(-2 . -2)
  c'1\<<
  c'2\<<
  c'1\p-tweak shorten-pair #'(2 . 0)\<
  c'2\ 'fff}
```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' { 
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio}
```

Positioning text markups inside slurs

Text markups need to have the `outside-staff-priority` property set to false in order to be printed inside slurs.

```
\relative c'' { 
```
Printing hairpins in various styles

Hairpin dynamics may be created in a variety of styles.
\relative c'' {
\override Hairpin.stencil = #flared-hairpin
a4\< a a a\f
a4\p\< a a a\ff
a4\sfz\< a a a!\}
\override Hairpin.stencil = #constante-hairpin
a4\< a a a\f
a4\p\< a a a\ff
a4\sfz\< a a a!
\override Hairpin.stencil = #flared-hairpin
a4\> a a a\f
a4\p\> a a a\ff
a4\sfz\> a a a!
\override Hairpin.stencil = #constante-hairpin
a4\> a a a\f
a4\p\> a a a\ff
a4\sfz\> a a a!
}\}

Printing hairpins using al niente notation

Hairpin dynamics may be printed with a circled tip ("al niente" notation) by setting the circled-tip property of the Hairpin object to #t.
\relative c'' {
\override Hairpin.circled-tip = ##t
c2\< c\!
c4\> c\< c2\!
}
Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the direction property of `MetronomeMark` or `RehearsalMark` appropriately.

```latex
\layout {
  indent = 0
  ragged-right = ##f
}

% Metronome marks below the staff
\override Score.MetronomeMark.direction = #DOWN
\tempo 8. = 120
c''1

% Rehearsal marks below the staff
\override Score.RehearsalMark.direction = #DOWN
\mark \default
c''1
```

Setting hairpin behavior at bar lines

If the note which ends a hairpin falls on a downbeat, the hairpin stops at the bar line immediately preceding. This behavior can be controlled by overriding the 'to-barline' property.

```latex
\relative c'' {
  e4\ < e2.
e1!\!
  \override Hairpin.to-barline = ##f
e4\ < e2.
e1!\!
}
```

Setting the minimum length of hairpins

If hairpins are too short, they can be lengthened by modifying the `minimum-length` property of the `Hairpin` object.

```latex
\relative c'' {
  c4\ < c! d! > e!\!
  << f1 \{ s4 s\ < s\ > s! \} >>
  \override Hairpin.minimum-length = #5
```
Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, c4_fermata^fermata will only show a fermata below. The fermata above will simply be ignored. However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, 'add-stem-support would be required. So, the solution is to write the note as a chord and add the articulations inside the <...>. The direction will always be above, but one can tweak this via a \tweak: \tweak direction #DOWN-fermata^fermata

% The same as \flageolet, just a little smaller
smallFlageolet = #(let ((m (make-articulation "flageolet")))
  (set! (ly:music-property m 'tweaks)
    (acons 'font-size -2
      (ly:music-property m 'tweaks)))
  m)
\relative c' {
  s4"Wrong:"
  c4^fermata^fermata % The second fermata is ignored!
  <e d'>4^smallFlageolet^smallFlageolet
  s4"Works if written inside a chord:"
  <e-smallFlageolet d'>\smallFlageolet>4
  <e-flageolet d'\flageolet>4
  <e-smallFlageolet\smallFlageolet>4
  <e-fermata^fermata>4
}

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.
\relative c' {
  c4\snappizzicato
Using a tick as the breath mark symbol

Vocal and wind music frequently uses a tick mark as a breathing sign. This indicates a breath that subtracts a little time from the previous note rather than causing a short pause, which is indicated by the comma breath mark. The mark can be moved up a little to take it away from the stave.

Using arpeggioBracket to make divisi more visible

The `arpeggioBracket` can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.
Using double slurs for legato chords

Some composers write two slurs when they want legato chords. This can be achieved by setting `doubleSlurs`.

\relative c' {
    \set doubleSlurs = ##t
    <c e>4( <d f> <c e> <d f>)
}

Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the `layer` property to control which objects are masked by the white background.

In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the time signature by setting the `whiteout` property of `TimeSignature`. To do this `TimeSignature` is moved to a layer above `Tie`, which is left in the default layer of 1, and `StaffSymbol` is moved to a layer above `TimeSignature` so it is not masked.

{\override Score.StaffSymbol.layer = #4
\override Staff.TimeSignature.layer = #3
b'2 b'~
\once \override Staff.TimeSignature.whiteout = ##t
\time 3/4
b' r4
}
Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```
upline =
#(let ((m (make-articulation "stopped")))
    (set! (ly:music-property m 'tweaks)
        (acons 'font-size 3
            (acons 'stencil (lambda (grob)
                (grob-interpret-markup
                    grob
                    (make-draw-line-markup '(0 . 1)))))
            (ly:music-property m 'tweaks))))
    m)

\relative c' {
    a'4^\upline a( c d')_\upline
}
```

Vertically aligning dynamics across multiple notes

Dynamics that occur at, begin on, or end on the same note will be vertically aligned. To ensure that dynamics are aligned when they do not occur on the same note, increase the staff-padding property of the DynamicLineSpanner object.

```
\relative c' {
    \override DynamicLineSpanner.staff-padding = #4
c2\p f\mf
g2< b4\> c!
}
```
Repeats

Section “Repeats” in Notation Reference

Adding volta brackets to additional staves

The Volta_engraver by default resides in the Score context, and brackets for the repeat are thus normally only printed over the topmost staff. This can be adjusted by adding the Volta_engraver to the Staff context where the brackets should appear; see also the “Volta multi staff” snippet.

```
<<
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff \with { \consists "Volta_engraver" } { c'2 g' e' a' }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
>>
```

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure’s extent. This snippet shows how the Measure_counter_engraver may be used to simulate this notational practice. Here, the engraver has been added to a Dynamics context.

```
\layout {
\context {
\Dynamics
\consists #Measure_counter_engraver
\override MeasureCounter.direction = #DOWN
\override MeasureCounter.font-encoding = #'latin1
\override MeasureCounter.font-shape = #'italic
% to control the distance of the Dynamics context from the staff:
\override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
}
\context {
\Score
\remove "Bar_number_engraver"
}
```
Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

%% http://lsr.di.unimi.it/LSR/Item?id=964

```lilypond
\layout {
  \context {\Score
    \defaultBarType = "!"
    \startRepeatType = "[|:
    \endRepeatType = ":|]
    \doubleRepeatType = ":|][|
  }
}
```

%% example:

{\repeat volta 2 { \repeat unfold 2 c' }
\repeat volta 2 { \repeat unfold 2 c' }
\alternative {
  { c' }"
Cross-staff tremolos

Since \repeat tremolo expects exactly two musical arguments for chord tremolos, the note or chord which changes staff within a cross-staff tremolo should be placed inside curly braces together with its \change Staff command.

\new PianoStaff <<
\new Staff = "up" \relative c'' {
  \key a \major
  \time 3/8
  s4.
}
\new Staff = "down" \relative c'' {
  \key a \major
  \time 3/8
  \voiceOne
  \repeat tremolo 6 {
    <a e'>32
    {
      \change Staff = "up"
      \voiceTwo
      <cis a' dis>32
    }
  }
}
>>

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain
engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the 'gap-count property of the Beam object, and the size of the gaps between beams and stems is set with the 'gap property.

\relative c'' {
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #2
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #3
  \repeat tremolo 8 { a32 f }

  \override Beam.gap-count = #3
  \override Beam.gap = #1.33
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.67
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.33
  \repeat tremolo 8 { a32 f }
}

\relative c'' {
  \makePercent s1
}

Isolated percent repeats

Isolated percents can also be printed.

\makePercent =
#(define-music-function (note) (ly: music?)
  "Make a percent repeat the same length as NOTE."
  (make-music 'PercentEvent
    'length (ly: music-length note)))

\relative c'' {
  \makePercent s1
}

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

<<
  \context Voice = "foo" {

Numbering groups of measures

This snippet demonstrates the use of the Measure_counter_engraver to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a Staff context is used; another possibility is a Dynamics context.

The counter is begun with \startMeasureCount and ended with \stopMeasureCount. Numbering will start by default with 1, but this behavior may be modified by overriding the count-from property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
}
\break
e'4 d'
\repeat unfold 7 {
  g'4 f' e' d'
}
\stopMeasureCount

\relative c'' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
  \repeat percent 10 { c1 } \break
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
  \repeat percent 6 { c1 d1 }
}

Percent repeat count visibility

Percent repeat counters can be shown at regular intervals by setting the context property repeatCountVisibility.

\relative c'' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
  \repeat percent 10 { c1 } \break
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
  \repeat percent 6 { c1 d1 }
}

Percent repeat counter

Measure repeats of more than two repeats can get a counter when the convenient property is switched, as shown in this example:

\relative c'' {
  \set countPercentRepeats = ##t
  \repeat percent 4 { c1 }
}

Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

```
\clef treble
\key g \major
\time 4/4
relative c' { 
  \repeat unfold 4 { 
    c4 c c c 
  }

  % Set segno sign as rehearsal mark and adjust size if needed
  % \once \override Score.RehearsalMark.font-size = #3
  \mark \markup { \musicglyph "scripts.segno" }
  \repeat unfold 2 { 
    c4 c c c 
  }

  % Set coda sign as rehearsal mark and adjust size if needed
  \once \override Score.RehearsalMark.font-size = #4
  \mark \markup { \musicglyph "scripts.coda" }
  \repeat unfold 2 { 
    c4 c c c 
  }

  % Should Coda be on anew line?
  \bar "||"

  % Set segno sign as rehearsal mark and adjust size if needed
  \once \override Score.RehearsalMark.break-visibility =
    #begin-of-line-invisible
  \once \override Score.RehearsalMark.font-size = #3
  \mark \markup { \musicglyph "scripts.segno" }

  % Here begins the trickery!
  % \cadenzaOn will suppress the bar count
  % and \stopStaff removes the staff lines.
  \cadenzaOn
  \stopStaff
  % Some examples of possible text-displays

    % text line-aligned
    % ===========
    % Move text to the desired position
    \once \override TextScript.extra-offset = '\( 2 , -3.5 \)'
```
% | <>\markup { D.S. al Coda } }

% text center-aligned
% ===============
% Move text to the desired position
% \once \override TextScript.extra-offset = #'( 6 . -5.0 )
% | <>\markup { \center-column { D.S. "al Coda" } }

% text and symbols center-aligned
% =================================
% Move text to the desired position
% and tweak spacing for optimum text alignment
\repeat unfold 1 {
  s1
  \bar ""
}
\once \override TextScript.extra-offset = #'( 0 . -3.0 )
\once \override TextScript.word-space = #1.5
<>\markup { \center-column { "D.S. al Coda"
  \line {
    \musicglyph "scripts.coda"
    \musicglyph "scripts.tenuto"
    \musicglyph "scripts.coda"} } }

% Increasing the unfold counter will expand the staff-free space
\repeat unfold 3 {
  s1
  \bar ""
}
% Resume bar count and show staff lines again
\startStaff
\cadenzaOff

% Should Coda be on new line?
% Coda NOT on new line: DON'T use \break
% Coda on new line: use \break
\break

% Show up, you clef and key!
\once \override Staff.KeySignature.break-visibility = #end-of-line-invisible
\once \override Staff.Clef.break-visibility = #end-of-line-invisible

% Set coda sign as rehearsal mark and adjust size and position

% Put the coda sign on top of the (treble-)clef
% depending on coda's line-position

% Coda NOT on new line, use this:
% \once \override Score.RehearsalMark.extra-offset = #'( -2 . 1.75 )

% Coda on new line, use this:
\once \override Score.RehearsalMark.extra-offset = #'( -5 . .5 )
Setting the double repeat default for volte

There are three different styles of double repeats for volte, that can be set using doubleRepeatType.

\relative c'' {
  \repeat volta 1 { c1 }
  \set Score.doubleRepeatType = #":..:" 
  \repeat volta 1 { c1 }
  \set Score.doubleRepeatType = #":|.|:" 
  \repeat volta 1 { c1 }
  \set Score.doubleRepeatType = #":|.:"
  \repeat volta 1 { c1 }
}

Shortening volta brackets

By default, the volta brackets will be drawn over all of the alternative music, but it is possible to shorten them by setting voltaSpannerDuration. In the next example, the bracket only lasts one measure, which is a duration of 3/4.

\relative c'' {
\time 3/4
c4 c c
\set Score.voltaSpannerDuration = #(ly:make-moment 3/4)
\repeat volta 5 { d4 d d }
\alternative {
   { e4 e e 
     f4 f f 
   }
   { g4 g g }
}

Volta below chords
By adding the \Volta_engraver to the relevant staff, volte can be put under chords.
\score {
   <<
      \chords {
         c1
         c1
      }
      \new Staff \with {
         \consists "Volta_engraver"
      }
      { 
         \repeat volta 2 { c'1 }
         \alternative { c' }
      }
   >>
   \layout {
      \context { 
         \Score 
         \remove "Volta_engraver"
      }
   }
}

Volta multi staff
By adding the \Volta_engraver to the relevant staff, volte can be put over staves other than the topmost one in a score.
voltaMusic = \relative c' { 

Volta text markup using \repeatCommands

Though volte are best specified using \repeat volta, the context property \repeatCommands must be used in cases where the volta text needs more advanced formatting with \markup.

Since \repeatCommands takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax #(list (list 'volta textIdentifier)). Start- and end-repeat commands can be added as separate list elements:

\set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
\set Score.repeatCommands = #'(volta #f) (volta "4.") end-repeat)
f1
\set Score.repeatCommands = #'((volta #f))
}

\clef \G
\times \C44
\notes "1.2.3. ad lib." 
\.....
\notes "4."
Simultaneous notes

Section “Simultaneous notes” in Notation Reference

Additional voices to avoid collisions

In some instances of complex polyphonic music, additional voices are necessary to prevent collisions between notes. If more than four parallel voices are needed, additional voices can be added by defining a variable using the Scheme function `context-spec-music`.

voiceFive = #(context-spec-music (make-voice-props-set 4) 'Voice)

Changing a single note’s size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.
Simultaneous notes

Inside the chord (within the brackets \( < > \)), before the note to be altered, place the \texttt{\textbackslash tweak} command, followed by \texttt{\#\textquoteleft font-size} and define the proper size like \texttt{\#-2} (a tiny note head).

\begin{verbatim}
\relative c' { 
  \tweak font-size \#+2 c e g c 
  \tweak font-size \#-2 e>1 
  \markup { A tiny e }_\markup { A big c }
}
\end{verbatim}

A tiny e
\text{A big c}

Changing partcombine texts

When using the automatic part combining feature, the printed text for the solo and unison sections may be changed:

\begin{verbatim}
\new Staff << 
  \set Staff.soloText = \#"girl"
  \set Staff.soloIIText = \#"boy"
  \set Staff.aDueText = \#"together"
  \partcombine 
  \relative c'' { 
    g4 g r r 
    a2 g 
  } 
  \relative c' { 
    r4 r a( b) 
    a2 g 
  } 
>>
\end{verbatim}

girl boy together

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

\begin{verbatim}
fragment = \relative c' { 
  c4 f \textless e d'^>4 
  \textless g a \textgreater 8 \textless e a \textgreater a4 c2 \textless d b \textgreater 4 
  e2 c 
} 
\end{verbatim}

\begin{verbatim}
\new Staff \fragment 
\new Staff \makeClusters \fragment 
\end{verbatim}
Combining two parts on the same staff

The part combiner tool (\partcombine command) allows the combination of several different parts on the same staff. Text directions such as “solo” or “a2” are added by default; to remove them, simply set the property printPartCombineTexts to \f. For vocal scores (hymns), there is no need to add “solo/a2” texts, so they should be switched off. However, it might be better not to use it if there are any solos, as they won’t be indicated. In such cases, standard polyphonic notation may be preferable.

This snippet presents the three ways two parts can be printed on a same staff: standard polyphony, \partcombine without texts, and \partcombine with texts.

%% Combining pedal notes with clef changes

\begin{music}
\time 4/4
\begin{music}

Simultaneous notes

Displaying complex chords
Here is a way to display a chord where the same note is played twice with different accidentals.

```latex
\begin{Verbatim}
fixA = {
    \once \override Stem.length = #11
}
\end{Verbatim}
```

```latex
\begin{Verbatim}
fixB = {
    \once \override NoteHead.X-offset = #1.7
    \once \override Stem.length = #7
    \once \override Stem.rotation = #'(45 0 0)
    \once \override Stem.extra-offset = #'(-0.1 . -0.2)
    \once \override Flag.style = #'no-flag
    \once \override Accidental.extra-offset = #'(4 . -.1)
}
\end{Verbatim}
```

```latex
\begin{Verbatim}
\relative c' {
    << { \fixA <b d!>8 } \ \ { \voiceThree \fixB dis } >> s
}
\end{Verbatim}
```

Double glissando
To connect chords with glissando lines, attach a second glissando to a hidden voice.

```latex
\begin{Verbatim}
\relative c {
    \clef bass
    <<
    {
        % new voice (= \voiceOne), hidden
        \hideNotes
        % attach glissando to note heads
        e2\glissando g
    }
}
\end{Verbatim}

Simultaneous notes

% original voice with chords rearranged so that
% glissando is attached to a & c
<e a,>2\glissando <g c,>

Forcing horizontal shift of notes

When the typesetting engine cannot cope, the following syntax can be used to override typesetting decisions. The units of measure used here are staff spaces.

\relative c' <<
{  
<d g>2 <d g>
}
\relative c'’ <<
{  
<b f'>2
\once \override NoteColumn.force-hshift = #1.7
<b f'>2
}

Making an object invisible with the 'transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

\relative {
\time 2/4
<<
{
\once \hide Stem
\once \override Stem.length = #8
b'8 ~ 8\noBeam
\once \hide Stem
Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be over-ridden by using the prefer-dotted-right property of NoteCollision.

\new Staff \relative c' <<
{ 
f2. f4
\override Staff.NoteCollision.prefer-dotted-right = ##f
f2. f4
\override Staff.NoteCollision.prefer-dotted-right = ##t
f2. f4
}
\new Voice{ \ignore \stemDown f2 g }
\new Voice{ c2 \stemDown c, }
>>

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ignore-collision property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

ignore = \override NoteColumn.ignore-collision = ##t

\new Staff <<
\new Voice{ \ignore \stemDown f2 g }
\new Voice{ c2 \stemDown c, }
>>
}
Two \partcombine pairs on one staff

The \partcombine function takes two music expressions each containing a part, and distributes them among four Voices named "two" "one" "solo" and "chords" depending on when and how the parts merged into a common voice. The voices output from \partcombine can have their layout properties adjusted in the usual way. Here we define extensions of \partcombine to make it easier to put four voices on a staff.

\begin{verbatim}
  soprano = { d’4 | cis’ b e’ d8 cis’ | cis’2 b }
  alto =  { fis4 | e8 gis ais b4 b | b ais fis2 }
  tenor = { a8 b | cis’ dis’ e’4 b8 cis’ d’4 | gis cis’ dis’2 }
  bass =  { fis8 gis | a4 gis g fis | eis fis b,2 }

  \new Staff << \key b\minor \clef alto \partial 4 \transpose b b’ \partcombineUp \soprano \alto \partcombineDown \tenor \bass >>

  \layout {
    \context {
      \Staff
      \accepts "VoiceBox"
    }
    \context {
      \name "VoiceBox"
      \type "Engraver_group"
      \defaultchild "Voice"
      \accepts "Voice"
    }
  }

  \partcombineUp =
  #(define-music-function (partOne partTwo)
    (ly:music? ly:music?)
    "Take the music in @var{partOne} and @var{partTwo} and return
    a @code{VoiceBox} named @q{Up} containing @code{Voice}s
    that contain @var{partOne} and @var{partTwo} merged into one
    voice where feasible. This variant sets the default voicing
    in the output to use upward stems."
    #{
      \new VoiceBox = "Up" <<
      \context Voice = "one" { \voiceOne }
      \context Voice = "two" { \voiceThree }
      \context Voice = "shared" { \voiceOne }

    b1
}
>>

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of Staff.explicitKeySignatureVisibility as is shown in the example.

\score {
    \new StaffGroup \relative c'' {
        \new Staff
        \key f \major
        c1 c"Unwanted extra space" \break
        \new Staff {
            \key f \major
            \once \omit Staff.TimeSignature
            c1 \break
        }\break
        c1 \break
        c1 c"Fixed here" \break
    }
}
Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.
\score {
<<
\new Staff \relative c' { 
  c1 | c | c | c | c
}
\new StaffGroup \relative c'' {
  \new Staff {
    c1 | c
    \new Staff {
      c1 | d
    }
    \new Staff {
      \once \omit Staff.TimeSignature 
      c1 | b
    }
  }
}
Adding indicators to staves which get split after a break

This snippet defines the \splitStaffBarLine, convUpStaffBarLine and convDownStaffBarLine commands. These add arrows at a bar line, to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

\begin{verbatim}
#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* (
    (PI-OVER-180 (/ (atan 1 1) 34))
    (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
    (angle-rad (degrees->radians angle-deg))
    (target-x (* length (cos angle-rad)))
    (target-y (* length (sin angle-rad))))
    (interpret-markup layout props
      (markup
        #:translate (cons (/ target-x 2) (/ target-y 2))
        #:rotate angle-deg
        #:translate (cons (/ length -2) 0)
        #:concat (#:draw-line (cons length 0)
          #:arrow-head X RIGHT fill))))))

splitStaffBarLineMarkup = \markup \with-dimensions #'(0 . 0) #'(0 . 0) {

Adding orchestral cues to a vocal score

This shows one approach to simplify adding many orchestral cues to the piano reduction in a vocal score. The music function `cueWhile` takes four arguments: the music from which the cue is to be taken, as defined by `addQuote`, the name to be inserted before the cue notes, then either `#UP` or `#DOWN` to specify either `voiceOne` with the name above the staff or `voiceTwo` with the name below the staff, and finally the piano music in parallel with which the cue notes are to appear. The name of the cued instrument is positioned to the left of the cued notes. Many passages can be cued, but they cannot overlap each other in time.

\begin{verbatim}
cueWhile = #(define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
#
  \once \override TextScript.self-alignment-X = #RIGHT
  \once \override TextScript.direction = $dir
  <>-\markup { \tiny #name }
  $music
  #}

flute = \relative c'' {\transposition c'
  s4 s4 e g}
\addQuote "flute" { \flute }

clarinet = \relative c' {
\transposition bes
fis4 d d c
}
\addQuote "clarinet" { \clarinet }
singer = \relative c'' { c4. g8 g4 bes4 }
words = \lyricmode { here's the lyr -- ics }
pianoRH = \relative c'' {
  \transposition c'
  \cueWhile "clarinet" "Clar." #DOWN { c4. g8 }
  \cueWhile "flute" "Flute" #UP { g4 bes4 }
}
pianoLH = \relative c { c4 <c' e> e, <g c> }
\score {
  \new Staff {
    \new Voice = "singer" {
      \singer
    }
  }
  \new Lyrics {
    \lyricsto "singer"
    \words
  }
  \new PianoStaff <<
    \new Staff {
      \new Voice {
        \new Voice { \pianoRH
      }
    }
    \new Staff {
      \clef "bass"
      \pianoLH
    }
  >>
}
Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks, often consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly.

\begin{verbatim}
glissandoSkipOn = {
    \override NoteColumn.glissando-skip = ##t
    \hide NoteHead
    \override NoteHead.no-ledgers = ##t
}

\glissandoSkipOff = {
    \revert NoteColumn.glissando-skip
    \undo \hide NoteHead
    \revert NoteHead.no-ledgers
}
\end{verbatim}

\relative c'' {
    r8 f8\glissando
    \glissandoSkipOn
    f4 g a a8\noBeam
    \glissandoSkipOff
    a8

    r8 f8\glissando
    \glissandoSkipOn
    g4 a8
    \glissandoSkipOff
    a8 |

    r4 f\glissando \<
    \glissandoSkipOn
    a4\f \\>
    \glissandoSkipOff
    b8\\! r |
}\end{verbatim}

Alternative bar numbering

Two alternative methods for bar numbering can be set, especially for when using repeated music.

\begin{verbatim}
\relative c'{
    \set Score.alternativeNumberingStyle = #'numbers
    \repeat volta 3 { c4 d e f | }
    \alternative {
        { c4 d e f | c2 d \break }
        { f4 g a b | f4 g a b | f2 a | \break }
}\end{verbatim}
Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure’s extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a Dynamics context.

```latex
\layout {
\context {
\Dynamics
\consists #Measure_counter_engraver
\override MeasureCounter.direction = #DOWN
```
Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

% http://lsr.di.unimi.it/LSR/Item?id=964
% => http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357.html

\layout {
  \context {
    \Score
      \defaultBarType = #"!"
      \startRepeatType = #"[|:
      \endRepeatType = #":"|
      \doubleRepeatType = #":"|
    }
  }
}
Changing the number of lines in a staff

The number of lines in a staff may changed by overriding the \StaffSymbol property line-count.

\upper = \relative c' { c4 d e f }

\lower = \relative c { \clef bass c4 b a g }

\score {
  \context PianoStaff <<
    \new Staff {
      \upper
    }
    \new Staff {
      \override \StaffStaffSymbol.line-count = #4
      \lower
    }
  >>
}

\example{
  \repeat volta 2 { \repeat unfold 2 c' }
  \repeat volta 2 { \repeat unfold 2 c' }
  \alternative{
    \c' }
    \{ 
    \% v2.18 workaround
    \once \override \Score.VoltaBracket.shorten-pair = #'(1 . -1)
    c'
  }
  \bar "|."
Changing the staff size

Though the simplest way to resize staves is to use \(set-global-staff-size\ xx\), an individual staff’s size can be changed by scaling the properties 'staff-space and fontSize.

\[
\begin{verbatim}
\new Staff {
    \relative c'' {
        \dynamicDown
        c8 ff c c c c c c
    }
}
\new Staff \with {
    fontSize = #-3
    \override StaffSymbol.staff-space = #(magstep -3)
} {
    \clef bass
    c8 c c c c\f c c c
}
\end{verbatim}
\]

Creating blank staves

To create blank staves, generate empty measures then remove the Bar_number_engraver from the Score context, and the Time_signature_engraver, Clef_engraver and Bar_engraver from the Staff context.

