

LilyPond

Il compositore tipografico per la musica

Frammenti

Il team di sviluppo di LilyPond

Questo documento contiene una selezione di frammenti LilyPond tratti dal LilyPond Snippet Repository (<https://lsr.di.unimi.it>) (LSR). I frammenti sono nel pubblico dominio.

Desideriamo ringraziare Sebastiano Vigna per la gestione del sito web e del database dell'LSR, e l'università di Milano per l'hosting.

Questo documento non è un sottoinsieme esatto dell'LSR: alcuni frammenti vengono dalla directory `input/new` dei sorgenti di LilyPond; i frammenti tratti dall'LSR vengono convertiti con `convert-ly`, perché l'LSR usa una versione stabile di LilyPond, mentre questo manuale è valido per la versione 2.24.3.

I frammenti sono raggruppati per categorie; le categorie elencate nell'indice corrispondono a una sezione del manuale di notazione di LilyPond. Un frammento potrebbe avere più di una categoria, e non tutte le categorie dell'LSR saranno presenti in questo documento.

Nella versione HTML di questo manuale, si può fare clic sul nome del file o sull'immagine di ciascun esempio per vedere il corrispondente file di input.

Questo manuale è disponibile in altri formati ed è integrato col resto della documentazione. Maggiori informazioni in Sezione “Manuali” in *Informazioni generali*.

La documentazione completa si trova all'indirizzo <https://lilypond.org/>.

Questo documento è stato posto nel pubblico dominio.

Per la versione di LilyPond 2.24.3

Sommario

Pitches	1
Un ambitus per voce	1
Aggiungere un segno di ottava a una sola voce	1
Teste di nota Aiken variante sottile	2
Altering the length of beamed stems	2
Ambitus	3
Ambitus dopo armatura di chiave	3
Ambitus su più voci	4
Applicazione degli stili delle teste di nota in base al grado della scala	4
Cambiare automaticamente la direzione del gambo della nota centrale in base alla melodia	5
Changing ottava text	6
Modifica dell'intervallo dell'ambitus	6
Changing the interval of lines on the stave	7
Clefs can be transposed by arbitrary amounts	8
Coloring notes depending on their pitch	8
Creating a sequence of notes on various pitches	9
Creating custom key signatures	10
Direction of merged 'fa' shape note heads	10
Force a cancellation natural before accidentals	11
Forcing a clef symbol to be displayed	11
Generating random notes	11
Nascondere le alterazioni delle note con legatura di valore	12
Keep change clefs full sized	12
Esempio di makam	13
Modificare l'inclinazione dell'estensore dell'ottava	13
Armature di chiave non tradizionali	14
Numeri dentro le teste di nota	14
Modello per orchestra, coro e pianoforte	16
Impedire l'inserimento automatico dei bequadri supplementari	19
Impedire l'inserimento dei segni di bequadro quando cambia l'armatura di chiave	20
Quoting another voice with transposition	20
Separating key cancellations from key signature changes	21
Trasposizione delle altezze con numero minimo di alterazioni	21
Turkish Makam example	23
Modifiche manuali della proprietà della chiave	23
Using autochange with more than one voice	25
 Rhythms	 27
Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms	27
Adding drum parts	27
Adjusting grace note spacing	28
Allineare i numeri di battuta	28
Note brevi alternative	29
Appoggiatura or grace note before a bar line	29
Automatic beam subdivisions	30
Automatically change durations	30
Estremità delle travature nel contesto Score	31

Travature che attraversano le interruzioni di linea	32
Modificare la distanza delle travature angolari	32
Modificare la forma delle pause multiple	33
Modifica del numero di punti di aumentazione per nota	33
Modificare il tempo senza mostrare l'indicazione metronomica	33
Modifica del numero del gruppo irregolare	34
Changing time signatures inside a polymetric section using <code>\scaleDurations</code>	34
Notazione per canti e salmi	35
Compound time signatures	36
Segni per la conduzione, segni di raggruppamento della misura	36
Consistently left aligned bar numbers	37
Controllare la visibilità della parentesi del gruppo irregolare	38
Cow and ride bell example	39
Creare indicazioni metronomiche in modalità testuale	39
Disegnare manualmente le legature di valore	40
Engraving tremolos with floating beams	40
Inserire vari gruppi irregolari usando una sola volta il comando <code>\tuplet</code>	41
Code e punte delle travature	41
Forcing rehearsal marks to start from a given letter or number	43
Generating custom flags	43
Ritmi di accompagnamento per chitarra	44
Heavily customized polymetric time signatures	45
High and Low woodblock example	46
Making an object invisible with the 'transparent property	47
Legature di portamento con complesse strutture di tratteggio	48
Manually controlling beam positions	48
Merging multi-measure rests in a polyphonic part	49
Modifying tuplet bracket length	49
Spostare le note puntate in polifonia	50
Regolazione della lunghezza delle pause multiple	50
Testo a margine delle pause multiple	51
Numeri non predefiniti per i gruppi irregolari	51
Numbering single measure rests	52
PartCombine e autoBeamOff	52
Percussion example	53
Consentire l'interruzione del rigo all'interno di gruppi irregolari con travature	54
Positioning grace note beams at the height of normal note beams	55
Posizionare gli abbellimenti con dello spazio fluttuante	55
Posizionamento delle pause multiple	56
Positioning opposing fermatas on a bar line	57
Preventing final mark from removing final tuplet	58
Mostrare i numeri di battuta a intervalli regolari	58
Printing bar numbers for broken measures	59
Numeri di battuta racchiusi in rettangoli o cerchi	60
Printing bar numbers using modulo-bar-number-visible	60
Stampare i numeri di battuta a intervalli regolari variabili	61
Posizionare il metronomo e i numeri di chiamata sotto il rigo	61
Printing music with different time signatures	62
Mostrare il numero di battuta nella prima misura	65
Printing tuplet brackets on the note head side	65
Ridefinire le impostazioni predefinite globali degli abbellimenti	66
Togliere i numeri di battuta da uno spartito	67
Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff	67
Stili di pausa	68

Reverting default beam endings	69
Rhythmic slashes	69
Skips in lyric mode	70
Skips in lyric mode (2).....	70
Stemlets	71
Travatura che segue strettamente il battito.....	71
Suddividere le travature.....	72
Tam-tam example	72
Tambourine example.....	73
Three-sided box.....	73
Time signature in parentheses.....	74
Time signature in parentheses - method 3	74
Indicazione di tempo che mostra solo il numeratore (invece della frazione).....	75
Modificare l'aspetto degli abbellimenti di un intero brano	75
User defined time signatures	76
Using alternative flag styles.....	76
Usare il gambo barrato degli abbellimenti con le teste normali	77
Usare le legature di valore con un arpeggio	77
Expressive marks	79
Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms.....	79
Adding parentheses around an expressive mark or chordal note	79
Aggiungere i segni di tempo per i glissandi lunghi	79
Cambiare la forma dei portamenti indeterminati verso il basso o verso l'alto.....	80
Allineare le estremità delle forcelle alle direzioni di NoteColumn	81
Note brevi alternative.....	81
Asymmetric slurs	81
Breathing signs	82
Broken Crescendo Hairpin	83
Caesura ("railtracks") with fermata	83
Center text below hairpin dynamics	84
Nascondere la linea di estensione per le dinamiche testuali	85
Changing the appearance of a slur from solid to dotted or dashed.....	86
Cambiare il simbolo del segno di respiro.....	86
Modifica del numero di punti di aumentazione per nota.....	87
Combining dynamics with markup texts.....	87
Glissando contemporaneo	87
Controlling spanner visibility after a line break	88
Controllo dell'ordine verticale degli script.....	88
Creare un gruppetto ritardato.....	89
Creare degli arpeggi che attraversano note appartenenti a voci diverse	89
Creare degli arpeggi che attraversano il rigo del pianoforte	90
Creare degli arpeggi che attraversano i rigi in altri contesti.....	90
Creating double-digit fingerings	91
Creating "real" parenthesized dynamics	91
Creating slurs across voices	92
Creating text spanners.....	92
Estensore testuale della dinamica personalizzato.....	93
Estensore testuale della dinamica personalizzato.....	94
Glissandi can skip grobs	94
Hairpins with different line styles.....	95
Nascondere la linea di estensione per le dinamiche testuali	95
Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p").....	95
Inserire una cesura.....	99

Laissez vibrer ties	99
Line arrows	100
Legature di portamento con complesse strutture di tratteggio	100
Modificare i valori predefiniti per le abbreviazioni delle articolazioni	101
Moving slur positions vertically	101
Spostare le estremità delle forcelle	102
Positioning arpeggios	103
Posizionare il testo a margine dentro le legature di portamento	103
Stampare le forcelle in vari stili	103
Forcelle con notazione al niente	104
Posizionare il metronomo e i numeri di chiamata sotto il rigo	104
Impostare il comportamento delle forcelle sulle stanghette	105
Impostare la lunghezza minima delle forcelle	105
Showing the same articulation above and below a note or chord	106
Snap-pizzicato or Bartok pizzicato	106
Usare un segno di spunta come simbolo di respiro	107
Usare arpeggioBracket per rendere i divisi più visibili	107
Uso delle doppie legature di portamento per gli accordi legati	108
Uso della proprietà whiteout	108
Vertical line as a baroque articulation mark	108
Vertically aligning dynamics across multiple notes	109
Repeats	110
Aggiungere le parentesi delle volte a altri righi	110
Centered measure numbers	110
Changing the default bar lines	111
Tremoli attraverso i righi	112
Engraving tremolos with floating beams	113
Ripetizioni con segni di percentuale isolati	113
Measure counter	113
Numbering groups of measures	114
Visibilità del conto della ripetizione con segno percentuale	115
Contatore della ripetizione con segno percentuale	115
Positioning segno and coda (with line break)	116
Impostare la doppia ripetizione predefinita per le volte	117
Accorciare le parentesi delle volte	117
Volta sotto gli accordi	117
Volta multi staff	118
Volta text markup using repeatCommands	119
Simultaneous notes	120
Voci ulteriori per evitare le collisioni	120
Changing a single note's size in a chord	120
Modificare le indicazioni testuali di partCombine	121
Clusters	121
Combinare due parti sullo stesso rigo	122
Displaying complex chords	123
Forzare lo spostamento orizzontale delle note	123
Making an object invisible with the 'transparent property	124
Spostare le note puntate in polifonia	124
Suppressing warnings for clashing note columns	125
Two \partCombine pairs on one staff	125

