Music Glossary

The LilyPond development team

This glossary provides definitions and translations of musical terms used in the documentation manuals for LilyPond version 2.24.0.

For more information about how this manual fits with the other documentation, or to read this manual in other formats, see Section “Manuals” in General Information.
If you are missing any manuals, the complete documentation can be found at https://lilypond.org/.

- NL: a
- DK: a
- S: a
- FI: A, a

See also

Chapter 3 [Pitch names], page 87.

1.2 a due

Abbreviated a2 or a 2. In orchestral scores, a due indicates that:
1. A single part notated on a single staff that normally carries parts for two players (e.g., first and second oboes) is to be played by both players.
2. Or conversely, that two pitches or parts notated on a staff that normally carries a single part (e.g., first violin) are to be played by different players, or groups of players (‘desks’).

See also

No cross-references.

1.3 accelerando

[Italian: ‘speed up, accelerate’]

An increase in the tempo, abbreviated accel.

See also

No cross-references.
1.4 accent

The stress of one tone over others.

See also
No cross-references.

1.5 accessory
See also
Section 1.228 [ornament], page 58.

1.6 acciaccatura

A grace note which takes its time from the rest or note preceding the principal note to which it is attached. The acciaccatura is drawn as a small eighth note (quaver) with a line drawn through the flag and stem.

See also
Section 1.20 [appoggiatura], page 6, Section 1.146 [grace notes], page 36, Section 1.210 [mordent], page 53, Section 1.228 [ornament], page 58.

1.7 accidental

An accidental alters a note by:
• Raising its pitch:
  • By two semitones—double sharp
  • By one semitone—sharp
• Lowering its pitch:
  • By one semitone—flat
  • By two semitones—double flat
• Or canceling the effects of the key signature or previous accidentals.

See also
Section 1.13 [alteration], page 4, Section 1.270 [semitone], page 68, Section 1.341 [whole tone], page 83.
1.8 adagio

[Italian: ‘comfortable, easy’]

- Slow tempo, slower – especially in even meter – than andante and faster than largo.
- A movement in slow tempo, especially the second (slow) movement of sonatas, symphonies, etc.

See also
Section 1.19 [andante], page 5, Section 1.171 [largo], page 43, Section 1.286 [sonata], page 71.

1.9 al fine

[Italian: ‘to the end’]

In an instruction such as D.C. al Fine, indicates that the performance should continue to the point marked Fine.

See also
Section 1.79 [da capo], page 20, Section 1.81 [dal segno], page 21, Section 1.130 [fine], page 32.

1.10 al niente

[Italian: ‘to nothing’] Used with decrescendo to indicate that the sound should fade away to nothing.

Al niente is indicated by circling the tip of the hairpin:

```
\begin{tikzpicture}
    \node at (0,0) {\textbf{Al niente}};
    \draw[thick, bend left] (0,0) to (0.5,0.5);
    \draw[thick, bend right] (0,0) to (0.5,-0.5);
\end{tikzpicture}
```

or with the actual phrase al niente:

```
\begin{tikzpicture}
    \node at (0,0) {\textbf{decresc.} - - \textit{al niente}};
    \draw[thick, bend left] (0,0) to (0.5,0.5);
    \draw[thick, bend right] (0,0) to (0.5,-0.5);
\end{tikzpicture}
```

Since one does not crescendo to nothing, it is not correct to use al niente with crescendo. Instead, one should use dal niente (from nothing).

See also
Section 1.74 [crescendo], page 19, Section 1.80 [dal niente], page 21, Section 1.82 [decrescendo], page 21, Section 1.151 [hairpin], page 37.
1.11 alla breve

[Italian: ‘on the breve’] Twice as fast as the notation indicates. Also called in cut time. The name derives from mensural notation, where the tactus (or beat) is counted on the semibreve (the modern whole note). Counting ‘on the breve’ shifts the tactus to the next longest note value, which (in modern usage) effectively halves all note values.

In mensural notation, breves and semibreves can have a ternary relationship, in which case alla breve means thrice (not twice) as fast. In practice, this complication may not have mattered, since Gaffurius’s system of multiplex proportions makes it easy to explicitly state which proportion is needed.

See also
Section 1.43 [breve], page 11, Section 1.157 [hemiola], page 39, Section 1.195 [mensural notation], page 47, Section 1.222 [note value], page 55, Section 1.249 [proportion], page 62, Section 1.339 [whole note], page 82.

1.12 allegro

[Italian: ‘cheerful’] Quick tempo. Also used as a title for pieces in a quick tempo, especially the first and last movements of a sonata.

See also
Section 1.286 [sonata], page 71.

1.13 alteration

An alteration is the modification, raising or lowering, of a note’s pitch. It is established by an accidental.

See also
Section 1.7 [accidental], page 2.

1.14 alto

A female voice of low range (contralto). Originally the alto was a high male voice (hence the name), which by castration or the use of falsetto reached the height of the natural female voice. This type of voice is also known as countertenor.

See also
Section 1.73 [countertenor], page 19.

1.15 alto clef

C clef setting middle C on the middle line of the staff.
See also
Section 1.45 [C clef], page 12.

1.16 ambitus

[Latin: past participle of ambire, ‘to go around’; plural: ambitus] Denotes a range of pitches for a given voice in a part of music. It may also denote the pitch range that a musical instrument is capable of playing. Sometimes anglicized to ambit (pl. ambits).

See also
No cross-references.

1.17 anacrusis

An anacrusis (also known as pickup or upbeat) is an incomplete measure of music before a section of music. It also refers to the initial note(s) of a melody occurring in that incomplete measure.

See also
Section 1.189 [measure], page 46, Section 1.198 [meter], page 49.

1.18 ancient minor scale

Also called ‘natural minor scale’.

See also
Section 1.84 [diatonic scale], page 22.

1.19 andante

[Italian: present participle of andare, ‘to walk’]

Walking tempo/character.

See also
No cross-references.
1.20 appoggiatura

Ornamental note, usually a second, that is melodically connected with the main note following it. In music before the 19th century appoggiature were usually performed on the beat, after that mostly before the beat. While the short appoggiatura is performed as a short note regardless of the duration of the main note the duration of the long appoggiatura is proportional to that of the main note.

An appoggiatura may have more notes preceding the main note.

See also

No cross-references.

1.21 arpeggio

[Italian: ‘harp-like, played like a harp’]

See also

No cross-references.
1.22 articulation

Articulation refers to notation which indicates how a note or notes should be played. Slurs, accents, staccato, and legato are all examples of articulation.

See also
No cross-references.

1.23 ascending interval

A distance between a starting lower note and a higher ending note.

See also
No cross-references.

1.24 augmentation

This is a placeholder for augmentation (wrt mensural notation).

See also
Section 1.88 [diminution], page 24, Section 1.195 [mensural notation], page 47.

1.25 augmented interval

See also
Section 1.163 [interval], page 41.

1.26 autograph

• A manuscript written in the composer’s own hand.
• Music prepared for photoreproduction by freehand drawing, with the aid of a straightedge ruler and T-square only, which attempts to emulate engraving. This required more skill than did engraving.

See also
No cross-references.
1.27 B
- ES: si
- I: si
- F: si
- D: H, h
- NL: b
- DK: h
- S: h
- FI: H, h

See also
Section 1.150 [H], page 36, Chapter 3 [Pitch names], page 87.

1.28 backfall

See also
Section 1.20 [appoggiatura], page 6.

1.29 bar

See also
Section 1.189 [measure], page 46.

1.30 bar line
ES: barra, línea divisoría, I: stanghetta, barra (di divisione), F: barre (de mesure), D: Taktstrich,
NL: maatstreep, DK: taktstreg, S: taktstreck, FI: tahtiviiva.

A vertical line through the staff (or through multiple staves) that separates measures. Used
very infrequently during the Renaissance (mostly in secular music, or in sacred music to indicate
congruences between parts in otherwise-unmetered music).

See also
Section 1.189 [measure], page 46.

1.31 baritone
ES: barítono, I: baritono, F: bariton, D: Bariton, NL: bariton, DK: baryton, S: baryton, FI:
baritoni, keskikorkuinen miesääni.

The male voice intermediate in pitch between the bass and the tenor.

See also
Section 1.33 [bass], page 9, Section 1.309 [tenor], page 76.

1.32 baritone clef
ES: clave de fa en tercera, I: chiave di baritono, F: clef d’es-troisième ligne, clef de fa troisième,
D: Baritonschlüssel, NL: baritonsleutel, DK: barytonnøgle, S: barytonklav, FI: baritoniavain.

C or F clef setting middle C on the upper staff line.
See also
Section 1.45 [C clef], page 12, Section 1.124 [F clef], page 31.

1.33 bass
- The lowest male voice.
- Sometimes, especially in jazz music, used as an abbreviation for double bass.

See also
Section 1.295 [strings], page 73.

1.34 bass clef
A clef setting with middle C on the first top ledger line.

See also
Section 1.124 [F clef], page 31, Section 1.158 [high bass clef], page 39.

1.35 beam
Line connecting a series of notes (shorter than a quarter note). The number of beams determines the note value of the connected notes.

See also
Section 1.126 [feathered beam], page 31.

1.36 beat
Note value used for counting, most often half-, fourth-, and eighth notes. The base counting value and the number of them in each measure is indicated at the start of the music by the time signature.

See also
Section 1.318 [time signature], page 78.
1.37 beat repeat

See also
Section 1.233 [percent repeat], page 59.

1.38 bind

See also
Section 1.316 [tie], page 78.

1.39 brace

Symbol at the start of a system connecting staves.

Curly braces are used for connecting piano staves, and sometimes for connecting the staves of like instruments in an orchestral score when written on different staves (e.g., first and second flutes):

![Example of curly braces](image1)

Angular brackets for connecting parts in an orchestral or choral score:

![Example of angular brackets](image2)

See also
No cross-references.

1.40 bracket

See also
Section 1.39 [brace], page 10.

1.41 brass

A family of blown musical instruments made of brass, all using a cup formed mouth piece. The brass instruments commonly used in a symphony orchestra are trumpet, trombone, French horn, and tuba. In marching bands, sousaphones and contrabass bugles are common.
See also
No cross-references.

1.42 breath mark

Indication of where to breathe in vocal and wind instrument parts.

See also
Section 1.48 [caesura], page 12.

1.43 breve
- US: breve, double-whole note
- ES: cuadrada, breve
- I: breve
- F: brève
- D: Brevis
- NL: brevis
- DK: brevis
- S: brevis
- FI: brevis, kaksoiskokonuotti

Note value: twice the length of a whole note (semibreve).

Mainly used in music from before 1650. In mensural notation, it was a note of fairly short duration—hence the name, which is Latin for ‘short’ or ‘of short duration’.

See also
Section 1.195 [mensural notation], page 47, Section 1.222 [note value], page 55, Section 1.269 [semibreve], page 68.

1.44 C
- ES: do
- I: do
- F: ut, do
- D: C, c
- NL: c
- DK: c
- S: c
- FI: C, c

See also
Chapter 3 [Pitch names], page 87.
1.45 C clef

Clef symbol indicating the position of the middle C. Used on all note lines.

See also
No cross-references.

1.46 cadence

See also
Section 1.154 [harmonic cadence], page 38, Section 1.142 [functional harmony], page 35.

1.47 cadenza

An extended, improvisatory style section inserted near the end of movement. The purpose of a cadenza is to give singers or players a chance to exhibit their technical skill and – not last – their ability to improvise. Since the middle of the 19th century, however, most cadenzas have been written down by the composer.

See also
No cross-references.

1.48 caesura

[Latin: from the supine of caedere ‘to cut down’]

The break between two musical phrases, sometimes (but not always) marked by a rest or a breath mark.

See also
Section 1.42 [breath mark], page 11.

1.49 canon

See also
Section 1.72 [counterpoint], page 19.
1.50 cent

Logarithmic unit of measuring pitch differences. 1 cent is 1/1200 of an octave (1/100 of an equally tempered semitone).