\(set-global-staff-size\ 20\)

\[
\begin{verbatim}
\score {
    \repeat unfold 12 { s1 \break }
} \layout {
    indent = 0\in
    \context {
        \Staff
        \remove "Time_signature_engraver"
        \remove "Clef_engraver"
        \remove "Bar_engraver"
    }
} \context {
\end{verbatim}
\]
\Score
\remove "Bar_number_engraver"
}
}

% uncomment these lines for "letter" size
%
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%

% uncomment these lines for "A4" size
%
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

\new Staff \with {
\override StaffSymbol.line-count = #8
\override KeySignature.flat-positions = #'((-7 . 6))
\override KeyCancellation.flat-positions = #'((-7 . 6))
% presumably sharps are also printed in both octaves
\override KeySignature.sharp-positions = #'((-6 . 7))
\override KeyCancellation.sharp-positions = #'((-6 . 7))

\override Clef.stencil =#
(lambda (grob)(grob-interpret-markup grob
#( \markup\combine
 \musicglyph "clefs.C"
 \translate #'(-3 . -2)
 \musicglyph "clefs.F"
 #}))
clefPosition = #3
middleCPosition = #3
middleCClefPosition = #3
}

{\key d \minor
 f bes, f bes,
}

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

\relative c' {\c1-10\c1-50\c1-36\c1-29}
Cross staff stems

This snippet shows the use of the \Span\_stem\_engraver and \cross\_Staff to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

\layout{\context{\PianoStaff\consists#Span\_stem\_engraver}}

\new\PianoStaff<<\new\Staff{\clef bass\voiceOne\autoBeamOff\cross\Staff{\autoBeamOn\note{<e.g>4\text{ e}\,g16\text{ a8}\,c8}\text{ d}}\note{g8\,f\,g4\,c2}}>>}

Display bracket with only one staff in a system

If there is only one staff in one of the staff types Choir\Staff or Staff\Group, by default the bracket and the starting bar line will not be displayed. This can be changed by overriding collapse\_height to set its value to be less than the number of staff lines in the staff.

Note that in contexts such as Piano\Staff and Grand\Staff where the systems begin with a brace instead of a bracket, another property has to be set, as shown on the second system in the example.
Extending a TrillSpanner

For TrillSpanner, the minimum-length property becomes effective only if the set-spacing-rods procedure is called explicitly. To do this, the springs-and-rods property should be set to ly:spanner::set-spacing-rods.

\relative c' {
\key c \minor
\time 2/4
c16( as') c,\-. des\-. 
\once\override TrillSpanner.minimum-length = #15
\once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
\afterGrace es4
\startTrillSpan { d16[( \stopTrillSpan es) ]}
c( c' g es c g' es d
\hideNotes
c8)
}
Extending glissandi across repeats

A glissando which extends into several `\alternative` blocks can be simulated by adding a hidden grace note with a glissando at the start of each `\alternative` block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function which takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

```music
repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{}
  % the next two lines ensure the glissando is long enough
  % to be visible
  \once \override Glissando.springs-and-rods
  = #ly:spanner::set-spacing-rods
  \once \override Glissando.minimum-length = #3.5
  \once \hideNotes
  \grace $grace \glissando
  #})

\score {
  \relative c'' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
      { \repeatGliss f g2 e }
      { \repeatGliss f e2 d }
    }
  }
}

music = \relative c' {
  \voiceOne
  \repeat volta 2 {
    g a b c\glissando
  }
  \alternative {
    { d1 }
    { \repeatGliss c \once \omit StringNumber e1\2 }
  }
}

\score {
  \new StaffGroup <<
    \new Staff <<
      \context Voice { \clef "G_8" \music }
    >>
    \new TabStaff <<
      \context TabVoice { \clef "moderntab" \music }
    >>
  >>
}
```
Flat Ties
The function takes the default Tie.stencil as an argument, calculating the result relying on the extents of this default. Further tweaking is possible by overriding Tie.details.height-limit or with \shape. It’s also possible to change the custom-definition on the fly.

%(http://lsr.di.unimi.it/LSR/Item?id=1031

#(define ((flared-tie coords) grob))

(define (pair-to-list pair)
  (list (car pair) (cdr pair)))

Forcing measure width to adapt to MetronomeMark’s width

By default, metronome marks do not influence horizontal spacing. This can be solved through a simple override, as shown in the second half of the example.

```
extemposkipdefault "Allegro"
\tempo "Rall."
\tempo "A tempo"
\compressMMRests { \example R1*8 } \example
```

```
extemposkipdefault "Allegro"
\tempo "Rall."
\tempo "A tempo"
\compressMMRests { \example R1*8 } \example
```

```\example
\tempo "Allegro"
R1*6
\tempo "Rall."
R1*2
\tempo "A tempo"
R1*8
\compressMMRests { \example R1 R1 \override Score.MetronomeMark.extra-spacing-width = #'(-3 . 0) \example }
```
Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

```latex
\relative c' {
    a2 \glissando
    \once \override NoteColumn.glissando-skip = ##t
    f''4 d,
}
```

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two ‘rehearsal marks’, one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate ‘break visibility’ as shown in snippet 1 will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

```latex
\relative c'{
    c d e f |
    \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
    \once \override Score.RehearsalMark.baseline-skip = #9
    \mark \markup { \center-column { \circle 1 \box A } }
    g f e d |
    \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
    \once \override Score.RehearsalMark.baseline-skip = #9
```
How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.
Incipit

When transcribing mensural music, an incipit at the beginning of the piece is useful to indicate the original key and tempo. Musicians today are used to bar lines, but these were not known during the period of mensural music. As a compromise, bar lines are often printed between the staves, a layout style called mensurstriche layout.

Inserting score fragments above a staff as markups

The \markup command is quite versatile. In this snippet, it contains a \score block instead of texts or marks.

\begin{verbatim}
tuning = \markup {
  \score {
    \new Staff \with { \remove "Time_signature_engraver" }
    { \clef bass 
      <c, g, d g>1
    }
    \layout { ragged-right = ##t indent = 0\cm }
  }
}
\end{verbatim}
Solo Cello Suites
Suite IV
Originalstimmung:

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the stringOneTopmost-context-property. For a context-wide setting this could be done in layout as well.

```latex
\layout { ragged-right = ##f }
\relative c'' { 
\time 4/8 
\tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e } 
\tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e } 
g8 a g a 
g8 a g a }
```

}
\set TabStaff.tablatureFormat = #fret-letter-tablature-format
}

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

\new Staff {\clef "G_8" \music}
\new TabStaff \with {tablatureFormat = #fret-letter-tablature-format}
{}
\music

Making glissandi breakable

Setting the `breakable` property to `#t` in combination with `after-line-breaking` allows a glissando to break if it occurs at a line break:

\glissandoSkipOn = {
\override NoteColumn.glissando-skip = ##t
\hide NoteHead
\override NoteHead.no-ledgers = ##t
Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the `line-positions` property of the `StaffSymbol` object.

```latex
\override Staff.StaffSymbol.line-positions = #'(-4 -2 -0.2 0 0.2 2 4)
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```latex
<< \context Voice = "foo" { \clef bass c4 r g r c4 r g r c4 r g r }
```
\context Voice = "foo" {
\set countPercentRepeats = ##t
\hide PercentRepeat
\override PercentRepeatCounter.staff-padding = #1
\repeat percent 4 { s1 }
}

\new StaffGroup \relative c'' {
<<
\new Staff { << \global { c1 c } >> }
\new Staff { << \global { c c } >> }
>>
}

**Mensurstriche layout (bar lines between the staves)**

The mensurstriche-layout where the bar lines do not show on the staves but between staves can be achieved with a *StaffGroup* instead of a *ChoirStaff*. The bar line on staves is blanked out using \hide.

global = {
\hide Staff.BarLine
s1 s
% the final bar line is not interrupted
\undo \hide Staff.BarLine
\bar "|."
}

\new StaffGroup \relative c'' {
<<
\new Staff { << \global { c1 c } >> }
\new Staff { << \global { c c } >> }
>>
}

**Modifying the Ottava spanner slope**

It is possible to change the slope of the Ottava spanner.

\relative c'' {
\override Staff.OttavaBracket.stencil = #ly:line-spanner::print
\override Staff.OttavaBracket.bound-details = 
  #'((left . ((Y . 0) ; Change the integer here
    (attach-dir . ,LEFT)
    (padding . 0)
    (stencil-align-dir-y . ,CENTER)))
  (right . ((Y . 5) ; Change the integer here}
(padding . 0)
(attach-dir . ,RIGHT)
(text . ,(make-draw-dashed-line-markup (cons 0 -1.2))))
\override Staff.OttavaBracket.left-bound-info =
   #ly:line-spanner::calc-left-bound-info-and-text
\override Staff.OttavaBracket.right-bound-info =
   #ly:line-spanner::calc-right-bound-info
\ottava #1
c1
c'''1
}

Nesting staves

The property systemStartDelimiterHierarchy can be used to make more complex nested staff groups. The command \set StaffGroup.systemStartDelimiterHierarchy takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are SystemStartBar, SystemStartBracket, SystemStartBrace, and SystemStartSquare.

\new StaffGroup
\relative c' <<
   \set StaffGroup.systemStartDelimiterHierarchy = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
   (SystemStartSquare b) ) c ) d)
\new Staff { c1 }
\new Staff { c1 }
\new Staff { c1 }
\new Staff { c1 }
\new Staff { c1 }
\new Staff { c1 }
>>
Non-traditional key signatures

The commonly used \key command sets the keyAlterations property in the Staff context. To create non-standard key signatures, set this property directly.

The format of this command is a list:

\set Staff.keyAlterations = #`(((octave . step) . alter) ((octave . step) . alter) . . .)

where, for each element in the list octave specifies the octave (0 being the octave from middle c to the b above), step specifies the note within the octave (0 means c and 6 means b), and alter is \SHARP,\FLAT,\DOUBLE-SHARP etc.

Alternatively, using the more concise format for each item in the list, (step . alter) specifies the same alteration holds in all octaves. For microtonal scales where a “sharp” is not 100 cents, alter refers to the proportion of a 200-cent whole tone.

\include "arabic.ly"
\relative do' {
\set Staff.keyAlterations = #`((0 . ,SEMI-FLAT) (1 . ,SEMI-FLAT) (2 . ,FLAT) (5 . ,FLAT) (6 . ,SEMI-FLAT))

%\set Staff.extraNatural = ##f
re reb \dwn reb resd
dod dob dosd \dwn dob |
dobsb dodsd do do |
}

Numbering groups of measures

This snippet demonstrates the use of the Measure_counter_engraver to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.
The engraver must be added to the appropriate context. Here, a Staff context is used; another possibility is a Dynamics context.

The counter is begun with \startMeasureCount and ended with \stopMeasureCount. Numbering will start by default with 1, but this behavior may be modified by overriding the count-from property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.
Orchestra choir and piano template

This template demonstrates the use of nested StaffGroup and GrandStaff contexts to subgroup instruments of the same type together, and a way to use \transpose so that variables hold music for transposing instruments at concert pitch.

#(set-global-staff-size 17)

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with \override LyricText.extra-offset = #'(0 . dy) and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

<<<
\new Staff <<
\new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>>
Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using \transpose. In this case, all the pitches (including the quoted ones) are transposed.

\addQuote clarinet {
  \transposition bes
  \repeat unfold 8 { d'16 d' d'8 }
}

\addQuote sax {
  \transposition es'
  \repeat unfold 16 { a8 }
}

quoteTest = {
  % french horn
  \transposition f
  g'4
  << \quoteDuring "clarinet" { \skip 4 } s4"clar." >>
  << \quoteDuring "sax" { \skip 4 } s4"sax." >>
  g'4
}

{
  \new Staff \with {
    instrumentName = \markup { \column { Horn "in F" } }
  }
  \quoteTest
  \transpose c' d' << \quoteTest s4"up a tone" >>
}

\begin{music}
\begin{staff}
  Horn \\
  in F
\end{staff}
\end{music}

Quoting another voice

The quotedEventTypes property determines the music event types which should be quoted. The default value is (note-event rest-event tie-event beam-event tuplet-span-event), which means that only the notes, rests, ties, beams and tuplets of the quoted voice will appear in the \quoteDuring expression. In the following example, a 16th rest is not quoted since rest-event is not in quotedEventTypes.

For a list of event types, consult the “Music classes” section of the Internals Reference.

quoteMe = \relative c' {

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

\relative c'' {
    \override Staff.TimeSignature.stencil = #(lambda (grob)
        (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
    \time 2/4
    a4 b8 c
} 

![Time signature in parentheses example](image)

Time signature in parentheses

The time signature can be enclosed within parentheses.

\relative c'' {
    \override Staff.TimeSignature.stencil = #(lambda (grob)
        (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
    \time 2/4
    a4 b8 c
}

![Time signature in parentheses example](image)

Tweaking clef properties

Changing the Clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines middleCClefPosition must also be specified, with positive or negative values moving middle C up or down respectively, relative to the staff’s center line.

For example, \clef "treble_8" is equivalent to setting the clefGlyph, clefPosition (the vertical position of the clef itself on the staff), middleCPosition and clefTransposition. Note
that when any of these properties (except middleCPosition) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

{%
% The default treble clef
\key f \major
c'1
% The standard bass clef
\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
\set Staff.middleCPosition = #6
\set Staff.middleCClefPosition = #6
\key g \major
c'1
% The baritone clef
\set Staff.clefGlyph = #"clefs.C"
\set Staff.clefPosition = #4
\set Staff.middleCPosition = #4
\set Staff.middleCClefPosition = #4
\key f \major
c'1
% The standard chorale tenor clef
\set Staff.clefGlyph = #"clefs.G"
\set Staff.clefPosition = #-2
\set Staff.clefTransposition = #-7
\set Staff.middleCPosition = #1
\set Staff.middleCClefPosition = #1
\key f \major
c'1
% A non-standard clef
\set Staff.clefPosition = #0

Two `partcombine` pairs on one staff

The `partcombine` function takes two music expressions each containing a part, and distributes them among four `Voices` named “two” “one” “solo” and “chords” depending on when and how the parts merged into a common voice. The voices output from `partcombine` can have their layout properties adjusted in the usual way. Here we define extensions of `partcombine` to make it easier to put four voices on a staff.

soprano = { d’4 | cis’ b e’ d’8 cis’ | cis’2 b } alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis’ dis’ e’4 b8 cis’ | fis gis’ dis’2 } bass = { fis8 gis | a4 gis g fis | eis fis b,2 }

\new Staff << \key b \minor \clef alto \partial 4 \transpose b b’ \partcombineUp \soprano \alto \partcombineDown \tenor \bass >>
\layout {
  \context {
    \Staff
    \accepts "VoiceBox"
  }
  \context {
    \name "VoiceBox"
    \type "Engraver_group"
    \defaultchild "Voice"
    \accepts "Voice"
  }
}

partcombineUp =
{-#(define-music-function (partOne partTwo)
  (ly:music? ly:music?)
  "Take the music in @var{partOne} and @var{partTwo} and return a @code{VoiceBox} named @q{Up} containing @code{Voice}s that contain @var{partOne} and @var{partTwo} merged into one voice where feasible. This variant sets the default voicing
in the output to use upward stems."
#{

Using marklines in a Frenched score

Using \texttt{MarkLine} contexts (such as in LSR1010 (http://lsr.di.unimi.it/LSR/Item?id=1010)) in a Frenched score can be problematic if all the staves between two \texttt{MarkLine}s are removed in one system. The \texttt{Keep\_alive\_together\_engraver} can be used within each \texttt{StaffGroup} to keep the \texttt{MarkLine} alive only as long as the other staves in the group stay alive.

```
bars = {
    \"Allegro\" 4=120
    s1*2
    \repeat unfold 5 { \mark \default s1*2 } \bar "||"
    \"Adagio\" 4=40
    s1*2
    \repeat unfold 8 { \mark \default s1*2 } \bar "."  
}
```

```
winds = \repeat unfold 120 { c''4 }
trumpet = { \repeat unfold 8 g'2 R1*16 \repeat unfold 4 g'2 R1*8 }
trombone = { \repeat unfold 4 c'1 R1*8 d'1 R1*17 }
strings = \repeat unfold 240 { c''8 }
```

```

Exercise: Improve the given choral
**Teacher:** This is a simple setting of the choral. Please improve it.

**Pupil:** Here's my version!

**Teacher:** Well, you simply copied and transposed a version of J.S.Bach. Do you know this one?
Volta below chords

By adding the \Volta_engraver to the relevant staff, volte can be put under chords.

\score {
  \with {\consists "Volta_engraver"}
    \chords {c1 c1}
  \new Staff
    \repeat volta 2 { c'1 }
    \alternative { c' }
}
Volta multi staff

By adding the Volta_engraver to the relevant staff, volte can be put over staves other than the topmost one in a score.

\begin{verbatim}
voltaMusic = \relative c' { 
  \repeat volta 2 { 
    c1 
  } 
  \alternative { 
    d1 
    e1 
  } 
}

    \new Staff \ voltaMusic 
    \new Staff \ voltaMusic 
  >> 
  \new StaffGroup << 
    \new Staff \with { \consists "Volta_engraver" } 
      \ voltaMusic 
    \new Staff \ voltaMusic 
  >>

\end{verbatim}
Editorial annotations

Section “Editorial annotations” in Notation Reference

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.
\relative c' { 
  c4-1 d-2 f-4 e-3
}

Adding links to objects

To add a link to a grob-stencil you could use add-link as defined here. Works with \override and \tweak. Drawback: point-and-click will be disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command.

#(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
        (begin
          (let* (
            (x-ext (ly:stencil-extent stil X))
            (y-ext (ly:stencil-extent stil Y))
            (url-expr (list 'url-link url-strg `(quote ,x-ext) `(quote ,y-ext)))
            (new-stil (ly:stencil-add
                       (ly:make-stencil url-expr x-ext y-ext) stil))))
          (ly:grob-set-property! grob 'stencil new-stil)))
        #f))))

%% test

urlI = "http://lilypond.org/doc/v2.14/Documentation/notation/writing-pitches"

Adding markups in a tablature

By default markups do not show in a tablature. To make them appear, simply use the command \revert TabStaff.TextScript.stencil

By P.P. Schneider on June 2014

high = { r4 r8 <g c'> q r8 r4 }  

low = { c4 r4 c8 r8 g,8 b, }  

pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }  

\score {  

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff. However, this behavior can be canceled. Note: you must use a chord construct $<$>, even if it is only a single note.

\relative c' {
  \override Fingering.staff-padding = #'() 
  <c-1 e-2 g-3 b-5>2 
  \override Fingering.staff-padding = #'() 
  <c-1 e-2 g-3 b-5>4 <g'-0> 
}

Alternative bar numbering

Two alternative methods for bar numbering can be set, especially for when using repeated music.

\relative c' {
  \set Score.alternativeNumberingStyle = #'numbers 
  \repeat volta 3 { c4 d e f | } 
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d } 
  } 
}
Simple horizontal analysis brackets are added below the staff by default. The following example shows a way to place them above the staff instead.

```latex
\layout {
    \context {
        \Voice
        \consists "Horizontal_bracket_engraver"
    }
}

\relative c'' {
    \once \override HorizontalBracket.direction = #UP
}
```
Analysis brackets with labels

Text may be added to analysis brackets through the text property of the HorizontalBracketText grob. Adding different texts to brackets beginning at the same time requires the \tweak command. Bracket text will be parenthesized after a line break.

\layout {
\context {
\Voice
\consists "Horizontal_bracket_engraver"
\override HorizontalBracket.direction = #UP
}
}

\once\override HorizontalBracketText.text = "a"
c''\startGroup d''\stopGroup
\once\override HorizontalBracketText.text = "a'"
e''\startGroup d''\stopGroup
c''\tweak HorizontalBracketText.text \markup \bold \huge "b" \startGroup
c''\tweak HorizontalBracketText.text "a" \startGroup
d''\stopGroup
e'\tweak HorizontalBracketText.text "a'" \startGroup
d''\stopGroup\stopGroup
c''\tweak HorizontalBracketText.text foo \startGroup d' e' f'
\break
g'' a'' b'' c''\stopGroup
\}

foo
Applying note head styles depending on the step of the scale

The `shapeNoteStyles` property can be used to define various note head styles for each step of the scale (as set by the key signature or the `tonic` property). This property requires a set of symbols, which can be purely arbitrary (geometrical expressions such as `triangle`, `cross`, and `xcircle` are allowed) or based on old American engraving tradition (some latin note names are also allowed).

That said, to imitate old American song books, there are several predefined note head styles available through shortcut commands such as `aikenHeads` or `sacredHarpHeads`.

This example shows different ways to obtain shape note heads, and demonstrates the ability to transpose a melody without losing the correspondence between harmonic functions and note head styles.

```latex
fragment = {
  \key c \major
  c2 d 
  e2 f 
  g2 a 
  b2 c 
}

\new Staff {
  \transpose c d 
  \relative c' {
    \set shapeNoteStyles = ##(do re mi fa 
    #f la ti)
  }
  \break
  \relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f 
    mensural xcircle diamond)
  }
}
```

Avoiding collisions with chord fingerings

Fingerings and string numbers applied to individual notes will automatically avoid beams and stems, but this is not true by default for fingerings and string numbers applied to the individual notes of chords. The following example shows how this default behavior can be overridden.

```latex
\relative c' {
```
\set fingeringOrientations = #'(up)
\set stringNumberOrientations = #'(up)
\set strokeFingerOrientations = #'(up)

\% Default behavior
r8
<f c'-5>8
<f c'\5>8
<f c'-'\rightHandFinger #2 >8

\% No tweak needed
r8
<f c'-5>8
<f c'\5>8
\% Corrected to avoid collisions
\override StrokeFinger.add-stem-support = ##t
<f c'-'\rightHandFinger #2 >8
}

Blanking staff lines using the \whiteout command

The \whiteout command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

\layout {
  \ragged-right = ##f
}

\relative c' {
  \override TextScript.extra-offset = #'(2 . 4)
  c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}

Changing a single note’s size in a chord

Individual note heads in a chord can be modified with the \tweak command inside a chord, by altering the font-size property.

Inside the chord (within the brackets < >), before the note to be altered, place the \tweak command, followed by #'font-size and define the proper size like #-2 (a tiny note head).

\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ^\markup { A tiny e }_\markup { A big c }
Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
    c4( d e c)
    \slurDotted
    c4( d e c)
    \slurSolid
    c4( d e c)
    \slurDashed
    c4( d e c)
    \slurSolid
    c4( d e c)
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

```
%(define color-mapping
    (list
        (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
        (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
        (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
        (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
        (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
        (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
        (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
        (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
        (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
        (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
        (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
        (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
        (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
        (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
        (cons (ly:make-pitch 0 4 SHARP) (x11-color 'blue))
        (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
        (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))
```
Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, you must use a chord construct <> even if it is a single note.
Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The `outside-staff-priority` property must be set to `#f`, as otherwise this would take precedence over the `avoid-slur` property. Changing the fractions `2/3` and `1/3` adjusts the horizontal position.

```latex
\relative c'' { 
  c2*2/3 ( s2*1/3\turn d4) r 
  << 
    { c4.( d8) } 
    { s4 s\turn } 
  >> 
  \transpose c d \relative c'' << 
    { c4.( d8) } 
    { s4 \once \set suggestAccidentals = ##t 
      \once \override AccidentalSuggestion.outside-staff-priority = ##f 
      \once \override AccidentalSuggestion.avoid-slur = #'inside 
      \once \override AccidentalSuggestion.font-size = -3 
      \once \override AccidentalSuggestion.script-priority = -1 
      \single \hideNotes 
      b8-\turn \noBeam 
    } s8 
} >> 
}
```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```latex
#(set-global-staff-size 20)

\score { 
  \repeat unfold 12 { s1 \break } 
} 
\layout { 
  indent = 0 \in 
  \context { 
    \Staff 
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
} 
```
\context {
  \Score
  \remove "Bar_number_engraver"
}
}

% uncomment these lines for "letter" size
%
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%

% uncomment these lines for "A4" size
%
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%
Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}

Default direction of stems on the center line of the staff

The default direction of stems on the center line of the staff is set by the Stem property neutral-direction.

\relative c'' {
  a4 b c b
  \override Stem.neutral-direction = #up
  a4 b c b
  \override Stem.neutral-direction = #down
  a4 b c b
}
Drawing boxes around grobs

The print-function can be overridden to draw a box around an arbitrary grob.

```
\relative c'' {
  \override TextScript.stencil =
    #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
c'4"foo"

  \override Stem.stencil =
    #(make-stencil-boxer 0.05 0.25 ly:stem::print)
  \override Score.RehearsalMark.stencil =
    #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
b8

  \revert Stem.stencil
  \revert Flag.stencil
  c4. c4
  \mark "F"
  c1
}
```

Drawing circles around note heads

Here is how to circle a note.

```
circle =
\once \override NoteHead.stencil = #(lambda (grob)
  (let* ((note (ly:note-head::print grob))
    (combo-stencil (ly:stencil-add
      note
      (circle-stencil note 0.1 0.8))))
    (ly:make-stencil (ly:stencil-expr combo-stencil)
      (ly:stencil-extent note X)
      (ly:stencil-extent note Y))))

{ \circle c'' }
```

Drawing circles around various objects

The \circle markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

```
\relative c' {
  c1
  \circle c'
```

Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

\relative c'' {
  a4-\markup { \postscript "3 4 moveto 5 3 rlineto stroke" }
  -\markup { \postscript "[ 0 1 ] 0 setdash 3 5 moveto 5 -3 rlineto stroke" }
  b4-\markup { \postscript "3 4 moveto 0 0 1 2 8 4 20 3.5 rcurveto stroke" }
  s2
  a'1
}

Grid lines: changing their appearance

The appearance of grid lines can be changed by overriding some of their properties.
Grid lines: emphasizing rhythms and notes synchronization

Regular vertical lines can be drawn between staves to show note synchronization; however, in case of monophonic music, you may want to make the second stave invisible, and make the lines shorter like in this snippet.

```latex
\score { 
\new ChoirStaff { 
\relative c' { <
\new Staff { 
\time 12/8 
\stemUp 
c4. d8 e8 f g4 f8 e8. d16 c8
}}}
\context { 
\Staff 
% set up grids 
\consists "Grid_point_engraver"
% set the grid interval to one quarter note 
gridInterval = #(ly:make-moment 1/4)
}
\context { 
\Score 
\consists "Grid_line_span_engraver"
% this moves them to the right half a staff space 
\override NoteColumn.X-offset = #\(-0.5
}
}
}
```
Hammer on and pull off using chords

When using hammer-on or pull-off with chorded notes, only a single arc is drawn. However “double arcs” are possible by setting the \texttt{doubleSlurs} property to \texttt{#t}.

\begin{verbatim}
\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g' b>8( <a c> <g b>)
  }
}
\end{verbatim}

Hammer on and pull off using voices

The arc of hammer-on and pull-off is upwards in voices one and three and downwards in voices two and four:

\begin{verbatim}
\new TabStaff {
  \relative c' {
    << { \voiceOne g2( a) }
    \\ { \voiceTwo a,( b) }
    >> \oneVoice
  }
}
\end{verbatim}

Hammer on and pull off

Hammer-on and pull-off can be obtained using slurs.

\begin{verbatim}
\new TabStaff {
  \relative c' {
    d4( e\2)
    a( g)
  }
}
\end{verbatim}
How to print two rehearsal marks above and below the same barline (method 1)

This method prints two 'rehearsal marks', one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate 'break visibility' as shown in snippet 1 will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using extra-offset does not change the bounding box of the mark from its original value.

```latex
\relative c' { 
    c d e f | 
    \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5) 
    \once \override Score.RehearsalMark.baseline-skip = #9 
    \mark \markup \center-column { \circle 1 \box A } 
    g f e d | 
    \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5) 
    \once \override Score.RehearsalMark.baseline-skip = #9 
    \mark \markup \center-column { \flat \text \small \italic Fine. } 
    g f e d | 
    \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5) 
    \once \override Score.RehearsalMark.baseline-skip = #9 
    \overline \override Score.RehearsalMark.break-visibility = #begin-of-line-invisible 
    \mark \markup \center-column { \fermata \box z } 
} 
```

How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

```latex
\score { 
    \relative c' 
    << 
    \new Staff { 
```
Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the `line-positions` property of the `StaffSymbol` object.

```plaintext
\override Staff.StaffSymbol.line-positions = #'(-4 -2 -0.2 0 0.2 2 4)
d'4 e' f' g'
```

\[\text{A}\]
Marking notes of spoken parts with a cross on the stem

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the \speakOn keyword, and end it with the \speakOff keyword.