Staff notation	128
Un ambitus per voce	128
Adding an extra staff	128
Adding an extra staff at a line break	129
Adding indicators to staves which get split after a break	130
Aggiungere citazioni orchestrali a una partitura vocale	134
Aggiungere i segni di tempo per i glissandi lunghi	136
Numeri di battuta alternativi	137
Ambitus dopo armatura di chiave	138
Centered measure numbers	138
Changing the default bar lines	139
Changing the number of lines in a staff	140
Changing the staff size	140
Creating blank staves	141
Creating custom key signatures	143
Creating double-digit fingerings	143
Cross staff stems	143
Mostrare la parentesi anche se c'è un solo rigo nel sistema	144
Extending a TrillSpanner	145
Estendere i glissandi sulle volte delle ripetizioni	145
Flat Ties	147
Forcing measure width to adapt to MetronomeMark's width	149
Glissandi can skip grobs	150
Incipit	150
Inserting score fragments above a staff, as markups	155
Let TabStaff print the topmost string at bottom	155
Letter tablature formatting	156
Lasciare che i glissandi vadano a capo	157
Rendere alcune linee del rigo più spesse delle altre	157
Measure counter	158
Formattazione mensurale (stanghette tra i rigi)	158
Modificare l'inclinazione dell'estensore dell'ottava	159
Annidare i rigi	159
Armature di chiave non tradizionali	160
Numbering groups of measures	161
Modello per orchestra, coro e pianoforte	162
Print ChordNames with same root and different bass as slash and bass-note	165
Putting lyrics inside the staff	167
Quoting another voice	168
Quoting another voice with transposition	169
Removing brace on first line of piano score	170
Eliminare la prima linea vuota	170
Setting system separators	172
Tick bar lines	174
Time signature in parentheses	174
Time signature in parentheses - method 3	174
Modifiche manuali della proprietà della chiave	174
Two \partCombine pairs on one staff	176
Usare una parentesi quadra all'inizio di un gruppo di rigi	178
Using autochange with more than one voice	178
Using marklines in a Frenched score	179
Vertical aligned StaffGroups without connecting SystemStartBar	182
Volta sotto gli accordi	190
Volta multi staff	191

Editorial annotations	192
Adding fingerings to a score	192
Adding links to objects	192
Adding markups in a tablature	194
Far sì che la diteggiatura appaia dentro il rigo	194
Numeri di battuta alternativi	195
Parentesi analitiche sopra il rigo	196
Parentesi analitiche con etichette	196
Applicazione degli stili delle teste di nota in base al grado della scala	197
Blanking staff lines using the <code>\whiteout</code> command	198
Changing a single note's size in a chord	198
Changing the appearance of a slur from solid to dotted or dashed	199
Coloring notes depending on their pitch	199
Controllare il posizionamento delle diteggiature di un accordo	200
Creare un gruppetto ritardato	201
Creating blank staves	201
Creating double-digit fingerings	203
Direzione predefinita dei gambi sulla linea centrale del rigo	203
Different font size settings for <code>instrumentName</code> and <code>shortInstrumentName</code>	204
Drawing boxes around grobs	205
Drawing circles around note heads	206
Drawing circles around various objects	206
Embedding native PostScript in a <code>\markup</code> block	206
Modificare l'aspetto delle linee della griglia	207
Grid lines: emphasizing rhythms and notes synchronization	208
Martellato e strappato	209
Martellato e strappato usando accordi	209
Martellato e strappato usando le voci	210
Rendere alcune linee del rigo più spesse delle altre	210
Marking notes of spoken parts with a cross on the stem (Sprechstimme)	210
Measure counter	211
Measure spanner	212
Numbering groups of measures	213
Positioning fingering indications precisely	214
Posizionare il testo a margine dentro le legature di portamento	215
Printing text from right to left	215
String number extender lines	215
Using PostScript to generate special note head shapes	216
Uso della proprietà <code>whiteout</code>	216
 Text	 218
Adding a QR code	218
Adding markups in a tablature	220
Adding the current date to a score	221
Adjusting lyrics vertical spacing	222
Aligning and centering instrument names	222
Aligning syllables with melisma	224
Blanking staff lines using the <code>\whiteout</code> command	224
Center text below hairpin dynamics	225
Changing ottava text	226
Changing the default text font family	227
Combining dynamics with markup texts	228
Combinare due parti sullo stesso rigo	228

Creating "real" parenthesized dynamics	230
Creating text spanners	230
Demonstrating all headers	231
Embedding native PostScript in a \markup block	232
Formattazione delle sillabe del testo vocale	233
How to put ties between syllables in lyrics	233
Allineamento del testo vocale	233
Markup list	234
Testo a margine delle pause multiple	236
Of the ubiquity of markup objects	236
Outputting the version number	237
Modello per pianoforte con testo al centro	237
Stampare i numeri di battuta a intervalli regolari variabili	238
Stampare le indicazioni su ogni rigo	239
Printing text from right to left	239
Putting lyrics inside the staff	240
Testo separato su due colonne	240
String number extender lines	241
Three-sided box	241
UTF-8	242
Modello per gruppo vocale con testo allineato sotto e sopra i righi	244
Volta text markup using repeatCommands	245
Vocal music	247
Un ambitus per voce	247
Adding indicators to staves which get split after a break	247
Aggiungere citazioni orchestrali a una partitura vocale	251
Adjusting lyrics vertical spacing	253
Aligning syllables with melisma	253
Ambitus	254
Ambitus dopo armatura di chiave	255
Ambitus su più voci	255
Modello per notazione antica – trascrizione moderna di musica gregoriana	256
Modello per salmo anglicano	256
Arranging separate lyrics on a single line	259
Changing stanza fonts	260
Notazione per canti e salmi	261
Forcing hyphens to be shown	262
Formattazione delle sillabe del testo vocale	262
How to put ties between syllables in lyrics	262
Modello per inno	263
Allineamento del testo vocale	265
Marking notes of spoken parts with a cross on the stem (Sprechstimme)	265
Ottenere la spaziatura del testo della vecchia versione 2.12	266
Modello per orchestra, coro e pianoforte	269
Modello per pianoforte con melodia e testo	272
Putting lyrics inside the staff	273
Modello per coro SATB - quattro righi	274
Modello di rigo singolo con note, testo e accordi	275
Single staff template with notes, lyrics, chords and frets	276
Modello di rigo singolo con note e testo	277
Skips in lyric mode	278
Skips in lyric mode (2)	278
Usare arpeggioBracket per rendere i divisi più visibili	278

Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente	279
Allineare verticalmente gli ossia e il testo vocale	281
Vertically centered common lyrics	281
Modello per complesso vocale	283
Modello per gruppo vocale con riduzione per pianoforte automatica	285
Modello per gruppo vocale con testo allineato sotto e sopra i righi	287
Modello per gruppo vocale con strofa e ritornello	289
Chords	291
Adding a figured bass above or below the notes	291
Aggiungere stanghette al contesto ChordNames	291
Adjusting figured bass alteration glyphs	292
Modifica del separatore dell'accordo	292
Changing the chord names to German or semi-German notation	292
Cambiare la posizione delle alterazioni del basso continuo	293
Eccezioni dei nomi degli accordi	294
Nome dell'accordo di settima maggiore	294
Chord names alternative	295
Chords with stretched fingering for FretBoards and TabVoice	305
Clusters	305
Controllare il posizionamento delle diteggiature di un accordo	306
Cross-staff chords - beaming problems workaround	306
Customizing the chord grid style	307
Customizing the no-chord symbol	308
Displaying complex chords	308
Manually break figured bass extenders for only some numbers	309
Print ChordNames with same root and different bass as slash and bass-note	309
Mostrare gli accordi nei cambi	311
Canzoniere semplice	312
Modello di rigo singolo con note, testo e accordi	312
Single staff template with notes, lyrics, chords and frets	313
Modello di rigo singolo con note e accordi	314
Vertically centering paired figured bass extenders	315
Volta sotto gli accordi	315
Keyboards	317
Accordion-discant symbols	317
Simboli di registro della fisarmonica	320
Changing the text for sustain markings	321
Clusters	321
Controllare il posizionamento delle diteggiature di un accordo	322
Creating slurs across voices	323
Cross-staff chords - beaming problems workaround	323
Tremoli attraverso i righi	324
Fine-tuning pedal brackets	325
Indicare accordi trasversali al rigo con la parentesi quadrata dell'arpeggio	325
Modello per combo jazz	326
Laissez vibrer ties	332
Modello per pianoforte (semplice)	333
Modello per pianoforte con testo al centro	333
Modello per pianoforte con melodia e testo	334
Removing brace on first line of piano score	335
Using autochange with more than one voice	336
Modello per gruppo vocale con riduzione per pianoforte automatica	337

Percussion	340
Adding drum parts	340
Cow and ride bell example	341
Customized drum notation in printed and MIDI output	341
Heavily customized polymetric time signatures	344
High and Low woodblock example	345
Modello per combo jazz.....	346
Percussion beaters	352

Pitches

Sezione “Pitches” in *Guida alla Notazione*

Un ambitus per voce

L’ambitus può essere specificato per voce. In tal caso occorre spostarlo manualmente per evitare collisioni.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Aggiungere un segno di ottava a una sola voce