See also
Section 1.120 [equal temperament], page 30, Section 1.270 [semitone], page 68.

1.51 central C
See also
Section 1.204 [middle C], page 52.

1.52 chord

Two or more tones sounding simultaneously. In traditional European music the base chord is a triad consisting of two thirds. Major (major + minor third) as well as minor (minor + major third) chords may be extended with more thirds. Four-tone seventh chords and five-tone ninth major chords are most often used as dominants (functional harmony). Chords having no third above the lower notes to define their mood are a special case called 'open chords'. The lack of the middle third means their quality is ambivalent – neither major nor minor.

See also
Section 1.142 [functional harmony], page 35, Section 1.163 [interval], page 41, Section 1.164 [inversion], page 41, Section 1.252 [quality], page 63, Section 1.312 [third], page 77.

1.53 chord grid
F: grille d’accords.

Chord grids notate chords in a visual way by placing them in squares. They are used for jazz music, mainly in France.

See also
Section 1.52 [chord], page 13.
1.54 chromatic scale
A scale consisting of all 12 semitones.

See also
Section 1.270 [semitone], page 68.

1.55 chromaticism
Using tones extraneous to a diatonic scale (minor, major).

See also
Section 1.84 [diatonic scale], page 22.

1.56 church mode

See also
Section 1.84 [diatonic scale], page 22.

1.57 clef
The clef indicates which lines of the staff correspond to which pitches. The three clef symbols in common use are:

The Treble or G clef: \( \text{\includegraphics[width=1cm]{clef.G}} \)
The Bass or F clef: \( \text{\includegraphics[width=1cm]{clef.F}} \)
The Alto or C clef: \( \text{\includegraphics[width=1cm]{clef.C}} \)

Imagine a large staff of 11 lines centered on middle C, sometimes called a ‘grand staff’, with the bottom line representing low G and the top line high F:
Staves of five lines are usually used, and the clef superimposed on them indicates which five lines have been selected from this *grand staff*. For example, the treble or G clef indicates that the top five lines have been selected:

\[
\text{g, b, d, f, a, c', e', g', b', d', f'}
\]

The ‘curl’ of the G clef is centered on the line that represents the pitch G.

In the same way, the bass or F clef indicates that the bottom five lines have been selected from the *grand staff*, and the alto or C clef indicates the middle five lines have been selected. This relationship is shown below, where the notes show an arpeggio on a C major chord.

See also

Section 1.45 [C clef], page 12, Section 1.124 [F clef], page 31, Section 1.144 [G clef], page 35.

1.58 cluster

A *cluster* is a range of simultaneously sounding pitches that may change over time. The set of available pitches to apply usually depends on the acoustic source. Thus, in piano music, a cluster typically consists of a continuous range of the semitones as provided by the piano’s fixed set of a chromatic scale. In choral music, each singer of the choir typically may sing an arbitrary pitch within the cluster’s range that is not bound to any diatonic, chromatic or other scale. In electronic music, a cluster (theoretically) may even cover a continuous range of pitches, thus resulting in colored noise, such as pink noise.

Clusters can be denoted in the context of ordinary staff notation by engraving simple geometrical shapes that replace ordinary notation of notes. Ordinary notes as musical events specify starting time and duration of pitches; however, the duration of a note is expressed by the shape of the note head rather than by the horizontal graphical extent of the note symbol. In contrast, the shape of a cluster geometrically describes the development of a range of pitches (vertical extent) over time (horizontal extent). Still, the geometrical shape of a cluster covers the area in which any single pitch contained in the cluster would be notated as an ordinary note.
See also
No cross-references.

1.59 comma

Difference in pitch between a note derived from pure tuning and the same note derived from some other tuning method.

See also
Section 1.85 [didymic comma], page 23, Section 1.250 [Pythagorean comma], page 63, Section 1.305 [syntonic comma], page 75, Section 1.307 [temperament], page 76.

1.60 common meter
Another name for Section 1.62 [common time], page 16.

See also
Section 1.62 [common time], page 16, Section 1.198 [meter], page 49.

1.61 Common Practice Period

This is a stub for Common Practice Period (CPP).

See also
Section “Note names in other languages” in Notation Reference.

1.62 common time

4/4 time. The symbol, which resembles a capital letter C, comes from mensural notation.

See also
Section 1.195 [mensural notation], page 47, Section 1.198 [meter], page 49.

1.63 complement

See also
Section 1.165 [inverted interval], page 42.

1.64 compound interval

Intervals larger than an octave.
1.65 compound meter

A meter that includes a triplet subdivision within the beat, such as 6/8, 9/8, 12/8.

1.66 compound time

1. A meter that includes a triplet subdivision within the beat: see Section 1.65 [compound meter], page 17.
2. A time signature that additively combines two or more unequal meters, e.g., ‘3/8 + 2/8’ instead of ‘5/8’. Sometimes called additive time signatures.

```latex
\relative c' { 
  \key f \major 
  \compoundMeter #'((3 8) (2 8) (3 8)) 
  c8 d e f4 d8 c bes 
  c4 g'8 e c f4. 
  \bar "||"
}
```

1.67 concert pitch

The pitch at which the piano and other nontransposing instruments play: such instruments are said to be ‘in C’. The following list includes some (but not all) instruments that play in concert pitch:

**Woodwinds**
- flute
- oboe
- bassoon

**Strings**
- violin
- viola
- violoncello

See also
Section 1.163 [interval], page 41.
Section 1.198 [meter], page 49, Section 1.277 [simple meter], page 69.
Section 1.65 [compound meter], page 17, Section 1.198 [meter], page 49, Section 1.244 [poly-metric time signature], page 61.
Instruments that play ‘in C’ but in a different octave than what is written are, technically speaking, transposing instruments:

- piccolo (plays an octave higher than written)
- celesta (plays an octave higher than written)
- classical guitar (plays an octave lower than written)
- double bass (plays an octave lower than written)

See also
Section 1.321 [transposing instrument], page 79.

1.68 conjunct movement

Progressing melodically by intervals of a second, as contrasted with disjunct movement.

See also
Section 1.90 [disjunct movement], page 24.

1.69 consonance

See also
Section 1.156 [harmony], page 38.

1.70 contralto

See also
Section 1.14 [alto], page 4.

1.71 copying music

A music copyist did fast freehand scores and parts on preprinted staff lines for performance. Some of their conventions (e.g., the placement of note heads on stems) varied slightly from those of engravers. Some of their working methods were superior and could well be adopted by music typesetters.

See also
No cross-references.
1.72 counterpoint

From Latin punctus contra punctum, note against note. The combination into a single musical fabric of lines or parts which have distinct melodic significance. A frequently used polyphonic technique is imitation, in its strictest form found in the canon needing only one part to be written down while the other parts are performed with a given displacement. Imitation is also the contrapuntal technique used in the fugue which, since the music of the baroque era, has been one of the most popular polyphonic composition methods.

See also
No cross-references.

1.73 countertenor

See also
Section 1.70 [contralto], page 18.

1.74 crescendo

Increasing volume. Indicated by a rightwards opening horizontal wedge (hairpin) or the abbreviation cresc.

See also
Section 1.82 [decrescendo], page 21, Section 1.151 [hairpin], page 37.

1.75 cue-notes

Notes belonging to one part printed in another to hint when to start playing. Usually printed in a smaller type.

See also
Compare: Section 1.229 [ossia], page 58.
1.76 custos

A custos (plural: custodes) is a staff symbol that appears at the end of a staff line with monophonic musical contents (i.e., with a single voice). It anticipates the pitch of the first note of the following line and thus helps the player or singer to manage line breaks during performance, which enhances the readability of a score.

Custodes were frequently used in music notation until the 16th century. There were different appearances for different notation styles. Nowadays, they have survived only in special forms of musical notation such as the Editio Vaticana, dating from the beginning of the 20th century.

See also

No cross-references.

1.77 cut time

See also

Section 1.11 [alla breve], page 4.

1.78 D

- ES: re
- I: re
- F: ré
- D: D, d
- NL: d
- DK: d
- S: d
- FI: D, d

See also

Chapter 3 [Pitch names], page 87.

1.79 da capo

Abbreviated D.C. Indicates that the piece is to be repeated from the beginning to the end or to a certain place marked Fine.

See also

Section 1.9 [al fine], page 3, Section 1.81 [dal segno], page 21, Section 1.130 [fine], page 32.
1.80 dal niente

[Italian: ‘from nothing’] Used with crescendo to indicate that the sound should gradually increase from nothing.

See also
Section 1.10 [al niente], page 3.

1.81 dal segno

Abbreviated D.S. Repetition, not from the beginning, but from another place frequently near the beginning marked by a sign (segno):

See also
Section 1.9 [al fine], page 3, Section 1.79 [da capo], page 20, Section 1.130 [fine], page 32.

1.82 decrescendo

Decreasing tone volume. Indicated by a leftwards opening horizontal wedge (hairpin) or the abbreviation decresc.

See also
Section 1.74 [crescendo], page 19, Section 1.87 [diminuendo], page 23, Section 1.151 [hairpin], page 37.

1.83 descending interval

A distance between a starting higher note and a lower ending note.

See also
No cross-references.
1.84 diatonic scale

A scale consisting of 5 whole tones and 2 semitones (S). Scales played on the white keys of a piano keyboard are diatonic. These scales are sometimes called, somewhat inaccurately, ‘church modes’.

These *modes* are used in Gregorian chant and in pre-baroque early music but also to some extent in newer jazz music.

From the beginning of the 17th century the scales used in European compositional music are primarily the major and the minor scales. In the harmonic minor scale type an augmented second (A) occurs between the 6th and 7th tone.
Chapter 1: Musical terms A-Z

1.85 didymic comma

See also
Section 1.270 [semitone], page 68, Section 1.341 [whole tone], page 83.

1.86 diminished interval

See also
Section 1.163 [interval], page 41.

1.87 diminuendo

Abbreviated *dim*. It indicates a decrease in tone volume.

See also
Section 1.82 [decrescendo], page 21.
1.88 diminution

This is a stub for diminution (wrt mensural notation).

See also
Section 1.24 [augmentation], page 7, Section 1.195 [mensural notation], page 47.

1.89 direct

See also
Section 1.76 [custos], page 20.

1.90 disjunct movement

Progressing melodically by intervals larger than a major second, as contrasted with conjunct movement.

See also
Section 1.68 [conjunct movement], page 18.

1.91 dissonance
Another name for Section 1.92 [dissonant interval], page 24.

See also
Section 1.92 [dissonant interval], page 24, Section 1.156 [harmony], page 38.

1.92 dissonant interval

See also
Section 1.156 [harmony], page 38.

1.93 divisio

[Latin: ‘division’; pl. divisiones] In Gregorian chant, a vertical stroke through part or all of the staff that serves to structure a chant into phrases and sections. There are four types:
- divisio minima, a short pause
• *divisio maior*, a medium pause
• *divisio maxima*, a long pause
• *finalis*, to indicate the end of a chant, or the end of a section in a long antiphonal or responsorial chant.

TODO: musical example here?

See also
No cross-references.

1.94 doit

Indicator for an indeterminately rising pitch bend. Compare with *glissando*, which has determinate starting and ending pitches.

See also
Section 1.125 [fall], page 31, Section 1.145 [glissando], page 36.

1.95 dominant

The fifth *scale degree* in *functional harmony*.

See also
Section 1.142 [functional harmony], page 35, Section 1.265 [scale degree], page 67.

1.96 dominant ninth chord

See also
Section 1.52 [chord], page 13, Section 1.142 [functional harmony], page 35.

Section 1.222 [note value], page 55.

### 1.116 elision

More properly *synalepha* [New Lat. > Gr. συναλοφή, from Greek συναλοφήν ‘to smear together’].

The singing of several syllables on a single note. Elision may be indicated by a lyric tie, which looks like (and serves the same function) as a musical tie.

**See also**

Section 1.183 [lyric tie], page 45.

### 1.117 embellishment

**See also**

Section 1.228 [ornament], page 58.