\speakOn = {
  \override Stem.stencil =
    #(lambda (grob)
      (let* ((x-parent (ly:grob-parent grob X))
            (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
        (if is-rest?
            empty-stencil
            (ly:stencil-combine-at-edge
             (ly:stem::print grob)
             Y
             (- (ly:grob-property grob 'direction))
             (grob-interpret-markup grob
              (markup #:center-align #:fontsize -4
                      #:musicglyph "noteheads.s2cross")
              -2.3)))))
  }

\speakOff = {
  \revert Stem.stencil
  \revert Flag.stencil
}

\score {
  \new Staff {
    \relative c'' {
      a4 b a c
      \speakOn
g4 f r g
      b4 r d e
      \speakOff
c4 a g f
    }
  }
}

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

<<
  \context Voice = "foo" {
    \clef bass
c4 r g r
c4 r g r
  }
Numbering groups of measures

This snippet demonstrates the use of the \texttt{Measure\_counter\_engraver} to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a \texttt{Staff} context is used; another possibility is a \texttt{Dynamics} context.

The counter is begun with \texttt{\startMeasureCount} and ended with \texttt{\stopMeasureCount}. Numbering will start by default with 1, but this behavior may be modified by overriding the \texttt{count-from} property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.
Positioning fingering indications precisely

Generally the options available for positioning the fingering of chords work well by default, but if one of the indications needs to be positioned more precisely, the following tweak may be used. This is particularly useful for correcting the positioning when intervals of a second are involved.

\relative c' {
    \set fingeringOrientations = #'(left)
    <c-1 d-2 a'-5>4
    <c-1 d-\tweak extra-offset #'(0 . 0.2)-2 a'-5>4
    \set fingeringOrientations = #'(down)
    <c-1 d-2 a'-5>4
    <c-\tweak extra-offset #'(0 . -1.1)-1
    d-\tweak extra-offset #'(-1.2 . -1.8)-2 a'-5>4
    \set fingeringOrientations = #'(down right up)
    <c-1 d-\tweak extra-offset #'(-0.3 . 0)-2 a'-5>4
    <c-1 d-\tweak extra-offset #'(-1 . 1.2)-2 a'-5>4
    \set fingeringOrientations = #'(up)
    <c-1 d-\tweak extra-offset #'(0 . 1.1)-2
    a'-\tweak extra-offset #'(0 . 1)-5>4
    <c-1 d-\tweak extra-offset #'(-1.2 . 1.5)-2
    a'-\tweak extra-offset #'(0 . 1.4)-5>4
}
Positioning text markups inside slurs

Text markups need to have the `outside-staff-priority` property set to false in order to be printed inside slurs.

\relative c'' {
    \override TextScript.avoid-slur = #'inside
    \override TextScript.outside-staff-priority = ##f
c2("\markup { \halign #-10 \natural } d4.) c8
}

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

{ 
    b1\markup { 
        \line { i n g i r u m i m u s n o c t e }
    } 
    f'_\markup { 
        \override #'(text-direction . -1)
        \line { i n g i r u m i m u s n o c t e }
    }
}

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

\stringNumberSpanner =

#(define-music-function (StringNumber) (string?)
#
    \override TextSpanner.style = #'solid
    \override TextSpanner.font-size = #-5
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber } 
    #)

\relative c {
    \clef "treble_8"
    \stringNumberSpanner "5"
    \textSpannerDown
    a8\startTextSpan
Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```plaintext
parallelogram =
  #(ly:make-stencil (list 'embedded-ps
    "gsave
    currentpoint translate
    newpath
    0 0.25 moveto
    1.3125 0.75 lineto
    1.3125 -0.25 lineto
    0 -0.75 lineto
    closepath
    fill
    grestore"
  )
  (cons 0 1.3125)
  (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

\relative c' {\myNoteHeads g4 d' \normalNoteHeads <f, \tweak stencil \parallelogram b e>4 d}
```

Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the layer property to control which objects are masked by the white background.
In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the time signature by setting the `whiteout` property of `TimeSignature`. To do this `TimeSignature` is moved to a layer above `Tie`, which is left in the default layer of 1, and `StaffSymbol` is moved to a layer above `TimeSignature` so it is not masked.

```
{ 
\override Score.StaffSymbol.layer = #4
\override Staff.TimeSignature.layer = #3
\once \override Staff.TimeSignature.whiteout = ##t
\time 3/4
\b'2 \b'~
\b' r4
}
```

\begin{music}
\kern -9pt
\hspace{1.5ex}
\end{music}
Adding markups in a tablature

By default markups does not show in a tablature. To make them appear, simply use the command \revert TabStaff.TextScript.stencil

% http://lsr.di.unimi.it/LSR/Item?id=919
% by P.P.Schneider on June 2014

\score {\new \new TabStaff { \repeat unfold 2 \< \high \> \low \> \pulse >>
\layout {
\context { \TabStaff \clef moderntab \revert TextScript.stencil \override TextScript.font-series = #'bold \override TextScript.font-size = #-2 \override TextScript.color = #red

}\context {
\Score \proportionalNotationDuration = #(ly:make-moment 1/8)

}
}
}

|\ & 2 & 3 & 4 & \ & 2 & 3 & 4 & 1 |
|---|---|---|---|---|---|---|---|---|
|T |1-1| & |1-1| & |
|A |0-0| & |0-0| & |
|B |3|3|2|3|3|2|3|2|

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))

% use it in the title block:
\header {
    title = "Including the date!"
Including the date!
01-03-2020

Adjusting lyrics vertical spacing
This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
c4 d e f
g4 f e d
c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
\new Voice = melody \relative c' {
c4 d e f
g4 f e d
c1
}
}% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
\override VerticalAxisGroup.nonstaff-relatedstaff-spacing = #'(basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName #'self-alignment-X` property. The \layout variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```latex
\paper { left-margin = 3\cm }
\score {
  \new StaffGroup <<
    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
      }
      shortInstrumentName = "Left"
    }
    \{ c''1 \break c''1 \}

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #CENTER
      instrumentName = \markup \center-column {
        Centered
        "instrument name"
      }
      shortInstrumentName = "Centered"
    }
    \{ g'1 g'1 \}

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #RIGHT
      instrumentName = \markup \right-column {
        "Right aligned"
        "instrument name"
      }
      shortInstrumentName = "Right"
    }
    \{ e'1 e'1 \}
  >>
}
Aligning objects created with the \mark command

By default the \mark command centers objects over a bar line. This behavior can be modified to align at right or left.

\relative c' {
    c1 \mark "(Center)"
    c1
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark "(Left)"
    c4 c c c
    c4 c c c
    \once \override Score.RehearsalMark.self-alignment-X = #RIGHT
    \mark "(Right)"
    c1
}
Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the \lyricMelismaAlignment property.

\score {
<<
\new Staff {
  \relative c''
  \new Voice = "vocal" {
    c d--\markup default d e
c d--\markup "right aligned" d e
c d--\markup "center aligned" d e
c d--\markup "reset to default" d e
  }
}
\new Lyrics \lyricsto "vocal" {
  word word word
  \set lyricMelismaAlignment = #RIGHT
  word word word
  \set lyricMelismaAlignment = #CENTER
  word word word
  \unset lyricMelismaAlignment
  word word word
}
>>}

Blanking staff lines using the \whiteout command

The \whiteout command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

\layout {
  ragged-right = ##f
}
\relative c' {
  \override TextScript.extra-offset = #'(2 . 4)
c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```scheme
hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
    #(lambda (grob)
      (let* ((stencil (ly:hairpin::print grob))
        (par-y (ly:grob-parent grob Y))
        (dir (ly:grob-property par-y 'direction))
        (new-stencil (ly:stencil-aligned-to
          (ly:stencil-combine-at-edge
            (ly:stencil-aligned-to stencil X CENTER)
          Y dir
          (ly:stencil-aligned-to
            (grob-interpret-markup grob text) X CENTER))
        X LEFT))
      (staff-space (ly:output-def-lookup (ly:grob-layout grob) 'staff-space))
      (staff-line-thickness
        (ly:output-def-lookup (ly:grob-layout grob) 'line-thickness))
      (par-x (ly:grob-parent grob X))
      (dyn-text (grob::has-interface par-x 'dynamic-text-interface))
      (dyn-text-stencil-x-length
        (if dyn-text
          (interval-length
            (ly:stencil-extent (ly:grob-property par-x 'stencil) X))
          0))
      (x-shift
        (if dyn-text
          (-
            (+ staff-space dyn-text-stencil-x-length)
            (* 0.5 staff-line-thickness))
          0))
      (ly:grob-set-property! grob 'Y-offset 0)
      (ly:grob-set-property! grob 'stencil
        (ly:stencil-translate-axis
          new-stencil
          x-shift X)))))
  #})

hairpinMolto = \hairpinWithCenteredText \markup { \italic molto }

hairpinMore = \hairpinWithCenteredText \markup { \larger moltissimo }
```
Changing ottava text

Internally, \texttt{\ottava} sets the properties \texttt{ottavation} (for example, to 8va or 8vb) and \texttt{middleCPosition}. To override the text of the bracket, set \texttt{ottavation} after invoking \texttt{\ottava}.

Short text is especially useful when a brief ottava is used.

\begin{verbatim}
{  
c'2
  \ottava #1
  \set Staff.ottavation = #"8"
c''2
  \ottava #0
  c'1
  \ottava #1
  \set Staff.ottavation = #"Text"
c''1
}
\end{verbatim}
Changing the default text font family

The default font families for text can be overridden with \make-pango-font-tree.

\paper {
% change for other default global staff size.
myStaffSize = 20
%
  run
    lilypond -dshow-available-fonts blabla
  to show all fonts available in the process log.
%

#(define fonts
  (make-pango-font-tree "Times New Roman"
    "Nimbus Sans,Nimbus Sans L"
    "Luxi Mono"
    "Helvetica"
    "Courier"
    (/ myStaffSize 20)))
}

\relative c'2 { c'4 \markup {
  roman: foo \bold bla \italic bar \italic \bold baz
}
\override #'(font-family . sans)
{
  sans: foo \bold bla \italic bar \italic \bold baz
}
}
\override #'(font-family . typewriter)
{
  mono: foo \bold bla \italic bar \italic \bold baz
}
}

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a \markup block.

piuF = \markup { \italic piu \dynamic f }
Combining two parts on the same staff

The part combiner tool (\partcombine command) allows the combination of several different parts on the same staff. Text directions such as “solo” or “a2” are added by default; to remove them, simply set the property printPartCombineTexts to f. For vocal scores (hymns), there is no need to add “solo/a2” texts, so they should be switched off. However, it might be better not to use it if there are any solos, as they won’t be indicated. In such cases, standard polyphonic notation may be preferable.

This snippet presents the three ways two parts can be printed on a same staff: standard polyphony, \partcombine without texts, and \partcombine with texts.

%% Combining pedal notes with clef changes

\layout { ragged-right = ##f }
\relative c'' {
  c2\f c-\piuF
}

\score {
  \new Staff \with { instrumentName = "Standard polyphony" }
  \musicUp \musicDown
  \partcombine \musicUp \musicDown
  \new Staff \with { instrumentName = "PartCombine without text" }
    \partcombine \musicUp \musicDown
  \new Staff \with { instrumentName = "PartCombine with text" }
    \partcombine \musicUp \musicDown
}
Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a \markup block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the make-dynamic-script function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as \dynamicUp or \dynamicDown.

\layout {
  indent = 6.0\cm
  \context {
    \Score
    \override SystemStartBar.collapse-height = #30
  }
}

\relative c'' {
  c4\paren f c c \dynamicUp c\paren p
}

\paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #\{ \markup \concat {
      \normal-text \italic \fontsize #2 ( 
      \pad-x #0.2 #(ly:music-property dyn 'text)
      \normal-text \italic \fontsize #2 )
    }
    #})

\relative c'' {
  c4\paren f c c \dynamicUp c\paren p
}
Creating simultaneous rehearsal marks

Unlike text scripts, rehearsal marks cannot be stacked at a particular point in a score: only one \RehearsalMark object is created. Using an invisible measure and bar line, an extra rehearsal mark can be added, giving the appearance of two marks in the same column. This method may also prove useful for placing rehearsal marks at both the end of one system and the start of the following system.

\begin{verbatim}
\{ 
    \key a \major 
    \set Score.markFormatter = #format-mark-box-letters

\end{verbatim}

Creating text spanners

The \startTextSpan and \stopTextSpan commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the \TextSpanner object to modify its output.

\begin{verbatim}
\paper { ragged-right = ##f } 

\relative c' { 
    \override TextSpanner.bound-details.left.text = #'bla 
    \override TextSpanner.bound-details.right.text = #'blu 
    a4 \startTextSpan 
    b4 c 
    a4 \stopTextSpan 

    \override TextSpanner.style = #'line 
    \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER 
\end{verbatim}
Demonstrating all headers

All header fields with special meanings.

\header {
  copyright = "copyright"
  title = "title"
  subtitle = "subtitle"
  composer = "composer"
  arranger = "arranger"
  instrument = "instrument"
  metre = "metre"
  opus = "opus"
  piece = "piece"
  poet = "poet"
  texidoc = "All header fields with special meanings."
  copyright = "public domain"
  enteredby = "jcn"
  source = "urtext"
}

\layout {
  ragged-right = ##f
Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

% PostScript is a registered trademark of Adobe Systems Inc.

\relative c' { 
ad-\markup { \postscript "3 4 moveto 5 3 rlineto stroke" } 
-\markup { \postscript "[ 0 1 ] 0 setdash 3 5 moveto 5 -3 rlineto stroke " } 

b4-\markup { \postscript "3 4 moveto 0 0 1 2 8 4 20 3.5 rcurveto stroke" }
Formatting lyrics syllables

Markup mode may be used to format individual syllables in lyrics.

\mel = \relative c'' { c4 c c c }  
\lyr = \lyricmode { 
  \Lyrics \markup { \italic can } \markup { \with-color #red contain } 
  \markup { \fontsize #8 \bold Markup! } 
}

\new Voice = melody \mel 
\new Lyrics \lyricsto melody \lyr

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

\lyrics { 
  wa~o~a 
}

Lyrics alignment

Horizontal alignment for lyrics can be set by overriding the \self-alignment-X property of the \LyricText object. \#-1 is left, \#0 is center and \#1 is right; however, you can use \#LEFT, \#CENTER and \#RIGHT as well.

\layout { ragged-right = ##f } 
\relative c'' {
  c1  
  c1  
  c1 
}
\addlyrics {
  \once \override LyricText.self-alignment-X = #LEFT  
  "This is left-aligned" 
  \once \override LyricText.self-alignment-X = #CENTER
}
"This is centered"
\once \override LyricText.self-alignment-X = #1
"This is right-aligned"
\}

\markuplist {
\override-lines #'(baseline-skip . 2.5) {

  }\}
Il y avait en Westphalie, dans le château de M. le baron de Thunder-ten-tronckh, un jeune garçon à qui la nature avait donné les mœurs les plus douces. Sa physionomie annonçait son âme. Il avait le jugement assez droit, avec l'esprit le plus simple; c'est, je crois, pour cette raison qu'on le nommait Candide. Les anciens domestiques de la maison soupçonnaient qu'il était fils de la sœur de monsieur le baron et d'un bon et honnête gentilhomme du voisinage, que cette demoiselle ne voulut jamais épouser parce qu'il n'avait pu prouver que soixante et onze quartiers, et que le reste de son arbre généalogique avait été perdu par l'injure du temps.

Monsieur le baron était un des plus puissants seigneurs de la Westphalie, car son château avait une porte et des fenêtres. Sa grande salle même était ornée d'une tapisserie. Tous les chiens de ses basses-cours composaient une meute dans le besoin; ses palefreniers étaient ses piqueurs; le vicaire du village était son grand-aumônier. Ils l'appelaient tous monseigneur, et ils riaient quand il faisait des contes.
Multi-measure rest markup

Markups attached to a multi-measure rest will be centered above or below it. Long markups attached to multi-measure rests do not cause the measure to expand. To expand a multi-measure rest to fit the markup, use an empty chord with an attached markup before the multi-measure rest.

Text attached to a spacer rest in this way is left-aligned to the position where the note would be placed in the measure, but if the measure length is determined by the length of the text, the text will appear to be centered.

```
\relative c' {
\compressMMRests {
\textLengthOn
\markup { [MAJOR GENERAL] }
R1*19
\markup { \italic { Cue: ... it is yours } }
R1*30\markup { [MABEL] }
\textLengthOff
\markup { CHORUS } d f c
}
}
```

Ottava text

Internally, \ottava sets the properties ottavation (for example, to 8va or 8vb) and middleCPosition. To override the text of the bracket, set ottavation after invoking \ottava.

```
{\ottava #1
\set Staff.ottavation = #"8"
c''1
\ottava #0
c'1
\ottava #1\set Staff.ottavation = #"Text"
c''1
}
```

Outputting the version number

By putting the output of lilypond-version into a lyric, it is possible to print the version number of LilyPond in a score, or in a document generated with lilypond-book. Another possibility is to append the version number to the doc-string, in this manner:

```
\score {
```
Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```lilypond
upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4
  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4
  a2 c
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score {
  \new PianoStaff <<
    \new Staff = upper { \new Voice = "singer" \upper }
    \new Lyrics \lyricsto "singer" \text
    \new Staff = lower { \lower }
  >>
  \layout { }
  \midi { }
}
```

Processed with LilyPond version 2.20.0
Printing bar numbers with changing regular intervals

The bar number interval can be changed by changing the context function `{set-bar-number-visibility}`.
\relative c' {
\override Score.BarNumber.break-visibility = #end-of-line-invisible
\context Score \applyContext #(set-bar-number-visibility 4)
\repeat unfold 10 c'1
\context Score \applyContext #(set-bar-number-visibility 2)
\repeat unfold 10 c
}

Printing marks at the end of a line

Marks can be printed at the end of the current line, instead of the beginning of the following line. In such cases, it might be preferable to align the right end of the mark with the bar line.
\relative c'' {
g2 c
d,2 a'
\once \override Score.RehearsalMark.break-visibility = #end-of-line-visible
\once \override Score.RehearsalMark.self-alignment-X = #RIGHT
\mark "D.C. al Fine"
\break
g2 b,
c1 \bar "||"
}

Printing marks on every staff

Although text marks are normally only printed above the topmost staff, they may also be printed on every staff.
\score {
<<
\new Staff { c''1 \mark "molto" c'’ }

\new Staff { c'1 \mark "molto" c' }

>>
\layout {
  \context {
    \Score

\clefs {G} /\noteheads.s0

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with \override LyricText.extra-offset = #'(0 . dy) and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

<<
\new Staff <<
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {

Stand-alone two-column markup

Stand-alone text may be arranged in several columns using \markup commands:

\markup {
  \fill-line {
    \hspace #1
    \column {
      \line { O sacrum convivium }
      \line { in quo Christus sumitur, }
      \line { recolitur memoria passionis ejus, }
      \line { mens impletur gratia, }
      \line { futurae gloriae nobis pignus datur. }
      \line { Amen. }
    }
    \hspace #2
    \column { \italic {
      \line { O sacred feast }
      \line { in which Christ is received, }
      \line { the memory of His Passion is renewed, }
      \line { the mind is filled with grace, }
      \line { and a pledge of future glory is given to us. }
      \line { Amen. }
    } }
    \hspace #1
  }
}

O sacrum convivium  
O sacred feast
in quo Christus sumitur,  
in which Christ is received,
recolitur memoria passionis ejus,  
the memory of His Passion is renewed,
mens impletur gratia,  
the mind is filled with grace,
futurae gloriae nobis pignus datur.  
and a pledge of future glory is given to us.
Amen.  
Amen.

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

\set stringNumberSpanner =
#(define-music-function (StringNumber) (string?))
#
\override TextSpanner.style = #'solid
\override TextSpanner.font-size = #-5
\override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
\override TextSpanner.bound-details.left.text =
\markup { \circle \number $StringNumber }
#}

\relative c {
\clef "treble_8"
\stringNumberSpanner "5"
\textSpannerDown
a8\startTextSpan
b c d e f\stopTextSpan
\stringNumberSpanner "4"
g\startTextSpan a
bes4 a g2\stopTextSpan
}

Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";;" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
         (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
         (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
         (x-rule (make-filled-box-stencil
                   (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
  @code{box-padding} and @code{font-size} properties to determine line
thickness and padding around the markup.

(\let ((pad (* (magstep font-size) box-padding))
      (m (interpret-markup layout props arg)))
   (NWS-box-stencil m thickness pad)))

% Test it:

\relative c' {
  c1`\markup { \NWS-box ABCD }
  c1`\markup { \NWS-box \note "4" #1.0 }
}

\begin{Verbatim}
%\begin{verbatim}

Volta text markup using repeatCommands

Though volte are best specified using \repeat volta, the context property repeatCommands
must be used in cases where the volta text needs more advanced formatting with \markup.

Since repeatCommands takes a list, the simplest method of including markup is to use an
identifier for the text and embed it in the command list using the Scheme syntax #(list (list
'volta textIdentifier)). Start- and end-repeat commands can be added as separate list
elements:
voltaAdLib = \markup { 1. 2. 3... \text \italic { ad lib. } }

\relative c' '{
c1 \set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
c4 b d e \set Score.repeatCommands = #'((volta #f) (volta "4.")) end-repeat)
f1 \set Score.repeatCommands = #'((volta #f))
}

Adding orchestral cues to a vocal score

This shows one approach to simplify adding many orchestral cues to the piano reduction in a vocal score. The music function `\cueWhile` takes four arguments: the music from which the cue is to be taken, as defined by `\addQuote`, the name to be inserted before the cue notes, then either `#UP` or `#DOWN` to specify either `\voiceOne` with the name above the staff or `\voiceTwo` with the name below the staff, and finally the piano music in parallel with which the cue notes are to appear. The name of the cued instrument is positioned to the left of the cued notes. Many passages can be cued, but they cannot overlap each other in time.

cueWhile =
  #(define-music-function
    (instrument name dir music)
    (string? string? ly:dir? ly:music?)
  )

#(\cueDuring $instrument #dir {
  \once \override TextScript.self-alignment-X = #RIGHT
  \once \override TextScript.direction = $dir
  <-> \markup { \tiny #name }

  $music
flute = \relative c'' { \transposition c' 
s4 s4 e g }
\addQuote "flute" { \flute }

clarinet = \relative c' { \transposition bes 
  fis4 d d c }
\addQuote "clarinet" { \clarinet }

singer = \relative c'' { c4. g8 g4 bes4 }

words = \lyricmode { here's the lyr -- ics }

pianoRH = \relative c'' { \transposition c' 
  \cueWhile "clarinet" "Clar." #DOWN { c4. g8 } 
  \cueWhile "flute" "Flute" #UP { g4 bes4 } }

pianoLH = \relative c { c4 <c' e> e, <g c> }

\score { <<

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:
<<\new Staff \new Voice = melody \relative c' {
  c4 d e f
g4 f e d
c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa aa }
\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
g4 f e d
c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing = #'(basic-distance . 1))
}\lyricsto melody { aa aa aa aa aa aa aa aa aa }
>>

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the lyricMelismaAlignment property.
\score {
  <<\new Staff {
    \relative c''

...
Ambitus with multiple voices

Adding the Ambitus_engraver to the Staff context creates a single ambitus per staff, even in the case of staves with multiple voices.

\new Staff \with { \consists "Ambitus_engraver" } << \new Voice \relative c'' { \voiceOne c4 a d e f1 } \new Voice \relative c' { \voiceTwo es4 f g as b1 } >>

Ambitus

Ambitus indicate pitch ranges for voices.
Accidentals only show up if they are not part of the key signature. `AmbitusNoteHead` grobs also have ledger lines.

And the last line of the same

Lyrics alignment

Horizontal alignment for lyrics can be set by overriding the self-alignment-X property of the LyricText object. #-1 is left, #0 is center and #1 is right; however, you can use #LEFT, #CENTER and #RIGHT as well.

\layout { ragged-right = ##f }
\relative c'' { 
  c1
  c1
  c1
}
\addlyrics {
  \once \override LyricText.self-alignment-X = #LEFT
  "This is left-aligned"
  \once \override LyricText.self-alignment-X = #CENTER
  "This is centered"
  \once \override LyricText.self-alignment-X = #1
"This is right-aligned"
}

This is left-aligned This is centered This is right-aligned

Marking notes of spoken parts with a cross on the stem

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the \speakOn keyword, and end it with the \speakOff keyword.

\speakOn = {
  \override Stem.stencil =
    #(lambda (grob)
      (let* ((x-parent (ly:grob-parent grob X))
          (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
        (if is-rest?
            empty-stencil
          (ly:stencil-combine-at-edge
            (ly:stem::print grob)
            Y
            (- (ly:grob-property grob 'direction))
            (grob-interpret-markup grob
              (markup #:center-align #:fontsize -4
                      #:musicglyph "noteheads.s2cross")
              -2.3)))))
    )
  }
\speakOff = {
  \revert Stem.stencil
  \revert Flag.stencil
  }

Obtaining 2.12 lyrics spacing in newer versions

The vertical spacing engine changed since version 2.14. This can cause lyrics to be spaced differently.

It is possible to set properties for \texttt{Lyric} and \texttt{Staff} contexts to get the spacing engine to behave as it did in version 2.12.

\begin{verbatim}

Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

```latex
melody = \relative c' \{
    \clef treble
    \key c \major
    \time 4/4
    a b c d
}
```