Se il rigo ha più di una voce, l’ottavazione in una voce trasporrà la posizione delle note in tutte le voci per la durata della parentesi dell’ottava. Se si intende applicare l’ottavazione a una sola voce, occorre spostare l’incisore `Ottava_spanner_engraver` nel contesto `Voice`.

```
\layout {
  \context {
    \Staff
    \remove Ottava_spanner_engraver
  }
  \context {
    \Voice
    \consists Ottava_spanner_engraver
  }
}

{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\\
  {
```

```

    r2.
    \ottava -1
    <b,,, b,,,>4 ~ |
    q2
    \ottava 0
    <c e>2
  }
  >>
}
```

Teste di nota Aiken variante sottile

Le teste di nota Aiken bianche sono più difficili da leggere a dimensioni del rigo più piccole, specialmente coi tagli addizionali. Perdendo lo spazio bianco interno le fa apparire come note di un quarto.

```

\score {
  {
    \aikenHeads
    c''2 a' c' a

    % Switch to thin-variant noteheads
    \set shapeNoteStyles = ##(doThin reThin miThin
                          faThin sol laThin tiThin)

    c'' a' c' a
  }
}
```

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the details of the `Stem`. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

```

\relative c'' {
  \override Stem.details.beamed-lengths = #'(2)
  a8[ a] a16[ a] a32[ a]
  \override Stem.details.beamed-lengths = #'(8 10 12)
  a8[ a] a16[ a] a32[ a] r8
  \override Stem.details.beamed-lengths = #'(8)
  a8[ a]
```

```

\override Stem.details.beamed-lengths = #'(8.5)
a8[ a]
\revert Stem.details.beamed-lengths
a8[ a] a16[ a] a32[ a] r16
}

```

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. AmbitusNoteHead grobs also have ledger lines.

```

\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

```

```

<<
\new Staff {
  \relative c' {
    \time 2/4
    c4 f'
  }
}
\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}
>>

```

Ambitus dopo armatura di chiave

Per impostazione predefinita, gli ambitus sono posizionati a sinistra della chiave. La funzione `\ambitusAfter` permette di cambiare questo posizionamento. La sintassi è `\ambitusAfter`

`grob-interface` (vedi Graphical Object Interfaces (<http://lilypond.org/doc/v2.22/Documentation/internals/graphical-object-interfaces>) per un elenco dei possibili valori per `grob-interface`.)

Un caso d'uso comune è il posizionamento dell'ambitus tra l'armatura di chiave e l'indicazione di tempo.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Ambitus su più voci

Se si aggiunge l'incisore `Ambitus_engraver` al contesto `Staff` viene creato un solo ambitus per il rigo, anche nel caso di righe che hanno più voci.

```
\new Staff \with {
  \consists "Ambitus_engraver"
}
<<
  \new Voice \relative c'' {
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Applicazione degli stili delle teste di nota in base al grado della scala

La proprietà `shapeNoteStyles` può essere usata per definire vari stili di teste di nota per ogni grado della scala (definita dall'armatura di chiave o dalla proprietà `tonic`). Questa proprietà richiede un insieme di simboli, che può essere puramente arbitrario (sono permesse espressioni geometriche come `triangle`, `cross` e `xcircle`) o basato sull'antica tradizione tipografica americana (sono consentiti anche alcuni nomi di nota latini).

Detto questo, per imitare gli antichi canzonieri americani, ci sono vari stili predefiniti disponibili attraverso dei comodi comandi come `\aikenHeads` o `\sacredHarpHeads`.

Questo esempio mostra modi diversi di ottenere teste di nota di varie forme e illustra la possibilità di trasporre una melodia senza perdere la corrispondenza tra le funzioni armoniche e gli stili delle teste.

```

fragment = {
  \key c \major
  c2 d
  e2 f
  g2 a
  b2 c
}

\new Staff {
  \transpose c d
  \relative c' {
    \set shapeNoteStyles = ##(do re mi fa
                          #f la ti)

    \fragment
  }

  \break

  \relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f
                          mensural xcircle diamond)

    \fragment
  }
}

```

Cambiare automaticamente la direzione del gambo della nota centrale in base alla melodia

LilyPond può modificare la direzione del gambo della nota centrale di un rigo in modo che segua la melodia: occorre aggiungere l'incisore `Melody_engraver` al contesto `Voice`.

La proprietà di contesto `suspendMelodyDecisions` può essere usata per disattivare questo comportamento localmente.

```

\relative c'' {
  \time 3/4
  a8 b g f b g |
  \set suspendMelodyDecisions = ##t
  a b g f b g |
  \unset suspendMelodyDecisions
  c b d c b c |
}

```

```
\layout {
  \context {
    \Voice
    \consists "Melody_engraver"
    \autoBeamOff
  }
}
```

Changing ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief *ottava* is used.

```
{
  c'2
  \ottava #1
  \set Staff.ottavation = #"8"
  c''2
  \ottava #0
  c'1
  \ottava #1
  \set Staff.ottavation = #"Text"
  c''1
}
```

Modifica dell'intervallo dell'ambitus

È possibile cambiare le impostazioni predefinite dell'intervallo tra le teste di nota dell'ambitus e la linea che le collega.

```
\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

\new Staff {
  \time 2/4
  % Default setting
  c'4 g''
}
```

```

\new Staff {
  \time 2/4
  \override AmbitusLine.gap = #0
  c'4 g''
}

\new Staff {
  \time 2/4
  \override AmbitusLine.gap = #1
  c'4 g''
}

\new Staff {
  \time 2/4
  \override AmbitusLine.gap = #1.5
  c'4 g''
}

```

Changing the interval of lines on the staff

`staffLineLayoutFunction` is used to change the position of notes. This snippet shows setting its value to `ly:pitch-semitones` in order to produce a chromatic scale with the distance between each space and line of the staff equal to one semitone.

```

scale = \relative c' {
  a4 ais b c
  cis4 d dis e
  f4 fis g gis
  a1
}

\new Staff \with {
  \remove "Accidental_engraver"
  staffLineLayoutFunction = #ly:pitch-semitones
}
{
  <<

```

```

    (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
    (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))

%Compare pitch and alteration (not octave).
#(define (pitch-equals? p1 p2)
  (and
    (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
    (= (ly:pitch-notename p1) (ly:pitch-notename p2))))

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch-equals?)))
    (if color
      (cdr color))))

#(define (color-notehead grob)
  (pitch-to-color
    (ly:event-property (event-cause grob) 'pitch)))

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
    c8 b d dis ees f g aes
  }
}

```

Creating a sequence of notes on various pitches

In music that contains many occurrences of the same sequence of notes at different pitches, the following music function may prove useful. It takes a note, of which only the pitch is used.

This example creates the rhythm used throughout *Mars*, from Gustav Holst's *The Planets*.

```

rhythm =
#(define-music-function (p) (ly:pitch?)
  "Make the rhythm in Mars (the Planets) at the given pitch"
  #{ \tuplet 3/2 { $p 8 8 8 } 4 4 8 8 4 #})

\new Staff {
  \time 5/4
  \rhythm c'
  \rhythm c''
  \rhythm g
}

```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
  #{ \markup\combine
    \musicglyph "clefs.C"
    \translate #'(-3 . -2)
    \musicglyph "clefs.F"
    #}))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}
```

Direction of merged 'fa' shape note heads

Using property `NoteCollision.fa-merge-direction`, the direction of 'fa' shape note heads ('fa', 'faThin', etc.) can be controlled independently of the stem direction if two voices with the same pitch and different stem directions are merged. If this property is not set, the 'down' glyph variant is used.

```
{
  \clef bass

  << { \aikenHeads
    f2
    \override Staff.NoteCollision.fa-merge-direction = #UP
    f2 }
  \\ { \aikenHeads
    f2
    f2 }
  >>
}
```

Force a cancellation natural before accidentals

The following example shows how to force a natural sign before an accidental.

```
\relative c' {
  \key es \major
  bes c des
  \tweak Accidental.restore-first ##t
  eis
}
```

Forcing a clef symbol to be displayed

When a clef sign has already been displayed and it has not been changed to a different clef, then repeating the `\clef` command will be ignored by LilyPond, since it is not a change of clef. It is possible to force the clef to be redisplayed using the command `\set Staff.forceClef = ##t`.

```
\relative c' {
  \clef treble
  c1
  \clef treble
  c1
  \set Staff.forceClef = ##t
  c1
  \clef treble
  c1
}
```

Generating random notes

This Scheme-based snippet generates 24 random notes (or as many as required), based on the current time (or any randomish number specified instead, in order to obtain the same random notes each time): i.e., to get different random note patterns, just change this number.

```
\score {
  {
    $(let ((random-state (seed->random-state (current-time))))
      (make-sequential-music
        (map (lambda (x)
              (let ((idx (random 12 random-state)))
                (make-event-chord
                  (list
                    (make-music 'NoteEvent
```

```

        'duration (ly:make-duration 2 0 1/1)
        'pitch (ly:make-pitch
                (quotient idx 7)
                (remainder idx 7)
                0)))))
    (make-list 24))))
}
}

```

Nascondere le alterazioni delle note con legatura di valore

all'inizio di un nuovo sistema

Questo frammento mostra come nascondere le alterazioni delle note unite alla figura precedente mediante una legatura di valore all'inizio di un nuovo sistema

```

\relative c' {
  \override Accidental.hide-tied-accidental-after-break = ##t
  cis1~ cis~
  \break
  cis
}

```

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with full-size-change.

```

\relative c' {
  \clef "treble"
  c1
  \clef "bass"
  c1
  \clef "treble"
  c1
  \override Staff.Clef.full-size-change = ##t
  \clef "bass"
  c1
  \clef "treble"
  c1
  \revert Staff.Clef.full-size-change
  \clef "bass"
}

```

```

c1
\clef "treble"
c1
}

```

Esempio di makam

Makam è un tipo di melodia proveniente dalla Turchia che usa alterazioni microtonali di 1/9. Consultare il file di inizializzazione 'ly/makam.ly' per vedere come sono definiti i nomi delle altezze e le alterazioni.

```

% Initialize makam settings
\include "makam.ly"

\relative c' {
  \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
  c4 cc db fk
  gbm4 gfc gfb efk
  fk4 db cc c
}

```

Modificare l'inclinazione dell'estensore dell'ottava

È possibile cambiare l'inclinazione dell'estensore dell'ottava.

```

\relative c' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details =
    #`((left . ((Y . 0)
      (attach-dir . ,LEFT)
      (padding . 0)
      (stencil-align-dir-y . ,CENTER)))
    (right . ((Y . 5.0) ; Change the number here
      (padding . 0)
      (attach-dir . ,RIGHT)
      (text . ,(make-draw-dashed-line-markup
        (cons 0 -1.2))))))
  \override Staff.OttavaBracket.left-bound-info =
    #ly:horizontal-line-spanner::calc-left-bound-info-and-text
  \override Staff.OttavaBracket.right-bound-info =
    #ly:horizontal-line-spanner::calc-right-bound-info
  \ottava #1
  c1
  c''1
}

```

Armature di chiave non tradizionali

Il comando `\key` comunemente usato imposta la proprietà `keyAlterations` del contesto `Staff`. Per creare armature di chiave non standard, tale proprietà va impostata esplicitamente.