### 1.118 engraving

Engraving means incising or etching a metal plate for printing. Photoengraving means drawing music with ink in a manner similar to drafting or engineering drawing, using similar tools.

The traditional process of music printing is done through cutting in a plate of metal. Now also the term for the art of music typesetting.

**See also**

No cross-references.

### 1.119 enharmonic

Two notes, intervals, or scales are enharmonic if they have different names but equal pitch.

![g sharp a flat dim fifth augm fourth](image)

**See also**

No cross-references.
1.120 equal temperament

A tuning system that divides the octave into 12 equal semitones (each of which is precisely equal to 100 cents).

See also
Section 1.50 [cent], page 13, Section 1.270 [semitone], page 68, Section 1.307 [temperament], page 76.

1.121 expression mark

Performance indications concerning:
- volume, dynamics (for example, forte, crescendo),
- tempo (for example, andante, allegro).

See also
Section 1.12 [allegro], page 4, Section 1.19 [andante], page 5, Section 1.74 [crescendo], page 19, Section 1.136 [forte], page 34.

1.122 extender line

The generic term (in LilyPond) for a line (or dash) of arbitrary length that extends text (without indicating the musical function of that text).

Used in many contexts, for example:
- In vocal music to indicate the syllable for a melisma. Called ‘extension’ in the Dolmetsch Online Music Dictionary (https://www.dolmetsch.com/defse1.htm).
- In figured bass to indicate that:
  - The extended note should be held through a change in harmony, when applied to one figure –OR–
  - The chord thus represented should be held above a moving bass line, when applied to more than one figure.
  - These uses were not completely standardized, and some composers used a single extender line to indicate the latter case.
- In string music to indicate that all notes in the passage thus indicated should be played on the same string. On the violin, for example, a series of notes to be played on the G string would be indicated sul G, another series to be played on the D string would be indicated sul D, and so on.
- With an octave mark to indicate that a passage is to be played higher or lower by the given number of octaves.
See also
Chapter 1.192 [melisma], page 47, Section 1.300 [sul G], page 74, Section 1.315 [thorough bass], page 77, Section 1.225 [octave mark], page 57, Section 1.226 [octave marking], page 57.

1.123 F
- ES: fa
- I: fa
- F: fa
- D: F, f
- NL: f
- DK: f
- S: f
- FI: F, f

See also
Chapter 3 [Pitch names], page 87.

1.124 F clef

The position between the dots of the key symbol is the line of the F below central C. Used on the third, fourth and fifth note line. A digit 8 above the clef symbol indicates that the notes must be played an octave higher (for example, bass recorder) while 8 below the clef symbol indicates playing an octave lower (for example, on the Double Bass).

See also
Section 1.32 [baritone clef], page 8, Section 1.295 [strings], page 73.

1.125 fall

Indicator for an indeterminately falling pitch bend. Compare with glissando, which has determinate starting and ending pitches.

See also
Section 1.94 [doit], page 25, Section 1.145 [glissando], page 36.

1.126 feathered beam
A type of beam used to indicate that a small group of notes should be played at an increasing or decreasing tempo – depending on the direction of ‘feathering’ – but without changing the overall tempo of the piece.

See also

1.127 fermata

Prolonged note or rest of indefinite duration.

\[
\text{\includegraphics[width=0.5\textwidth]{noteheads.s1/scripts.ufermata}}
\]

See also
No cross-references.

1.128 fifth

See also
Section 1.163 [interval], page 41.

1.129 figured bass

Also called ‘thorough bass’.

A method of indicating an accompaniment part by the bass notes only, together with figures designating the chief intervals and chords to be played above the bass notes.

\[
\text{\includegraphics[width=0.5\textwidth]{noteheads.s2}}
\]

See also
Section 1.52 [chord], page 13, Section 1.163 [interval], page 41.

1.130 fine
[Italian: ‘end’]

Indicates the end of the piece when it is not the written end of the music.
See also
Section 1.79 [da capo], page 20, Section 1.81 [dal segno], page 21.

1.131 fingering

Figures to the side or above the note that methodically indicate which fingers to use while playing a passage.

See also
No cross-references.

1.132 flag

Ornament at the end of the stem of a note used for notes with values less than a quarter note. The number of flags determines the note value.

<table>
<thead>
<tr>
<th>Notehead</th>

<tr>
<td>64th</td>
<td>4</td>
</tr>
</tbody>
</table>

See also
Section 1.222 [note value], page 55.

1.133 flageolet

An articulation for string players that means the note or passage is to be played in harmonics.

Also:
- A duct flute similar to the recorder.
- An organ stop of flute scale at 1’ or 2’ pitch.

See also
Section 1.22 [articulation], page 7, Section 1.155 [harmonics], page 38.

1.134 flat

See also
Section 1.7 [accidental], page 2.

1.135 forefall
See also
Section 1.20 [appoggiatura], page 6.
1.136  forte

   [Italian: ‘loud’]
Abbreviated f. Variants include:
   • mezzo forte, medium loud (notated mf),
   • fortissimo, very loud (notated ff).

See also
No cross-references.

1.137  fourth

See also
Section 1.163 [interval], page 41.

1.138  Frenched score

   A ‘condensed’ score, produced by omitting staves for instruments that are not playing at the moment, and by moving up additional systems from following pages to take up the space thus liberated, which reduces the total number of pages used to print the work.

   The specific rules for ‘frenching’ a score differ from publisher to publisher. If you are producing scores for eventual publication by a commercial publisher, you may wish to procure a copy of their style manual.

See also
Section 1.139 [Frenched staff], page 34.

1.139  Frenched staff

   [Pl.  Frenched staves] Analogous to Frenched scores (q.v), a Frenched staff has unneeded measures or sections removed. This is useful for producing, for example, an ossia staff.

See also
Section 1.229 [ossia], page 58.

1.140  Frenched staves
Plural of Section 1.139 [Frenched staff], page 34.

1.141  fugue

See also
Section 1.72 [counterpoint], page 19.
1.142 functional harmony

A system of harmonic analysis.

It is based on the idea that, in a given key, there are only three functionally different chords: tonic (T, the chord on the first note of the scale), subdominant (S, the chord on the fourth note), and dominant (D, the chord on the fifth note). Others are considered to be variants of the base chords. A few examples among many others are the tonic, subdominant or dominant of the parallel minor scale, or the incomplete dominant seventh chord.

See also
Section 1.95 [dominant], page 25, Section 1.162 [incomplete dominant seventh chord], page 41, Section 1.297 [subdominant], page 74, Section 1.320 [tonic], page 78.

1.143 G

- ES: sol
- I: sol
- F: sol
- D: G, g
- NL: g
- DK: g
- S: g
- FI: G, g

See also
Chapter 3 [Pitch names], page 87.

1.144 G clef

A clef symbol that indicates G above middle C. Used on the first and second note lines. A digit 8 above the clef symbol indicates that the notes must be played an octave higher while 8 below the clef symbol indicates playing or singing an octave lower (used most frequently to notate the tenor part in modern choral scores).

See also
No cross-references.
1.145 glissando
Letting the pitch slide fluently from one note to the other.
See also
No cross-references.

1.146 grace notes
Notes printed in small types to indicate that their time values are not counted in the rhythm of the bar.
See also
Section 1.6 [acciaccatura], page 2, Section 1.20 [appoggiatura], page 6, Section 1.210 [mordent], page 53, Section 1.228 [ornament], page 58.

1.147 grand staff
A combination of two staves with a brace. Usually used for piano music.
See also
Section 1.39 [brace], page 10.

1.148 grave
[Italian] Slow, solemn.
See also
No cross-references.

1.149 gruppetto
See also
Section 1.332 [turn], page 81.

1.150 H
- ES: si
- I: si
- F: si
- D: H, h
- NL: b
- DK: h
• S: h
• FI: H, h

Letter name used for B natural in German and Scandinavian usage. In the standard usage of these countries, B means B flat.

See also
Chapter 3 [Pitch names], page 87, Section 1.27 [B], page 8.

1.151 hairpin
Graphical version of the crescendo and decrescendo dynamic marks.

![Hairpin dynamic marks]

See also
Section 1.74 [crescendo], page 19, Section 1.82 [decrescendo], page 21.

1.152 half note
• UK: minim,
• ES: blanca,
• I: minima,
• F: blanche,
• D: Halbe, halbe Note,
• NL: halve noot,

Section 1.222 [note value], page 55.

1.153 half rest
• UK: minim rest,
• ES: silencio de blanca,
• I: pausa di minima,
• F: demi-pause,
• D: halbe Pause,
• NL: halve, rust,
• DK: halvnodespause,
• S: halvpaus,
• FI: puolitauko.

See also
Section 1.222 [note value], page 55.
1.154 harmonic cadence

ES: cadencia (armónica), I: cadenza (armonica), F: cadence harmonique, D: Schlusskadenz, NL: harmonische cadens, DK: harmonisk kadence, S: (harmonisk) kadens, FI: harmoninen kadenssi.

A sequence of chords that terminates a musical phrase or section.

See also
Section 1.142 [functional harmony], page 35.

1.155 harmonics

The general class of pitches produced by sounding the second or higher harmonic of a tone producer: string, column of air, and so on.

On stringed instruments, these pitches sound rather flute-like; hence, their name in languages other than English. They are produced by lightly touching the string at a node for the desired mode of vibration while it is being bowed or plucked.

For instruments of the violin family, there are two types of harmonics: natural harmonics, which are those played on the open string; and artificial harmonics, which are produced on stopped strings.

See also
No cross-references.

1.156 harmony

Tones sounding simultaneously. Two note harmonies fall into the categories consonances and dissonances.

Consonances:

Dissonances:
For harmony that uses three or more notes, see Section 1.52 [chord], page 13.

See also
Section 1.52 [chord], page 13.

1.157 hemiola

Most frequently, a proportion \((q.v.)\) of three notes of equal value in the time normally occupied by two. The resulting rhythm can be expressed in modern terms as a substitution (for example) of a bar in 3/2 for one of 6/4, or of a bar in 3/4 for one of 6/8. During the Baroque era, hemiola is most frequently as a special effect (or \emph{affect}) at cadences.

For example, this phrase in 6/4 time

\[
\begin{array}{cccccccc}
\text{F clef: } & \text{g} & \text{b} & \text{d'} & \text{g'} \\
\text{3/4 clef: } & \text{g} & \text{b} & \text{d'} & \text{g'}
\end{array}
\]

may be thought of having alternating time signatures

\[
\begin{array}{cccccccc}
\text{F clef: } & \text{g} & \text{b} & \text{d'} & \text{g'} \\
\text{3/4 clef: } & \text{g} & \text{b} & \text{d'} & \text{g'}
\end{array}
\]

and is therefore a polymeter (second definition) of considerable antiquity.

See also
Section 1.195 [mensural notation], page 47, Section 1.198 [meter], page 49, Section 1.242 [poly-meter], page 61, Section 1.249 [proportion], page 62.

1.158 high bass clef

Beginning in 18th century the high bass clef used in French Horn parts for the lowest pitches. This usage of the F clef was then passed down from the French Horn to the Basset Horn and then to the Bass Clarinet. It looks identical to the standard bass clef, but is pitched an octave higher – octavation indicators on clefs appeared at the beginning of the 20th Century.

In LilyPond, the most straightforward way to make a high bass clef is to print the modern version \clef "bass-8" but without the 8:

\[
<<
\new Staff {
   \clef treble { g4 b d' g' }
}
\new Staff \with { \omit ClefModifier }
   { \clef "bass-8" { g4 b d' g' } }
>>
\]
Chapter 1: Musical terms A-Z

40

See also
Section 1.124 [F clef], page 31, Section 1.34 [bass clef], page 9.

1.159 homophony

Music in which one voice leads melodically supported by the other voices in the same rhythm (more or less). In contrast to polyphony.

See also
Section 1.245 [polyphony], page 61.

1.160 hook

See also
Section 1.132 [flag], page 33.