```latex
text = \lyricmode
    Aaa Bee Cee Dee
}
```

```latex
upper = \relative c' \{
    \clef treble
    \key c \major
    \time 4/4
}
```
Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with \override LyricText.extra-offset = #'(0 . dy) and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

<< \new Staff <<
   \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 } 
>>
\new Lyrics \with {
   \override LyricText.extra-offset = #'(0 . 8.6)
   \override LyricExtender.extra-offset = #'(0 . 8.6)
   \override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la _ _ la }

Single staff template with notes lyrics chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

verseI = \lyricmode {
  \set stanza = #"1."
  This is the first verse
}

verseII = \lyricmode {
  \set stanza = #"2."
  This is the second verse.
}

theChords = \chordmode {
  % insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {
  \key c \major
  \clef treble
  % Type notes for melody here
  c4 d8 e f4 g
  \bar "|.
}

\score {
  <<
    \new ChordNames {
      \set chordChanges = ##t
      \harmonies
    }
    \new Voice = "one" { \autoBeamOff \melody }
    \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}
\context Voice = "voiceMelody" { \staffMelody }

\new Lyrics = "lyricsI" {
    \lyricsto "voiceMelody" \verseI
}
\new Lyrics = "lyricsII" {
    \lyricsto "voiceMelody" \verseII
}

>>
\layout { }
\midi { }
\}

C G C

1. This is the first verse
2. This is the second verse.

Single staff template with notes and lyrics
This small template demonstrates a simple melody with lyrics. Cut and paste, add notes, then words for the lyrics. This example turns off automatic beaming, which is common for vocal parts. To use automatic beaming, change or comment out the relevant line.

melody = \relative c' {
    \clef treble
    \key c \major
    \time 4/4
    a4 b c d
}

text = \lyricmode {
    Aaa Bee Cee Dee
}

\score{
    <<
    \new Voice = "one" {
        \autoBeamOff
        \melody
    }
    \new Lyrics \lyricsto "one" \text
    >>
    \layout { }
    \midi { }
\}
Skips in lyric mode (2)

Although skips cannot be used in \lyricmode (it is taken to be a literal “s”, not a space), double quotes (") or underscores (_), are available. So for example:

\rel c''' { a4 b c d }  
\new Lyrics \lyricmode { a4 "" _ gap }

Skips in lyric mode

The syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the \skip command is recommended.

\rel c''' { a1 a }  
\new Lyrics \lyricmode { \skip 1 bla1 }

Using arpeggioBracket to make divisi more visible

The \arpeggioBracket can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.

\include "english.ly"

\score {
  \relative c'' {
    \key a \major
    \time 2/2
    \new Voice = "upper"
    { \voiceOne \arpeggioBracket
      a2( b2
      <b d>1\arpeggio)
      <c e>\arpeggio ~
      <c e>4
    }
    \addlyrics { \lyricmode { A -- men. } }
  }  
  \new Voice = "lower"
Using tags to produce mensural and modern music from the same source

By using tags, it's possible to use the same music to produce both mensural and modern music. In this snippet, a function \texttt{menrest} is introduced, allowing mensural rests to be pitched as in the original, but with modern rests in the standard staff position. Tags are used to produce different types of bar line at the end of the music, but tags can also be used where other differences are needed: for example using "whole measure rests" (\texttt{R1}, \texttt{R\breve} etc.) in modern music, but normal rests (\texttt{r1}, \texttt{r\breve} etc.) in the mensural version. Note that converting mensural music to its modern equivalent is usually referred to as \textit{transcription}.

\begin{verbatim}
menrest = #(define-music-function (note)
  (ly:music?)
  #\{ 
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  #\})

MensStyle = {
  \autoBeamOff
  \override NoteHead.style = #'petrucci
  \override Score.BarNumber.transparent = ##t
  \override Stem.neutral-direction = #up
}

finalis = {
  \once \override BreathingSign.stencil = #ly:breathing-sign::finalis
  \once \override BreathingSign.Y-offset = #0
  \once \override BreathingSign.minimum-X-extent = #'(-1.0 . 0.0)
  \once \override BreathingSign.minimum-Y-extent = #'(-2.5 . 2.5)

  \breathe
}

Music = \relative c' {
  \set Score.tempoHideNote = ##t
  \key f \major
}\end{verbatim}
\time 4/4
gl d'2 \menrest bes4 bes2 a2 r4 g4 fis2.
\tag #'mens { \finalis }
\tag #'mod { \bar "||" }
}

\end{music}
Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties \alignBelowContext and \alignAboveContext to control the positioning of lyrics and ossias.

\paper {
  \raggedright = ##t
}

relative c' <<
new Staff = "1" { c4 c s2 }
new Staff = "2" { c4 c s2 }
new Staff = "3" { c4 c s2 }
{ \skip 2
  \lyrics {
    \set \alignBelowContext = "1"
    lyrics4 below
  }
  new Staff \with {
    \alignAboveContext = "3"
    fontSize = #-2
    \override StaffSymbol.staff-space = #(magstep -2)
    \remove "Time_signature_engraver"
  }
  \tuplet 6/4 {
    \override TextScript.padding = #3
c8["ossia above" d e d e f]
  }
}
>>

Vertically centered common lyrics

In a vocal piece where there are several (two, four or more) lines of lyrics and common lyrics for all voices at some point, the common lyrics may be made to appear vertically centered, as shown in the following example:
\dropLyrics = { \\
  \override LyricText.extra-offset = #'(0 . -4.5) \n  \override LyricHyphen.extra-offset = #'(0 . -4.5) \n  \override LyricExtender.extra-offset = #'(0 . -4.5) \n  \override StanzaNumber.extra-offset = #'(0 . -4.5) \n}

\raiseLyrics = { \\
  \revert LyricText.extra-offset \n  \revert LyricHyphen.extra-offset \n  \revert LyricExtender.extra-offset \n  \revert StanzaNumber.extra-offset \n}

\skipFour = \repeat unfold 4 { \skip 8 }

\lyricsA = \lyricmode { 
  The first verse has 
  \dropLyrics 
  \set stanza = #" All:" 
  the com -- mon __ words 
  \raiseLyrics 
  used in all four. 
}

\lyricsB = \lyricmode { In stan -- za two, \skipFour al -- so ap -- pear. }

\lyricsC = \lyricmode { By the third verse, \skipFour are get -- ting dull. }

\lyricsD = \lyricmode { Last stan -- za, and \skipFour get used once more. }

\melody = \relative c' { 
  c4 d e f |
  g f e8( e f) d |
  c4 e d c |
}

\score { 
  << 
  \new Voice = m \melody 
  \new Lyrics \lyricsto m \lyricsA 
  \new Lyrics \lyricsto m \lyricsB 
  \new Lyrics \lyricsto m \lyricsC 
  \new Lyrics \lyricsto m \lyricsD 
  >> 
}

The first verse has used in all four.
In stanza two, also appear.
By the third verse, all the common words are getting dull.
Last stanza, and get used once more.

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in “Vocal ensemble template”. This demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, tenorMusic), then the changes will also apply to the piano reduction.

Vocal ensemble template

Here is a standard four-part SATB vocal score. With larger ensembles, it is often useful to include a section which is included in all parts. For example, the time signature and key signature are almost always the same for all parts. Like in the “Hymn” template, the four voices are regrouped on only two staves.

Chords

Section “Chord notation” in Notation Reference

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the BassFigureAlignmentPositioning.direction property (exclusively in a Staff context). Choices are #UP (or #1), #CENTER (or #0) and #DOWN (or #−1).

This property can be changed as many times as you wish. Use \once \override if you don’t want the override to apply to the whole score.

```latex
bass = {
  \clef bass
  g4 b, c d
  e d8 c d2
}

continuo = \figuremode {
  <_.4 <6>4 <5/>4
  \override Staff.BassFigureAlignmentPositioning.direction = #UP
  \%bassFigureStaffAlignmentUp
  < _+ >4 <6>
  \set Staff.useBassFigureExtenders = ##t
  \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
  \%bassFigureStaffAlignmentDown
  <4>4. <4>8 <_.+>4
}

\score {
  \<<
    \new Staff = bassStaff \bass
    \context Staff = bassStaff \continuo
  >>
}

\chordmode {
  f1:maj7 f:7 bes:7
}
```

Adding bar lines to ChordNames context

To add bar line indications in the ChordNames context, add the Bar_engraver.

```latex
\new ChordNames \with {
  \override BarLine.bar-extent = #'(-2 . 2)
  \consists "Bar_engraver"
}
```

```latex
\chordmode {
  f1:maj7 f:7 bes:7
}
```
Avoiding collisions with chord fingerings

Fingerings and string numbers applied to individual notes will automatically avoid beams and stems, but this is not true by default for fingerings and string numbers applied to the individual notes of chords. The following example shows how this default behavior can be overridden.

\relative c' {
  \set fingeringsOrientations = #'(up)
  \set stringNumberOrientations = #'(up)
  \set strokeFingerOrientations = #'(up)
  % Default behavior
  r8
  <f c'-5>8
  <f c'\5>8
  <f c'-%rightHandFinger #2 >8
  % No tweak needed
  r8
  <f c'-5>8
  <f c'\5>8
  % Corrected to avoid collisions
  \override StrokeFinger.add-stem-support = ##t
  <f c'-%rightHandFinger #2 >8
}

Bar chords notation for Guitar (with Text Spanner)

Here is how to print bar chords (or barre chords) or half-bar chords (just uncomment the appropriate line for to select either one). The syntax is: \bbarre #'fret_number' note(s)

```scheme
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%% %%%%%%% Cut here ----- Start 'bbarred.ly'
%% C with slash -------------------------------
cWithSlash = \markup {
  \combine \roman C \translate #'(0.6 . -0.4) \draw-line #'(0 . 2.0)
} 
%% Span -----------------------------------
%% Syntax: \bbarre "text" { notes } - text = any number of box
bbarre = 
#(define-music-function (barre location str music) (string? ly:music?)
  (let ((elts (extract-named-music music '(NoteEvent EventChord))))
    (if (pair? elts)
      (let ((first-element (first elts))
        (last-element (last elts)))
        (set! (ly:music-property first-element 'articulations)
```

```scheme
```
Changing chord separator

The separator between different parts of a chord name can be set to any markup.

\chords {
  c:7sus4
  \set chordNameSeparator = \markup { \typewriter | }
  c:7sus4
}

C7 sus4 C7|sus4
Changing the chord names to German or semi-German notation

The english naming of chords (default) can be changed to german (\germanChords replaces B and Bes with H and B) or semi-german (\semiGermanChords replaces B and Bes with H and Bb).

```
scm = \chordmode {
   c1/c | cis/cis
   b1/b | bis/bis | bes/bes
}

\layout {
   ragged-right = ##t
   \context {\ChordNames \consists "Instrument_name_ engraver"
   }
}

<<

   \set instrumentName = "default"
   \scm
}
\new ChordNames {
   \set instrumentName = "german"
   \germanChords \scm
}
\new ChordNames {
   \set instrumentName = "semi-german"
   \semiGermanChords \scm
}
\new ChordNames {
   \set instrumentName = "italian"
   \italianChords \scm
}
\new ChordNames {
   \set instrumentName = "french"
   \frenchChords \scm
}
\context Voice { \scm }
>>
```
Changing the positions of figured bass alterations

Accidentals and plus signs can appear before or after the numbers, depending on the figuredBassAlterationDirection and figuredBassPlusDirection properties.

\figures {
  <6\>+> <5+> <6 4-> r
  \set figuredBassAlterationDirection = #RIGHT
  <6\>+> <5+> <6 4-> r
  \set figuredBassPlusDirection = #RIGHT
  <6\>+> <5+> <6 4-> r
  \set figuredBassAlterationDirection = #LEFT
  <6\>+> <5+> <6 4-> r
} 

+6 5 6 4 +6 5\# 6 \#4 6+ 5\# 6 \#4 6+ 5 6 \#4 

Chord name exceptions

The property chordNameExceptions can be used to store a list of special notations for specific chords.

% modify maj9 and 6(add9)
% Exception music is chords with markups
chExceptionMusic = {
  <c e g b d'>1-\markup { \super "maj9" } 
  <c e g a d'>1-\markup { \super "6(add9)" } 
}

% Convert music to list and prepend to existing exceptions.
chExceptions = #( append
  ( sequential-music-to-chord-exceptions chExceptionMusic #t)
  ignatzekExceptions)

theMusic = \chordmode {
  g1:maj9 g1:6.9
  \set chordNameExceptions = #chExceptions
  g1:maj9 g1:6.9
}

\layout {
  ragged-right = ##t
}
chord name major 7
The layout of the major 7 can be tuned with majorSevenSymbol.
\chords {
c:7+
  \set majorSevenSymbol = \markup { j7 }
c:7+
}
C\textsuperscript{7}  C\textsuperscript{7}

Clusters
Clusters are a device to denote that a complete range of notes is to be played.
fragment = \relative c' {
c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
e2 c
}

Controlling the placement of chord fingerings
The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, you must use a chord construct <> even if it is a single note.
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn’t detect collisions between staves using \override Staff.Beam.collision-voice-only = ##t

\new PianoStaff <<
\new Staff = up
\relative c' {
  <<
    \override Stem.cross-staff = ##t
    \override Stem.length = #19 % this is in half-spaces, % so it makes stems 9.5 staffspaces long
    \override Stem.Y-offset = #-6 % stems are normally lengthened % upwards, so here we must lower the stem by the amount % equal to the lengthening - in this case (19 - 7) / 2 % (7 is default stem length)
    e e e e }
  { s4
    \change Staff = "bottom"
    \override NoteColumn.ignore-collision = ##t
    c, c c }
>>
}
\new Staff = bottom
\relative c' {
  \clef bass
  \voiceOne
  g8 a g a g a g a
}
>>
Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

\[ \text{fixA} = \{ \]
\[ \text{\once \override Stem.length = #11} \]
\[ \} \]
\[ \text{fixB} = \{ \]
\[ \text{\once \override NoteHead.X-offset = #1.7} \]
\[ \text{\once \override Stem.length = #7} \]
\[ \text{\once \override Stem.rotation = #'(45 0 0)} \]
\[ \text{\once \override Stem.extra-offset = #'(-0.1 . -0.2)} \]
\[ \text{\once \override Flag.style = #'no-flag} \]
\[ \text{\once \override Accidental.extra-offset = #'(4 . -.1)} \]
\[ \} \]

\[ \text{\relative c'} { } \]
\[ \ll \{ \text{\fixA} \text{\<b d!>8} \} \ll \{ \text{\voiceThree \fixB \dis} \} \gg s \]

Manually break figured bass extenders for only some numbers

Figured bass often uses extenders to indicate continuation of the corresponding step. However, in this case Lilypond is in greedy-mode and uses extenders whenever possible. To break individual extenders, one can simply use a modifier \! to a number, which breaks any extender attributed to that number right before the number.

\[ \text{bassfigures} = \{ \text{\figuremode} \} \]
\[ \text{\set useBassFigureExtenders = ##t} \]
\[ \text{\<6 4\>\! <6 4\>\! <6 4\>\! \<6 4\!\> | \<6\! 4\!\> <6 4\> <6 4\!\> <6 4\> } \]

\[ \ll \text{\new Staff} \text{\relative c''} \{ \text{\c1 \c1} \} \ll \text{\new FiguredBass} \text{\bassfigures} \gg \]
Showing chords at changes

Chord names can be displayed only at the start of lines and when the chord changes.

```
harmonies = \chordmode {
  c1:m c:m \break c:m c:m d
}
```

```
\new ChordNames {
  \set chordChanges = ##t
  \harmonies
}
\new Staff {
  \relative c' { \harmonies }

```

Simple lead sheet

When put together, chord names, a melody, and lyrics form a lead sheet:

```
\chords { c2 g:sus4 f e }
\relative c'' {
  a4 e c8 e r4
  b2 c4( d)
}
\addlyrics { One day this shall be free __ }
```

```
C G\textsuperscript{sus4} F E
```

One day this shall be free_

Single staff template with notes lyrics and chords

This template allows the preparation of a song with melody, words, and chords.

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4
```
Single staff template with notes lyrics chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

\verseI = \lyricmode {
  \set stanza = "1."
  This is the first verse
}

\verseII = \lyricmode {
  \set stanza = "2."
  This is the second verse.
}

\theChords = \chordmode {
  % insert chords for chordnames and fretboards here
  c2 g4 c
}

\staffMelody = \relative c' {
  \key c \major
  \clef treble
  % Type notes for melody here
Want to prepare a lead sheet with a melody and chords? Look no further!

melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  f4 e8[ c] d4 g
  a2 ~ a
}

harmonies = \chordmode {
  c4:m f:min7 g:maj c:aug
d2:dim b4:5 e:sus
}

\score {
  \new ChordNames {
    \set chordChanges = ##t

  }
Vertically centering paired figured bass extenders

Where figured bass extender lines are being used by setting `useBassFigureExtenders` to true, pairs of congruent figured bass extender lines are vertically centered if `figuredBassCenterContinuations` is set to true.

```latex
<<
\score {
  \relative c' {
    c8 c b b a a c16 c b b
    c8 c b b a a c16 c b b
    c8 c b b a a c c b b
  }
  \figures {
    \set useBassFigureExtenders = ##t
    <6+ 4 3>4 <6 4 3>8 r
    <6+ 4 3>4 <6 4 3>8 <4 3>16 r
    \set figuredBassCenterContinuations = ##t
    <6+ 4 3>4 <6 4 3>8 r
    <6+ 4 3>4 <6 4 3>8 <4 3>16 r
    \set figuredBassCenterContinuations = ##f
    <6+ 4 3>4 <6 4 3>8 r
    <6+ 4 3>4 <6 4 3>8 <4 3>8
  }
}>
```

Volta below chords

By adding the `Volta_engraver` to the relevant staff, volte can be put under chords.

```latex
<<
\score {
  \chords {
    c1
    c1
  }
}>
```
\new Staff \with {
  \consists "Volta_engraver"
}
{
  \repeat volta 2 { c'1 }
  \alternative { c' }
}

\layout {
  \context {
    \Score
    \remove "Volta_engraver"
  }
}

Section “Keyboard and other multi-staff instruments” in Notation Reference

Accordion-discant symbols

This snippet has been obsoleted by predefined markup commands, see 'Accordion Registers' in the Notation Reference. It’s still useful as a simple demonstration of how to combine symbols: the placement of the symbols added with \markup can be tweaked by changing the \translate-scaled arguments. \translate-scaled is used here rather than \translate in order to let the positioning of the symbol parts adapt to changes of font-size.

discant = \markup {\musicglyph "accordion.discant"}
dot = \markup {\musicglyph "accordion.dot"}

\layout { ragged-right = ##t }

% 16 voets register
accBasson = ^\markup {\combine \discant \translate-scaled #'(0 . 0.5) \dot}

Accordion register symbols

Accordion register symbols are available as \markup as well as as standalone music events (as register changes tend to occur between actual music events. Bass registers are not overly standardized. The available commands can be found in 'Accordion Registers' in the Notation Reference.

#(use-modules (scm accreg))

\new PianoStaff
<<
\new Staff \relative {

  }
Changing the text for sustain markings

`Staff.pedalSustainStrings` can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.

```latex
\relative c' {
\sustainNotes
\set Staff.pedalSustainStrings = #'("P" "P-" ")
\sustainNotes
\set Staff.pedalSustainStrings = #'("d" "de" "e")
\sustainNotes
\set Staff.pedalSustainStrings = #'("M" "M-" ")
\sustainNotes
\set Staff.pedalSustainStrings = #'("Ped" "*Ped" "*")
\sustainNotes
}
```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```latex
fragment = \relative c' {
    c4 f <e d'>4
    <g a>8 <e a> a4 c2 <d b>4
e2 c
```
Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, you must use a chord construct `<>` even if it is a single note.

```
\relative c' {
\set fingeringOrientations = #'(left)
<\c-1 e-3 a-5>4
\set fingeringOrientations = #'(down)
<\c-1 e-3 a-5>4
\set fingeringOrientations = #'(down right up)
<\c-1 e-3 a-5>4
\set fingeringOrientations = #'(up)
<\c-1 e-3 a-5>4
\set fingeringOrientations = #'(left)
<\c-1>2
\set fingeringOrientations = #'(down)
<\e-3>2
```

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices.

The solution is to add invisible notes to one of the voices, using \hideNotes.

This example is measure 235 of the Ciaconna from Bach’s 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
<<
{ 
    d16( a') s a s a[ s a] s a[ s a]
}
```
Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn’t detect collisions between staves using \override Staff.Beam.collision-voice-only = ##t

\new PianoStaff <<
\new Staff = up
\relative c' {
<<
r4
\override Stem.cross-staff = ##t
\override Stem.length = #19 % this is in half-spaces,
% so it makes stems 9.5 staffspaces long
\override Stem.Y-offset = #-6 % stems are normally lengthened
% upwards, so here we must lower the stem by the amount
% equal to the lengthening - in this case (19 - 7) / 2
% (7 is default stem length)
ee e e e }
{ s4
\change Staff = "bottom"
\override NoteColumn.ignore-collision = ##t
c, c c }
>>
\new Staff = bottom
\relative c' {
\clef bass
Cross-staff tremolos

Since \repeat tremolo expects exactly two musical arguments for chord tremolos, the note or chord which changes staff within a cross-staff tremolo should be placed inside curly braces together with its \change Staff command.

\new PianoStaff <<
\new Staff = "up" \relative c'' {
   \key a \major
   \time 3/8
   s4.
}
\new Staff = "down" \relative c'' {
   \key a \major
   \time 3/8
   \voiceOne
   \repeat tremolo 6 {
      <a e'>32
      {
         \change Staff = "up"
         \voiceTwo
         <cis a' dis>32
      }
   }
}
>>

Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.
\paper { ragged-right = ##f } \relative c'' {
   c2\sostenutoOn c
Indicating cross-staff chords with arpeggio bracket

An arpeggio bracket can indicate that notes on two different staves are to be played with the same hand. In order to do this, the PianoStaff must be set to accept cross-staff arpeggios and the arpeggios must be set to the bracket shape in the PianoStaff context.

(Debussy, Les collines d’Anacapri, m. 65)

\new PianoStaff <<
\set PianoStaff.connectArpeggios = ##t
\override PianoStaff.Arpeggio.stencil = #ly:arpeggio::brew-chord-bracket

    \new Staff = "upper" \upper
    \new Staff = "lower" \lower
  >>
  \layout { }
  \midi { }
}
\end{Verbatim}
```

Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```latex
\begin{Verbatim}
upper = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4
```

```latex
\end{Verbatim}
```
Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

```music
\score {

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in “Vocal ensemble template”. This demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, `tenorMusic`), then the changes will also apply to the piano reduction.

```

Percussion

Section “Percussion” in Notation Reference

Adding drum parts

Using the powerful pre-configured tools such as the \drummode function and the DrumStaff context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

\drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
\drl = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
\timb = \drummode {
  timh4 ssh timl8 ssh r timh r4
  ssh8 timl r4 cb8 cb
}

\score {
  \new DrumStaff \with {
    instrumentName = "timbales"
    drumStyleTable = #timbales-style
    \override StaffSymbol.line-count = #2
    \override BarLine.bar-extent = #'(-1 . 1)
  }
  \new DrumStaff \with { instrumentName = "drums" }
  \new DrumVoice { \stemUp \drh }
  \new DrumVoice { \stemDown \drl }
}

\layout { }
\midi { \tempo 4 = 120 }

\begin{Verbatim}
\verbatimcode
\drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
\drl = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
\timb = \drummode {
  timh4 ssh timl8 ssh r timh r4
  ssh8 timl r4 cb8 cb
}
\end{Verbatim}
Heavily customized polymetric time signatures

Though the polymetric time signature shown was not the most essential item here, it has been included to show the beat of this piece (which is the template of a real Balkan song!).

```
\relative c' { 
  \key g \major 
  \compoundMeter #'((3 8) (2 8) (2 8) (3 8) (2 8) (2 8) (2 8) (2 8))
  c8 c c d4 c8 c b c b a4 g fis8 e d c b' c d e4- fis8 g \break 
  c,4. d4 c4 d4. c4 d c2 d4. e4- d4 
  c4. d4 c4 d4. c4 d c2 d4. e4- d4 \break 
  c4. d4 c4 d4. c4 d c2 d4. e4- d4 \break 
  c4. d4 c4 d4. c4 d c2 d4. e4- d4 \break 
}
```

```
\new Staff \with { 
  instrumentName = \markup { \concat { "B" \flat " Sop." } } 
}
```

```
\melody \drum
```

```
\new DrumStaff \drummode { 
  \bar ":-|:" bd4.\markup { Drums } sn4 bd \bar ":|:" sn4. 
  bd4 sn \bar ":|:" bd sn bd4. sn4 bd \bar ":-|:" 
}
```

```
\new Staff \with { 
  instrumentName = \markup { \concat { "B" \flat " Sop." } } 
}
```

```
\melody \drum
```
Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments are notated in \key c \major. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a \transpose section.

\header {
  title = "Song"
  subtitle = "(tune)"

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized. The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the Default_barline_engraver and Timing_translator are moved from the Score context to the Staff context.

If bar numbers are required, the Bar_number_engraver should also be moved, since it relies on properties set by the Timing_translator; a \with block can be used to add bar numbers to the relevant staff.

\paper {

Fretted strings

Section “Fretted string instruments” in Notation Reference

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

\relative c'' {
  c4-1 d-2 f-4 e-3
}

Adding fingerings to tablatures

To add fingerings to tablatures, use a combination of \markup and \finger.

one = \markup { \finger 1 }
two = \markup { \finger 2 }
threeTwo = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 2
  }
}
threeFour = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 4
  }
}
\score {
  \new TabStaff {
    \tabFullNotation
    \stemUp
e8\"\one b\2 <g\3 e\'\1>^[b\2 e\4]
    <a\3 fis\'\1>^[threeTwo[ b\2 e\4]
  }
}
Adding markups in a tablature

By default markups does not show in a tablature. To make them appear, simply use the command `\revert TabStaff.TextScript.stencil`

%% http://lsr.di.unimi.it/LSR/Item?id=919
% by P.P.Schneider on June 2014

\[\begin{align*}
\text{high} &= \{ r4 \ r8 \ <g \ c'> \ q \ r8 \ r4 \} \\
\text{low} &= \{ c4 \ r4 \ c8 \ r8 \ g,8 \ b, \} \\
\text{pulse} &= \{ \text{s8}^"1" \ \text{s}^"2" \ \text{s}^"3" \ \text{s}^"4" \ \text{s}^"5" \ \text{s}^"6" \}
\end{align*}\]

\score { \\
\new TabStaff { \\
\repeat unfold 2 << \high \ \low \ \pulse >>
} \\
\layout {
\context { \\
\TabStaff \\
\clef moderntab \\
\revert TextScript.stencil \\
\override TextScript.font-series = #'bold \\
\override TextScript.font-size = #-2 \\
\override TextScript.color = #red
}
\context { \\
\Score \\
proportionalNotationDuration = #(ly:make-moment 1/8)
}
}

<p>| |</p>
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>T</td>
</tr>
<tr>
<td>A</td>
</tr>
<tr>
<td>B</td>
</tr>
</tbody>
</table>

\[\begin{array}{c|c|c|}
T & 1-1 & 1-1 \\
A & 0-0 & 0-0 \\
B & 3-3-3 & 3-3-3
\end{array}\]

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff. However, this behavior can be canceled. Note: you must use a chord construct `<>`, even if it is only a single note.