Il formato di questo comando è una lista:

```
\set Staff.keyAlterations = #`(((ottava . grado) . alterazione) ((ottava .
grado) . alterazione) ...)
```

dove, per ogni elemento della lista, ottava indica l'ottava (0 è l'ottava dal Do centrale al Si precedente), grado indica la nota all'interno dell'ottava (0 significa Do e 6 significa Si) e alterazione può essere `,SHARP`, `,FLAT`, `,DOUBLE-SHARP` etc.

Altrimenti, usando il formato breve per ogni elemento della lista, `(grado . alterazione)`, ciò indica che la stessa alterazione deve essere presente in tutte le ottave. Per le scale microtonali dove un "diesis" non è 100 centesimi, alterazione si riferisce alla proporzione di un duecentesimo di tono intero.

```
\include "arabic.ly"
\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
                                (1 . ,SEMI-FLAT)
                                (2 . ,FLAT)
                                (5 . ,FLAT)
                                (6 . ,SEMI-FLAT))

  %\set Staff.extraNatural = ##f
  re reb \down reb resd
  dod dob dosd \down dob |
  dobsb dodsdo do do |
}
```

Numeri dentro le teste di nota

Le teste di nota con nome della nota usano la proprietà `note-names` dell'oggetto `NoteHead` per determinare cosa appaia all'interno della testa. È possibile sovrascrivere questa proprietà e mostrare numeri corrispondenti ai gradi della scala.

Si può creare un semplice incisore che faccia questo per ogni oggetto testa di nota che incontra.

```
#(define Ez_numbers_engraver
  (make-engraver
    (acknowledgers
      ((note-head-interface engraver grob source-engraver)
       (let* ((context (ly:translator-context engraver))
              (tonic-pitch (ly:context-property context 'tonic))
              (tonic-name (ly:pitch-notename tonic-pitch))
```

```

(grob-pitch
  (ly:event-property (event-cause grob) 'pitch))
(grob-name (ly:pitch-notename grob-pitch))
(delta (modulo (- grob-name tonic-name) 7))
(note-names
  (make-vector 7 (number->string (1+ delta))))))

(ly:grob-set-property! grob 'note-names note-names))))))

Impedire l'inserimento dei segni di bequadro quando cambia l'armatura di chiave

Quando l'armatura di chiave cambia, vengono inseriti automaticamente i segni di bequadro per annullare le alterazioni di precedenti armature. Si può evitare questo comportamento impostando su f (falso) la proprietà `printKeyCancellation` nel contesto `Staff`.

```
\relative c' {
  \key d \major
  a4 b cis d
  \key g \minor
  a4 bes c d
  \set Staff.printKeyCancellation = ##f
  \key d \major
  a4 b cis d
  \key g \minor
  a4 bes c d
}
```

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

```
\addQuote clarinet {
  \transposition bes
  \repeat unfold 8 { d'16 d' d'8 }
}

\addQuote sax {
  \transposition es'
  \repeat unfold 16 { a8 }
}

quoteTest = {
  % french horn
  \transposition f
  g'4
  << \quoteDuring "clarinet" { \skip 4 } s4^"clar." >>
  << \quoteDuring "sax" { \skip 4 } s4^"sax." >>
  g'4
}

{
  \new Staff \with {
    instrumentName = \markup { \column { Horn "in F" } }
  }
  \quoteTest
  \transpose c' d' << \quoteTest s4_"up a tone" >>
}
```

}

up a tone

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the 'break-align-orders property of the BreakAlignment grob.

The value of 'break-align-orders is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving key-cancellation before staff-bar; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

```
\new Staff {
  \override Score.BreakAlignment.break-align-orders =
    ##((left-edge ambitus breathing-sign clef staff-bar
        key-cancellation key-signature time-signature custos)

        (left-edge ambitus breathing-sign clef key-cancellation
          staff-bar key-signature time-signature custos)

        (left-edge ambitus breathing-sign clef key-cancellation
          key-signature staff-bar time-signature custos))

  \key des \major
  c'1
  \bar "||"
  \key bes \major
  c'1
}
```

Trasposizione delle altezze con numero minimo di alterazioni

Questo esempio usa del codice Scheme per imporre delle modifiche enarmoniche alle note che permettano di avere il numero minimo di alterazioni. In questo caso si applica la seguente regola:

Le doppie alterazioni devono essere eliminate

Si diesis -> Do

Mi diesis -> Fa

Do bemolle -> Si

Fa bemolle -> Mi

In questo modo vengono scelti i suoni enarmonici più semplici.

```
#(define (naturalize-pitch p)
  (let ((o (ly:pitch-octave p))
        (a (* 4 (ly:pitch-alteration p))))
```

```

    ;; alteration, a, in quarter tone steps,

Modifiche manuali della proprietà della chiave

Cambiando il glifo della chiave, la sua posizione o l'ottavazione non cambia la posizione delle note successive nel rigo. Per far sì che le armature di chiave si trovino sulle linee del rigo corrette, bisogna specificare anche `middleCPosition`, con valori positivi o negativi che spostano il Do centrale rispettivamente su o giù in senso relativo alla linea centrale del rigo.

Per esempio, `\clef "treble_8"` equivale a impostare `clefGlyph`, `clefPosition` (che regola la posizione verticale della chiave), `middleCPosition` e `clefTransposition`. Viene stampata una chiave quando cambia una di queste proprietà, eccetto `middleCPosition`.

Gli esempi seguenti mostrano le possibilità date dall'impostazione manuale di tali proprietà. Sulla prima linea le modifiche manuali preservano il posizionamento relativo standard di chiavi e note, mentre sulla seconda linea non lo fanno.

```
{
% The default treble clef
\key f \major
c'1
% The standard bass clef
\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
\set Staff.middleCPosition = #6
\set Staff.middleCClefPosition = #6
\key g \major
c'1
% The baritone clef
\set Staff.clefGlyph = #"clefs.C"
\set Staff.clefPosition = #4
\set Staff.middleCPosition = #4
\set Staff.middleCClefPosition = #4
\key f \major
c'1
% The standard choral tenor clef
\set Staff.clefGlyph = #"clefs.G"
\set Staff.clefPosition = #-2
\set Staff.clefTransposition = #-7
\set Staff.middleCPosition = #1
\set Staff.middleCClefPosition = #1
\key f \major
c'1
% A non-standard clef
\set Staff.clefPosition = #0
\set Staff.clefTransposition = #0
\set Staff.middleCPosition = #-4
\set Staff.middleCClefPosition = #-4
\key g \major
c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
c'1
\set Staff.clefGlyph = #"clefs.G"
c'1
\set Staff.clefGlyph = #"clefs.C"
c'1
\set Staff.clefTransposition = #7
c'1
\set Staff.clefTransposition = #0
```

```

\set Staff.clefPosition = #0
c'1

% Return to the normal clef:

\set Staff.middleCPosition = #0
c'1
}

Rhythms

Sezione “Rhythms” in *Guida alla Notazione*

Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved.

For example, when entering a manual beam, the left square bracket has to be placed *after* the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
  r16[ g16 \tuplet 3/2 { r16 e'8} ]
  g16( a \tuplet 3/2 { b d e'} )
  g8[( a \tuplet 3/2 { b d' e'} ~ ]
  \time 2/4
  \tuplet 5/4 { e'32\ ( a b d' e' } a'4.\)
}
```

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```
drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
drl = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
  timh4 ssh timl8 ssh r timh r4
  ssh8 timl r4 cb8 cb
}

\score {
  <<
  \new DrumStaff \with {
    instrumentName = "timbales"
```

```

    drumStyleTable = #timbales-style
    \override StaffSymbol.line-count = #2
    \override BarLine.bar-extent = #'(-1 . 1)
  }
  <<
    \timb
  >>
  \new DrumStaff \with { instrumentName = "drums" }
  <<
    \new DrumVoice { \stemUp \drh }
    \new DrumVoice { \stemDown \drl }
  >>
  >>
  \layout { }
  \midi { \tempo 4 = 120 }
}

```

The image shows a musical score for two staves: 'timbales' and 'drums'. Both staves are in common time (C) and use a two-line staff format. The timbales staff contains notes with stems pointing up and down, some with grace notes (marked with 'x'). Specific notes are labeled 'crash' and 'h.h.'. The drums staff contains notes with stems pointing up and down, some with grace notes (marked with '+'). Specific notes are labeled 'crash' and 'h.h.'. The score is set to a tempo of 4 = 120.

Adjusting grace note spacing

The space given to grace notes can be adjusted using the spacing-increment property of `Score.GraceSpacing`.