1.161 hymn meter

A group or list of numbers that indicate the number of syllables in a line of a hymn’s verse. Different hymnals have different ways of noting the hymn meter: for example, consider a hymn that has four lines in two couplets alternating regularly between eight and seven syllables. The English Hymnal notes this as 87. 87. Other hymnals may note it as 8787, 87.87, or 8787. Some frequently-used hymn meters have traditional names:

• 66.86 is called Short Meter (abbreviated SM or S.M.)
• 86.86 is called Common Meter (CM or C.M.)
• 88.88 is called Long Meter (LM or L.M.)

Some hymns and their tunes are doubled versions of a simpler meter: for easier reading, a hymn with a meter of 87.87.87.87 is usually written 87.87D. The traditional names above also have doubled versions:

• 66.86.66.86 is Double Short Meter (DSM or D.S.M.)
• 86.86.86.86 is Double Common Meter (DCM or D.C.M.)
• 88.88.88.88 is Double Long Meter (DLM or D.L.M.)

See also
No cross-references.
1.162 **incomplete dominant seventh chord**

A dominant seventh chord where the root tone is removed. The remaining three tones build a diminished triad.

**See also**

Section 1.52 [chord], page 13, Section 1.97 [dominant seventh chord], page 25, Section 1.142 [functional harmony], page 35.

1.163 **interval**

Difference in pitch between two notes. Intervals may be diminished, minor, perfect, major, or augmented. The augmented fourth and the diminished fifth are identical (or **enharmonic**) on an equal-tempered twelve-tone scale and are called **tritonus** because they consist of three whole tones. The addition of such two intervals forms an octave.

![Interval Diagram]

**See also**

Section 1.119 [enharmonic], page 29, Section 1.341 [whole tone], page 83.

1.164 **inversion**

When a chord sounds with a bass note that differs from the root of the chord, it is said to be inverted. The number of inversions that a chord can have is one fewer than the number of constituent notes. For example, triads (which have three constituent notes) can have three positions, two of which are inversions:

**Root position**

The root note is in the bass, and above that are the third and the fifth. A triad built on the first scale degree, for example, is marked I.
First inversion
The third is in the bass, and above it are the fifth and the root. This creates an interval of a sixth and a third above the bass note, and so is marked in figured Roman notation as $6/3$. This is commonly abbreviated to $I6$ (or $Ib$) since the sixth is the characteristic interval of the inversion, and so always implies $6/3$.

Second inversion
The fifth is in the bass, and above it are the root and the third. This creates an interval of a sixth and a fourth above the bass note, and so is marked as $I6/4$ or $Ic$. Second inversion is the most unstable chord position.

See also
No cross-references.

1.165 inverted interval

The difference between an interval and an octave.

See also
No cross-references.

1.166 just intonation

Tuning system in which the notes are obtained by adding and subtracting natural fifths and thirds.

See also
Section 1.307 [temperament], page 76.

1.167 key

According to the 12 tones of the chromatic scale there are 12 keys, one on c, one on c-sharp, etc.

See also
Section 1.54 [chromatic scale], page 14, Section 1.168 [key signature], page 42.

1.168 key signature

The sharps or flats appearing at the beginning of each staff indicating the key of the music.
See also
Section 1.7 [accidental], page 2.

1.169 kievan notation
A form of medieval music notation used predominantly in the chantbooks of the Russian Orthodox Church as well as Carpatho-Russian and Ukrainian jurisdictions of Orthodoxy and Byzantine-rite Catholicism. It is characterized by the square shape of its noteheads.

1.170 laissez vibrer

[French: ‘Let vibrate’] Most frequently associated with harp parts. Marked l.v. in the score.

See also
No cross-references.

1.171 largo

[Italian: ‘wide’.] Very slow in tempo, usually combined with great expressiveness. Larghetto is less slow than largo.

1.172 leading note

The seventh scale degree, a semitone below the tonic; so called because of its strong tendency to ‘lead up’ (resolve upwards) to the tonic scale degree.

See also
Section 1.265 [scale degree], page 67, Section 1.270 [semitone], page 68.

1.173 ledger line

A ledger line is an extension of the staff.

See also
No cross-references.
1.174 legato

To be performed (a) without any perceptible interruption between the notes, unlike (b) leggiero or non-legato, (c) portato, or (d) staccato.

See also
Section 1.290 [staccato], page 72.

1.175 legato curve

See also
Section 1.284 [slur], page 71, Section 1.174 [legato], page 44.

1.176 leger line

See also
Section 1.173 [ledger line], page 43.

1.177 ligature

A ligature is a coherent graphical symbol that represents at least two distinct notes. Ligatures originally appeared in the manuscripts of Gregorian chant notation around the 9th century to denote ascending or descending sequences of notes. In early notation, ligatures were used for monophonic tunes (Gregorian chant) and very soon denoted also the way of performance in the sense of articulation. With the invention of the metric system of the white mensural notation, the need for ligatures to denote such patterns disappeared.

See also
Section 1.195 [mensural notation], page 47.

1.178 lilypond

A pond with lilies floating in it.

Also, the name of a music typesetting program.

See also
No cross-references.
1.179 line
See also
Section 1.291 [staff], page 72.

1.180 loco
[Italian: ‘place’] Instruction to play the following passage at the written pitch. Cancels octave mark (q.v.).
See also
Section 1.225 [octave mark], page 57, Section 1.226 [octave marking], page 57.

1.181 long appoggiatura
See also
Section 1.20 [appoggiatura], page 6.

1.182 longa
- US: long, longa,
- ES: longa,
- I: longa,
- F: longa, longue,
- D: Longa,
- NL: longa,
- DK: longa,
- S: longa,
- FI: longa.
Note value: twice the length of a breve.

See also
Section 1.43 [breve], page 11, Section 1.222 [note value], page 55.

1.183 lyric tie
See also
Section 1.116 [elision], page 29.
1.184 lyrics

See also
No cross-references.

1.185 major

See also
Section 1.84 [diatonic scale], page 22.

1.186 major interval

See also
Section 1.163 [interval], page 41.

1.187 maxima

Note value: twice the length of a longa.

The maxima is the largest duration in use during the 15th and 16th centuries. Like the longa, the maxima can be either two or three times as long as the longa (called binary and ternary, respectively). By the late 15th century, most composers used the smaller proportion by default.

See also
Chapter 2 [Duration names notes and rests], page 84, Section 1.182 [longa], page 45, Section 1.222 [note value], page 55.

1.188 meantone temperament

Temperament yielding acoustically pure thirds by decreasing the natural fifth by 16 cents. Due to the non-circular character of this temperament only a limited set of keys are playable. Used for tuning keyboard instruments for performance of pre-1650 music.

See also
Section 1.50 [cent], page 13, Section 1.307 [temperament], page 76.

1.189 measure

A group of beats (units of musical time) the first of which bears an accent. Such groups in numbers of two or more recur consistently throughout the composition and are separated from each other by bar lines.
See also
Section 1.30 [bar line], page 8, Section 1.36 [beat], page 9, Section 1.198 [meter], page 49.

1.190 measure repeat

See also
Section 1.233 [percent repeat], page 59.

1.191 mediant

• The third scale degree.
• A chord having its base tone a third from that of another chord. For example, the tonic chord may be replaced by its lower mediant (variant tonic).

See also
Section 1.52 [chord], page 13, Section 1.142 [functional harmony], page 35, Section 1.258 [relative key], page 65.

1.192 melisma

A melisma (Greek: plural melismata) is a group of notes or tones sung on one syllable, especially as applied to liturgical chant.

See also
No cross-references.

1.193 melisma line

See also
Section 1.122 [extender line], page 30.

1.194 melodic cadence

See also
Section 1.47 [cadenza], page 12.

1.195 mensural notation

A system of duration notation whose principles were first established in the mid-13th century, and that (with various changes) remained in use until about 1600. As such, it is the basis for the notation of rhythms in Western musical notation.
Franco of Cologne (ca. 1250) is credited with the first systematic explanation of the notation’s principles, so the notation of this earliest period is called ‘Franconian’. Franco’s system made use of three note values – long, breve, and semibreve – each of which was normally equivalent to three of the next lower note value.

Then, in the first half of the 14th century, Philippe de Vitry and Jehan de Murs added several note values (the minim, semiminim and fusa) and extended Franco’s principles to govern the relationship between these values. They also put the duple division of note values on an equal footing with the earlier (preferred) triple division.

TODO: continue description of French and Italian black notation, and the relationship between them.

White or void mensural notation

In the 15th century, hollow (or void) notes began to substitute for the earlier solid black ones, which were then free to assume the function of red (or colored) notes in the earlier notation. ...

TODO: add to definition (including summary info on proportional notation)

1.196 mensuration sign

The ancestor of the time signature, mensuration signs were used to indicate the relationship between two sets of note durations—specifically, the ratio of breves to semibreves (called tempus), and of semibreves to minims (called prolatio).

Each ratio was represented with a single single sign, and was either three-to-one (ternary) or two-to-one (binary), as in modern music notation. Unlike modern music notation, the ternary ratio was the preferred one—applied to the tempus, it was called perfect, and was represented by a complete circle; applied to the prolatio, it was called major and was represented by a dot in the middle of the sign. The binary ratio applied to the tempus was called imperfect, and was represented by an incomplete circle; applied to prolatio, it was called minor and was represented by the lack of an internal dot. There are four possible combinations, which can be represented in modern time signatures with and without reduction of note values. (These signs are hard-coded in LilyPond with reduction.)

**perfect tempus with major prolatio**

Indicated by a complete circle with an internal dot. In modern time signatures, this equals:

- 9/4, with reduction or
- 9/2, without reduction

**perfect tempus and minor prolatio**

Indicated by a complete circle without an internal dot. In modern time signatures, this equals:

- 3/2, with reduction or
- 3/1, without reduction

**imperfect tempus and major prolatio**

Indicated by an incomplete circle with an internal dot. In modern time signatures, this equals:

- 6/4, with reduction or
• 6/2, without reduction

**imperfect tempus and minor prolatio**

Indicated by an incomplete circle without an internal dot. In modern time signatures, this equals:

• 4/4, with reduction or
• 2/1, without reduction

The last mensuration sign *looks* like common-time because it *is*, with note values reduced from the original semibreve to a modern quarter note. Being doubly imperfect, this sign represented the (theoretically) least-preferred mensuration, but it was actually used fairly often.

This system extended to the ratio of longer note values to each other:

• maxima to longa, called:
  • *modus maximorum*,
  • *modus major*, or
  • *maximodus*

• longa to breve, called:
  • *modus longarum*,
  • *modus minor*, or
  • *modus*

In the absence of any other indication, these modes were assumed to be binary. The mensuration signs only indicated tempus and prolatio, so composers needed another way to indicate these longer ratios (called modes. Around the middle of the 15th century started to use groups of rests at the beginning of the staff, preceding the mensuration sign.

Two mensuration signs have survived to the present day: the C-shaped sign, which originally designated *tempus imperfectum* and *prolatio minor* now stands for *common time*; and the slashed C, which designated the same with *diminution* now stands for *cut time* (essentially, it has not lost its original meaning).

Section 1.88 [diminution], page 24, Section 1.249 [proportion], page 62, Section 1.318 [time signature], page 78.

### 1.197 Mensurstrich

A bar line drawn between staves.

**See also**

Section 1.195 [mensural notation], page 47.

### 1.198 Meter

The pattern of note values and accents in a composition or a section thereof. There are a couple ways to classify ‘traditional’ meter (i.e., not polymeter): by grouping beats and by subdividing the primary beat.

- **By grouping beats:**
  - *dupe*: groups of two.
• **triple**: groups of three.
• **quadruple**: groups of four. A special case of duple meter.
• **quintuple**: groups of five beats.
• **sextuple** meter: groups of six. A special case of:
  • duple meter, subdivided in three; or
  • triple meter, subdivided in two.
• **septuple** meter: groups of seven.
• and so on.

Other than triple meter and its subdivided variants (see below), meters that feature odd groupings of beats (e.g., quintuple or septuple meter) are not frequently used prior to the 20th Century.