\relative c' { \\
<\text{c-1} \ e-2 \ g-3 \ b-5>2 \\
\override Fingering.staff-padding = #'()
<\text{c-1} \ e-2 \ g-3 \ b-5>4 <g'-0>
}

Bar chords notation for Guitar (with Text Spanner)

Here is how to print bar chords (or barre chords) or half-bar chords (just uncomment the appropriate line for to select either one). The syntax is: \bbarre #'fret_number' note(s)

%(%%%%%% Cut here ----- Start 'bbarred.ly'

%(%% C with slash -------------------------------
cWithSlash = \markup {
   \combine \roman C \translate #'(0.6 . -0.4) \draw-line #'(0 . 2.0)
}
%(%% Span -----------------------------------
%(%% Syntax: \bbarre #"text" { notes } - text = any number of box
bbarre =
%(#(define-music-function (barre location str music) (string? ly:music?)

         (padding . 0.25)
         (attach-dir . -2))
      (right
         (text . ,#{ \markup { \cWithSlash #str } #})
         (Y . 0)
         (padding . 0.25)
         (attach-dir . 2)))
%(%% uncomment this line for make full barred
   % \once \override TextSpanner.bound-details.left.text = \markup{"B" #str}
   $music
   #})

%(%%%%%% Cut here ----- End 'bbarred.ly'
%(%% Copy and change the last line for full barred. Rename in 'fbarred.ly'
Changing fret orientations

Fret diagrams can be oriented in three ways. By default the top string or fret in the different orientations will be aligned.

\include "predefined-guitar-fretboards.ly"

<<
\chords {
  c1
  c1
  c1
}
\new FretBoards {
  \chordmode {
    c1
    \override FretBoard.fret-diagram-details.orientation = #'landscape
    c1
    \override FretBoard.fret-diagram-details.orientation = #'opposing-landscape
    c1
  }
}
\new Voice {
  c'1
  c'1
  c'
}
>>
Chord glissando in tablature

Slides for chords are indicated by default in both Staff and TabStaff. String numbers are necessary for TabStaff because automatic string calculations are different for chords and for single notes.

```
myMusic = \relative c' {
  <c e g>1 \glissando <f a c>
}
```

```
\score {
  \new Staff {
    \clef "treble_8"
    \myMusic
  }
  \new TabStaff \myMusic
}
```

```
\score {
  \new Staff {
    \clef "treble_8"
    \myMusic
  }
  \new TabStaff \with { \override Glissando.style = #'none } { \myMusic
  }
}
```

ChordChanges for FretBoards

FretBoards can be set to display only when the chord changes or at the beginning of a new line.

\include "predefined-guitar-fretboards.ly"
Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, you must use a chord construct <> even if it is a single note.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
```
Customizing fretboard fret diagrams

Fret diagram properties can be set through `fret-diagram-details`. For FretBoard fret diagrams, overrides are applied to the `FretBoards.FretBoard` object. Like `Voice`, `FretBoards` is a bottom level context, therefore can be omitted in property overrides.

```
\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }
#guitar-tuning
#"x;1-1-;3-2;3-3;3-4;1-1-;"

<<
\new ChordNames {
  \chordmode { c1 | c | c | d }
}
\new FretBoards {
  \% Set global properties of fret diagram
  \override FretBoards.FretBoard.size = #'1.2
  \override FretBoard.fret-diagram-details.finger-code = #'in-dot
  \override FretBoard.fret-diagram-details.dot-color = #'white
  \chordmode {
    c
    \once \override FretBoard.size = #'1.0
    \once \override FretBoard.fret-diagram-details.barre-type = #'straight
    \once \override FretBoard.fret-diagram-details.dot-color = #'black
    \once \override FretBoard.fret-diagram-details.finger-code = #'below-string
    c'
    \once \override FretBoard.fret-diagram-details.barre-type = #'none
    \once \override FretBoard.fret-diagram-details.number-type = #'arabic
    \once \override FretBoard.fret-diagram-details.orientation = #'landscape
    \once \override FretBoard.fret-diagram-details.mute-string = #"M"
    \once \override FretBoard.fret-diagram-details.label-dir = #LEFT
    \once \override FretBoard.fret-diagram-details.dot-color = #'black
    c'
    \once \override FretBoard.fret-diagram-details.finger-code = #'below-string
    \once \override FretBoard.fret-diagram-details.dot-radius = #0.35
    \once \override FretBoard.fret-diagram-details.dot-position = #0.5
    \once \override FretBoard.fret-diagram-details.fret-count = #3
    d
  }
}
\new Voice {
  c'1 | c' | c' | d'
}
Customizing markup fret diagrams

Fret diagram properties can be set through `fret-diagram-details`. For markup fret diagrams, overrides can be applied to the `Voice.TextScript` object or directly to the markup.

```
<<
\chords { c1 | c | c | d }
\new Voice = "mel" {
% Set global properties of fret diagram
\override TextScript.size = #'1.2
\override TextScript.fret-diagram-details.finger-code = #'in-dot
% C major for guitar, no barre, using defaults
% terse style
\markup { \fret-diagram-terse "x;3-3;2-2;o;1-1;o;" }
% C major for guitar, barred on third fret
% verbose style
% size 1.0
% roman fret label, finger labels below string, straight barre
\markup {
% standard size
\override #"(size . 1.0) {
\override #"(fret-diagram-details . (number-type . roman-lower)
(finger-code . in-dot)
(barre-type . straight))) {
\fret-diagram-verbose #"((mute 6)
(place-fret 5 3 1)
(place-fret 4 5 2)
(place-fret 3 5 3)
(place-fret 2 5 4)
(place-fret 1 3 1)
(barre 5 1 3))
}
}
% C major for guitar, barred on third fret
% verbose style
```
Defining predefined fretboards for other instruments

Predefined fret diagrams can be added for new instruments in addition to the standards used for guitar. This file shows how this is done by defining a new string-tuning and a few predefined fretboards for the Venezuelan cuatro.

This file also shows how fingerings can be included in the chords used as reference points for the chord lookup, and displayed in the fret diagram and the TabStaff, but not the music.
These fretboards are not transposable because they contain string information. This is planned to be corrected in the future.

% add FretBoards for the Cuatro
% Note: This section could be put into a separate file
% predefined-cuatro-fretboards.ly
% and \included into each of your compositions

Fretted strings

This example combines left-hand fingering, string indications, and right-hand fingering.

$(\text{define RH rightHandFinger})$

Flamenco notation

For flamenco guitar, special notation is used:

* a golpe symbol to indicate a slap on the guitar body with the nail of the ring finger *
* an arrow to indicate (the direction of) strokes *
* different letters for fingering (“p”: thumb, “i”: index finger, “m”: middle finger, “a”: ring finger and “x”: little finger) *
* 3- and 4-finger rasgueados; stroke upwards with all fingers, ending with an up- and down using the index finger *
* abanicos: strokes (in tuples) with thumb (down), little and index finger (both up). There’s also an abanico 2 where middle and ring finger are used instead of the little finger. * alza pua: fast playing with the thumb

Most figures use arrows in combination with fingering; with abanicos and rasgueados, note-heads are printed only for the first chord.

This snippet contains some header-like code that can be copied as ‘flamenco.ly’ and included in source files.

Fretboards alternate tables

Alternate fretboard tables can be created. These would be used in order to have alternate fretboards for a given chord.

In order to use an alternate fretboard table, the table must first be created. Fretboards are then added to the table.

The created fretboard table can be blank, or it can be copied from an existing table. The table to be used in displaying predefined fretboards is selected by the property `\predefinedDiagramTable`.

```latex
\include "predefined-guitar-fretboards.ly"
```

% Make a blank new fretboard table
#(define custom-fretboard-table-one (make-fretboard-table))

% Make a new fretboard table as a copy of default-fret-table
#(define custom-fretboard-table-two (make-fretboard-table default-fret-table))

% Add a chord to custom-fretboard-table-one
\storePredefinedDiagram #custom-fretboard-table-one
\chordmode{c}
#guitar-tuning
"3-;3;5;5;5;3-;"

% Add a chord to custom-fretboard-table-two
\storePredefinedDiagram #custom-fretboard-table-two
\chordmode{c}
#guitar-tuning
"x;3;5;5;5;o;"

Guitar slides

Unlike glissandos, slides may go from an imprecise point of the fretboard to a specific fret. A good way to do this is to add a hidden grace note before the note which is actually played, as demonstrated in the following example.

%% Hide fret number: useful to draw slide into/from a casual point of
%% the fretboard.
hideFretNumber = {
    \once \hide TabNoteHead
    \once \hide NoteHead
    \once \hide Stem
    \once \override NoteHead.no-ledgers = ##t
    \once \override Glissando.bound-details.left.padding = #0.3
}

music= \relative c' {
    \grace { \hideFretNumber d8\2 \glissando s2 } g2\2
    \grace { \hideFretNumber g8\2 \glissando s2 } d2 |

    \grace { \hideFretNumber c,8 \glissando s } f4\5\markup \tiny { Slide into }
    \grace { \hideFretNumber f8 \glissando s } a4\4
    \grace { \hideFretNumber e'8\3 \glissando s } b4\3\markup \tiny { Slide from }
    \grace { \hideFretNumber b'8 \glissando s2 } g4 |
}

\score {

    \improvisationOn
    c4 c8 c c4 c8 c
    f4 f8 f f4 f8 f
    g4 g8 g g4 g8 g
    c4 c8 c c4 c8 c
  }
}
\new Voice = "melody" {
  \relative c'' {
    c2 e4 e4
    f2. r4
    g2. a4
    e4 c2.
  }
}
\new Lyrics {
  \lyricsto "melody" {
    This is my song.
    I like to sing.
  }
}
>>
Hammer on and pull off using chords

When using hammer-on or pull-off with chorded notes, only a single arc is drawn. However “double arcs” are possible by setting the doubleSlurs property to \#t.

```latex
\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g' b>8( <a c> <g b>)
  }
}
```

Hammer on and pull off using voices

The arc of hammer-on and pull-off is upwards in voices one and three and downwards in voices two and four:

```latex
\new TabStaff {
  \relative c' {
    \<< { \voiceOne g2( a) } \\
    \\ { \voiceTwo a,( b) } \\
    \>> \oneVoice
  }
}
```

Hammer on and pull off

Hammer-on and pull-off can be obtained using slurs.

```latex
\new TabStaff {
  \relative c' {
    d4( e\2)
    a( g)
  }
}
```
How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

1) modify #$padding or #$extra-offset values (as shown in the first snippet)

2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```
harmonies = \chordmode
{

Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments are notated in \key c \major. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a \transpose section.

\header {
  title = "Song"
  subtitle = "(tune)"
  composer = "Me"
  meter = "moderato"
  piece = "Swing"
  tagline = \markup {
    \column {
      "LilyPond example file by Amelie Zapf,"
      "Berlin 07/07/2003"
    }
  }
}

% To make the example display in the documentation

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using `tie-configuration`.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
  <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

  <c d e f>4\laissezVibrer r
  \override LaissezVibrerTieColumn.tie-configuration
    = #'(( -7 ,DOWN)
      (-5 ,DOWN)
      (-3 ,UP)
      (-1 ,UP))
  <c d e f>4\laissezVibrer r
}
```
Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost`-context-property. For a context-wide setting this could be done in layout as well.

```
% \layout {
% \context {
% \Score
%   stringOneTopmost = ##f
% }
% \context {
% \TabStaff
%   tablatureFormat = #fret-letter-tablature-format
% }
%}

m = {
  \cadenzaOn
  e, b, e gis! b e'
  \bar "||"
}

<< \new Staff { \clef "G_8" <>_"default" \m <>_"italian (historic)"
 \new TabStaff
 { 
   \m
   \set \Score.stringOneTopmost = ##f
   \set \TabStaff.tablatureFormat = #fret-letter-tablature-format
   \m
 }
} >>
```

![Tabstaff example](image)

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```
music = \relative c {
  c4 d e f
g4 a b c
d4 e f g
}
```
Open string harmonics in tablature

This snippet demonstrates open-string harmonics

openStringHarmonics = {
    textSpannerDown
    \override TextSpanner.staff-padding = #3
    \override TextSpanner.dash-fraction = #0.3
    \override TextSpanner.dash-period = #1

\score {
  \new Staff
  \with { \omit StringNumber } { 
    \new Voice {
      \clef "treble_8"
      \openStringHarmonics 
    }
  }
  \new TabStaff {
    \new TabVoice { 
      \openStringHarmonics 
    }
  }
}
Placement of right-hand fingerings

It is possible to exercise greater control over the placement of right-hand fingerings by setting a specific property, as demonstrated in the following example. Note: you must use a chord construct

#(define RH rightHandFinger)

\relative c {
  \clef "treble_8"

  \set strokeFingerOrientations = #'(up down)
  <c-\RH #1 e-\RH #2 g-\RH #3 c-\RH #4 >4

  \set strokeFingerOrientations = #'(up right down)
  <c-\RH #1 e-\RH #2 g-\RH #3 c-\RH #4 >4

  \set strokeFingerOrientations = #'(left)
  <c-\RH #1 e-\RH #2 g-\RH #3 c-\RH #4 >2
}
Polyphony in tablature

Polyphony is created the same way in a TabStaff as in a regular staff.

```music
upper = \relative c' { \\
  \time 12/8 \\
  \key e \minor \\
  \voiceOne \\
  r4. r8 e, fis g16 b g e ' b c b a g fis e 
}
lower = \relative c { \\
  \key e \minor \\
  \voiceTwo \\
  r16 e d c b a g4 fis8 e fis g a b c 
}
```

\score { 
  \new \StaffGroup = "tab with traditional" << 
  \new \Staff = "guitar traditional" << 
    \clef "treble_8" 
    \context Voice = "upper" \upper 
    \context Voice = "lower" \lower 
  >> 
  \new \TabStaff = "guitar tab" << 
    \context TabVoice = "upper" \upper 
    \context TabVoice = "lower" \lower 
  >> 
  >> 
}

Slides in tablature

Slides can be typeset in both Staff and TabStaff contexts:

```music
slides = { 
  c'8\3\glissando d'8\3 
  c'8\3\glissando d'8\3 
  \hideNotes 
  \grace { g16\glissando } 
  \unHideNotes 
  c'4\3 
  \afterGrace d'4\3\glissando 
```
\stemDown \hideNotes
g16 }
\unHideNotes
}
\score {
<<
\new Staff { \clef "treble_8" \slides }
\new TabStaff { \slides }
>>
\layout {
\context {
\Score
\override Glissando.minimum-length = #4
\override Glissando.springs-and-rods =
##ly:spanner::set-spacing-rods
\override Glissando.thickness = #2
\omit StringNumber
% or:
%\override StringNumber.stencil = ##f
}
}
}

Stem and beam behavior in tablature

The direction of stems is controlled the same way in tablature as in traditional notation. Beams can be made horizontal, as shown in this example.
\new TabStaff {
\relative c {
\tabFullNotation
g16 b d g b d g b
\stemDown
\override Beam.concaveness = #10000
g,,16 b d g b d g b
}
}
String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

\[\text{stringNumberSpanner} =\]

\#(define-music-function (StringNumber) (string?))

\#

\override TextSpanner.style = #'solid
\override TextSpanner.font-size = #(-5)
\override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
\override TextSpanner.bound-details.left.text =
\markup { \circle \number $\text{StringNumber} \} #)}

\relative c {\clef "treble_8"

\textSpannerDown
a8\startTextSpan
b c d e f\stopTextSpan
\stringNumberSpanner "4"
g\startTextSpan a
bes4 a g2\stopTextSpan
}
Unfretted strings

Section “Unfretted string instruments” in Notation Reference

Changing \flageolet mark size

To make the \flageolet circle smaller use the following Scheme function.

```scheme
smallFlageolet = (let ((m (make-articulation "flageolet")))
  (set! (ly:music-property m 'tweaks)
    (acons 'font-size -3
    (ly:music-property m 'tweaks)))
  m)
```

\layout { ragged-right = ##f }

\relative c'' {
  d4\flageolet\markup { default size } d\flageolet
  c4\smallFlageolet\markup { smaller } c\smallFlageolet
}

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices.

The solution is to add invisible notes to one of the voices, using \hideNotes.

This example is measure 235 of the Ciaconna from Bach’s 2nd Partita for solo violin, BWV 1004.

\relative c' {
  \slurUp
  \hideNotes a'( s a s a[ s a] s a[ s a]
  \unHideNotes a
  \unHideNotes f[(
    \hideNotes a)
  \unHideNotes fis)(
    \hideNotes a)
  \unHideNotes g[(
    \hideNotes a)
  \unHideNotes gis)(
    \hideNotes a)
  >>
}
Dotted harmonics

Artificial harmonics using \harmonic do not show dots. To override this behavior, set the context property harmonicDots.

\relative c'' {
    \time 3/4
    \key f \major
    \set harmonicDots = ##t
    <bes f'\harmonic>2. ~
    <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
    <fis cis'\harmonic>2.
    <bes f'\harmonic>2.
}

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

\relative c' {
    c4\snappizzicato
    <c' e g>4\snappizzicato
    <c' e g>4\_\snappizzicato
    <c, e g>4\_\snappizzicato
}

String quartet template (simple)

This template demonstrates a simple string quartet. It also uses a \global section for time and key signatures

\global = {
    \time 4/4
    \key c \major
}
Unfretted strings

violinOne = \new Voice \relative c' { 
c2 d

\layout { } 
\midi { } 
}
String quartet template with separate parts

The “String quartet template” snippet produces a nice string quartet, but what if you needed to print parts? This new template demonstrates how to use the \tag feature to easily split a piece into individual parts.

You need to split this template into separate files; the filenames are contained in comments at the beginning of each file. piece.ly contains all the music definitions. The other files – score.ly, vn1.ly, vn2.ly, vla.ly, and vlc.ly – produce the appropriate part.

Do not forget to remove specified comments when using separate files!

%%%%% piece.ly
%%%%% (This is the global definitions file)

global= {

Winds

Section “Wind instruments” in Notation Reference

Changing the size of woodwind diagrams

The size and thickness of woodwind diagrams can be changed.

\relative c’ { \textLengthOn
 c1 \markup
 \woodwind-diagram #’piccolo #’()

 c \markup
 \override #’(size . 1.5) { \woodwind-diagram #’piccolo #’()
  }
 c \markup
 \override #’(thickness . 0.15) { \woodwind-diagram #’piccolo #’()
  }
}

Fingering symbols for wind instruments

Special symbols can be achieved by combining existing glyphs, which is useful for wind instruments.

centermarkup = {
  \once \override TextScript.self-alignment-X = #CENTER
  \once \override TextScript.X-offset =#(lambda (g)
    (+ (ly:self-alignment-interface::centered-on-x-parent g)
      (ly:self-alignment-interface::x-aligned-on-self g)))}
Flute slap notation

It is possible to indicate special articulation techniques such as a flute “tongue slap” by replacing the note head with the appropriate glyph.

\[\text{slap} = \]

#(define-music-function (music) (ly:music?)
  #(lambda (grob)
    (let* ((thickness (ly:staff-symbol-line-thickness grob))
           (dir (ly:grob-property grob 'direction UP)))
      (cons 1 (+ (if (= dir DOWN) 0.5 0)
                 (/ thickness 2)))))
#music
\revert NoteHead.stencil
\revert NoteHead.stem-attachment
#}
Graphical and text woodwind diagrams

In many cases, the keys other than the central column can be displayed by key name as well as by graphical means.

Recorder fingering chart

The following example demonstrates how fingering charts for wind instruments can be realized.

% range chart for paetzold contrabass recorder

```lilypond
\centermarkup = {
  \once \override TextScript.self-alignment-X = #CENTER
  \once \override TextScript.X-offset =#(lambda (g)
    (+ (ly:self-alignment-interface::centered-on-x-parent g)
      (ly:self-alignment-interface::x-aligned-on-self g)))
```
Woodwind diagrams key lists

The snippet below produces a list of all possible keys and key settings for woodwind diagrams as defined in scm/define-woodwind-diagrams.scm. The list will be displayed in the log file,
but not in the music. If output to the console is wanted, omit the \texttt{(current-error-port)} from
the commands.

\begin{verbatim}
#(print-keys-verbose 'piccolo (current-error-port))
#(print-keys-verbose 'flute (current-error-port))
#(print-keys-verbose 'flute-b-extension (current-error-port))
#(print-keys-verbose 'tin-whistle (current-error-port))
#(print-keys-verbose 'oboe (current-error-port))
#(print-keys-verbose 'clarinet (current-error-port))
#(print-keys-verbose 'bass-clarinet (current-error-port))
#(print-keys-verbose 'low-bass-clarinet (current-error-port))
#(print-keys-verbose 'saxophone (current-error-port))
#(print-keys-verbose 'soprano-saxophone (current-error-port))
#(print-keys-verbose 'alto-saxophone (current-error-port))
#(print-keys-verbose 'tenor-saxophone (current-error-port))
#(print-keys-verbose 'baritone-saxophone (current-error-port))
#(print-keys-verbose 'bassoon (current-error-port))
#(print-keys-verbose 'contrabassoon (current-error-port))
\end{verbatim}

\score {c''1}

\begin{figure}[h]
\centering
\includegraphics[width=0.5\textwidth]{woodwind-diagrams}
\caption{Woodwind diagrams listing}
\end{figure}

The following music shows all of the woodwind diagrams currently defined in LilyPond.

\begin{verbatim}
\layout {
  indent = 0
}

\relative c' {
  \textLengthOn
  c1^
  \markup {
    \center-column { 'tin-whistle " "
      \woodwind-diagram
      #'tin-whistle
      #'()
    }
  }
  c1^
  \markup {
    \center-column { 'piccolo " "
      \woodwind-diagram
      #'piccolo
      #'()
    }
  }
\end{verbatim}
Ancient notation

Section “Ancient notation” in Notation Reference

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the \BassFigureAlignmentPositioning\.direction property (exclusively in a Staff context). Choices are \#UP (or \#1), \#CENTER (or \#0) and \#DOWN (or \#-1).

This property can be changed as many times as you wish. Use \once \override if you don’t want the override to apply to the whole score.

```lilypond
bass = {
    \clef bass
    g4 b, c d

Incipit

When transcribing mensural music, an incipit at the beginning of the piece is useful to indicate the original key and tempo. Musicians today are used to bar lines, but these were not known during the period of mensural music. As a compromise, bar lines are often printed between the staves, a layout style called mensurstriche layout.

Using tags to produce mensural and modern music from the same source

By using tags, it’s possible to use the same music to produce both mensural and modern music. In this snippet, a function `menrest` is introduced, allowing mensural rests to be pitched as in the original, but with modern rests in the standard staff position. Tags are used to produce different types of bar line at the end of the music, but tags can also be used where other differences are needed: for example using “whole measure rests” (R1, R\breve etc.) in modern music, but normal rests (r1, r\breve, etc.) in the mensural version. Note that converting mensural music to its modern equivalent is usually referred to as transcription.

```latex
menrest = #(define-music-function (note)
  (ly:music?)
  #\{
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  #\})

MensStyle = {
  \autoBeamOff
  \override NoteHead.style = #'petrucci
  \override Score.BarNumber.transparent = ##t
  \override Stem.neutral-direction = #up
}

finalis = {
  \once \override BreathingSign.stencil = #ly:breathing-sign::finalis
  \once \override BreathingSign.Y-offset = #0
  \once \override BreathingSign.minimum-X-extent = #'(-1.0 . 0.0)
  \once \override BreathingSign.minimum-Y-extent = #'(-2.5 . 2.5)
  \breathe
}

Music = \relative c' { 
  \set Score.tempoHideNote = ##t
  \key f \major
  \time 4/4
  g1 d'2 \menrest bes4 bes2 a2 r4 g4 fis2.
  \tag #'mens { \finalis }

Arabic improvisation

For improvisations or taqasim which are temporarily free, the time signature can be omitted and `\cadenzaOn` can be used. Adjusting the accidental style might be required, since the absence of bar lines will cause the accidental to be marked only once. Here is an example of what could be the start of a hijaz improvisation:

```
\include "arabic.ly"
\relative sol' {
   \key re \kurd
   \accidentalStyle forget
   \cadenzaOn
   sol4 sol sol sol fad mib sol1 fad8 mib re4. r8 mib1 fad sol }
```

Makam example

Makam is a type of melody from Turkey using 1/9th-tone microtonal alterations. Consult the initialization file ‘ly/makam.ly’ for details of pitch names and alterations.

```
% Initialize makam settings
\include "makam.ly"
\relative c' {
   \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
   c4 cc db fk
   gbm4 gfc gfb efk
   fk4 db cc c }
```

Non-traditional key signatures

The commonly used `\key` command sets the `keyAlterations` property in the `Staff` context. To create non-standard key signatures, set this property directly.

The format of this command is a list:
```
\set Staff.keyAlterations = #`(((octave . step) . alter) ((octave . step) . alter) ...)
```
where, for each element in the list `octave` specifies the octave (0 being the octave from middle c to the b above), `step` specifies the note within the octave (0 means c and 6 means b), and `alter` is ,SHARP ,FLAT ,DOUBLE-SHARP etc.
Alternatively, using the more concise format for each item in the list, \( \texttt{step \ . \ alter} \) specifies the same alteration holds in all octaves. For microtonal scales where a “sharp” is not 100 cents, \texttt{alter} refers to the proportion of a 200-cent whole tone.

\begin{verbatim}
\include "arabic.ly"
\relative do' {
  \set Staff.keyAlterations = #\((0 \ . \ ,\text{SEMI-FLAT})\)
  (1 \ . \ ,\text{SEMI-FLAT})
  (2 \ . \ ,\text{FLAT})
  (5 \ . \ ,\text{FLAT})
  (6 \ . \ ,\text{SEMI-FLAT})\)

%\set Staff.extraNatural = ##f
  \re reb \dwn reb resd
  \dod \dob \dosd \dwn \dob |
  \dobsb \dodsd \do \do |}
\end{verbatim}

\textbf{Printing text from right to left}

It is possible to print text from right to left in a markup object, as demonstrated here.

\begin{verbatim}
{  \line { \textit{ingirumimusnocte} }\}
  \f'\_\markup {  \override #'(text-direction . -1)
    \line { \textit{ingirumimusnocte} }\}
}
\end{verbatim}

\textbf{ingirumimusnocte}

Contexts and engravers

Section “Changing defaults” in Notation Reference
Section “Contexts and engravers” in Learning Manual

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the BassFigureAlignmentPositioning.direction property (exclusively in a Staff context). Choices are #UP (or #1), #CENTER (or #0) and #DOWN (or #-1).