```

graceNotes = {
  \grace { c4 c8 c16 c32 }
  c8
}

\relative c' {
  c8
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}

```

The image shows a musical score on a single staff in common time (C). It features a sequence of notes with stems pointing up and down, some with grace notes (marked with 'x'). The spacing between the notes and their grace notes is adjusted according to the code provided above.

Allineare i numeri di battuta

Per impostazione predefinita i numeri di battuta sono allineati a destra rispetto al loro oggetto genitore. Di solito si tratta del margine sinistro della linea oppure, se i numeri appaiono all'interno della linea, del lato sinistro della stanghetta. I numeri possono essere posizionati anche direttamente sopra la stanghetta oppure allineati a sinistra della stanghetta.

```

\relative c' {
  \set Score.currentBarNumber = #111
  \override Score.BarNumber.break-visibility = #all-visible
  % Increase the size of the bar number by 2
  \override Score.BarNumber.font-size = #2
  % Print a bar number every second measure
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)
  c1 | c1
  % Center-align bar numbers
  \override Score.BarNumber.self-alignment-X = #CENTER
  c1 | c1
  % Left-align bar numbers
  \override Score.BarNumber.self-alignment-X = #LEFT
  c1 | c1
}

```

Note brevi alternative

Le note brevi sono disponibili anche con due linee verticali su ciascun lato della testa invece di una sola e in stile barocco.

```

\relative c' {
  \time 4/2
  c\breve |
  \override Staff.NoteHead.style = #'altdefault
  b\breve
  \override Staff.NoteHead.style = #'baroque
  b\breve
  \revert Staff.NoteHead.style
  a\breve
}

```

Appoggiatura or grace note before a bar line

By default, appoggiaturas and grace notes that occur on the first beat of a measure are printed after the bar line. They can however be printed before, simply by adding an invisible BarLine and then the visible one, as demonstrated here.

```

{
  R1
  %% default
  \appoggiatura d''8 c''4 r2.
  %% cheated
  \appoggiatura { \bar "" d''8 \bar "| " } c''4 r2.
}

```

Automatic beam subdivisions

Beams can be subdivided automatically. By setting the property `subdivideBeams`, beams are subdivided at beat positions (as specified in `baseMoment`).

```
\new Staff {
  \relative c'' {
    <<
    {
      \voiceOne
      \set subdivideBeams = ##t
      b32[ a g f c' b a g
      b32^"subdivide beams" a g f c' b a g]
    }
    \new Voice {
      \voiceTwo
      b32_"default"[ a g f c' b a g
      b32 a g f c' b a g]
    }
  }
  >>
  \oneVoice
  \set baseMoment = #(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  b32^"baseMoment 1 8"[ a g f c' b a g]
  \set baseMoment = #(ly:make-moment 1/16)
  \set beatStructure = 4,4,4,4
  b32^"baseMoment 1 16"[ a g f c' b a g]
}
}
```

Automatically change durations

`shiftDurations` can be used to change the note lengths of a piece of music.

It takes two arguments - the scaling factor as a power of two, and the number of dots to be added as a positive integer.

```
\paper { indent = 0 }

music = \relative c'' { a1 b2 c4 d8 r }

\score {
  \new Voice {
    \time 4/2
```

```

\music
\time 4/4
\shiftDurations #1 #0 { \music }
\time 2/4
\shiftDurations #2 #0 { \music }
\time 4/1
\shiftDurations #-1 #0 { \music }
\time 8/1
\shiftDurations #-2 #0 { \music }
\time 6/2
\shiftDurations #0 #1 { \music }
\time 7/2
\shiftDurations #0 #2 { \music }
}
}

```

The image displays three staves of musical notation. The first staff contains a sequence of time signatures: 4/4, 2/4, 4/1, 8/1, 6/2, 7/2, and 4/4. The second staff contains a sequence of time signatures: 4/4, 8/1, and 6/2. The third staff contains a sequence of time signatures: 6/2, 7/2, and 4/4. The notation includes various rhythmic values such as whole, half, quarter, and eighth notes, and rests.

Estremità delle travature nel contesto Score

Le regole relative alle estremità delle travature definite nel contesto Score si applicano a tutti i righe, ma possono essere modificate anche ai livelli Staff e Voice:

```

\relative c'' {
  \time 5/4
  % Set default beaming for all staves
  \set Score.baseMoment = #(ly:make-moment 1/8)
  \set Score.beatStructure = 3,4,3
  <<
  \new Staff {
    c8 c c c c c c c c c
  }
  \new Staff {
    % Modify beaming for just this staff
    \set Staff.beatStructure = 6,4
    c8 c c c c c c c c c
  }
  \new Staff {
    % Inherit beaming from Score context
    <<
    {
      \voiceOne
    }
  }
}

```

```

      c8 c c c c c c c c c
    }
    % Modify beaming for this voice only
    \new Voice {
      \voiceTwo
      \set Voice.beatStructure = 6,4
      a8 a a a a a a a a a
    }
  >>
}
>>
}

```

Travature che attraversano le interruzioni di linea

Le interruzioni di linea sono di norma proibite quando le travature attraversano la stanghetta di una battuta. Si può cambiare questo comportamento nel modo seguente:

```

\relative c' {
  \override Beam.breakable = ##t
  c8 c[ c] c[ c] c[ c] c[ \break
  c8] c[ c] c[ c] c[ c] c
}

```

Modificare la distanza delle travature angolari

Le travature angolari vengono inserite automaticamente quando viene rilevata un'ampia distanza tra le teste di nota. Questo comportamento può essere regolato attraverso la proprietà `auto-knee-gap`. Viene disegnata una travatura angolare se la distanza è più grande del valore di `auto-knee-gap` più la larghezza della travatura (che dipende dalla durata delle note e dall'inclinazione della travatura). Il valore predefinito di `auto-knee-gap` è 5.5 spazi rigo.

```

{
  f8 f''8 f8 f''8
  \override Beam.auto-knee-gap = #6
}

```

```
f8 f''8 f8 f''8
}
```

Modificare la forma delle pause multiple

Se la pausa multipla dura dieci misure o un numero inferiore a dieci, nel rigo apparirà una serie di pause di lunga e di breve (chiamate in tedesco “Kirchenpausen” - pause ecclesiastiche); altrimenti apparirà una semplice linea. Il numero predefinito di dieci può essere cambiato sovrascrivendo la proprietà `expand-limit`.

```
\relative c' {
  \compressMMRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = #3
    R1*2 | R1*5 | R1*9
  }
}
```

Modifica del numero di punti di aumentazione per nota

Il numero di punti di aumentazione su una singola nota può essere modificato in modo indipendente dai punti posizionati dopo la nota.

```
\relative c' {
  c4.. a16 r2 |
  \override Dots.dot-count = #4
  c4.. a16 r2 |
  \override Dots.dot-count = #0
  c4.. a16 r2 |
  \revert Dots.dot-count
  c4.. a16 r2 |
}
```

Modificare il tempo senza mostrare l'indicazione metronomica

Per cambiare il tempo del file MIDI senza che appaia l'indicazione metronomica, basta renderla invisibile.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
  }
}
```

```

c4 e g b
c4 b d c
\set Score.tempoHideNote = ##t
\tempo 4 = 96
d,4 fis a cis
d4 cis e d
}
\layout { }
\midi { }
}

```

Modifica del numero del gruppo irregolare

Di norma compare sulla parentesi del gruppo irregolare solo il numeratore del numero del gruppo irregolare, ovvero il numeratore dell'argomento del comando `\tuplet`. Ma è possibile mostrare la frazione *num:den* del numero del gruppo irregolare oppure nascondere del tutto il numero.

```

\relative c' ' {
  \tuplet 3/2 { c8 c c }
  \tuplet 3/2 { c8 c c }
  \override TupletNumber.text = #tuplet-number::calc-fraction-text
  \tuplet 3/2 { c8 c c }
  \omit TupletNumber
  \tuplet 3/2 { c8 c c }
}

```

Changing time signatures inside a polymeric section using `\scaleDurations`

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the `ly:make-moment` callback. The second argument must be the same as the second argument of `\scaleDurations`.

```

\layout {
  \context {
    \Score
    \remove "Timing_translator"
  }
  \context {
    \Staff
    \consists "Timing_translator"
  }
}

```

```

}
<<
\new Staff {

}

```

Compound time signatures

Odd 20th century time signatures (such as “5/8”) can often be played as compound time signatures (e.g. “3/8 + 2/8”), which combine two or more unequal metrics.

LilyPond can make such music quite easy to read and play, by explicitly printing the compound time signatures and adapting the automatic beaming behavior.

```
\relative c' {
  \compoundMeter #'((2 8) (3 8))
  c8 d e fis gis
  c8 fis, gis e d
  c8 d e4 gis8
}
```

Segni per la conduzione, segni di raggruppamento della misura

Il raggruppamento delle pulsazioni all’interno della misura è regolato dalla proprietà di contesto `beatStructure`. I valori di `beatStructure` per varie indicazioni di tempo vengono stabiliti in `scm/time-signature-settings.scm`. Questi valori possono essere impostati o modificati con `\set`. Altrimenti, si può usare `\time` per impostare sia l’indicazione di tempo che la struttura delle pulsazioni. Per farlo si specifica il raggruppamento interno delle pulsazioni in una misura in una lista di numeri (nella sintassi di Scheme) prima dell’indicazione di tempo.

`\time` agisce nel contesto `Timing`, dunque non reimposterà i i valori di `beatStructure` e `baseMoment` che sono impostati in altri contesti di più basso livello, come `Voice`.