**By subdividing the primary beat:**
• simple: subdivided in groups of two.
  • duple: 2/2, 2/4, 2/8
  • triple: 3/2, 3/4, 3/8
  • quadruple: 4/2, 4/4 (also called common time), 4/8
• compound: subdivided in groups of three.
  • duple: 6/8
  • triple: 9/8
  • quadruple: 12/8

Time signatures are placed at the beginning of a composition (or section) to indicate the meter. For instance, a piece written in simple triple meter with a beat on each quarter note is conventionally written with a time signature of 3/4. Here are some combinations of the two classifications above:

**Simple duple meter** (F.J. Haydn, 1732-1809; or a Croatian folk tune):

Simple triple meter:

Simple quadruple meter (French folk tune, *Au clair de la lune*):

Simple quintuple meter (B. Marcello, 1686-1739):
(Aside: this is an example of *Augenmusik*: the accidentals are thus in the source, with sharps in the accompaniment where the voice has flats and *vice versa*.)

**Compound duple meter (unknown):**

![Compound duple meter](image1)

**Compound triple meter (J.S. Bach, 1685-1750):**

![Compound triple meter](image2)

**Compound quadruple meter (P. Yon, 1886-1943):**

![Compound quadruple meter](image3)

### 1.199 metronome

Device used to indicate the exact tempo of a piece.

Invented ca. 1812 by Dietrich Nikolaus Winkler of Amsterdam, but takes its name from Johann Nepomuk Mälzel, who copied the device, added a scale of tempo divisions, and patented it as a ‘metronome’. The inevitable lawsuit that followed acknowledged Winkler as the creator, but by then Mälzel had already sold many of them, and people had taken to calling it a Mälzel Metronome.

See also

Section 1.200 [metronome mark], page 51.

### 1.200 metronome mark

Exact tempo indication (in beats per minute). Abbreviated M.M. or MM, which is short for Mälzels Metronom (or Mälzel’s Mark, *anglice*).

See also

Section 1.199 [metronome], page 51.
1.201 metronomic indication

See also
Section 1.200 [metronome mark], page 51.

1.202 mezzo

[Italian: ‘medium’]

Used to qualify other indications, such as:

- Dynamics
  - *mezzo piano* is ‘medium quiet’ (that is, not as quiet as piano)
  - *mezzo forte* is ‘medium loud’ (that is, not as loud as forte)
- Voice
  - Pitchwise, a mezzo-soprano’s voice lies between that of contraltos and sopranos

See also
No cross-references.

1.203 mezzo-soprano

The female voice between soprano and contralto.

See also
Section 1.289 [soprano], page 72, Section 1.70 [contralto], page 18.

1.204 middle C

ES: do central, I: do centrale, F: do central, do 3, D: eingestrichenes c, NL: centrale c, DK: enstreget c, S: ettstruket c, FI: keski-C.

First C below the 440 Hz A.

No cross-references.

1.210 mordent

See also
Section 1.6 [acciaccatura], page 2, Section 1.20 [appoggiatura], page 6, Section 1.146 [grace notes], page 36, Section 1.228 [ornament], page 58.

1.211 motif

See also
Section 1.212 [motive], page 53.

1.212 motive

The briefest intelligible and self-contained fragment of a musical theme or subject.
1.213 movement

Greater musical works like Section 1.303 [symphony], page 75, and Section 1.286 [sonata], page 71, most often consist of several – more or less – independent pieces called movements.

See also
No cross-references.

1.214 multi-measure rest

Multi-measure rests are conventionally typeset with a combination of longa, breve and whole rests for shorter and a long horizontal bar for longer spans of rest, with a number above to indicate the duration (in measures) of the rest. The former style is called ‘Kirchenpausen’ in German, as a reminiscence of its use in Renaissance vocal polyphony.

See also
Section 1.163 [interval], page 41.

1.218 non-legato

See also
Section 1.174 [legato], page 44.

1.219 note

Notes are signs by means of which music is fixed in writing. The term is also used for the sound indicated by a note, and even for the key of the piano which produces the sound. However, a clear distinction between the terms tone and Section 1.219 [note], page 55, is strongly recommended. Briefly, one sees a note, and hears a tone.

See also
No cross-references.

1.220 note head

A head-like sign which indicates pitch by its position on a staff provided with a clef, and duration by a variety of shapes such as hollow or black heads with or without stems, flags, etc. For percussion instruments (often having no defined pitch) the note head may indicate the instrument.

See also
Section 1.57 [clef], page 14, Section 1.132 [flag], page 33, Section 1.291 [staff], page 72, Section 1.293 [stem], page 73.

1.221 note names

See also
Chapter 3 [Pitch names], page 87.

1.222 note value

Note values (durations) are measured as fractions—in modern usage, one-half—of the next higher note value. The longest duration in current use is the breve (equal to two whole notes), but sometimes (especially in music dating from the Baroque era or earlier) the longa (four whole notes) or maxima (eight whole notes) may be found.

As used in mensural notation, this fraction was more flexible: it could also be one-third the higher note value. Composers indicated which proportions to use with various signs—two of
which survive to the present day: the C-shaped sign for common time, and the slashed C for alla breve or cut time.

An augmentation dot after a note increases its duration by half; a second dot increases it by half of the first addition (that is, by a fourth of the original duration). More dots can be used to add further halved fractions of the original note value (1/8, 1/16, etc.), but they are not frequently encountered.

Alternatively note values may be subdivided by other ratios. Most common is subdivision by 3 (triplets) and 5 (quintuplets). Subdivisions by 2 (duplets) or 4 (quadruplets) of dotted notes are also frequently used.

See also
Section 1.62 [common time], page 16.

1.223 octavation

See also
Section 1.226 [octave marking], page 57.

1.224 octave

The interval of an octave, sometimes abbreviated 8ve.

For uses like all'ottava or 8va with an extender line or bracket, or loco see octave marking.

See also
Section 1.163 [interval], page 41, Section 1.226 [octave marking], page 57.
1.225 octave mark

The phrase, abbreviation, or other mark used (with or without an extender line or bracket) to indicate that the music is to be played in a different octave:

- **15ma**: play two octaves higher
- **8va**: play one octave higher
- **8vb**: play one octave lower
- **8va (written below the passage)**: unusual, same as **8vb**
- **15vb**: play two octaves lower
- **15va (written below the passage)**: unusual, same as **15vb**

For longer passages, it may be more practical to mark the octave change at the beginning with a phrase (see the list below for examples), but without a bracket or extender line. Then, when the music returns to the written pitch, the octave change is canceled with the word **loco** (q.v.).

To parallel the list above:

- **15ma**: *alla quindicesima* (alta)
- **8va**: *all’ottava* or *ottava sopra*
- **8vb**: *all’ottava bassa, ottava sotto*
- **15vb**: *alla quindicesima* (bassa)

In the phrases above, *quindicesima* is sometimes replaced with *quindecima*, which is Latin.

The music on an entire staff can be marked to be played in a different octave by putting a small 8 or 15 above or below the clef at the beginning. This octave mark can be applied to any clef, but it is most frequently used with the G and F clefs.

See also
Section 1.124 [F clef], page 31, Section 1.144 [G clef], page 35, Section 1.180 [loco], page 45, Section 1.226 [octave marking], page 57.

1.226 octave marking

The practice of marking music – an entire staff, a passage, etc. – to indicate that it is to be played in a different octave. If applied to the clef at the beginning of the staff, all music on that staff is to played at the indicated octave.

For a list of the specific marks used, see Section 1.225 [octave mark], page 57.

See also
Section 1.163 [interval], page 41, Section 1.180 [loco], page 45, Section 1.224 [octave], page 56, Section 1.225 [octave mark], page 57.

1.227 octave sign

See also
Section 1.225 [octave mark], page 57.
1.228 ornament

Most commonly used is the trill, the rapid alternation of a given note with the diatonic Section 1.268 [second], page 68, above it. In the music from the middle of the 19th century and onwards the trill is performed with the main note first while in the music from the preceding baroque and classic periods the upper note is played first.

Other frequently used ornaments are the turn, the mordent, and the prall (inverted mordent).

See also
Section 1.6 [acciaccatura], page 2, Section 1.20 [appoggiatura], page 6, Section 1.146 [grace notes], page 36, Section 1.210 [mordent], page 53.

1.229 ossia

Ossia (otherwise) marks an alternative. It is an added staff or piano score, usually only a few measures long, which presents another version of the music, for example for small hands.

See also
Compare: Section 1.75 [cue-notes], page 19.

1.230 part

- In instrumental or choral music, the music for a single instrument or voice.
- in contrapuntal music, a single melodic line in the contrapuntal web.

See also
Section 1.72 [counterpoint], page 19.
1.231 pause

See also
Section 1.127 [fermata], page 32.

1.232 pennant

See also
Section 1.132 [flag], page 33.

1.233 percent repeat

LilyPond-specific term to indicate the repetition of a musical expression on a single staff, as opposed to the more usual definition of repeat, which affects all parts. The musical expression can be anything from a single note or note pattern to one or more measures. There are other names for this symbol:

- simile mark
- slash mark, or slash repeat
- beat repeat
- measure (or multi-measure) repeat

See also
Section 1.259 [repeat], page 66, University of Vermont Music Dictionary (http://www.music.vt.edu/musicdictionary/textr/Repeat.html).

1.234 percussion

A family of musical instruments which are played on by striking or shaking. Percussion instruments commonly used in a symphony orchestra are kettledrums (I: timpani, D: Pauken), snare drum, bass drum, tambourine, cymbals, Chinese gong (tam-tam), triangle, celesta, glockenspiel, and xylophone.

See also
No cross-references.

1.235 perfect interval

See also
Section 1.163 [interval], page 41.

1.236  phrase
A natural division of the melodic line, comparable to a sentence of speech.

See also
Section 1.48 [caesura], page 12.

1.237  phrasing
The clear rendering in musical performance of the phrases of the melody. Phrasing may be indicated by a slur.

See also
Section 1.236 [phrase], page 60, Section 1.284 [slur], page 71.

1.238  piano

\textit{piano} (p) soft, \textit{pianissimo} (pp) very soft, \textit{mezzo piano} (mp) medium soft.

See also
No cross-references.

1.239  pickup

See also
Section 1.17 [anacrusis], page 5.

1.240  pitch
1. The perceived quality of a sound that is primarily a function of its fundamental frequency.
2. \textit{[FR. ton; DE. Ton; ES. tono]} Any point on the continuum of musical pitch.
3. \textit{[FR. diapason; DE. Kammerton, Stimmung; ES. diapasón]} The standardized association of a particular frequency with a particular pitch name, e.g., \(c' = 256\) Hz.

See also
Chapter 3 [Pitch names], page 87.
1.241 pizzicato

A technique for stringed instruments, abbr. *pizz*. To play by plucking the strings.

See also
No cross-references.

1.242 polymeter

- The *simultaneous* use of two or more meters, in two or more parts.
- The *successive* use of different meters in one or more parts.

See also
Section 1.243 [polymetric], page 61, (adjective).

1.243 polymetric

Characterized by *polymeter*: using two or more metric frameworks simultaneously or in alternation.

See also
Section 1.242 [polymeter], page 61, (noun).

1.244 polymetric time signature

A time signature that indicates regularly alternating polymetric time.

See also
Section 1.243 [polymetric], page 61.

1.245 polyphony

Music written in a combination of several simultaneous voices (parts) of a more or less pronounced individuality.

See also
Section 1.72 [counterpoint], page 19.

1.246 portato
[Italian: past participle of *portare*, ‘to carry’]

A stroke in which each of several notes is separated slightly within a slur, without changing the bow’s direction. It is used for passages of a *cantabile* character.
See also
Section 1.174 [legato], page 44.

1.247 power chord
A chord containing only the root and the fifth (possibly in multiple octaves). Commonly used in guitar music, particularly with electric guitar and high distortion.

See also
Section 1.52 [chord], page 13.

1.248 presto

[Italian]
Very quick, i.e., quicker than Section 1.12 [allegro], page 4; prestissimo denotes the highest possible degree of speed.

See also
No cross-references.