This property can be changed as many times as you wish. Use \once \override if you don’t want the override to apply to the whole score.

\bass = {
  \clef bass
  g4 b, c d
  e d8 c d2
}

\continuo = \figuremode {
  <._.>4 <6>4 <5/>4
  \override Staff.BassFigureAlignmentPositioning.direction = #UP
  %\bassFigureStaffAlignmentUp

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

\score {
  \new Staff \relative c'' { 
    c1 | c | c | c | c 
  }
  \new StaffGroup \relative c'' { 
    \new Staff { 
      c1 | c 
    } 
  }
}
Automatically changing the stem direction of the middle note based on the melody

LilyPond can alter the stem direction of the middle note on a staff so that it follows the melody, by adding the Melody_engraver to the Voice context and overriding the neutral-direction of Stem.

\relative c'' { 
    \time 3/4 
    a8 b g f b g | 
    c b d c b c | 
} 

\context { 
    \Voice 
    \consists "Melody_engraver" 
    \autoBeamOff 
    \override Stem.neutral-direction = #'() 
}
Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure’s extent. This snippet shows how the \Measure_counter_engraver may be used to simulate this notational practice. Here, the engraver has been added to a \Dynamics context.

```
\layout {
  \context {
    \Dynamics
    \consists \Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    \% to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}
```

```
pattern = \repeat unfold 7 { c'4 d' e' f' }
```

```
\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
  \new Dynamics {
    \startMeasureCount
    s1*7
    \stopMeasureCount
  }
>>
```

Changing MIDI output to one channel per voice

When outputting MIDI, the default behavior is for each staff to represent one MIDI channel, with all the voices on a staff amalgamated. This minimizes the risk of running out of MIDI channels, since there are only 16 available per track.
However, by moving the `Staff_performer` to the `Voice` context, each voice on a staff can have its own MIDI channel, as is demonstrated by the following example: despite being on the same staff, two MIDI channels are created, each with a different `midiInstrument`.

```
\score {
  \new Staff <<
    \new Voice \relative c'' {
      \set midiInstrument = #'flute
      \voiceOne
      \key g \major
      \time 2/2
      r2 g-"Flute" ~
      g fis ~
      fis4 g8 fis e2 ~
      e4 d8 cis d2
    }
    \new Voice \relative c'' {
      \set midiInstrument = #'clarinet
      \voiceTwo
      b1-"Clarinet"
      a2. b8 a
      g2. fis8 e
      fis2 r
    }
  >>
  \layout { }
  \midi {
    \context { 
      \Staff
      \remove "Staff_performer"
    } 
    \context { 
      \Voice
      \consists "Staff_performer"
    } 
    \tempo 2 = 72
  }
}
```

![Musical notation example](image)

**Changing time signatures inside a polyrhythmic section using \scaleDurations**

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the `ly:make-moment` callback. The second argument must be the same as the second argument of `\scaleDurations`. 
Chant or psalms notation

This form of notation is used for Psalm chant, where verses aren’t always the same length.

stemOff = \hide Staff.Stem

stemOn = \undo \stemOff

\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  { 
    \key g \minor
    \cadenzaOn
    \stemOff a'\breve b e s'4 g'4
    \stemOn a'2 \bar "||"
    \stemOff a'\breve g'4 a'4
  }
}
Creating blank staves

To create blank staves, generate empty measures then remove the Bar_number_engraver from the Score context, and the Time_signature_engraver, Clef_engraver and Bar_engraver from the Staff context.

```latex
\score {
   \repeat unfold 12 { s1 \break }
}
\layout {
   indent = 0\in
   \context {
      \Staff
      \remove "Time_signature_engraver"
      \remove "Clef_engraver"
      \remove "Bar_engraver"
   }
   \context {
      \Score
      \remove "Bar_number_engraver"
   }
}

% uncomment these lines for "letter" size
%
\paper {
   #(set-paper-size "letter")
   ragged-last-bottom = ##f
   line-width = 7.5\in
   left-margin = 0.5\in
   bottom-margin = 0.25\in
   top-margin = 0.25\in
}
%

% uncomment these lines for "A4" size
%
\paper {
   #(set-paper-size "a4")
}
\texttt{ragged-last-bottom = \$#f$
line-width = 180
left-margin = 15
bottom-margin = 10
top-margin = 10
}
\%

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))
  % presumably sharps are also printed in both octaves
}

\override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
  #{ \markup\combine
    \musicglyph "clefs.C"
    \translate #'(-3 . -2)
    \musicglyph "clefs.F"
  })))
clefPosition = #3
middleCPosition = #3
middleCClefPosition = #3

\key d\minor
f bes, f bes,

Cross staff stems

This snippet shows the use of the Span_stem_engraver and \crossStaff to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

\layout {
  \context {
    \PianoStaff
    \consists #Span_stem_engraver
  }
}

\new PianoStaff <<
\new Staff {
  <b d'>4 r d'16\> e'8. g8 r\!
  e'8 f' g'4 e'2
}
\new Staff {
   \clef bass
   \voiceOne
   \autoBeamOff
   \crossStaff { <e g>4 e, g16 a8. c8} d
   \autoBeamOn
   g8 f g4 c2
}

\new Staff {
   \clef bass
   \voiceOne
   \autoBeamOff
   \crossStaff { <e g>4 e, g16 a8. c8} d
   \autoBeamOn
   g8 f g4 c2
}

Defining an engraver in Scheme: ambitus engraver

This example demonstrates how the ambitus engraver may be defined on the user side, with a Scheme engraver.

This is basically a rewrite in Scheme of the code from lily/ambitus-engraver.cc.

#(use-modules (oop goops))

%%%%
%%%% Grob utilities
%%%%
%%%% These are literal rewrites of some C++ methods used by the ambitus engraver.

Displaying a whole GrandStaff system if only one of its staves is alive

In orchestral scores sometimes single or groups of instruments are silent for a while and their staves can be removed for that time (with \removeEmptyStaves).

When they play again it is often preferred to show the staves of all instruments of such a group. This can be done adding the \Keep_alive_together_ engraver in the grouper (e.g., a GrandStaff or a StaffGroup).

In the example the violins are silent in the 2nd system and in the 3rd system. Only the first violin plays the last measure but the staff of the second violin is also displayed.

Engravers one-by-one

The notation problem, creating a certain symbol, is handled by plugins. Each plugin is called an Engraver. In this example, engravers are switched on one by one, in the following order:

- note heads,
- staff symbol,
- clef,
- stem,
- beams, slurs, accents,
- accidentals, bar lines, time signature and key signature.

Engravers are grouped. For example, note heads, slurs, beams etc. form a **Voice** context. Engravers for key signature, accidentals, bar line, etc. form a **Staff** context.

```
%% sample music
topVoice = \relative c' {
    \key d \major
    es8([ g] a[ fis])
    b4
    b16[-. b-. b-. cis-.]
    d4->
}
```

```
botVoice = \relative c' {
    \key d \major
    c8([ f] b[ a])
    es4
    es16[-. es-. es-. fis-.]
    b4->
}
```

```
hoom = \relative c {
    \key d \major
    \clef bass
    g8-. r
    r4
    fis8-.
    r8
    r4
    b4->
```
pah = \relative c' { 
  r8 b-.
  r4
  r8 g8-.
  r16 g-. r8
  \clef treble
  fis'4->
}

Mensurstriche layout (bar lines between the staves)

The mensurstriche-layout where the bar lines do not show on the staves but between staves can be achieved with a StaffGroup instead of a ChoirStaff. The bar line on staves is blanked out using \hide.

global = {
    \hide Staff.BarLine
    s1 s
    % the final bar line is not interrupted
    \undo \hide Staff.BarLine
    \bar "."
}

\new StaffGroup \relative c' { 
    <<
    \new Staff { << \global { c1 c } >> }
}
Nesting staves

The property `systemStartDelimiterHierarchy` can be used to make more complex nested staff groups. The command `\set StaffGroup.systemStartDelimiterHierarchy` takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace`, and `SystemStartSquare`.

```
\new StaffGroup
\relative c'' <<
  \set StaffGroup.systemStartDelimiterHierarchy
  = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
                      (SystemStartSquare b) ) c ) d)
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
>>
```
Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with \startMeasureCount and ended with \stopMeasureCount. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

\layout {
\context {
  \Staff
  \consists #Measure_counter_engraver
}
}
\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {
    g'4 f' e' d'
  }
  \stopMeasureCount
}

\begin{music}
\includegraphics{music.png}
\end{music}
Removing bar numbers from a score

Bar numbers can be removed entirely by removing the `Bar_number_engraver` from the `Score` context.

```
\layout {
  \context {
    \Score
    \omit BarNumber
    % or:
    %\remove "Bar_number_engraver"
  }
}
\relative c'' {
  c4 c c c \break
  c4 c c c
}
```

Use square bracket at the start of a staff group

The system start delimiter `SystemStartSquare` can be used by setting it explicitly in a `StaffGroup` or `ChoirStaff` context.

```
\score {
  \new StaffGroup { <<
    \set StaffGroup.systemStartDelimiter = #'SystemStartSquare
    \new Staff { c'4 d' e' f' }
    \new Staff { c'4 d' e' f' }
  >> }
}
```
Using marklines in a Frenched score

Using MarkLine contexts (such as in LSR1010 (http://lsr.di.unimi.it/LSR/Item?id=1010)) in a Frenched score can be problematic if all the staves between two MarkLines are removed in one system. The `Keep_alive_together_engraver` can be used within each `StaffGroup` to keep the MarkLine alive only as long as the other staves in the group stay alive.

```plaintext
bars = {
    \tempo "Allegro" 4=120
    s1*2
    \repeat unfold 5 { \mark \default s1*2 }
    \bar "||"
    \tempo "Adagio" 4=40
    s1*2
    \repeat unfold 8 { \mark \default s1*2 }
    \bar "."
}
winds = \repeat unfold 120 { c''4 }
trumpet = { \repeat unfold 8 g'2 R1*16 \repeat unfold 4 g'2 R1*8 }
trombone = { \repeat unfold 4 c'1 R1*8 d'1 R1*17 }
strings = \repeat unfold 240 { c''8 }

Tweaks and overrides

Section “Changing defaults” in Notation Reference
Section “Tweaking output” in Learning Manual

Adding an ottava marking to a single voice

If you have more than one voice on the staff, setting octavation in one voice will transpose the position of notes in all voices for the duration of the ottava bracket. If the ottavation is only intended to apply to one voice, the middleCPosition and ottava bracket may be set explicitly. In this snippet, the bass clef usually has middleCPosition set to 6, six positions above the center line, so in the 8va portion middleCPosition is 7 positions (one octave) higher still.

```
{\clef bass
<< { <g d'>1~ q2 <c' e'> }
\`
{ r2.
\set Staff.ottavation = #"8vb"
\once \override Staff.OttavaBracket.direction = #DOWN
\set Voice.middleCPosition = #(+ 6 7)
<b,,, b,,>4 ~ |
q2
\unset Staff.ottavation
\unset Voice.middleCPosition
<c e>2
}
>>
}
```

Adding links to objects

To add a link to a grob-stencil you could use add-link as defined here. Works with \override and \tweak. Drawback: point-and-click will be disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command.

```
#(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
        (begin
          (let* (
            (x-ext (ly:stencil-extent stil X))
            (y-ext (ly:stencil-extent stil Y)))
          
```
Tweaks and overrides

```lilypond
(url-expr (list 'url-link url-strg `(quote ,x-ext) `(quote ,y-ext)))
(new-stil (ly:stencil-add
   (ly:make-stencil url-expr x-ext y-ext) stil)))
(ly:grob-set-property! grob 'stencil new-stil))
```

Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks, often consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.
If the stems do not align well with the glissando, they may need to be repositioned slightly.

\begin{verbatim}
glis\s\text{andoSkipOn} = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}
glis\s\text{andoSkipOff} = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}

\relative c'' { 
  r8 f8\glissando
  \glissandoSkipOn
  f4 g a a8\noBeam
  \glissandoSkipOff
  a8
  r8 f8\glissando
  \glissandoSkipOn
  g4 a8
  \glissandoSkipOff
  a8 |
  r4 f\glissando \<
  \glissandoSkipOn
  a4\f \>
  \glissandoSkipOff
  b8\! r |
}
\end{verbatim}

\[\begin{tikzpicture}
\end{tikzpicture}\]

**Adjusting grace note spacing**

The space given to grace notes can be adjusted using the \texttt{spacing-increment} property of \texttt{Score.GraceSpacing}.

\begin{verbatim}
graceNotes = {
  \grace { c4 c8 c16 c32 }
  c8
}

\relative c'' { 
  c8 
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0 
  \graceNotes
}
\end{verbatim}
\revert Score.GraceSpacing.spacing-increment
\graceNotes
}

\begin{music}
\relative c' {
    c4 d e f
g4 f e d
c1
}
\lyricsto melody { aa aa aa aa aa aa aa aa aa aa }
\end{music}

\begin{music}
\with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing = #'((basic-distance . 1))
}\lyricsto melody { aa aa aa aa aa aa aa aa aa aa }
\end{music}

### Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
    c4 d e f
g4 f e d
c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa aa }
\end{music}

% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing = #'((basic-distance . 1))
}\lyricsto melody { aa aa aa aa aa aa aa aa aa }

>>

### Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the `details` of the `Stem`. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

\relative c'' {
    \override Stem.details.beamed-lengths = #'(2)
Alternative bar numbering

Two alternative methods for bar numbering can be set, especially for when using repeated music.

```latex
\relative c'{
\set Score.alternativeNumberingStyle = #'numbers
\repeat volta 3 { c4 d e f | }
\alternative {
\{ c4 d e f | c2 d \break \}
\{ f4 g a b | f4 g a b | f2 a | \break \}
\{ c4 d e f | c2 d \}
}
\set Score.alternativeNumberingStyle = #'numbers-with-letters
\repeat volta 3 { c,4 d e f | }
\alternative {
\{ c4 d e f | c2 d \break \}
\{ f4 g a b | f4 g a b | f2 a | \break \}
\{ c4 d e f | c2 d \}
}
}\relative c''
```
Analysis brackets above the staff

Simple horizontal analysis brackets are added below the staff by default. The following example shows a way to place them above the staff instead.

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c'' {
  \once \override HorizontalBracket.direction = #UP
c2\startGroup
d2\stopGroup
}

Analysis brackets with labels

Text may be added to analysis brackets through the text property of the HorizontalBracketText grob. Adding different texts to brackets beginning at the same time requires the \tweak command. Bracket text will be parenthesized after a line break.

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{\once\override HorizontalBracketText.text = "a"
c''\startGroup d''\stopGroup
\once\override HorizontalBracketText.text = "a'"
e''\startGroup d''\stopGroup
c'"
Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

\relative c' {
    \set Slur.eccentricity = #3.0
    \slurNotes = {d,8(a' d f a f' d, a)}
}

Avoiding collisions with chord fingerings

Fingerings and string numbers applied to individual notes will automatically avoid beams and stems, but this is not true by default for fingerings and string numbers applied to the individual notes of chords. The following example shows how this default behavior can be overridden.

\relative c' {
    \set fingeringOrientations = #'(up)
    \set stringNumberOrientations = #'(up)
    \set strokeFingerOrientations = #'(up)
}

% Default behavior
Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c'' {
  c2.
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|.
}
```

Changing a single note’s size in a chord

Individual note heads in a chord can be modified with the \tweak command inside a chord, by altering the font-size property.

Inside the chord (within the brackets < >), before the note to be altered, place the \tweak command, followed by #'font-size and define the proper size like #-2 (a tiny note head).
Changing beam thickness and spacing

To make beams thicker or thinner alter the \texttt{Beam.beam-thickness} property. To adjust the spacing between beams alter the \texttt{Beam.length-fraction} property.

\section*{Changing form of multi-measure rests}

If there are ten or fewer measures of rests, a series of longa and breve rests (called in German "Kirchenpausen" - church rests) is printed within the staff; otherwise a simple line is shown. This default number of ten may be changed by overriding the \texttt{expand-limit} property.
Changing properties for individual grobs

The \applyOutput command allows the tuning of any layout object, in any context. It requires a Scheme function with three arguments.

```scheme
#(define (mc-squared grob grob-origin context)
  (let ((sp (ly:grob-property grob 'staff-position)))
    (ly:grob-set-property!
      grob 'stencil
      (grob-interp-markup grob
       #\( \markup \lower #0.5
       #(case sp
          ((-5) "m")
          ((-3) "c ")
          ((-2) #(\markup \teeny \bold 2 #})
          (else "bla")) #)))))

\relative c' {
  <d f g b>2
  \applyOutput Voice.NoteHead #mc-squared
  <d f g b>2
}
```

Changing text and spanner styles for text dynamics

The text used for crescendos and decrescendos can be changed by modifying the context properties crescendoText and decrescendoText.

The style of the spanner line can be changed by modifying the 'style property of DynamicTextSpanner. The default value is 'dashed-line, and other possible values include 'line, 'dotted-line and 'none.

```latex
\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
  a2 a\mf
}
```

Changing the default text font family

The default font families for text can be overridden with \makepangoftree. 

```latex
\paper {
```
Tweaks and overrides

% change for other default global staff size.
myStaffSize = #20
%
  run
      lilypond -dshow-available-fonts blabla
    to show all fonts available in the process log.
%
 #(define fonts
      (make-pango-font-tree "Times New Roman"
         "Nimbus Sans,Nimbus Sans L"
         "Luxi Mono"
         "Helvetica"
         "Courier"
      ;; (/ myStaffSize 20)))
}
relative c'' {
  c4\markup {
    roman: foo \bold bla \italic bar \italic \bold baz
  }
  c'4\markup {
    \override #'(font-family . sans)
    {
      sans: foo \bold bla \italic bar \italic \bold baz
    }
  }
  c'2\markup {
    \override #'(font-family . typewriter)
    {
      mono: foo \bold bla \italic bar \italic \bold baz
    }
  }
  mon:\markup {\roman: foo \textbf{bla} \textit{bar} \textbf{baz} }\n\textit{sans: foo \textbf{bla} \textit{bar} \textbf{baz} }

Changing the staff size

Though the simplest way to resize staves is to use #(set-global-staff-size xx), an individual staff’s size can be changed by scaling the properties 'staff-space and fontSize.
<<
\new Staff {
  \relative c'' {
    \dynamicDown
    c8\ff c c c c c c c
Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.
\score {
\new Staff \relative c' {
\tempo 4 = 160
\c4 e g b
c4 b d c
\set Score.tempoHideNote = ##t
\tempo 4 = 96
d,4 fis a cis
d4 cis e d
}
\layout {}
\midi {}
}

Changing the text for sustain markings

Staff.pedalSustainStrings can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.
sustainNotes = { c4\sustainOn d e\sustainOff\sustainOn f\sustainOff }

\relative c' {
\sustainNotes
\set Staff.pedalSustainStrings = #'("P" "P-" "-")
\sustainNotes
}
Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the \after-line-breaking callback \ly:spanner::kill-zero-spanned-time.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.
Controlling the vertical ordering of scripts

The vertical ordering of scripts is controlled with the 'script-priority property. The lower this number, the closer it will be put to the note. In this example, the TextScript (the sharp symbol) first has the lowest priority, so it is put lowest in the first example. In the second, the prall trill (the Script) has the lowest, so it is on the inside. When two objects have the same priority, the order in which they are entered determines which one comes first.

\relative c'' { 
  \once \override TextScript.script-priority = #-100
  a2\prall\markup { \sharp }
}

\relative c'' { 
  \once \override Script.script-priority = #-100
  a2\prall\markup { \sharp }
}

Controlling tuplet bracket visibility

The default behavior of tuplet-bracket visibility is to print a bracket unless there is a beam of the same length as the tuplet. To control the visibility of tuplet brackets, set the property 'bracket-visibility to either #t (always print a bracket), #f (never print a bracket) or #'if-no-beam (only print a bracket if there is no beam).

music = \relative c'' { 
  \tuplet 3/2 { c16 d e } f8
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}

\new Voice { 
  \relative c' { 
    << \music s4~"default" >>
    \override TupletBracket.bracket-visibility = #'if-no-beam
    << \music s4~"if-no-beam" >>
    \override TupletBracket.bracket-visibility = ##t
    << \music s4~"#t" >>
    \override TupletBracket.bracket-visibility = ##f
    << \music s4~"#f" >>
    \% \% v2.18
    \omit TupletBracket
    << \music s4~"omit" >>
  }
}
Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The outside-staff-priority property must be set to \#f, as otherwise this would take precedence over the avoid-slur property. Changing the fractions 2/3 and 1/3 adjusts the horizontal position.

\relative c'' {  
c2*2/3 ( s2*1/3\turn d4) r  
<<  
{ c4.( d8) }  
{ s4 s\turn }  
>>  
\transpose c d \relative c'' <<  
{ c4.( d8) }  
{  
s4  
\once \set suggestAccidentals = ##t  
\once \override AccidentalSuggestion.outside-staff-priority = ##f  
\once \override AccidentalSuggestion.avoid-slur = #'inside  
\once \override AccidentalSuggestion.font-size = -3  
\once \override AccidentalSuggestion.script-priority = -1  
\single \hideNotes  
b8-\turn \noBeam  
s8  
}  
>>  
}

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

\new Staff \with {  
\override StaffSymbol.line-count = #8  
\override KeySignature.flat-positions = #'((-7 . 6))  
\override KeyCancellation.flat-positions = #'((-7 . 6))  
% presumably sharps are also printed in both octaves  
\override KeySignature.sharp-positions = #'((-6 . 7))  
\override KeyCancellation.sharp-positions = #'((-6 . 7))  
\override Clef.stencil = #  
(lambda (grob)(grobat-interpret-markup grob  
#{ \markup\combine  
\musicglyph "clefs.C"  
\translate #'(-3 . -2)  
)}

\relative c' {  
c2*2/3 ( s2*1/3\turn d4) r  
<<  
{ c4.( d8) }  
{ s4 s\turn }  
>>  
\transpose c d \relative c''' <<  
{ c4.( d8) }  
{  
s4  
\once \set suggestAccidentals = ##t  
\once \override AccidentalSuggestion.outside-staff-priority = ##f  
\once \override AccidentalSuggestion.avoid-slur = #'inside  
\once \override AccidentalSuggestion.font-size = -3  
\once \override AccidentalSuggestion.script-priority = -1  
\single \hideNotes  
b8-\turn \noBeam  
s8  
}  
>>  
}
Creating double-digit fingerings

Creating fingerings larger than 5 is possible.
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}

Creating simultaneous rehearsal marks

Unlike text scripts, rehearsal marks cannot be stacked at a particular point in a score: only one RehearsalMark object is created. Using an invisible measure and bar line, an extra rehearsal mark can be added, giving the appearance of two marks in the same column. This method may also prove useful for placing rehearsal marks at both the end of one system and the start of the following system.

{  
  \key a \major  
  \set Score.markFormatter = #format-mark-box-letters  
  \once \override Score.RehearsalMark.outside-staff-priority = #5000  
  \once \override Score.RehearsalMark.self-alignment-X = #LEFT  
  \once \override Score.RehearsalMark.break-align-symbols = #'(key-signature)  
  \mark \markup { \bold { Senza denti } }  
\}% the hidden measure and bar line  
% \cadenzaOn turns off automatic calculation of bar numbers  
\cadenzaOn  
\once \override Score.TimeSignature.stencil = ##f  
\time 1/16  
s16 \bar ""  
\cadenzaOff
\time 4/4
\once \override Score.RehearsalMark.self-alignment-X = #LEFT
\mark \markup { \box \bold Intro }
d'1
\mark \default
d'1
}

\begin{Verbatim}
\begin{align*}
\text{Senza denti} \\
\text{Intro} & A \\
\text{C} \text{E} \text{G} \text{G} \text{A}
\end{align*}
\end{Verbatim}

Creating text spanners

The \startTextSpan and \stopTextSpan commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the TextSpanner object to modify its output.

\paper{ragged-right = ##f}

\relative c''{
\override TextSpanner.bound-details.left.text = #'bla
\override TextSpanner.bound-details.right.text = #'blu
a4 \startTextSpan
b4 \text{c}
a4 \stopTextSpan

\override TextSpanner.style = #'line
\once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
a4 \startTextSpan
b4 \text{c}
a4 \stopTextSpan

\override TextSpanner.style = #'dashed-line
\override TextSpanner.bound-details.left.text =
\begin{Verbatim}
\markup { \draw-line #'(0 . 1) }
\end{Verbatim}
\override TextSpanner.bound-details.right.text =
\begin{Verbatim}
\markup { \draw-line #'(0 . -2) }
\end{Verbatim}
\once \override TextSpanner.bound-details.right.padding = #-2
a4 \startTextSpan
b4 \text{c}
a4 \stopTextSpan

\set Staff.middleCPosition = #-13
\override TextSpanner.dash-period = #10
\override TextSpanner.dash-fraction = #0.5
\override TextSpanner.thickness = #10
a4 \startTextSpan
b4 \text{c}
\end{Verbatim}
Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn’t detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`.

\new PianoStaff <<
\new Staff = up
\relative c' {
<<
{ r4
  \override Stem.cross-staff = ##t
  \override Stem.length = #19 \% this is in half-spaces,
  \% so it makes stems 9.5 staffspaces long
  \override Stem.Y-offset = #-6 \% stems are normally lengthened
  \% upwards, so here we must lower the stem by the amount
  \% equal to the lengthening - in this case (19 - 7) / 2
  \% (7 is default stem length)
  e e e }
{ s4
  \change Staff = "bottom"
  \override NoteColumn.ignore-collision = ##t
  c, c c }
>>
}
\new Staff = bottom
\relative c' {
  \clef bass
  \voiceOne
  g8 a g a g a g a
}
>>
Cross staff stems

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

```latex
\layout {
\context {
\PianoStaff
\consists #Span_stem_engraver
}
}

{\new PianoStaff <<
\new Staff {
<\bd'4 \rd'16> \e'8. \g8 \r!\n\e'8 \f' \g'4 \e'2
}
\new Staff {
\clef bass
\voiceOne
\autoBeamOff
\crossStaff { <\e \g}4 \e, \g16 \a8. \c8\} \d
\autoBeamOn
\g8 \f \g4 \c2
}
>>
}
```

Custodes

Custodes may be engraved in various styles.

```latex
\layout { ragged-right = ##t }
\new Staff with { \consists "Custos_engraver" } \relative c' {
\override Staff.Custos.neutral-position = #4

\override Staff.Custos.style = #'hufnagel
\c1"hufnagel" \break
<d \a' \f'>1

\override Staff.Custos.style = #'medicaea
\c1"medicaea" \break
```
Customizing fretboard fret diagrams

Fret diagram properties can be set through `fret-diagram-details`. For FretBoard fret diagrams, overrides are applied to the `FretBoards.FretBoard` object. Like `Voice`, `FretBoards` is a bottom level context, therefore can be omitted in property overrides.