Se si include l’incisore `Measure_grouping_engraver` in uno dei contesti che regolano l’aspetto, appariranno i segni di raggruppamento della misura. Tali segni facilitano la lettura di musica moderna ritmicamente complessa. Nell’esempio la misura di 9/8 è raggruppata in due diversi schemi usando due metodi differenti, mentre la misura di 5/8 è raggruppata in base alle impostazioni predefinite in `scm/time-signature-settings.scm`:

```
\score {
  \new Voice \relative c'' {
    \time 9/8
    g8 g d d g g a( bes g) |
    \set Timing.beatStructure = 2,2,2,3
    g8 g d d g g a( bes g) |
    \time 4,5 9/8
    g8 g d d g g a( bes g) |
    \time 5/8
    a4. g4 |
  }
  \layout {
    \context {
      \Staff
      \consists "Measure_grouping_engraver"
    }
  }
}
```

Consistently left aligned bar numbers

When left aligning bar numbers, overlapping problems may occur with Staves brackets.

The snippet solves this by keeping right aligned the first bar number following line breaks.

```
consistentlyLeftAlignedBarNumbers = {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \override Score.BarNumber.self-alignment-X =
    #(lambda (grob)
      (let ((break-dir (ly:item-break-dir grob)))
        (if (= break-dir RIGHT) RIGHT LEFT)))
}

\new ChoirStaff <<
  \new Staff {
    \relative c' {
      \set Score.barNumberVisibility = #(every-nth-bar-number-visible 3)
      \bar ""
      \consistentlyLeftAlignedBarNumbers

      \set Score.currentBarNumber = #112
      \repeat unfold 8 { R1 }
      \break
      \repeat unfold 9 { R1 }
      \break
      \repeat unfold 7 { R1 }
    }
  }
  \new Staff {
    \relative c' {
      \repeat unfold 24 { R1 }
    }
  }
}
>>

\layout {
  indent = #0
  ragged-right = ##t
  ragged-last = ##t
}
```

The image displays three systems of musical notation, each consisting of two staves. The first system is labeled with measure numbers 114 and 117. The second system is labeled with 120, 123, and 126. The third system is labeled with 129, 132, and 135. The notation includes beams and flags, indicating eighth notes grouped in threes.

Controllare la visibilità della parentesi del gruppo irregolare

Il comportamento predefinito relativo alla visibilità della parentesi quadra del gruppo irregolare è di mostrare una parentesi a meno che non ci sia una travatura della stessa lunghezza del gruppo.

Per controllare la visibilità di tale parentesi, si imposta la proprietà 'bracket-visibility su #t (mostra sempre la parentesi), #'if-no-beam (mostra la parentesi solo se non c'è una travatura, che è il comportamento predefinito) o #f (non mostrare mai la parentesi). L'ultima opzione equivale a omettere l'oggetto `\TupletBracket` dall'output.

```
music = \relative c' {
  \tuplet 3/2 { c16[ d e ] f8]
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}

\new Voice {
  \relative c' {
    \override Score.TextMark.non-musical = ##f
    \textMark "default" \music
    \override TupletBracket.bracket-visibility = #'if-no-beam
    \textMark \markup \typewriter "'if-no-beam" \music
    \override TupletBracket.bracket-visibility = ##t
    \textMark \markup \typewriter "#t" \music
    \override TupletBracket.bracket-visibility = ##f
    \textMark \markup \typewriter "#f" \music
    \omit TupletBracket
    \textMark \markup \typewriter "omit" \music
  }
}
```

}

Cow and ride bell example

Two different bells, entered with 'cb' (cowbell) and 'rb' (ridebell).

```
\paper { tagline = ##f }
```

```

#(define mydrums '((ridebell default #f 3)

      )
    }
  }
}
c1
c4 c' c,2

```

}

Disegnare manualmente le legature di valore

Le legature di valore possono essere disegnate a mano cambiando la proprietà `tie-configuration` dell'oggetto `TieColumn`. Il primo numero indica la distanza dal centro del rigo nell'unità di metà spazio rigo, mentre il secondo numero indica la direzione (1 = su, -1 = giù).

Si noti che LilyPond fa una distinzione tra valori precisi e imprecisi per il primo numero. Se si usa un valore preciso (ovvero un intero o una frazione come $(/ 4 5)$), il valore serve come posizione verticale approssimata che viene ulteriormente aggiustata da LilyPond per far sì che la legatura di valore eviti le linee del rigo. Se si usa un valore impreciso, come una virgola mobile, viene usato per la posizione verticale senza ulteriori regolazioni.

```
\relative c' {
  <c e g>2~ <c e g>
  \override TieColumn.tie-configuration =
    #'((0.0 . 1) (-2.0 . 1) (-4.0 . 1))
  <c e g>2~ <c e g>
  \override TieColumn.tie-configuration =
    #'((0 . 1) (-2 . 1) (-4 . 1))
  <c e g>2~ <c e g>
}
```

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the `'gap-count` property of the `Beam` object, and the size of the gaps between beams and stems is set with the `'gap` property.

```
\relative c'' {
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #2
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #3
  \repeat tremolo 8 { a32 f }

  \override Beam.gap-count = #3
  \override Beam.gap = #1.33
}
```

```

\repeat tremolo 8 { a32 f }
\override Beam.gap = #1
\repeat tremolo 8 { a32 f }
\override Beam.gap = #0.67
\repeat tremolo 8 { a32 f }
\override Beam.gap = #0.33
\repeat tremolo 8 { a32 f }
}

```

Inserire vari gruppi irregolari usando una sola volta il comando `\tuplet`

La proprietà `tupletSpannerDuration` imposta la durata di ognuno dei gruppi irregolari compresi tra parentesi dopo il comando `\tuplet`. In questo modo si possono inserire molti gruppi irregolari consecutivi all'interno di una singola espressione `\tuplet`, risparmiando così tempo e spazio.

Ci sono vari modi per impostare `tupletSpannerDuration`. Il comando `\tupletSpan` la imposta su una certa durata e poi la annulla quando invece di una durata viene specificato `\default`. Altrimenti si può usare un argomento opzionale con `\tuplet`.

```

\relative c' {
  \time 2/4
  \tupletSpan 4
  \tuplet 3/2 { c8^"\tupletSpan 4" c c c c c }
  \tupletSpan \default
  \tuplet 3/2 { c8^"\tupletSpan \default" c c c c c }
  \tuplet 3/2 4 { c8^"\tuplet 3/2 4 {...}" c c c c c }
}

```

Code e punte delle travature

È possibile ottenere delle codette su note isolate e dei tratti di suddivisione all'estremità della travatura con una combinazione di `stemLeftBeamCount`, `stemRightBeamCount` e una coppia di indicatori della travatura `[]`.

Per ottenere delle codette rivolte a destra, si usa la coppia di indicatori `[]` e si imposta `stemLeftBeamCount` a zero (vedi Example 1).

Per ottenere delle codette rivolte a sinistra, si imposta invece `stemRightBeamCount` (Example 2).

Perché i tratti di suddivisione alla fine di un gruppo di note unite da travatura siano rivolti a destra, si imposta `stemRightBeamCount` su un valore positivo. Perché i tratti di suddivisione all'inizio di un gruppo di note unite da travatura siano rivolti a sinistra, si imposta invece `stemLeftBeamCount` (Example 3).

Talvolta, ad esempio per una nota isolata circondata da pause, ha senso avere una coda che punti sia a destra che a sinistra. Lo si può fare con una coppia di indicatori di travatura [] da soli (Example 4).

(Nota che `\set stemLeftBeamCount` è sempre equivalente a `\once \set`. In altre parole, le impostazioni che definiscono il conteggio delle travature non “permangono”, quindi la coppia di code attaccate al 16[] solitario nell’ultimo esempio non hanno nulla a che fare con l’impostazione `\set` di due note prima.)

```
\score {
  <<
  % Example 1
  \new RhythmicStaff {
    \set stemLeftBeamCount = #0
    c16[]
    r8.
  }
  % Example 2

    I like to sing.
  }
}
>>

```

The image displays a musical score for a piece of music. At the top, four guitar chord diagrams are shown for the chords C, F, G, and C. Each diagram includes fret numbers and fingerings. Below the chords, the music is written on two staves. The upper staff is a guitar part with a complex, polymeric time signature, indicated by slanted lines. The lower staff is a melody line in treble clef with a common time signature (C). The lyrics 'This is my song. I like to sing.' are written below the melody line.

Heavily customized polymeric time signatures

Though the polymeric time signature shown was not the most essential item here, it has been included to show the beat of this piece (which is the template of a real Balkan song!).

```

melody = \relative c'' {

  }
}

```

```

\new Staff \with {
  instrumentName = \markup { \concat { "B" \flat " Sop." } }
}
{
  \melody
  \drum
}

```

The image shows a musical score for a soprano part and drums. The soprano part is written on a single staff with a treble clef, a key signature of one sharp (F#), and a complex time signature of 3/8 + 2/8 + 2/8 + 3/8 + 2/8 + 2/8 + 2/8 + 2/8 + 2/8 + 2/8 + 2/8. The melody consists of eighth and quarter notes, with accents (^) over the final notes of several phrases. The drum part is written on a single staff with a bass clef and a 2/5 time signature. It features a simple rhythmic pattern of quarter notes and rests, with accents (^) over the final notes of several phrases. The score is divided into two systems, with the first system containing the soprano and drum parts and the second system containing the drum part.