1.249 proportion

[Latin: proportio] Described in great detail by Gaffurius, in Practica musicae (published in Milan in 1496). In mensural notation, proportion is:

1. A ratio that expresses the relationship between the note values that follow with those that precede;
2. A ratio between the note values of a passage and the ‘normal’ relationship of note values to the metrical pulse. (A special case of the first definition.)

The most common proportions are:
- 2:1 (or simply 2), expressed by a vertical line through the mensuration sign (the origin of the alla breve time signature), or by turning the sign backwards
- 3:1 (or simply 3)
- 3:2 (sesquialtera)

To ‘cancel’ any of these, the inverse proportion is applied. Thus:
- 1:2 cancels 2:1
- 1:3 cancels 3:1
- 2:3 cancels 3:2
- and so on.

Gaffurius enumerates five basic types of major:minor proportions and their inverses:
1. Multiplex, if the major number is an exact multiple of the minor (2:1, 3:1, 4:2, 6:3); and its inverse, Submultiplex (1:2, 1:3, 2:4, 3:6)
2. Epimoria or Superparticular [orig. Epimoria seu Superparticularis], if the major number is one more than the minor (3:2, 4:3, 5:4); and its inverse, Subsuperparticular (2:3, 3:4, 4:5)
3. Superpartiens, if the major number is one less than twice the minor (5:3, 7:4, 9:5, 11:6); and its inverse, subsuperpartiens (3:5, 4:7, 5:9, 6:11)
4. Multiplexsuperparticular, if the major number is one more than twice the minor (5:2, 7:3, 9:4); and its inverse, Submultiplexsuperparticular (2:5, 3:7, 4:9)

5. Multiplexsuperpartiens, if the major number is one less than some other multiple (usually three or four) of the minor (8:3, 11:4, 14:5, 11:3); and its inverse, Submultiplexsuperpartiens (3:8, 4:11, 5:14, 3:11)

He then continues to subdivide each type in various ways. For the multiplex proportions, for example, he indicates how many times greater the major number is than the minor:

- If two times greater, the proportion is *dupla*. If inverted, it’s called *subdupla*. Examples: 2:1, 4:2, and 6:3.
- If four, *quadrupla*; and its inversion, *subquadrupla*. Example: 4:1, 8:2, and 12:3

Other proportions were possible, but whether they were frequently used is another question:

- 33:9, *triplasuperbipartientetertias*
- 51:15, *triplasuperbipartientequintas*

See also

Section 1.195 [mensural notation], page 47.

### 1.250 Pythagorean comma

Originally, the interval by which the sum of six whole tones exceeds the octave – \((9:8)^6 - 2:1 = 531441:524288\), or 23.5 cents.

Modern acoustical theory defines it as the interval by which twelve fifths exceed seven octaves. To put it another way: A sequence of fifths that starts on C eventually circles back to C. However, this C is 23.5 Section 1.50 [cent], page 13s higher than the C obtained by adding 7 octaves. The difference between those two pitches is the Pythagorean comma.

See also

Section 1.50 [cent], page 13, Section 1.307 [temperament], page 76.

### 1.251 quadruplet

See also

Section 1.222 [note value], page 55.

### 1.252 quality

The quality of a triad is determined by the precise arrangement of its intervals. Tertian triads can be described as a series of three notes. The first element is the root note (or simply ‘root’) of the chord, the second note is the ‘third’ of the chord, and the last note is the ‘fifth’ of the chord. These are described below:
<table>
<thead>
<tr>
<th>Chord name</th>
<th>Component intervals</th>
<th>Example</th>
<th>Symbol</th>
</tr>
</thead>
<tbody>
<tr>
<td>major triad</td>
<td>major third/perfect fifth</td>
<td>C-E-G</td>
<td>C, CM, Cma, Cmaj, CΔ</td>
</tr>
<tr>
<td>minor triad</td>
<td>minor third/perfect fifth</td>
<td>C-E♭-G</td>
<td>Cm, Cmi, Cmin, C-</td>
</tr>
<tr>
<td>augmented triad</td>
<td>major third/augmented fifth</td>
<td>C-E-♯G</td>
<td>C+, C~+, Caug</td>
</tr>
<tr>
<td>diminished triad</td>
<td>minor third/diminished fifth</td>
<td>C-E♭-G♭</td>
<td>Cm(♭5), C♭, Cdim</td>
</tr>
</tbody>
</table>

There are various types of seventh chords depending on the quality of the original chord and the quality of the seventh added.

Five common types of seventh chords have standard symbols. The chord quality indications are sometimes superscripted and sometimes not (e.g. Dm7, Dm♯7, and D♭m7 are all identical). The last three chords are not commonly used except in jazz.

**See also**
Section 1.52 [chord], page 13.

### 1.253 quarter note
- UK: crotchet
- ES: negra
- I: semiminima, nera
- F: noire
- D: Viertel, Viertelnote
- NL: kwartnoot
- DK: fjerdedelsnode
- S: fjärdedelsnot
- FI: neljäosanuotti

**See also**
Section 1.222 [note value], page 55.

### 1.254 quarter rest
- UK: crotchet rest
- ES: silencio de negra
- I: pausa di semiminima
- F: soupir
- D: Viertelpause
- NL: kwartertrust
- DK: fjerdedelspause
- S: fjärdedelspaus
- FI: neljäosatauko

**See also**
Section 1.222 [note value], page 55.
1.255 quarter tone

An interval equal to half a semitone.

See also
Section 1.163 [interval], page 41.

1.256 quintuplet

See also
Section 1.222 [note value], page 55.

1.257 rallentando

[Italian: ‘slowing down’]

Slackening in speed, more gradual than Section 1.262 [ritardando], page 66. Abbreviated to rall.

See also
Section 1.262 [ritardando], page 66.

1.258 relative key

Major and minor keys that have the same key signature.

See also
Section 1.167 [key], page 42, Section 1.168 [key signature], page 42, Section 1.185 [major], page 46, Section 1.205 [minor], page 52.
1.259  repeat

\[ \text{See also} \]
No cross-references.

1.260  rest

\[ \text{See also} \]
Section 1.222 [note value], page 55.

1.261  rhythm
- Metrical rhythm in which every time value is a multiple or fraction of a fixed unit of time, called beat, and in which the normal accent recurs in regular intervals, called measure. The basic scheme of time values is called meter.
- Measured rhythm which lacks regularly recurrent accent. In modern notation such music appears as a free alternation of different measures.
- Free rhythm, i.e., the use of temporal values having no common metrical unit (beat).

\[ \text{See also} \]
Section 1.4 [accent], page 2, Section 1.36 [beat], page 9, Section 1.189 [measure], page 46, Section 1.198 [meter], page 49.

1.262  ritardando
Gradual slowing down, more pronounced than Section 1.257 [rallentando], page 65. Mostly abbreviated to rit. or ritard.

\[ \text{See also} \]
Section 1.257 [rallentando], page 65.

1.263  ritenuto
Immediate reduction of speed.

\[ \text{See also} \]
No cross-references.
1.264 scale

See also
Section 1.84 [diatonic scale], page 22.

1.265 scale degree

Names and symbols used in harmonic analysis to denote tones of the scale as roots of chords. The most important are degrees I = tonic (T), IV = subdominant (S) and V = dominant (D).

See also
Section 1.142 [functional harmony], page 35.

1.266 scordatura

[Italian: scordare, ‘to mistune’] Unconventional tuning of stringed instruments, particularly lutes or violins. Used to:
- facilitate pitch combinations that would otherwise be difficult or impossible
- alter the characteristic timbre of the instrument, for example, to increase brilliance
- reinforce certain sonorities or tonalities by making them available on open strings
- imitate other instruments
- etc.

Tunings that could be called scordatura first appeared early in the 16th Century and became commonplace in the 17th.

See also
No cross-references.

1.267 score
ES: partitura, I: partitura, F: partition, conducteur (full score), D: Partitur (full score), Klavierauszug (vocal score), NL: partituur, DK: partitur, S: partitur, FI: partituri.

A copy of orchestral, choral, or chamber music showing what each instrument is to play, each voice to sing, having each part arranged one underneath the other on different staves Section 1.291 [staff], page 72.

See also
No cross-references.
Chapter 1: Musical terms A-Z

1.268 second

The interval between two neighboring tones of a scale. A diatonic scale consists of alternating semitones and whole tones, hence the size of a second depends on the scale degrees in question.

See also
Section 1.84 [diatonic scale], page 22, Section 1.163 [interval], page 41, Section 1.270 [semitone], page 68, Section 1.341 [whole tone], page 83.

1.269 semibreve
- US: whole note,
- ES: redonda,
- I: semibreve,
- F: ronde,
- D: Ganze, ganze Note, Semibrevis,
- NL: hele noot,
- DK: helnode,
- S: helnot,
- FI: kokonuotti.

Note value: called whole note in the US.
The semibreve is the basis for the tactus in mensural notation (i.e., music written before ca. 1600).

See also
Section 1.195 [mensural notation], page 47, Section 1.222 [note value], page 55.

1.270 semitone

The interval of a minor second. The (usually) smallest interval in European composed music. The interval between two neighboring tones on the piano keyboard – including black and white keys – is a semitone. An octave may be divided into 12 semitones.

See also
Section 1.163 [interval], page 41, Section 1.54 [chromatic scale], page 14.

1.271 seventh

See also
Section 1.163 [interval], page 41.
1.272 sextolet

See also
Section 1.273 [sextuplet], page 69, Section 1.222 [note value], page 55.

1.273 sextuplet

See also
Section 1.222 [note value], page 55.

1.274 shake

See also
Section 1.326 [trill], page 80.

1.275 sharp

See also
Section 1.7 [accidental], page 2.

1.276 simile

[Italian: ‘in the same manner’] Performance direction: the music thus marked is to be played in the same manner (i.e., with the same articulations, dynamics, etc.) as the music that precedes it.

See also
TODO: Where else could I refer the reader?

1.277 simple meter

A meter in which the basic beat is subdivided in two: that is, a meter that does not include triplet subdivision of the beat.

See also
Section 1.65 [compound meter], page 17, Section 1.198 [meter], page 49.

1.278 sixteenth note

• UK: semiquaver
• ES: semicorchea
• I: semicroma
• F: double croche
• D: Sechzehntel, Sechzehntelnote
• NL: zestiende noot
• DK: sekstendedelsnode
• S: sextondelsnot
• FI: kuudestoistaosanuotti

See also

See also
Section 1.222 [note value], page 55.

1.283 slash repeat

See also
Section 1.233 [percent repeat], page 59.

1.284 slur

A slur above or below a group of notes indicates that they are to be played Section 1.174 [legato], page 44, e.g., with one stroke of the violin bow or with one breath in singing.

See also
No cross-references.

1.285 solmization

General term for systems of designating the degrees of the scale, not by letters, but by syllables (do (ut), re, mi, fa, sol, la, si (ti)).

See also
Section 1.264 [scale], page 67, Section 1.265 [scale degree], page 67.

1.286 sonata

In its present-day meaning a sonata denotes an instrumental composition for piano or for some other instrument with piano accompaniment, which consists of three or four independent pieces, called movements.

See also
No cross-references.
1.287 **sonata form**

A form used frequently for single movements of the *sonata*, *symphony*, quartet, etc. A movement written in sonata form falls into three sections called *exposition*, *development* and *recapitulation*. In the exposition the composer introduces some musical ideas, consisting of a number of themes; in the development section the composer *develops* this material, and in the recapitulation the composer repeats the exposition, with certain modifications. The exposition contains a number of themes that fall into two groups, often called first and second subject. Other melodies occurring in each group are considered as continuations of these two. The second theme is in another key, normally in the key of the *dominant* if the *tonic* is *major*, and in the *relative key* if the tonic is *minor*.

**See also**

Section 1.95 [dominant], page 25, Section 1.185 [major], page 46, Section 1.205 [minor], page 52, Section 1.258 [relative key], page 65, Section 1.286 [sonata], page 71, Section 1.303 [symphony], page 75, Section 1.320 [tonic], page 78.