```
\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }  
  \guitar-tuning
  \"x;1-1-;3-2;3-3;3-4;1-1-;";
<<
  \new ChordNames {
    \chordmode { c1 | c | c | d }
  }
\new FretBoards {
  % Set global properties of fret diagram
  \override FretBoards.FretBoard.size = #'1.2
  \override FretBoard.fret-diagram-details.finger-code = '#in-dot
  \override FretBoard.fret-diagram-details.dot-color = '#white
```
Customizing markup fret diagrams

Fret diagram properties can be set through `fret-diagram-details`. For markup fret diagrams, overrides can be applied to the `Voice.TextScript` object or directly to the markup.

<<
\chords { c1 | c | c | d }

\new Voice = "mel" {
  \textLengthOn
  % Set global properties of fret diagram
  \override TextScript.size = #'1.2
  \override TextScript.fret-diagram-details.finger-code = #'in-dot
  \override TextScript.fret-diagram-details.dot-color = #'white

  %% C major for guitar, no barre, using defaults

Display bracket with only one staff in a system

If there is only one staff in one of the staff types ChoirStaff or StaffGroup, by default the bracket and the starting bar line will not be displayed. This can be changed by overriding collapse-height to set its value to be less than the number of staff lines in the staff.

Note that in contexts such as PianoStaff and GrandStaff where the systems begin with a brace instead of a bracket, another property has to be set, as shown on the second system in the example.

```latex
\score {
  \new StaffGroup <<
    \override StaffGroup.SystemStartBracket.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
  \new Staff {
    c'1
  }
}>
\score {
  \new PianoStaff <<
    \override PianoStaff.SystemStartBrace.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
  \new Staff {
    c'1
  }
}>
```
Displaying grob ancestry

When working with grob callbacks, it can be helpful to understand a grob’s ancestry. Most grobs have parents which influence the positioning of the grob. X- and Y-parents influence the horizontal and vertical positions for the grob, respectively. Additionally, each parent may have parents of its own.

Unfortunately, there are several aspects of a grob’s ancestry that can lead to confusion:

* The types of parents a grob has may depend on context.
* For some grobs, the X- and Y-parents are the same.
* A particular “ancestor” may be related to a grob in multiple ways.
* The concept of “generations” is misleading.

For example, the System grob can be both parent (on the Y-side) and grandparent (twice on the X-side) to a VerticalAlignment grob.

This macro prints (to the console) a textual representation of a grob’s ancestry.

When called this way:

```latex
\once \override NoteHead.before-line-breaking = \#display-ancestry c
```

The following output is generated:

```
NoteHead X,Y: NoteColumn X: PaperColumn X,Y: System Y: VerticalAxisGroup X:
```

%% http://lsr.di.unimi.it/LSR/Item?id=622

    \once \override Arpeggio.before-line-breaking = #display-ancestry
    <f as c>4\arpeggio
}

Dotted harmonics

Artificial harmonics using \harmonic do not show dots. To override this behavior, set the context property harmonicDots.

\relative c''' {
    \time 3/4
    \key f \major
    \set harmonicDots = ##t
    <bes f'\harmonic>2. ~
    <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
    <fis cis'\harmonic>2.
    <bes f'\harmonic>2.
}
Drawing boxes around grobs

The `print-function` can be overridden to draw a box around an arbitrary grob.

```latex
\relative c'' { 
  \override TextScript.stencil = 
    #(make-stencil-boxer 0.1 0.3 ly:text-interface::print) 
  c'4"foo"

  \override Stem.stencil = 
    #(make-stencil-boxer 0.05 0.25 ly:stem::print) 

  \override Score.RehearsalMark.stencil = 
    #(make-stencil-boxer 0.15 0.3 ly:text-interface::print) 

  b8

  \revert Stem.stencil 
  \revert Flag.stencil 
  c4. c4 
  \mark "F" 
  c1
}
```

Drawing circles around various objects

The `\circle` markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

```latex
\relative c' { 
  \set Score.markFormatter = 
    #(lambda (mark context) 
      (make-circle-markup (format-mark-numbers mark context))) 
  \mark \default 

  c2 d^\markup { 
    \override #(thicknes . 3) { 
      \circle \finger 2 
    }
  }
}

\override Score.BarNumber.break-visibility = #all-visible 
\override Score.BarNumber.stencil = 
    #(make-stencil-circler 0.1 0.25 ly:text-interface::print) 
}
Dynamics custom text spanner postfix

Postfix functions for custom crescendo text spanners. The spanners should start on the first note of the measure. One has to use -\mycresc, otherwise the spanner start will rather be assigned to the next note.

% Two functions for (de)crescendo spanners where you can explicitly give the spanner text.

\mycresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'CrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))

\mydecresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'DecrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))

\relative c' {
  c4-\mycresc "custom cresc" c4 c4 c4 |
  c4 c4 c4 |
  c4-\mydecresc "custom decresc" c4 c4 c4 |
  c4 c4\! c4 c4
}

custom cresc - - - custom decresc

Dynamics text spanner postfix

Custom text spanners can be defined and used with hairpin and text crescendos. \ and \ produce hairpins by default, \cresc etc. produce text spanners by default.

% Some sample text dynamic spanners, to be used as postfix operators

\crpoco =
#(make-music 'CrescendoEvent
  'span-direction START
  'span-type 'text
  'span-text "cresc. poco a poco")

\relative c' {
  c4\cresc d4 e4 f4 |
  g4 a4\! b4\crpoco c4 |
  c4 d4 e4 f4 |
  g4 a4\! b4\< c4 |
  g4\dim a4 b4\decresc c4\!
}

Extending a TrillSpanner

For TrillSpanner, the minimum-length property becomes effective only if the set-spacing-rods procedure is called explicitly. To do this, the springs-and-rods property should be set to ly:spanner::set-spacing-rods.

```latex
\relative c' { \\
\key c \minor \\
\time 2/4 \\
c16( as') c,-. des-. \\
\once \override TrillSpanner.minimum-length = #15 \\
\once \override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods \\
\afterGrace es4 \\
\startTrillSpan { d16[ ( \stopTrillSpan es)] } \\
c( c' g es c g' es d \\
\hideNotes \\
c8) 
}
```

Extending glissandos across repeats

A glissando which extends into several \alternative blocks can be simulated by adding a hidden grace note with a glissando at the start of each \alternative block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function which takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

```plaintext
repeatGliss = #(define-music-function (grace) 
  (ly:pitch?) 
  #{ 
    % the next two lines ensure the glissando is long enough 
    % to be visible 
    \once \override Glissando.springs-and-rods = #ly:spanner::set-spacing-rods 
    \once \override Glissando.minimum-length = #3.5 
    \once \hideNotes 
    \grace \$grace \glissando 
  } 
}
```

```plaintext
\score { \\
\relative c' { \\
\repeat volta 3 { c4 d e f\glissando } \\
\alternative { \\
  { g2 d } \\
  \repeatGliss f g2 e } 
}
```
{ \repeatGliss f e2 d }
}
}

music = \relative c' { 
\voiceOne 
\repeat volta 2 { 
g a b c\glissando 
} 
\alternative { 
{ dl } 
{ \repeatGliss c \once \omit StringNumber e1\2 } 
} 
}

\score { 
\new StaffGroup << 
\new Staff << 
\context Voice { \clef "G_8" \music } 
>> 
\new TabStaff << 
\context TabVoice { \clef "moderntab" \music } 
>> 
>> 
}

\Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.
\paper { ragged-right = ##f } 
\relative c'' {

\once \override Staff.PianoPedalBracket.edge-height = #'(0 . 3)
Flat Ties

The function takes the default Tie.stencil as an argument, calculating the result relying on the extents of this default. Further tweaking is possible by overriding Tie.details.height-limit or with \shape. It’s also possible to change the custom-definition on the fly.

## http://lsr.di.unimi.it/LSR/Item?id=1031

    c2\< c\!
    \override Hairpin.style = #'zigzag
    c2\< c\!
    \revert Hairpin.style
}
```

Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p")

Some dynamic expressions involve additional text, like “sempre pp”. Since dynamics are usually centered under the note, the \pp would be displayed way after the note it applies to.

To correctly align the “sempre pp” horizontally, so that it is aligned as if it were only the \pp, there are several approaches:

* Simply use `\once\override DynamicText.X-offset = #-9.2` before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...

* Add some padding (`#:hspace 7.1`) into the definition of your custom dynamic mark, so that after LilyPond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.

* Shift the dynamic script `\once\override ... X-offset = ...` DRAWBACK: `\once\override` is needed for every invocation!

* Set the dimensions of the additional text to 0 (using `#:with-dimensions '(0 . 0) '(0 . 0)`). Drawback: To LilyPond “sempre” has no extent, so it might put other stuff there and
create collisions (which are not detected by the collision detection!). Also, there seems to be some spacing, so it’s not exactly the same alignment as without the additional text

* Add an explicit shifting directly inside the scheme function for the dynamic-script.

* Set an explicit alignment inside the dynamic-script. By default, this won’t have any effect, only if one sets X-offset! Drawback: One needs to set DynamicText.X-offset, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of pp.

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

1) modify `padding` or `extra-offset` values (as shown in the first snippet)
2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```
harmonies = \chordmode
{
  a8:13
  % THE FOLLOWING IS THE COMMAND TO MOVE THE CHORD NAME
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s2.
  % THIS LINE IS THE SECOND METHOD
  s4 s4 b4:13 }
\score
{
  <<\new ChordNames \harmonies
  \new Staff
  {a8\markup { \fret-diagram "6-x;5-0;4-2;3-0;2-0;1-2;" }
  % THE FOLLOWING IS THE COMMAND TO MOVE THE FRET DIAGRAM
  \once \override TextScript.extra-offset = #'(10 . 0)
  b4.~\markup { \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" } b4. a8\break
```
How to print two rehearsal marks above and below the same barline (method 1)

This method prints two ‘rehearsal marks’, one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate ‘break visibility’ as shown in snippet 1 will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using extra-offset does not change the bounding box of the mark from its original value.
How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

\score {

}
Inserting a caesura

Caesura marks can be created by overriding the `text` property of the `BreathingSign` object. A curved caesura mark is also available.

\relative c'' {
\override BreathingSign.text = \markup {\musicglyph "scripts.caesura.straight"}
c8 e4. \breathe g8. e16 c4
\override BreathingSign.text = \markup {\musicglyph "scripts.caesura.curved"}
g8 e'4. \breathe g8. e16 c4
}

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with `full-size-change`.

\relative c' {
\clef "treble"
c1
\clef "bass"
c1
\clef "treble"
c1
\override Staff.Clef.full-size-change = ##t
\clef "bass"
c1
\clef "treble"
c1
\revert Staff.Clef.full-size-change
\clef "bass"
c1
\clef "treble"
c1
}
Tweaks and overrides

Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```latex
\relative c'' {
\override TextSpanner.bound-padding = #1.0
\override TextSpanner.style = #'line
\override TextSpanner.bound-details.right.arrow = ##t
\override TextSpanner.bound-details.left.text = #'fof
\override TextSpanner.bound-details.right.text = #'gag
\override TextSpanner.bound-details.right.padding = #0.6
\override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
\override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
\override Glissando.bound-details.right.arrow = ##t
\override Glissando.arrow-length = #0.5
\override Glissando.arrow-width = #0.25

a8\startTextSpan gis a4 b\glissando b,
g'4 c\stopTextSpan c2
}
```

Making an object invisible with the 'transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```latex
\relative {
\time 2/4
<<
\once \hide Stem
\once \override Stem.length = #8
b'8 ~ 8\noBeam
\once \hide Stem
\once \override Stem.length = #8
g8 ~ 8\noBeam
}
\\{
\b8 g g e
}
```
Making glissandi breakable

Setting the `breakable` property to `#t` in combination with `after-line-breaking` allows a glissando to break if it occurs at a line break:

```latex
\override NoteColumn.glissando-skip = ##t
\override NoteHead.no-ledgers = ##t
```

```latex
\relative c'' {
  \time 2/4
  f1\glissando |
  a4 r2. |
  f1\glissando
  \once \glissandoSkipOn
  \break
  a2 a4 r4 |
}
```

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the `positions` setting of the `Beam` grob.

```latex
\relative c' {
  \time 2/4
  \override Beam.positions = #'(2 . 0)
  c8 c
}
\% from center to one above center (position 1)
\override Beam.positions = #'(0 . 1)
c8 c}

\new StaffGroup \relative c'' {
<<
  \new Staff { << \global { c1 c } >> } 
  \new Staff { << \global { c c } >> } 
>>
}

\relative c'' {
\override Staff.OttavaBracket.stencil = #ly:line-spanner::print
\override Staff.OttavaBracket.bound-details = #'((left . ((Y . 0) ; Change the integer here
   (attach-dir . ,LEFT)
   (padding . 0)
   (stencil-align-dir-y . ,CENTER)))
   (right . ((Y . 5) ; Change the integer here
     (padding . 0)
     (attach-dir . ,RIGHT)
     (text . ,(make-draw-dashed-line-markup (cons 0 -1.2)))))
\override Staff.OttavaBracket.left-bound-info =

Mensurstriche layout (bar lines between the staves)

The mensurstriche-layout where the bar lines do not show on the staves but between staves can
be achieved with a StaffGroup instead of a ChoirStaff. The bar line on staves is blanked out
using \hide.

global = {
  \hide Staff.BarLine
  s1 s
  \% the final bar line is not interrupted
  \undo \hide Staff.BarLine
  \bar "| ."
}

\new StaffGroup \relative c'' {
<<
  \new Staff { << \global { c1 c } >> } 
  \new Staff { << \global { c c } >> } 
>>

Modifying the Ottava spanner slope

It is possible to change the slope of the Ottava spanner.

\relative c'' {
\override Staff.OttavaBracket.stencil = #ly:line-spanner::print
\override Staff.OttavaBracket.bound-details = #'((left . ((Y . 0) ; Change the integer here
   (attach-dir . ,LEFT)
   (padding . 0)
   (stencil-align-dir-y . ,CENTER)))
   (right . ((Y . 5) ; Change the integer here
     (padding . 0)
     (attach-dir . ,RIGHT)
     (text . ,(make-draw-dashed-line-markup (cons 0 -1.2)))))
\override Staff.OttavaBracket.left-bound-info =
Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be over-ridden by using the `prefer-dotted-right` property of `NoteCollision`.

```lilypond
\new Staff \relative c' <<
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##t
  f2. f4
}\end
{ e4 e e e e e e e e e e e e e e e e }
```

Moving slur positions vertically

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

```lilypond
\relative c' {
  \stemDown
  e4( a)
  \override Slur.positions = #'(1 . 1)
  e4( a)
  \override Slur.positions = #'(2 . 2)
  e4( a)
  \override Slur.positions = #'(3 . 3)
```
Nesting staves

The property systemStartDelimiterHierarchy can be used to make more complex nested staff groups. The command \set StaffGroup.systemStartDelimiterHierarchy takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are SystemStartBar, SystemStartBracket, SystemStartBrace, and SystemStartSquare.

\new StaffGroup
\relative c'' <<
\set StaffGroup.systemStartDelimiterHierarchy = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a (SystemStartSquare b) ) c ) d)
\new Staff { c1 }
\new Staff { c1 }
\new Staff { c1 }
\new Staff { c1 }
\new Staff { c1 }
>>
Overriding articulations of distinct type

Sometimes you may want to affect a single articulation-type. Although it is always possible to use \tweak, it might become tedious to do so for every single sign of a whole score. The following shows how to tweak articulations with a list of custom-settings. One use-case might be to create a style-sheet.

With 2.16.2 it is possible to put the proposed function, \customScripts, into a \layout-block.

% Code by David Nalesnik and Thomas Morley

#(define (custom-script-tweaks ls)
    (lambda (grob)
        (let* ((type (ly:prob-property
                      (assoc-ref (ly:grob-properties grob) 'cause)
                      'articulation-type))
               (tweaks (assoc-ref ls type)))
            (if tweaks
                (for-each
                  (lambda (x) (ly:grob-set-property! grob (car x) (cdr x)))
                  tweaks))))

customScripts =
#(define-music-function (settings)(list?)
  #{
    \override Script.before-line-breaking =
      #(custom-script-tweaks settings)
    #}
)

revertCustomScripts = { \revert Script.before-line-breaking }

%%%%%%%%%%%%%%%%
% Example:
%%%%%%%%%%%%%%%%

% Predefine a list of desired tweaks.
#(define my-settings-1
  '(}
Percent repeat count visibility

Percent repeat counters can be shown at regular intervals by setting the context property `repeatCountVisibility`.

```latex
\relative c' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
}
```
Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

\relative c' {
    <c e g b>\arpeggio
    \once \override Arpeggio.positions = #'(-5 . 0)
    <c e g b>\arpeggio
    \once \override Arpeggio.positions = #'(0 . 5)
    <c e g b>\arpeggio
    \once \override Arpeggio.positions = #'(-5 . 5)
    <c e g b>\arpeggio
}

Positioning multi-measure rests

Unlike ordinary rests, there is no predefined command to change the staff position of a multi-measure rest symbol of either form by attaching it to a note. However, in polyphonic music multi-measure rests in odd-numbered and even-numbered voices are vertically separated. The positioning of multi-measure rests can be controlled as follows:

\relative c'' {
    % Multi-measure rests by default are set under the fourth line
    R1
    % They can be moved using an override
    \override MultiMeasureRest.staff-position = #-2
    R1
    \override MultiMeasureRest.staff-position = #0
    R1
    \override MultiMeasureRest.staff-position = #2
    R1
    \override MultiMeasureRest.staff-position = #3
    R1
    \override MultiMeasureRest.staff-position = #6
}
Tweaks and overrides

R1
\revert MultiMeasureRest.staff-position
\break

% In two Voices, odd-numbered voices are under the top line
<< { R1 } \ \ { a1 } >>
% Even-numbered voices are under the bottom line
<< { a1 } \ \ { R1 } >>
% Multi-measure rests in both voices remain separate
<< { R1 } \ \ { R1 } >>

% Separating multi-measure rests in more than two voices
% requires an override
<< { R1 } \ \ { R1 } \ \ 
  \once \override MultiMeasureRest.staff-position = #0
  { R1 }
>>

% Using compressed bars in multiple voices requires another override
% in all voices to avoid multiple instances being printed
\compressMMRests
<<
  \revert MultiMeasureRest.direction
  \ { R1*3 } \\
  \revert MultiMeasureRest.direction
  \ { R1*3 }
>>

Positioning text markups inside slurs

Text markups need to have the outside-staff-priority property set to false in order to be printed inside slurs.
\relative c'' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
c2(\markup { \halign #-10 \natural } d4.) c8
}

Printing bar numbers inside boxes or circles

Bar numbers can also be printed inside boxes or circles.

\relative c' {
  % Prevent bar numbers at the end of a line and permit them elsewhere
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

  % Increase the size of the bar number by 2
  \override Score.BarNumber.font-size = #2

  % Draw a box round the following bar number(s)
  \override Score.BarNumber.stencil
    = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
  \repeat unfold 5 { c1 }

  % Draw a circle round the following bar number(s)
  \override Score.BarNumber.stencil
    = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
  \repeat unfold 4 { c1 } \bar "|.”
}

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the direction property of MetronomeMark or RehearsalMark appropriately.

\layout {
  indent = 0
  ragged-right = ##f
}

{ 
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN \tempo 8. = 120 c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN \mark \default c''1
}

\relative c' { 
  \tempo 8. = 120
  \repeat unfold 5 { c1 }
  \bar "|.”
Printing note names with and without an octave marker

The \noteNames context can be used to print the text value of notes. The \printOctaveNames property turns on or off the representation of the octave of the note.

\scale = \relative c' {
  a4 b c d
e4 f g a
}

\new Staff {
  <<
    \scale
    \context NoteNames {
      \set printOctaveNames = ##f
      \scale
    }
  >>
}

\relative c'' {
  \override Score.SpacingSpanner.strict-note-spacing = ##t
  \set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
  \new Staff {
    c8[ c \clef alto c c \grace { d16 } c8 c] c4
c2 \grace { c16[ c16] } c2
  }
}

\new Staff {
  c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
c1
}

Proportional strict notespacing

If \strict-note-spacing is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

\relative c'' {
  \override Score.SpacingSpanner.strict-note-spacing = ##t
  \set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
  \new Staff {
    c8[ c \clef alto c c \grace { d16 } c8 c] c4
c2 \grace { c16[ c16] } c2
  }
}
Removing brace on first line of piano score

This snippet removes the first brace from a PianoStaff or a GrandStaff. It may be useful when cutting and pasting the engraved image into existing music.

It uses \alterBroken.

\score {
\once \override Staff.Clef.stencil = ##f
\once \override Staff.TimeSignature.stencil = ##f
\repeat unfold 3 c1 \break
\repeat unfold 5 c1 \break
\repeat unfold 5 c1
}

\new PianoStaff
<<
\new Staff = "right" \relative c' \someMusic
\new Staff = "left" \relative c' { \clef F \someMusic }
>>
\layout {
indent=75
\context {
\PianoStaff
\alterBroken transparent #'(#t) SystemStartBrace
}
}
Removing connecting bar lines on StaffGroup PianoStaff or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves. This behaviour can be overridden on a staff-by-staff basis.

\relative c' {
  \new StaffGroup <<
    \new Staff {
      e1 | e
      \once \override Staff.BarLine.allow-span-bar = ##f
e1 | e | e
    }
  \new Staff {
    c1 | c | c
    \once \override Staff.BarLine.allow-span-bar = ##f
c1 | c
  }
  \new Staff {
    a1 | a | a | a | a
  }
>>
}

Removing the first empty line

The first empty staff can also be removed from the score by setting the VerticalAxisGroup property remove-first. This can be done globally inside the \layout block, or locally inside the specific staff that should be removed. In the latter case, you have to specify the context (Staff applies only to the current staff) in front of the property.

The lower staff of the second staff group is not removed, because the setting applies only to the specific staff inside of which it is written.

\layout {
  \context {
    \Staff \RemoveEmptyStaves
    \% To use the setting globally, uncomment the following line:
    \% \override VerticalAxisGroup.remove-first = ##t
  }
}
Rest styles

Rests may be used in various styles.
\new Staff \relative c { 
  \omit Score.TimeSignature
\cadenzaOn

\override Staff.Rest.style = #'mensural

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians. The standard support for this using \repeat percent is unsuitable here since the first beat has to be an ordinary note or rest. This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the r4 in the definitions with a rest of the appropriate duration).

% Macro to print single slash
rs = {
    \once \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
    \once \override Rest.thickness = #0.48
    \once \override Rest.slope = #1.7
    r4
}

% Function to print a specified number of slashes
comp = #(define-music-function (count) (integer?)
    #{
        \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
        \override Rest.thickness = #0.48
        \override Rest.slope = #1.7
        \repeat unfold $count { r4 }
        \revert Rest.stencil
    #}
)

\score {
    \relative c' {
        c4 d e f |
        \rs \rs \rs \rs |
        \comp #4 |
    }
}

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the 'break-align-orders property of the BreakAlignment grob.

The value of 'break-align-orders is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving key-cancellation before staff-bar; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

\new Staff {
    \override Score.BreakAlignment.break-align-orders =
Setting hairpin behavior at bar lines

If the note which ends a hairpin falls on a downbeat, the hairpin stops at the bar line immediately preceding. This behavior can be controlled by overriding the 'to-barline' property.

```latex
\relative c'' {
  e4\langle e2.
  e1!\
  \Override Hairpin.to-barline = ##f
e4\langle e2.
e1!\
}
```

Setting system separators

System separators can be inserted between systems. Any markup can be used, but \slashSeparator has been provided as a sensible default.

```latex
\paper {
  system-separator-markup = \slashSeparator
  line-width = 120
}
notes = \relative c' {
  c1 | c \break
  c1 | c \break
  c1 | c
}
\book {
```
\score {
    \new GrandStaff <<
    \new Staff \notes
    \new Staff \notes
    >>
}
}
Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, \c4_\fermata^\fermata will only show a fermata below. The fermata above will simply be ignored. However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, `add-stem-support` would be required. So, the solution is to write the note as a chord and add the articulations inside the `<...>`. The direction will always be above, but one can tweak this via a `\tweak`:

\c4_\tweak direction #DOWN-\fermata^\fermata

% The same as `\flageolet`, just a little smaller
\smallFlageolet = #(let ((m (make-articulation "flageolet")))
  (set! (ly:music-property m 'tweaks)
    (acons 'font-size -2
    (ly:music-property m 'tweaks)))
  m)

\relative c' {
  s4"Wrong:"
  c4_\fermata^\fermata % The second fermata is ignored!
  <e d'>4\smallFlageolet_\smallFlageolet

  s4"Works if written inside a chord:"
  <e_\smallFlageolet d'\smallFlageolet>4
  <e_\flageolet d'\flageolet>4
  <e_\smallFlageolet\smallFlageolet>4
  <e_\fermata^\fermata>4
}

Wrong: Works if written inside a chord:

\[\text{Works if written inside a chord:}\]

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

\stringNumberSpanner = #(define-music-function (StringNumber) (string?))
  #{
    \override TextSpanner.style = #'solid
    \override TextSpanner.font-size = #-5
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    \override TextSpanner.bound-details.left.text =
    \markup { \circle \number $StringNumber }
  #)}
Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message 'warning: ignoring too many clashing note columns' will appear when compiling the LilyPond file. This message can be suppressed by setting the 'ignore-collision' property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

\begin{verbatim}
ignore = \override NoteColumn.ignore-collision = ##t
\end{verbatim}

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

\begin{verbatim}
\textbf{\texttt{\relative c' {}}}
\end{verbatim}
Time signature in parentheses

The time signature can be enclosed within parentheses.
\relative c'' {
\override Staff.TimeSignature.stencil = #(lambda (grob)
  (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
\time 2/4
a4 b8 c
}

Time signature printing only the numerator as a number (instead of the fraction)

Sometimes, a time signature should not print the whole fraction (e.g. 7/4), but only the numerator (7 in this case). This can be easily done by using \override Staff.TimeSignature.style = #'single-digit to change the style permanently. By using \revert Staff.TimeSignature.style, this setting can be reversed. To apply the single-digit style to only one time signature, use the \override command and prefix it with a \once.
\relative c'' {
\time 3/4
c4 c c
% Change the style permanently
\override Staff.TimeSignature.style = #'single-digit
\time 2/4
c4 c
\time 3/4
c4 c c
% Revert to default style:
\revert Staff.TimeSignature.style
\time 2/4
c4 c
% single-digit style only for the next time signature
\once \override Staff.TimeSignature.style = #'single-digit
\time 5/4
c4 c c c c
\time 2/4
c4 c
}

Tuplet bracket and change staff

This snippet shows how to set a tuplet starting in a lower staff and finishing in the upper one.
aigues = \relative c' {
\time 6/8
Tweaking clef properties

Changing the Clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines `middleCClefPosition` must also be specified, with positive or negative values moving middle C up or down respectively, relative to the staff’s center line.

For example, \clef "treble_8" is equivalent to setting the `clefGlyph`, `clefPosition` (the vertical position of the clef itself on the staff), `middleCPosition` and `clefTransposition`. Note that when any of these properties (except `middleCPosition`) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.
\%

```plaintext
{
  \%
  The default treble clef
  \key f \major
  c'1
  \%
  The standard bass clef
  \set Staff.clefGlyph = "#clefs.F"
  \set Staff.clefPosition = #2
  \set Staff.middleCPosition = #6
  \set Staff.middleCClefPosition = #6
  \key g \major
  c'1
  \%
  The baritone clef
  \set Staff.clefGlyph = "#clefs.C"
  \set Staff.clefPosition = #4
  \set Staff.middleCPosition = #4
  \set Staff.middleCClefPosition = #4
  \key f \major
  c'1
  \%
  The standard choral tenor clef
  \set Staff.clefGlyph = "#clefs.G"
  \set Staff.clefPosition = #-2
  \set Staff.clefTransposition = #-7
  \set Staff.middleCPosition = #1
  \set Staff.middleCClefPosition = #1
  \key f \major
  c'1
  \%
  A non-standard clef
  \set Staff.clefPosition = #0
  \set Staff.clefTransposition = #0
  \set Staff.middleCPosition = #0
  \set Staff.middleCClefPosition = #0
  \key g \major
  c'1 \break

  \%
  The following clef changes do not preserve
  \%
  the normal relationship between notes, key signatures
  \%
  and clefs:

  \set Staff.clefGlyph = "#clefs.F"
  \set Staff.clefPosition = #2
  c'1
  \set Staff.clefGlyph = "#clefs.G"
  c'1
  \set Staff.clefGlyph = "#clefs.C"
  c'1
  \set Staff.clefTransposition = #7
  c'1
  \set Staff.clefTransposition = #0
  \set Staff.clefPosition = #0
  c'1

  \%
  Return to the normal clef:

```
Tweaks and overrides

The layout of grace expressions can be changed throughout the music using the functions `add-grace-property` and `remove-grace-property`. The following example undefines the `Stem` direction for this grace, so that stems do not always point up, and changes the default note heads to crosses.