High and Low woodblock example

Two Woodblocks, entered with 'wbh' (high woodblock) and 'wbl' (low woodblock). The length of the barline has been altered with an \override command otherwise it would be too short. The positions of the two stafflines also have to be explicitly defined.

```

\paper { tagline = ##f }

```

```

% These lines define the position of the woodblocks in the stave;
% if you like, you can change it or you can use special note heads
% for the woodblocks.
#(define mydrums '((hiwoodblock default #f 3)
                  (lowoodblock default #f -2)))

woodstaff = {
  % This defines a staff with only two lines.
  % It also defines the positions of the two lines.
  \override Staff.StaffSymbol.line-positions = #'(-2 3)

  % This is necessary; if not entered,
  % the barline would be too short!
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)
  % small correction for the clef:
  \set DrumStaff.clefPosition = 0.5
}

\new DrumStaff {
  % with this you load your new drum style table
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)

  \woodstaff

  \drummode {
    \time 2/4
    wbl8 16 16 8-> 8 |
    wbl8 16 16-> ~ 16 16 r8 |
  }
}

```

Making an object invisible with the 'transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```

\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
  }
}

```

```

      g8 ~ 8\noBeam
    }
  \\  

  {
    b8 g g e
  }
  >>
}

```

Legature di portamento con complesse strutture di tratteggio

Le legature di portamento possono avere schemi di tratteggio complessi definendo la proprietà `dash-definition`. `dash-definition` è una lista di `dash-elements`. Un `dash-element` è una lista di parametri che definiscono il comportamento del tratteggio per un segmento della legatura.

La legatura di portamento è definita come il parametro `t` della curva di bezier che va da 0 sul margine sinistro della legatura fino a 1 su quello destro. `dash-element` è una lista di (`inizio-t fine-t frazione-trattino punto-trattino`). La regione della legatura di portamento che va da `inizio-t` a `fine-t` avrà una `frazione-trattino` di ogni `punto-trattino` nero. `punto-trattino` viene definito in spazi rigo. `frazione-trattino` è impostato su 1 per una legatura di portamento continua.

```

\relative c' {
  \once \override
    Slur.dash-definition = #'((0 0.3 0.1 0.75)
                              (0.3 0.6 1 1)
                              (0.65 1.0 0.4 0.75))
  c4( d e f)
  \once \override
    Slur.dash-definition = #'((0 0.25 1 1)
                              (0.3 0.7 0.4 0.75)
                              (0.75 1.0 1 1))
  c4( d e f)
}

```

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the `positions` setting of the `Beam` grob.

```

\relative c' {
  \time 2/4
  % from upper staff-line (position 2) to center (position 0)
  \override Beam.positions = #'(2 . 0)
  c8 c
  % from center to one above center (position 1)
}

```

```
\override Beam.positions = #'(0 . 1)
c8 c
}
```

Merging multi-measure rests in a polyphonic part

When using multi-measure rests in a polyphonic staff, the rests will be placed differently depending on the voice they belong to. However they can be printed on the same staff line, using the following setting.

```
normalPos = \revert MultiMeasureRest.direction
```

```
{
  <<
    {
      c'1
      R1
      c'1
      \normalPos
      R1
    }
    \\\
    {
      c'1
      R1
      c'1
      \normalPos
      R1
    }
  >>
}
```

Modifying tuplet bracket length

Tuplet brackets can be made to run to prefatory matter or the next note. Default tuplet brackets end at the right edge of the final note of the tuplet; full-length tuplet brackets extend farther to the right, either to cover all the non-rhythmic notation up to the following note, or to cover only the whitespace before the next item of notation, be that a clef, time signature, key signature, or another note. The example shows how to switch tuplets to full length mode and how to modify what material they cover.

```
\new RhythmicStaff {
  % Set tuplets to be extendable...
  \set tupletFullLength = ##t
  % ...to cover all items up to the next note
  \set tupletFullLengthNote = ##t
```

```

\time 2/4
\tuplet 3/2 { c4 4 4 }
% ...or to cover just whitespace
\set tupletFullLengthNote = ##f
\time 4/4
\tuplet 5/4 { 4 1 }
\time 3/4
2.
}

```

Spostare le note puntate in polifonia

Quando una nota puntata della voce più alta viene spostata per evitare una collisione con una nota di un'altra voce, il comportamento predefinito è spostare la nota più alta a destra. Tale comportamento può essere modificato tramite la proprietà `prefer-dotted-right` di `NoteCollision`.

```

\new Staff \relative c' <<
{
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##t
  f2. f4
}
\\
{ e4 e e e e e e e e e e }
>>

```

Regolazione della lunghezza delle pause multiple

Le pause multiple hanno una lunghezza che dipende dalla loro durata totale e tale lunghezza è regolata da `MultiMeasureRest.space-increment`. Nota che il valore predefinito è 2.0.

```

\relative c' {
  \compressEmptyMeasures
  R1*2 R1*4 R1*64 R1*16
  \override Staff.MultiMeasureRest.space-increment = 2.5
  R1*2 R1*4 R1*64 R1*16
}

```

87

Testo a margine delle pause multiple

Il testo a margine di una pausa multipla viene centrato sopra o sotto di essa. Se il testo è lungo, la misura non si espanderà. Per espandere la pausa multipla in modo che si allinei col testo, conviene usare un accordo vuoto con del testo attaccato prima della pausa multipla.

Il testo così attaccato a una nota spaziatrice viene allineato a sinistra della posizione in cui la nota sarebbe posta nella misura, ma se la lunghezza della misura è determinata dalla lunghezza del testo, il testo verrà centrato.

```
\relative c' {
  \compressMMRests {
    \textLengthOn
    <>^\markup { [MAJOR GENERAL] }
    R1*19
    <>_\markup { \italic { Cue: ... it is yours } }
    <>^\markup { A }
    R1*30^\markup { [MABEL] }
    \textLengthOff
    c4^\markup { CHORUS } d f c
  }
}
```

Numeri non predefiniti per i gruppi irregolari

LilyPond fornisce anche funzioni di formattazione che permettono di creare numeri di gruppi irregolari diversi dalla frazione vera e propria, così come di aggiungere un valore di nota al numero o alla frazione di un gruppo irregolare.

```
\relative c' {
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-tuplet-denominator-text 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-tuplet-fraction-text 12 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      (tuplet-number::non-default-tuplet-fraction-text 12 7)
      (ly:make-duration 3 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::append-note-wrapper
      tuplet-number::calc-denominator-text
      (ly:make-duration 2 0))
}
```

```

\tuplet 3/2 { c8 c8 c8 c8 c8 c8 }
\once \override TupletNumber.text =
  #(\tuplet-number::append-note-wrapper
    tuplet-number::calc-fraction-text
    (ly:make-duration 2 0))
\tuplet 3/2 { c8 c8 c8 c8 c8 c8 }
\once \override TupletNumber.text =
  #(\tuplet-number::fraction-with-notes
    (ly:make-duration 2 1) (ly:make-duration 3 0))
\tuplet 3/2 { c4. c4. c4. c4. }
\once \override TupletNumber.text =
  #(\tuplet-number::non-default-fraction-with-notes 12
    (ly:make-duration 3 0) 4 (ly:make-duration 2 0))
\tuplet 3/2 { c4. c4. c4. c4. }
}

```

Numbering single measure rests

Multi measure rests show their length by a number except for single measures. This can be changed by setting `restNumberThreshold`.

```

{
  \compressEmptyMeasures
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 0
  R1 R1*10 R1*11 \bar "||"
  \set restNumberThreshold = 10
  R1 R1*10 R1*11
}

```

PartCombine e autoBeamOff

La funzione `\autoBeamOff`, se usata insieme a `\partCombine`, può essere difficile da comprendere.

È preferibile usare invece

```
\set Staff.autoBeaming = ##f
```

per assicurarsi che la disposizione delle travature sia disabilitata per tutto il rigo.

`\partCombine` funziona con 3 voci – gambo in su singolo, gambo in giù singolo, gambo in su unito.

L'uso di `\autoBeamOff` all'interno del primo argomento di `partCombine` ha effetto sulla voce che è attiva al momento in cui la funzione viene elaborata, ovvero sul gambo in su singolo o sul gambo in giù unito. L'uso di `\autoBeamOff` nel secondo argomento avrà effetto sulla voce che ha il gambo in giù singolo.

Per poter usare `\autoBeamOff` per impedire tutte le disposizioni automatiche delle travature, se usato con `\partCombine`, è necessario richiamare tre volte la funzione `\autoBeamOff`.

```
{
  %\set Staff.autoBeaming = ##f % turns off all autobeaming
  \partCombine
  {
    \autoBeamOff % applies to split up stems
    \repeat unfold 4 a'16
    %\autoBeamOff % applies to combined up stems
    \repeat unfold 4 a'8
    \repeat unfold 4 a'16
  }
  {
    \autoBeamOff % applies to down stems
    \repeat unfold 4 f'8
    \repeat unfold 8 f'16 |
  }
}
```

Percussion example

A short example taken from Stravinsky's *L'Histoire du soldat*.

```
#(define mydrums '((bassdrum default #f 4)
                  (snare default #f -4)
                  (tambourine default #f 0)))

global = {

Consentire l'interruzione del rigo all'interno di gruppi irregolari con travature

Questo esempio artificioso mostra come permettere interruzioni del rigo sia manuali che automatiche all'interno di un gruppo irregolare con travature. Si noti che le travature di questi gruppi irregolari fuori dal ritmo devono essere disposte manualmente.

```

\layout {
  \context {

```

```

\Voice
% Permit line breaks within triplets
\remove "Forbid_line_break_engraver"
% Allow beams to be broken at line breaks
\override Beam.breakable = ##t
}
}
\relative c'' {
a8

\repeat unfold 5 { \tuplet 3/2 { c[ b a] } }
c8
}

```

Positioning grace note beams at the height of normal note beams

When notes are placed on ledger lines, their beams are usually centred on the staff. Grace notes beams are shorter and grace notes on ledger lines may well have beams outside the staff. You can override this beaming for grace notes.

```

\relative c {
f8[ e]
\grace {
f8[ e]
\override Stem.no-stem-extend = ##f
f8[ e]
\revert Stem.no-stem-extend
}
f8[ e]
}

```

Posizionare gli abbellimenti con dello spazio fluttuante

Se si imposta la proprietà 'strict-grace-spacing, le colonne musicali degli abbellimenti 'fluttuano', ovvero si scollegano dalle note normali: prima vengono spaziate le note normali, poi le colonne musicali degli abbellimenti vengono messe a sinistra delle colonne delle note principali.

```

\relative c' {
  <<
    \override Score.SpacingSpanner.strict-grace-spacing = ##t
    \new Staff \new Voice {
      \afterGrace c4 { c16[ c8 c16] }
      c8[ \grace { b16 d } c8]
      c4 r
    }
    \new Staff {
      c16 c c c c c c c c4 r
    }
  >>
}