1.288 **song texts**

**See also**

Section 1.184 [lyrics], page 46.

1.289 **soprano**

The highest female voice.

**See also**

No cross-references.

1.290 **staccato**

Playing the note(s) short. Staccato is indicated by a dot above or below the note head.

![Staccato notation](/scripts/flags/u3/noteheads.s2/scripts.staccato)

**See also**

No cross-references.

1.291 **staff**

A staff (plural: staves) is a series of (normally five) horizontal lines upon and between which the musical notes are written, thus indicating (in connection with a Section 1.57 [clef], page 14) their pitch. Staves for Section 1.234 [percussion], page 59, instruments may have fewer lines.

See also
Section 1.306 [system], page 76.

1.292 staves
See also
Section 1.291 [staff], page 72.

1.293 stem
Vertical line above or below a Section 1.220 [note head], page 55, shorter than a whole note.

See also
Section 1.35 [beam], page 9.

1.294 stringendo
[Italian: ‘pressing’] Pressing, urging, or hastening the time, as to a climax.

See also
Section 1.3 [accelerando], page 1.

1.295 strings
A family of stringed musical instruments played with a bow. Strings commonly used in a symphony orchestra are violin, viola, violoncello, and double bass.

See also
No cross-references.
1.296 strong beat

See also
Section 1.36 [beat], page 9, Section 1.4 [accent], page 2, Section 1.189 [measure], page 46, Section 1.261 [rhythm], page 66.

1.297 subdominant

The fourth scale degree.

See also
Section 1.142 [functional harmony], page 35, Section 1.265 [scale degree], page 67.

1.298 submediant

The sixth scale degree.

See also
Section 1.142 [functional harmony], page 35, Section 1.265 [scale degree], page 67, Section 1.301 [superdominant], page 74.

1.299 subtonic

The seventh Section 1.265 [scale degree], page 67.

See also
Section 1.142 [functional harmony], page 35, Section 1.265 [scale degree], page 67.

1.300 sul G

Indicates that the indicated passage (or note) should be played on the G string.

See also
No cross-references.

1.301 superdominant

The sixth Section 1.265 [scale degree], page 67. Equivalent to the submediant, q.v.
See also
Section 1.142 [functional harmony], page 35, Section 1.265 [scale degree], page 67, Section 1.298 [submediant], page 74.

1.302 supertonic

The second Section 1.265 [scale degree], page 67.

See also
Section 1.142 [functional harmony], page 35, Section 1.265 [scale degree], page 67.

1.303 symphony

A symphony may be defined as a *sonata* for orchestra.

See also
Section 1.286 [sonata], page 71.

1.304 syncopation

Any deliberate upsetting of the normal pulse of Section 1.198 [meter], page 49, Section 1.4 [accent], page 2, and Section 1.261 [rhythm], page 66. The occidental system of musical rhythm rests upon the grouping of equal beats into groups of two or three, with a regularly recurrent accent on the first beat of each group. Any deviation from this scheme is felt as a disturbance or contradiction between the underlaying (normal) pulse and the actual (abnormal) rhythm.

![Syncopation example](https://example.com/syncopation.png)

See also
No cross-references.

1.305 syntonic comma

Named after Ptolemy’s syntonic diatonic genus. Originally, the difference by which the ditone exceeds the pure major third obtained by Pythagorean tuning – $(9:8)^2 - 5:4 = 81:80$, or 21.5 cents.

Modern acoustical theory defines it as the interval by which four fifths exceed the sum of two octaves plus a major third. $(3:2)^4 - (2:1)^2 + (5:4)$

This comma is also known as the comma of Didymus, or didymic comma.
See also
Section 1.250 [Pythagorean comma], page 63.

1.306 system

One ‘line’ of music on the page, consisting of one or more staves grouped vertically. A line break is a switch to the next system.

For example, a piano music score often contains five to six systems per page (with normally two staves per system), while a full orchestral score usually contains only one or two systems per page.

See also
Section 1.291 [staff], page 72.

1.307 temperament

Systems of tuning in which the intervals deviate from the acoustically pure intervals.

See also
Section 1.188 [meantone temperament], page 46, Section 1.120 [equal temperament], page 30.

1.308 tempo indication

The rate of speed of a composition or a section thereof, ranging from the slowest to the quickest, as is indicated by tempo marks as largo, adagio, andante, allegro, and presto.

See also
Section 1.8 [adagio], page 3, Section 1.12 [allegro], page 4, Section 1.19 [andante], page 5, Section 1.171 [largo], page 43, Section 1.248 [presto], page 62.

1.309 tenor

The highest ‘natural’ male voice (apart from countertenor).

See also
Section 1.73 [countertenor], page 19.

1.310 tenth

See also
Section 1.222 [note value], page 55.
1.311 tenuto
An indication that a particular note should be held for the whole length, although this can vary depending on the composer and era.

See also
No cross-references.

1.312 third

See also
Section 1.163 [interval], page 41.

1.313 thirty-second note
- UK: demisemiquaver
- ES: fusa
- I: biscroma
- F: triple croche
- D: Zweiunddreissigstel, Zweiunddreissigstelnote
- NL: tweeendertigste (32e) noot
- DK: toogtredivtedelsnode
- S: trettiotvåondelsnot
- FI: kolmaskymmeneskahdesosanuotti

See also
Section 1.222 [note value], page 55.

1.314 thirty-second rest
- UK: demisemiquaver rest
- ES: silencio de fusa
- I: pausa di biscroma
- F: huitième de soupir
- D: Zweiunddreissigstelpause
- NL: tweeendertigste (32e) rust
- DK: toogtredivtedelspause
- S: trettiofåondelspaus
- FI: kolmaskymmeneskahdesosatauko

See also
Section 1.222 [note value], page 55.

1.315 thorough bass

See also
Section 1.129 [figured bass], page 32.
1.316  tie

A curved line, identical in appearance with the Section 1.284 [slur], page 71, which connects two successive notes of the same pitch, and which has the function of uniting them into a single sound (tone) equal to the combined durations.

1.317  time
See also
Section 1.198 [meter], page 49.

1.318  time signature

The sign placed at the beginning of a composition to indicate its meter. It most often takes the form of a fraction, but a few signs derived from mensural notation and proportions are also employed.

See also
Section 1.195 [mensural notation], page 47, Section 1.196 [mensuration sign], page 48, Section 1.198 [meter], page 49.

1.319  tone

A sound of definite pitch and duration, as distinct from noise. Tone is a primary building material of music.

See also
No cross-references.

1.320  tonic

The first scale degree.

See also
Section 1.142 [functional harmony], page 35, Section 1.265 [scale degree], page 67.
1.321 transposing instrument

Instruments whose notated pitch is different from their sounded pitch. Except for those whose notated and sounding pitches differ by one or more octaves (to reduce the number of ledger lines needed), most such instruments are identified by the letter name of the pitch class of their fundamental. The pitch class is the note that sounds (disregarding the octave in which it sounds) when the instrument plays a notated C.

For example: when played on the B-flat clarinet, the note middle C sounds the B-flat one tone lower. If played on the A clarinet, the same written note sounds the A (one and half tones – a minor third – lower).

Not all transposing instruments include the pitch class in their name:
- Alto flute (in G)
- English horn (in F)
- Saxophones (in B-flat or E-flat)

See also
Section 1.67 [concert pitch], page 17.

1.322 transposition

Shifting a melody up or down in pitch, while keeping the same relative pitches.

See also
No cross-references.

1.323 treble clef

See also
Section 1.144 [G clef], page 35.

1.324 tremolo

On stringed instruments:

1. The quick reiteration of the same tone, produced by a rapid up-and-down movement of the bow.

2. Or, the rapid alternation between two notes of a Section 1.52 [chord], page 13, usually in the distance of a third (Section 1.163 [interval], page 41).

See also
Section 1.295 [strings], page 73.

1.325 triad

See also
Section 1.52 [chord], page 13.

1.326 trill

See also
Section 1.228 [ornament], page 58.

1.327 triple meter

See also
Section 1.198 [meter], page 49.

1.328 triplet

See also
Section 1.222 [note value], page 55.

1.329 tritone

See also
Section 1.163 [interval], page 41.
1.330 tuning fork
A two-pronged piece of steel used to indicate an absolute pitch, usually for A above middle C (440 cps/Hz), which is the international tuning standard. Tuning forks for other pitches are available.

See also
Section 1.204 [middle C], page 52.

1.331 tuplet
A non-standard subdivision of a beat or part of a beat, usually indicated with a bracket and a number indicating the number of subdivisions.

See also
Section 1.328 [triplet], page 80, Section 1.222 [note value], page 55.

1.332 turn

See also
Section 1.228 [ornament], page 58.

1.333 unison
Playing of the same notes or the same melody by various instruments (voices) or by the whole orchestra (choir), either at exactly the same pitch or in a different octave.

See also
No cross-references.

1.334 upbeat

See also
Section 1.17 [anacrusis], page 5.

1.335 voice
- Human voices:
  - Section 1.289 [soprano], page 72,
• Section 1.203 [mezzo-soprano], page 52,
• Section 1.70 [contralto], page 18,
• Section 1.309 [tenor], page 76,
• Section 1.31 [baritone], page 8,
• Section 1.33 [bass], page 9,
• A melodic layer or part of a polyphonic composition.

See also
No cross-references.

1.336 volta

[Italian: ‘time’ (instance, not duration)] An ending, such as a first or second ending. LilyPond extends this idea to any number, and allows any text (not just a number) – to serve as the volta text.

See also
No cross-references.

1.337 vowel transition

A gradual change of vowel or sustained consonant, usually indicated by an arrow between syllables (see Gould, pp. 452–453).

See also
No cross-references.

1.338 weak beat

See also
Section 1.36 [beat], page 9, Section 1.189 [measure], page 46, Section 1.261 [rhythm], page 66.

1.339 whole note
• UK: semibreve
• ES: redonda
• I: semibreve
• F: ronde
• D: Ganze, ganze Note
• NL: hele noot
• DK: helnode
• S: helnot
• FI: kokonuotti
1.340 whole rest

- UK: semibreve rest
- ES: silencio de redonda
- I: pausa di semibreve
- F: pause
- D: ganze Pause, ganztaktige Pause
- NL: hele rust
- DK: helnodespause
- S: helpaus
- FI: kokotauko

See also
Section 1.222 [note value], page 55.

1.341 whole tone

The interval of a major second. The interval between two tones on the piano keyboard with exactly one key between them – including black and white keys – is a whole tone.

See also
Section 1.163 [interval], page 41.

1.342 woodwind

A family of blown wooden musical instruments. Today some of these instruments are actually made from metal. The woodwind instruments commonly used in a symphony orchestra are flute, oboe, clarinet, saxophone, and bassoon.

* About the French naming system: croche refers to the note’s ‘hook’. Therefore, from the eighth note on, the note names mean ‘hook’, ‘doubled hook’, ‘trebled hook’, and so on.

The rest names are based on the soupir, or quarter rest. Subsequent rests are expressed as fractions thereof: half a soupir, a quarter of a soupir, and so on.
Each of the following tables contains one type of note and its matching rest, with abbreviations that apply to both notes and rests. Just switch the part that means ‘note’ with the part that means ‘rest’, for example:

- English: 16th note, 16th rest
- German: 32tel-Note, 32tel-Pause
- Finnish: 64-osanmotti, 64-osataulko

Editor’s note: I put a dash ‘-’ when I could not find a language-specific abbreviation for a duration name. If you know of one that I missed, please send it to me, care of the lilypond-user discussion list.

Appendix A Literature used

Appendix B  GNU Free Documentation License

Version 1.3, 3 November 2008

https://fsf.org/

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

0. PREAMBLE
The purpose of this License is to make a manual, textbook, or other functional and useful document free in the sense of freedom: to assure everyone the effective freedom to copy and redistribute it, with or without modifying it, either commercially or noncommercially. Secondly, this License preserves for the author and publisher a way to get credit for their work, while not being considered responsible for modifications made by others.
This License is a kind of “copyleft”, which means that derivative works of the document must themselves be free in the same sense. It complements the GNU General Public License, which is a copyleft license designed for free software.
We have designed this License in order to use it for manuals for free software, because free software needs free documentation: a free program should come with manuals providing the same freedoms that the software does. But this License is not limited to software manuals; it can be used for any textual work, regardless of subject matter or whether it is published as a printed book. We recommend this License principally for works whose purpose is instruction or reference.