```music
\relative c'' {
  \new Staff {
    $(\text{remove-grace-property 'Voice 'Stem 'direction})
    $(\text{add-grace-property 'Voice 'NoteHead 'style 'cross})
    \new Voice {
      \acciaccatura { f16 } g4
      \grace { d16 e } f4
      \appoggiatura { f,32 g a } e2
    }
  }
}
```

Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. Valid values are `modern-straight-flag`, `old-straight-flag` and `flat-flag`.

```music
testnotes = {
  \autoBeamOff
  c8 d16 c32 d64 \acciaccatura { c8 } d64 r4
}
\score {
  \relative c' {
    \time 2/4
    \testnotes
    \override Flag.stencil = #modern-straight-flag
  }
}
Using \texttt{ly:grob-object} to access grobs with \texttt{\tweak}

Some grobs can be accessed “laterally” from within another grob’s callback. These are usually listed as “layout objects” in the “Internal properties” section of a grob-interface. The function \texttt{ly:grob-object} is used to access these grobs.

Demonstrated below are some ways of accessing grobs from within a NoteHead callback, but the technique is not limited to NoteHeads. However, the NoteHead callback is particularly important, since it is the implicit callback used by the \texttt{\tweak} command.

The example function defined below ("display-grobs") is probably not that useful, but it demonstrates that the grobs are indeed being accessed.

Example console output:

\begin{verbatim}
\#Grob Accidental () \#Grob Stem
\#(define (notehead-get-accidental notehead)
    ;; notehead is grob
    (ly:grob-object notehead 'accidental-grob))

\#(define (notehead-get-arpeggio notehead)
    ;; notehead is grob
    (let ((notecolumn (notehead-get-notecolumn notehead)))
      (ly:grob-object notecolumn 'arpeggio)))

\#(define (notehead-get-notecolumn notehead)
    ;; notehead is grob
    (ly:grob-parent notehead X))

\#(define (notehead-get-stem notehead)
    ;; notehead is grob
\end{verbatim}
Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

\begin{verbatim}
\makeatletter
\newcommand{\myNoteHeads}{\override NoteHead.stencil = \parallelogram}
\makeatother
\end{verbatim}

\begin{verbatim}
\makeatletter
\newcommand{\myNoteHeads}{\override NoteHead.stencil = \parallelogram}
\makeatother
\end{verbatim}

\relative c' {\myNoteHeads}

\begin{verbatim}
parallellogram =
(#(ly:make-stencil (list 'embedded-ps
"gsave
 currentpoint translate
 newpath
 0 0.25 moveto
 1.3125 0.75 lineto
 1.3125 -0.25 lineto
 0 -0.75 lineto
 closepath
 fill
 grestore")
 (cons 0 1.3125)
 (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallellogram
normalNoteHeads = \revert NoteHead.stencil

\myNoteHeads
\end{verbatim}

\begin{verbatim}
\myNoteHeads
\end{verbatim}
g4 d' 
\normalNoteHeads
<f, \tweak stencil \parallelogram b e>4 d 
}

\relative c' {
  \time 2/4
  \set fingeringOrientations = #'(right)
  \tweak font-size #3 c
  \tweak color #red d-\tweak font-size #8 -4
  \tweak style #'cross g
  \tweak duration-log #2 a
  >2
}

Vertically aligned dynamics and textscripts

All DynamicLineSpanner objects (hairpins and dynamic texts) are placed with their reference line at least `staff-padding from the staff, unless other notation forces them to be farther. Setting `staff-padding to a sufficiently large value aligns the dynamics.

The same idea, together with `textLengthOn, is used to align the text scripts along their baseline.

\music = \relative c' {
\markup { \huge gorgeous } c\markup { \huge fantastic }
}\operation{\markup { \huge gorgeous } c\markup { \huge fantastic }
}

\text
\break
\override DynamicLineSpanner.staff-padding = #3
\textLengthOn
\override TextScript.staff-padding = #1
\music
}
Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties `alignBelowContext` and `alignAboveContext` to control the positioning of lyrics and ossias.

\paper {
  ragged-right = ##t
}

\relative c' {
  \new Staff = "1" { c4 c s2 }
  \new Staff = "2" { c4 c s2 }
  \new Staff = "3" { c4 c s2 }
  { \skip 2
    \lyrics {
      \set alignBelowContext = #"1"
      lyrics4 below
    }
    \new Staff \with {
      alignAboveContext = #"3"
      fontSize = #-2
      \override StaffSymbol.staff-space = #(magstep -2)
      \remove "Time_signature_engraver"
    }
    { \tuplet 6/4 {
        c8[^"ossia above" d e d e f]
      }
    }
  }
}

}
Vertically centering paired figured bass extenders

Where figured bass extender lines are being used by setting `useBassFigureExtenders` to true, pairs of congruent figured bass extender lines are vertically centered if `figuredBassCenterContinuations` is set to true.

```
<< \relative c' {
    c8 c b b a a c16 c b b
    c8 c b b a a c16 c b b
    c8 c b b a a c c b b
}
\figures {
    \set useBassFigureExtenders = ##t
    <6+ 4 3>4 <6 4 3>8 r
    <6+ 4 3>4 <6 4 3>8 <4 3>16 r
    \set figuredBassCenterContinuations = ##t
    <6+ 4 3>4 <6 4 3>8 r
    <6+ 4 3>4 <6 4 3>8 <4 3>16 r
    \set figuredBassCenterContinuations = ##f
    <6+ 4 3>4 <6 4 3>8 r
    <6+ 4 3>4 <6 4 3>8 <4 3>8
}
>>
```
Paper and layout

Section “Spacing issues” in Notation Reference

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName #'self-alignment-X` property. The \layout variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

\paper { left-margin = 3\cm }

\score {
\new StaffGroup <<

\new Staff \with {
  \override InstrumentName.self-alignment-X = #LEFT
  instrumentName = \markup \left-column {
    "Left aligned"
    "instrument name"
  }
  shortInstrumentName = "Left"
}

{ c''1 \break c''1 }

\new Staff \with {
  \override InstrumentName.self-alignment-X = #CENTER
  instrumentName = \markup \center-column {
    Centered
    "instrument name"
  }
  shortInstrumentName = "Centered"
}

{ g'1 g'1}

\new Staff \with {
  \override InstrumentName.self-alignment-X = #RIGHT
  instrumentName = \markup \right-column {
    "Right aligned"
    "instrument name"
  }
  shortInstrumentName = "Right"
}

{ e'1 e'1 }

>>

\layout {
  ragged-right = ##t
Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line, where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```latex
\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f
  }
}

aliceSings = \markup { \text { \smallCaps "Alice" } }

eveSings = \markup { \text { \smallCaps "Eve" } }

<<
  \new Staff <<
  \new Voice = "alice" {
    f'4\aliceSings g' \rest 2 |
    s1 |
    f'4\aliceSings g' \rest 2 |
    s1 | \break
    % ...
  }
  \voiceOne
}
Book parts

\bookpart can be used to split a book into several parts. Each part last page can be affected by ragged-last-bottom. Header and footer markups can detect a part last page, and make the difference with the book last page.

%(set-default-paper-size "a6")

\book {
  \%

Changing the staff size

Though the simplest way to resize staves is to use \( \texttt{(set-global-staff-size xx)} \), an individual staff’s size can be changed by scaling the properties 'staff-space and fontSize.

<<
\new Staff {
  \relative c'' {
    \dynamicDown
c8\ff c c c c c c c
  }
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} {
  \clef bass
c8 c c c c\f c c c
}
>>
Clip systems

This code shows how to clip (extract) snippets from a full score.

This file needs to be run separately with -dclip-systems; the snippets page may not adequately show the results.

The result will be files named 'base-from-start-to-end[-count].eps'.

If system starts and ends are included, they include extents of the System grob, e.g., instrument names.

Grace notes at the end point of the region are not included.

Regions can span multiple systems. In this case, multiple EPS files are generated.

#(ly:set-option 'clip-systems)
#(define output-suffix "1")

Titles

Section “Titles and headers” in Notation Reference

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

% first, define a variable to hold the formatted date:
\set Strut #<#(strftime "\%d-%\%m-%\%Y" (localtime (current-time)))>
\set Strut #<#(strftime "\%d-%\%m-%\%Y" (localtime (current-time)))>

% use it in the title block:
\header {
  title = "Including the date!"
  subtitle = \date
}

\score {
  \relative c' {
    c4 c c c
  }
}
% and use it in a \markup block:
\markup {
  \date
}

Including the date!

01-03-2020

01-03-2020

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the Staff.InstrumentName #self-alignment-X property. The layout variables indent and short-indent define the space in which the instrument names are aligned before the first and the following systems, respectively.

\paper { left-margin = 3\cm }

\score {
  \new StaffGroup <<
    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
\new Staff \with {
  \override InstrumentName.self-alignment-X = #CENTER
  instrumentName = \markup \center-column {
    Centered
    "instrument name"
  }
  shortInstrumentName = "Centered"
}

{ c''1 \break c''1 }

\new Staff \with {
  \override InstrumentName.self-alignment-X = #RIGHT
  instrumentName = \markup \right-column {
    Right aligned
    "instrument name"
  }
  shortInstrumentName = "Right"
}

{ g'1 g'1}

{ e'1 e'1 }

>>

Outputting the version number

By putting the output of \lilypond-version into a lyric, it is possible to print the version number of LilyPond in a score, or in a document generated with \lilypond-book. Another possibility is to append the version number to the doc-string, in this manner:

\score {
  \new Lyrics {
    \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark #(string-append "Processed with LilyPond version " (lilypond-version))
  }
}

Processed with LilyPond version 2.20.0
Spacing

Section “Spacing issues” in Notation Reference

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:

\new Staff \new Voice = melody \relative c' {
  c4 d e f
g4 f e d
c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
g4 f e d
c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing = #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa aa }

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff. However, this behavior can be canceled. Note: you must use a chord construct <<>, even if it is only a single note.

\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 <g'-0>
}
Page label

Page labels may be placed inside music or at top-level, and referred to in markups.

```lilypond
(set-default-paper-size "a6")

define-markup-command (toc-line layout props label text)
  (symbol? markup?)
  (interpret-markup layout props
   (markup #:fill-line (text #:page-ref label "8" "?")))

\book {
  \markup \huge \fill-line { \null Title Page \null }

  \pageBreak

  \label #'toc
  \markup \column {
    \large \fill-line { \null Table of contents \null }
    \toc-line #'toc "Table of contents"

First score

A (page 3)
Proportional strict notespacing

If strict-note-spacing is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```lilypond
\relative c' { 
\override Score.SpacingSpanner.strict-note-spacing = ##t
\set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
\new Staff { 
c8[ c \clef alto c c \grace { d16 } c8 c] c4 
c2 \grace { c16[ c16] } c2 
} 
\new Staff { 
c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4 
c1 
} 
} >>
```
Vertically aligned dynamics and textscripts

All DynamicLineSpanner objects (hairpins and dynamic texts) are placed with their reference line at least 'staff-padding' from the staff, unless other notation forces them to be farther. Setting 'staff-padding' to a sufficiently large value aligns the dynamics.

The same idea, together with \textLengthOn, is used to align the text scripts along their baseline.

\verbatim
music = \relative c' {
    a'2\p b\f
    e4\p f/f/\> g, b\p
    c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

\verbatim
\music
\break
\override DynamicLineSpanner.staff-padding = #3
\textLengthOn
\override TextScript.staff-padding = #1
\music
\verbatim

Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties alignBelowContext and alignAboveContext to control the positioning of lyrics and ossias.

\verbatim
\paper {
    \ragged-right = ##t
}

\verbatim
\relative c' <<
    \new Staff = "1" { c4 c s2 }
    \new Staff = "2" { c4 c s2 }
    \new Staff = "3" { c4 c s2 }
\verbatim
\skip 2
\lyrics {
  \set alignBelowContext = #'1'
  lyrics4 below
}
\new Staff \with {
  alignAboveContext = #'3'
  fontSize = #-2
  \override StaffSymbol.staff-space = #(magstep -2)
  \remove "Time_signature_engraver"
} {
  \tuplet 6/4 {
    c8[^"ossia above" d e d e f]
  }
}
}
MIDI

Section “Creating MIDI output” in Notation Reference

Changing MIDI output to one channel per voice

When outputting MIDI, the default behavior is for each staff to represent one MIDI channel, with all the voices on a staff amalgamated. This minimizes the risk of running out of MIDI channels, since there are only 16 available per track.

However, by moving the Staff_performer to the Voice context, each voice on a staff can have its own MIDI channel, as is demonstrated by the following example: despite being on the same staff, two MIDI channels are created, each with a different midiInstrument.

\score {
\new Staff <<
\newVoice \relative c'' {
\set midiInstrument = #"flute"
\voiceOne
\key g \major
\time 2/2
r2 g-"Flute" ~
g fis ~
fis4 g8 fis e2 ~
e4 d8 cis d2
}
\newVoice \relative c'' {
\set midiInstrument = #"clarinet"
\voiceTwo
b1-"Clarinet"
a2. b8 a
g2. fis8 e
fis2 r
}
>>
\layout { }
\midi {
\context {
\Staff
\remove "Staff_performer"
}
\context {
\Voice
\consists "Staff_performer"
}
\tempo 2 = 72
}
Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

\score {
\new Staff \relative c' {
\tempo 4 = 160
\c4 e\ g\ b
\c4\ b\ d\ c
\set Score.tempoHideNote = ##t
\tempo 4 = 96
\d,4 fis\ a\ cis
\d4\ cis\ e\ d
}
\layout {}
\midi {}
}

\( \text{\( j = 160 \)} \)

Creating custom dynamics in MIDI output

The following example shows how to create a dynamic marking, not included in the default list, and assign it a specific value so that it can be used to affect MIDI output.

The dynamic mark \( \text{rfz} \) is assigned a value of 0.9.

\#(define (myDynamics dynamic)
  (if (equal? dynamic "rfz")
    0.9
    (default-dynamic-absolute-volume dynamic)))

\score {
\new Staff {
\set Staff.midiInstrument = #$"cello"
\set Score.dynamicAbsoluteVolumeFunction = #myDynamics
\new Voice {
\relative {
\a'4\pp\ b\ c-\text{rfz}
}
}
\layout {}
\midi {}
}

\( \text{\pp} \)

Replacing default MIDI instrument equalization

The default MIDI instrument equalizer can be replaced by setting the instrumentEqualizer property in the Score context to a user-defined Scheme procedure that uses a MIDI instrument name as its argument along with a pair of fractions indicating the minimum and maximum volumes respectively to be applied to that specific instrument.

The following example sets the minimum and maximum volumes for flute and clarinet respectively.

```
#(define my-instrument-equalizer-alist '())

#(set! my-instrument-equalizer-alist
  (append
   '("flute" . (0.7 . 0.9))
   ("clarinet" . (0.3 . 0.6)))
  my-instrument-equalizer-alist))

#(define (my-instrument-equalizer s)
  (let ((entry (assoc s my-instrument-equalizer-alist)))
    (if entry
      (cdr entry))))

\score {
  <<
    \new Staff {
      \key g \major
      \time 2/2
      \set Score.instrumentEqualizer = #my-instrument-equalizer-equalizer
      \set Staff.midiInstrument = "flute"
      \new Voice \relative {r2 g'\mp g fis~4 g8 fis e2~4 d8 cis d2}
    }
    \new Staff {

This is quite an advanced template, for a jazz ensemble. Note that all instruments are notated in \key c \major. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a \transpose section.

\header {  
This is line one of the first verse  
This is line two of the same  
And here's line three of the first verse  
And the last line of the same

Score for diatonic accordion

A template to write a score for a diatonic accordion.

- There is a horizontal staff indicating if the accordion must be pushed (thick line) or pulled (thin line)

- There is a small rhythmic staff with lyrics that describes the bass buttons to press. The bar lines are made from gridlines

- The tabulator staff for diatonic accordions shows the geographic position of the buttons and not (as for every other instrument) the pitch of the notes; the keys on the melody-side of the accordion are placed in three columns and about 12 rows

In the tabulator staff notation the outermost column is described with notes between lines, the innermost column is described with notes between lines and a cross as accidental, and the middle column is described with notes on a line, whereby the row in the middle is represented on the middle line in the staff.

Some words to transpose piano notes to the diatonic accordion:

1. Every diatonic accordion is built for some keys only (for example, for the keys of C major and F major), so it is important to transpose a piano melody to match one of these keys.
Transpose the source code, not only the output because this code is required later on to translate it once more to the tabulator staff. This can be done with the command \texttt{displayLilyMusic}.

2. You have to alternate the push- and pull-direction of the accordion regularly. If the player has a too long part to pull the accordion gets broken. On the other hand, some harmonies are only available in one direction. Considering this, decide which parts of the melody are the push-parts and which the pull-parts.

3. For each pull- or push-part translate the piano notes to the according tabulature representation.

\texttt{verse = \lyricmode \{ Wie gross bist du! Wie gross bist du! \}}

\texttt{harmonies = \new ChordNames \chordmode \{\germanChords \set chordChanges = ##t bes8 bes8 bes8 es2 f bes1 \}}

\texttt{NoStem = \{ \hide Stem \}}
\texttt{NoNoteHead = \hide NoteHead}
\texttt{ZeroBeam = \override Beam.positions = #'(0 . 0)}

\texttt{staffTabLine = \new Staff \with \{ \remove "Time_signature_engraver" \remove "Clef_engraver" \} \override Staff.StaffSymbol.line-positions = #'(0)
\% Shows one horizontal line. The vertical line
\% (simulating a bar-line) is simulated with a gridline
\set Staff.midiInstrument = #$"choir aahs"
\key c \major
\relative c'\{
\% disable the following line to see the noteheads while writing the song
\NoNoteHead
\override NoteHead.no-ledgers = ##t

\% The beam between 8th-notes is used to draw the push-line
\% How to fast write the push-lines:
\% 1. write repeatedly 'c c c c c c c |' for the whole length of the song
\% 2. uncomment the line \NoNoteHead
\% 3. compile
\% 4. Mark the positions on which push/pull changes.
\% In the score-picture click on the position
\% the push- or pull-part starts
\% (on the noteHead, the cursor will change to a hand-icon).
\% The cursor in the source code will jump just at this position.
\% a) If a push-part starts there, replace the 'c' by an 'e['
\% b) If a pull-part starts there, replace the 'c' by an 's'
\% 5. Switch into 'overwrite-mode' by pressing the 'ins' key.
\% 6. For the pull-parts overwrite the 'c' with 's'
% 7. For every push-part replace the last 'c' with 'e']
% 8. Switch into 'insert-mode' again
% 9. At last it should look like e.g.
%      (s s e[ c | c c c c c c c | c c c c e] s s)
% 10. re-enable the line \NoNoteHead
\autoBeamOff
\ZeroBeam
  s8 s s e[ c c c c c c e] | s s s s s
}
}

Single staff template with notes lyrics chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

```latex
verseI = \lyricmode {
    \set stanza = #'1.'
    \This is the first verse
}

verseII = \lyricmode {
    \set stanza = #'2.'
    \This is the second verse.
}

theChords = \chordmode {
    \% insert chords for chordnames and fretboards here
    c2 g4 c
}

staffMelody = \relative c' {
    \key c \major
    \clef treble
    \% Type notes for melody here
    c4 d8 e f4 g
    \bar "|.
}

\score {
    \context ChordNames { \theChords }
    \context FretBoards { \theChords }
    \new Staff {
        \context Voice = "voiceMelody" { \staffMelody }
    }
    \new Lyrics = "lyricsI" {
        \lyricsto "voiceMelody" \verseI
    }
    \new Lyrics = "lyricsII" {
        \lyricsto "voiceMelody" \verseII
    }
    \layout { }
    \midi { }
}
```

1. This is the first verse
2. This is the second verse.
Single staff template with notes and chords

Want to prepare a lead sheet with a melody and chords? Look no further!

```latex
melody = \relative c' {
    \clef treble
    \key c \major
    \time 4/4
    f4 e8[ c] d4 g
    a2 ~ a
}

harmonies = \chordmode {
    c4:m f:min7 g:maj c:aug
d2:dim b4:5 e:sus
}

\score {
    \new ChordNames {
        \set chordChanges = ##t
        \harmonies
    }
    \new Staff \melody
}
```

```
Cm Fm7 G\triangledown C+ D^0 B E^{sus4}
```

Single staff template with notes and lyrics

This small template demonstrates a simple melody with lyrics. Cut and paste, add notes, then words for the lyrics. This example turns off automatic beaming, which is common for vocal parts. To use automatic beaming, change or comment out the relevant line.

```latex
melody = \relative c' {
    \clef treble
    \key c \major
    \time 4/4
    a4 b c d
}

text = \lyricmode {
    Aaa Bee Cee Dee
}

\score{
```
Single staff template with only notes
This very simple template gives you a staff with notes, suitable for a solo instrument or a melodic fragment. Cut and paste this into a file, add notes, and you’re finished!

\begin{verbatim}
\new Voice = "one" {
  \autoBeamOff
  \melody
}
\new Lyrics \lyricsto "one" \text
\end{verbatim}

String quartet template (simple)
This template demonstrates a simple string quartet. It also uses a \global section for time and key signatures

\begin{verbatim}
global= {
  \time 4/4
  \key c \major
}
\end{verbatim}

\begin{verbatim}
violinOne = \new Voice \relative c'' {
  c2 d
e1
  \bar "|:"
}
\end{verbatim}
violinTwo = \new Voice \relative c' {  
g2 f  
e1  
\bar "|."  
}\violinTwo

viola = \new Voice \relative c' {  
\clef alto  
e2 d  
c1  
\bar "|."  
}\viola

cello = \new Voice \relative c' {  
\clef bass  
c2 b  
a1  
\bar "|."  
}\cello

\score {  
\new StaffGroup <<  
\new Staff \with { instrumentName = "Violin 1" }  
<< \violinOne >>  
\new Staff \with { instrumentName = "Violin 2" }  
<< \violinTwo >>  
\new Staff \with { instrumentName = "Viola" }  
<< \viola >>  
\new Staff \with { instrumentName = "Cello" }  
<< \cello >>  
>>  
\layout { }  
\midi { }  
}
String quartet template with separate parts

The “String quartet template” snippet produces a nice string quartet, but what if you needed to print parts? This new template demonstrates how to use the \tag feature to easily split a piece into individual parts.

You need to split this template into separate files; the filenames are contained in comments at the beginning of each file. piece.ly contains all the music definitions. The other files – score.ly, vn1.ly, vn2.ly, vla.ly, andvlc.ly – produce the appropriate part.

Do not forget to remove specified comments when using separate files!

%%% piece.ly
%%% (This is the global definitions file)

global= {
  \time 4/4
  \key c \major
}

Violinone = \new Voice {  
  \relative c'' {  
    c2 d e1  
    \bar "|."  
  }
}

Violintwo = \new Voice {  
  \relative c'' {  
    g2 f e1  
    \bar "|."  
  }
}

Viola = \new Voice {  
  \relative c' {  
    \clef alto  
    e2 d c1  
    \bar "|."  
  }
}

Cello = \new Voice {  
  \relative c' {  
    \clef bass  
    c2 b a1  
    \bar "|."  
  }
}
music = {
  \t\tag #'score \tag #'vn1
  \t\new Staff \with { instrumentName = "Violin 1" }
  \t<< \global \Violinone >>

}

% vn2.ly
% (This is the Violin 2 part file)
Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in “Vocal ensemble template”. This demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, tenorMusic), then the changes will also apply to the piano reduction.

\paper {
  top-system-spacing.basic-distance = #10
  score-system-spacing.basic-distance = #20
  system-system-spacing.basic-distance = #20
  last-bottom-spacing.basic-distance = #10

    \lyricsto "tenors" \tenorWords
Vocal ensemble template with verse and refrain

This template creates a score which starts with a solo verse and continues into a refrain for two voices. It also demonstrates the use of spacer rests within the \global variable to define meter changes (and other elements common to all parts) throughout the entire score.

\global = { 
  \key g \major

  }
Vocal ensemble template

Here is a standard four-part SATB vocal score. With larger ensembles, it is often useful to include a section which is included in all parts. For example, the time signature and key signature are almost always the same for all parts. Like in the “Hymn” template, the four voices are regrouped on only two staves.

\paper {
  top-system-spacing.basic-distance = #10
  score-system-spacing.basic-distance = #20
  system-system-spacing.basic-distance = #20
  last-bottom-spacing.basic-distance = #10
}