1. APPLICABILITY AND DEFINITIONS
This License applies to any manual or other work, in any medium, that contains a notice placed by the copyright holder saying it can be distributed under the terms of this License. Such a notice grants a world-wide, royalty-free license, unlimited in duration, to use that work under the conditions stated herein. The “Document”, below, refers to any such manual or work. Any member of the public is a licensee, and is addressed as “you”. You accept the license if you copy, modify or distribute the work in a way requiring permission under copyright law.
A “Modified Version” of the Document means any work containing the Document or a portion of it, either copied verbatim, or with modifications and/or translated into another language.
A “Secondary Section” is a named appendix or a front-matter section of the Document that deals exclusively with the relationship of the publishers or authors of the Document to the Document’s overall subject (or to related matters) and contains nothing that could fall directly within that overall subject. (Thus, if the Document is in part a textbook of mathematics, a Secondary Section may not explain any mathematics.) The relationship could be a matter of historical connection with the subject or with related matters, or of legal, commercial, philosophical, ethical or political position regarding them.
The “Invariant Sections” are certain Secondary Sections whose titles are designated, as being those of Invariant Sections, in the notice that says that the Document is released under this License. If a section does not fit the above definition of Secondary then it is not allowed to be designated as Invariant. The Document may contain zero Invariant Sections. If the Document does not identify any Invariant Sections then there are none.
The “Cover Texts” are certain short passages of text that are listed, as Front-Cover Texts or Back-Cover Texts, in the notice that says that the Document is released under this License. A Front-Cover Text may be at most 5 words, and a Back-Cover Text may be at most 25 words.
A “Transparent” copy of the Document means a machine-readable copy, represented in a format whose specification is available to the general public, that is suitable for revising the document straightforwardly with generic text editors or (for images composed of pixels) generic paint programs or (for drawings) some widely available drawing editor, and that is suitable for input to text formatters or for automatic translation to a variety of formats suitable for input to text formatters. A copy made in an otherwise Transparent file format whose markup, or absence of markup, has been arranged to thwart or discourage subsequent modification by readers is not Transparent. An image format is not Transparent if used for any substantial amount of text. A copy that is not “Transparent” is called “Opaque”.

Examples of suitable formats for Transparent copies include plain ASCII without markup, Texinfo input format, \LaTeX{} input format, SGML or XML using a publicly available DTD, and standard-conforming simple HTML, PostScript or PDF designed for human modification. Examples of transparent image formats include PNG, XCF and JPG. Opaque formats include proprietary formats that can be read and edited only by proprietary word processors, SGML or XML for which the DTD and/or processing tools are not generally available, and the machine-generated HTML, PostScript or PDF produced by some word processors for output purposes only.

The “Title Page” means, for a printed book, the title page itself, plus such following pages as are needed to hold, legibly, the material this License requires to appear in the title page. For works in formats which do not have any title page as such, “Title Page” means the text near the most prominent appearance of the work’s title, preceding the beginning of the body of the text.

The “publisher” means any person or entity that distributes copies of the Document to the public.

A section “Entitled XYZ” means a named subunit of the Document whose title either is precisely XYZ or contains XYZ in parentheses following text that translates XYZ in another language. (Here XYZ stands for a specific section name mentioned below, such as “Acknowledgements”, “Dedications”, “Endorsements”, or “History”.) To “Preserve the Title” of such a section when you modify the Document means that it remains a section “Entitled XYZ” according to this definition.

The Document may include Warranty Disclaimers next to the notice which states that this License applies to the Document. These Warranty Disclaimers are considered to be included by reference in this License, but only as regards disclaiming warranties: any other implication that these Warranty Disclaimers may have is void and has no effect on the meaning of this License.

2. VERBATIM COPYING

You may copy and distribute the Document in any medium, either commercially or noncommercially, provided that this License, the copyright notices, and the license notice saying this License applies to the Document are reproduced in all copies, and that you add no other conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

3. COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document’s license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both
Appendix B: GNU Free Documentation License

covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition. Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material. If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give them a chance to provide you with an updated version of the Document.

4. MODIFICATIONS

You may copy and distribute a Modified Version of the Document under the conditions of sections 2 and 3 above, provided that you release the Modified Version under precisely this License, with the Modified Version filling the role of the Document, thus licensing distribution and modification of the Modified Version to whoever possesses a copy of it. In addition, you must do these things in the Modified Version:

A. Use in the Title Page (and on the covers, if any) a title distinct from that of the Document, and from those of previous versions (which should, if there were any, be listed in the History section of the Document). You may use the same title as a previous version if the original publisher of that version gives permission.

B. List on the Title Page, as authors, one or more persons or entities responsible for authorship of the modifications in the Modified Version, together with at least five of the principal authors of the Document (all of its principal authors, if it has fewer than five), unless they release you from this requirement.

C. State on the Title page the name of the publisher of the Modified Version, as the publisher.

D. Preserve all the copyright notices of the Document.

E. Add an appropriate copyright notice for your modifications adjacent to the other copyright notices.

F. Include, immediately after the copyright notices, a license notice giving the public permission to use the Modified Version under the terms of this License, in the form shown in the Addendum below.

G. Preserve in that license notice the full lists of Invariant Sections and required Cover Texts given in the Document’s license notice.

H. Include an unaltered copy of this License.

I. Preserve the section Entitled “History”, Preserve its Title, and add to it an item stating at least the title, year, new authors, and publisher of the Modified Version as given on the Title Page. If there is no section Entitled “History” in the Document, create one stating the title, year, authors, and publisher of the Document as given on its
Title Page, then add an item describing the Modified Version as stated in the previous sentence.

J. Preserve the network location, if any, given in the Document for public access to a Transparent copy of the Document, and likewise the network locations given in the Document for previous versions it was based on. These may be placed in the “History” section. You may omit a network location for a work that was published at least four years before the Document itself, or if the original publisher of the version it refers to gives permission.

K. For any section Entitled “Acknowledgements” or “Dedications”, Preserve the Title of the section, and preserve in the section all the substance and tone of each of the contributor acknowledgements and/or dedications given therein.

L. Preserve all the Invariant Sections of the Document, unaltered in their text and in their titles. Section numbers or the equivalent are not considered part of the section titles.

M. Delete any section Entitled “Endorsements”. Such a section may not be included in the Modified Version.

N. Do not retitle any existing section to be Entitled “Endorsements” or to conflict in title with any Invariant Section.

O. Preserve any Warranty Disclaimers.

If the Modified Version includes new front-matter sections or appendices that qualify as Secondary Sections and contain no material copied from the Document, you may at your option designate some or all of these sections as invariant. To do this, add their titles to the list of Invariant Sections in the Modified Version’s license notice. These titles must be distinct from any other section titles.

You may add a section Entitled “Endorsements”, provided it contains nothing but endorsements of your Modified Version by various parties—for example, statements of peer review or that the text has been approved by an organization as the authoritative definition of a standard.

You may add a passage of up to five words as a Front-Cover Text, and a passage of up to 25 words as a Back-Cover Text, to the end of the list of Cover Texts in the Modified Version. Only one passage of Front-Cover Text and one of Back-Cover Text may be added by (or through arrangements made by) any one entity. If the Document already includes a cover text for the same cover, previously added by you or by arrangement made by the same entity you are acting on behalf of, you may not add another; but you may replace the old one, on explicit permission from the previous publisher that added the old one.

The author(s) and publisher(s) of the Document do not by this License give permission to use their names for publicity for or to assert or imply endorsement of any Modified Version.

5. COMBINING DOCUMENTS

You may combine the Document with other documents released under this License, under the terms defined in section 4 above for modified versions, provided that you include in the combination all of the Invariant Sections of all of the original documents, unmodified, and list them all as Invariant Sections of your combined work in its license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and multiple identical Invariant Sections may be replaced with a single copy. If there are multiple Invariant Sections with the same name but different contents, make the title of each such section unique by adding at the end of it, in parentheses, the name of the original author or publisher of that section if known, or else a unique number. Make the same adjustment to the section titles in the list of Invariant Sections in the license notice of the combined work.
In the combination, you must combine any sections Entitled “History” in the various original documents, forming one section Entitled “History”; likewise combine any sections Entitled “Acknowledgements”, and any sections Entitled “Dedications”. You must delete all sections Entitled “Endorsements.”

6. COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents released under this License, and replace the individual copies of this License in the various documents with a single copy that is included in the collection, provided that you follow the rules of this License for verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute it individually under this License, provided you insert a copy of this License into the extracted document, and follow this License in all other respects regarding verbatim copying of that document.

7. AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate and independent documents or works, in or on a volume of a storage or distribution medium, is called an “aggregate” if the copyright resulting from the compilation is not used to limit the legal rights of the compilation’s users beyond what the individual works permit. When the Document is included in an aggregate, this License does not apply to the other works in the aggregate which are not themselves derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these copies of the Document, then if the Document is less than one half of the entire aggregate, the Document’s Cover Texts may be placed on covers that bracket the Document within the aggregate, or the electronic equivalent of covers if the Document is in electronic form. Otherwise they must appear on printed covers that bracket the whole aggregate.

8. TRANSLATION

Translation is considered a kind of modification, so you may distribute translations of the Document under the terms of section 4. Replacing Invariant Sections with translations requires special permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled “Acknowledgements”, “Dedications”, or “History”, the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title.

9. TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, or distribute it is void, and will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation. Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.
Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, receipt of a copy of some or all of the same material does not give you any rights to use it.

10. FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See https://www.gnu.org/licenses/.

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License “or any later version” applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation. If the Document specifies that a proxy can decide which future versions of this License can be used, that proxy’s public statement of acceptance of a version permanently authorizes you to choose that version for the Document.

11. RELICENSING

“Massive MultiAuthor Collaboration Site” (or “MMC Site”) means any World Wide Web server that publishes copyrightable works and also provides prominent facilities for anybody to edit those works. A public wiki that anybody can edit is an example of such a server. A “Massive MultiAuthor Collaboration” (or “MMC”) contained in the site means any set of copyrightable works thus published on the MMC site.

“CC-BY-SA” means the Creative Commons Attribution-Share Alike 3.0 license published by Creative Commons Corporation, a not-for-profit corporation with a principal place of business in San Francisco, California, as well as future copyleft versions of that license published by that same organization.

“Incorporate” means to publish or republish a Document, in whole or in part, as part of another Document.

An MMC is “eligible for relicensing” if it is licensed under this License, and if all works that were first published under this License somewhere other than this MMC, and subsequently incorporated in whole or in part into the MMC, (1) had no cover texts or invariant sections, and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site under CC-BY-SA on the same site at any time before August 1, 2009, provided the MMC is eligible for relicensing.
ADDENDUM: How to use this License for your documents

To use this License in a document you have written, include a copy of the License in the document and put the following copyright and license notices just after the title page:

Copyright (C) year your name.
Permission is granted to copy, distribute and/or modify this document
under the terms of the GNU Free Documentation License, Version 1.3
or any later version published by the Free Software Foundation;
with no Invariant Sections, no Front-Cover Texts, and no Back-Cover
Texts. A copy of the license is included in the section entitled ``GNU
Free Documentation License''.

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts, replace the
"with...Texts." line with this:

with the Invariant Sections being list their titles, with
the Front-Cover Texts being list, and with the Back-Cover Texts
being list.

If you have Invariant Sections without Cover Texts, or some other combination of the three,
merge those two alternatives to suit the situation.

If your document contains nontrivial examples of program code, we recommend releasing
these examples in parallel under your choice of free software license, such as the GNU General
Public License, to permit their use in free software.