```

Posizionamento delle pause multiple

Diversamente dalle pause normali, non esiste un comando predefinito per cambiare la posizione sul rigo di un simbolo di pausa multipla di qualsiasi tipo connettendolo a una nota. Tuttavia, nella musica polifonica le pause multiple nelle voci dispari e pari sono separate verticalmente. Il posizionamento delle pause multiple si controlla nel modo seguente:

```

\relative c' {
  % Multi-measure rests by default are set under the fourth line
  R1
  % They can be moved using an override
  \override MultiMeasureRest.staff-position = #-2
  R1
  \override MultiMeasureRest.staff-position = #0
  R1
  \override MultiMeasureRest.staff-position = #2
  R1
  \override MultiMeasureRest.staff-position = #3
  R1
  \override MultiMeasureRest.staff-position = #6
  R1
  \revert MultiMeasureRest.staff-position
  \break

  % In two Voices, odd-numbered voices are under the top line
  << { R1 } \ \ { a1 } >>
  % Even-numbered voices are under the bottom line
  << { a1 } \ \ { R1 } >>
  % Multi-measure rests in both voices remain separate
  << { R1 } \ \ { R1 } >>

```

```

% Separating multi-measure rests in more than two voices
% requires an override
<< { R1 } \\ { R1 } \\
  \once \override MultiMeasureRest.staff-position = #0
  { R1 }
>>

% Using compressed bars in multiple voices requires another override
% in all voices to avoid multiple instances being printed
\compressMMRests
<<
  \revert MultiMeasureRest.direction
  { R1*3 }
  \\
  \revert MultiMeasureRest.direction
  { R1*3 }
>>
}

```

Positioning opposing fermatas on a bar line

This snippet demonstrates a command that prints fermatas both above and below a bar line. If there would not otherwise be a bar line, it adds a double bar line. Semantically, the command codes a longer-than-normal caesura, which might be considered misuse depending on the situation.

```

twoWayFermata = {
  \once \set Staff.caesuraType = #'((underlying-bar-line . "||"))
  \once \set Staff.caesuraTypeTransform = ##f
  \caesura ^\fermata _\fermata
}

music = {
  f'1 \twoWayFermata
  R1
  f'2 \twoWayFermata f'2
  R1
  b'1 \twoWayFermata \fine
}

\new GrandStaff <<
  \new Staff \music
  \new Staff \music
>>

```

Preventing final mark from removing final tuplet

The addition of a final mark can result in the loss of a final tuplet marking. This can be overcome by setting `TupletBracket.full-length-to-extent` to `false`.

```
% due to issue 2362 a long mark such as
% \textEndMark "Composed Feb 2007 - Feb 2008"
% cannot be used here.
```

```
\new Staff {
  \set tupletFullLength = ##t
  \time 1/8
  \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' }
  \tweak direction #DOWN \textEndMark "1234"
}

\new Staff {
  \set tupletFullLength = ##t
  \override TupletBracket.full-length-to-extent = ##f

  \time 1/8
  \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' }
  \tweak direction #DOWN \textEndMark "1234"
}
```

Mostrare i numeri di battuta a intervalli regolari

Impostando la proprietà `barNumberVisibility` si possono far apparire i numeri di battuta a intervalli regolari. In questo esempio vengono mostrati ogni due misure eccetto alla fine della linea.

```
\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.currentBarNumber = #11
  % Print a bar number every second measure
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)
```

```

c1 | c | c | c | c
\break
c1 | c | c | c | c
}

```

Printing bar numbers for broken measures

By default a BarNumber of a broken measure is not repeated at the beginning of the new line. Use `first-bar-number-invisible-save-broken-bars` for `barNumberVisibility` to get a parenthesized BarNumber there.

```

\layout {
  \context {
    \Score
    barNumberVisibility = #first-bar-number-invisible-save-broken-bars
    \override BarNumber.break-visibility = ##(#f #t #t)
  }
}

```

```

\relative c' {
  c1 | d | e | f2 \bar "" \break
  fis | g1 | e2 \bar "" \break
  <>^"reenabled default"
  % back to default -
  % \unset Score.barNumberVisibility would do so as well
  \set Score.barNumberVisibility =
    #first-bar-number-invisible-and-no-parenthesized-bar-numbers
  es | d1 | c
}

```

Numeri di battuta racchiusi in rettangoli o cerchi

I numeri di battuta possono apparire anche all'interno di rettangoli o cerchi.

```
\relative c' {
  % Prevent bar numbers at the end of a line and permit them elsewhere
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

  % Increase the size of the bar number by 2
  \override Score.BarNumber.font-size = #2

  % Draw a box round the following bar number(s)
  \override Score.BarNumber.stencil
    = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
  \repeat unfold 5 { c1 }

  % Draw a circle round the following bar number(s)
  \override Score.BarNumber.stencil
    = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
  \repeat unfold 4 { c1 } \bar "|."
}
```

Printing bar numbers using modulo-bar-number-visible

If the remainder of the division of the current BarNumber by the first argument of modulo-bar-number-visible equals its second argument print the BarNumber.

Useful to print the BarNumber at certain distances, p.e:

- (modulo-bar-number-visible 3 2) -> prints 2,5,8
- (modulo-bar-number-visible 4 2) -> prints 2,6,10
- (modulo-bar-number-visible 3 1) -> prints 3,5,7
- (modulo-bar-number-visible 5 2) -> prints 2,7,12

```
\layout {
  \context {
    \Score
    \override BarNumber.break-visibility = ##(#f #t #t)
    barNumberVisibility = #(modulo-bar-number-visible 3 2)
  }
}
```

```
\relative c' {
  c1 | d | e | f \break
  g1 | e | d | c
}
```

Stampare i numeri di battuta a intervalli regolari variabili

Tramite la funzione di contesto `{set-bar-number-visibility}` si possono modificare gli intervalli dei numeri di battuta.

```
\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \context Score \applyContext #(set-bar-number-visibility 4)
  \repeat unfold 10 c'1
  \context Score \applyContext #(set-bar-number-visibility 2)
  \repeat unfold 10 c
}
```

Posizionare il metronomo e i numeri di chiamata sotto il rigo

Di norma, il metronomo e i numeri di chiamata vengono posizionati sopra il rigo. Per metterli sotto il rigo basta impostare correttamente la proprietà `direction` di `MetronomeMark` o `RehearsalMark`.

```
\layout {
  indent = 0
  ragged-right = ##f
}

{
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
  \mark \default
  c''1
}
```

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the `Timing_translator` is moved from the Score context to the Staff context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```
\paper {
  indent = #0
  ragged-right = ##t
}

global = { \time 3/4 { s2.*3 } \bar "" \break { s2.*3 } }

\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \remove "Bar_number_engraver"
    \override SpacingSpanner.uniform-stretching = ##t
    \override SpacingSpanner.strict-note-spacing = ##t
    proportionalNotationDuration = #(ly:make-moment 1/64)
  }
  \context {
    \Staff
    \consists "Timing_translator"
  }
  \context {
    \Voice
    \remove "Forbid_line_break_engraver"
    tupletFullLength = ##t
  }
}

Bassklarinette = \new Staff \with {

Mostrare il numero di battuta nella prima misura

Il primo numero di battuta di una partitura viene soppresso se è inferiore o uguale a '1'. Se si imposta `barNumberVisibility` su `all-bar-numbers-visible`, verrà mostrato il numero di battuta della prima misura e di tutte quelle successive. Si noti che perché funzioni è necessario inserire una stanghetta invisibile prima della prima nota.

```
\layout {
  indent = 0
  ragged-right = ##t
}
```

```
\relative c' {
  \set Score.barNumberVisibility = #all-bar-numbers-visible
  c1 | d | e | f \break
  g1 | e | d | c
}
```

1

5

Printing tuplet brackets on the note head side

Whichever option you choose for controlling the tuplet bracket visibility, it will show or hide the tuplet bracket irrespectively of tuplet bracket placement (stem side or note head side). However,

when placing the tuplet bracket on the note head side some authors recommend always printing the tuplet bracket. The option `visible-over-note-heads` can be used to achieve this.

```
music = \relative c'' {
  \tupletNeutral \tuplet 3/2 { c16[ d e ] f8]
  \tupletUp \tuplet 3/2 { c8 d e }
}

\new Voice {
  \relative c' {
    \time 2/4
    \override TupletBracket.visible-over-note-heads = ##t
    \override Score.TextMark.non-musical = ##f
    { \textMark \markup "default" \music }
    \override TupletBracket.bracket-visibility = #'if-no-beam
    { \textMark \markup \typewriter "'if-no-beam" \music }
  }
}
```

Ridefinire le impostazioni predefinite globali degli abbellimenti

Le impostazioni globali predefinite degli abbellimenti sono salvate nei seguenti identificatori:

```
startGraceMusic
stopGraceMusic
startAcciaccaturaMusic
stopAcciaccaturaMusic
startAppoggiaturaMusic
stopAppoggiaturaMusic
```

Sono definiti nel file `ly/grace-init.ly`. Ridefinendoli si possono ottenere effetti diversi.

```
startAcciaccaturaMusic = {
  <>(
    \override Flag.stroke-style = #"grace"
    \slurDashed
  )
}

stopAcciaccaturaMusic = {
  \revert Flag.stroke-style
  \slurSolid
  <>
}

\relative c'' {
  \acciaccatura d8 c1
}
```

Togliere i numeri di battuta da uno spartito

I numeri di battuta possono essere tolti rimuovendo l'incisore `Bar_number_engraver` dal contesto `Score`.

```
\layout {
  \context {
    \Score
    \omit BarNumber
    % or:
    %\remove "Bar_number_engraver"
  }
}
```

```
\relative c' ' {
  c4 c c c \break
  c4 c c c
}
```

Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff

By default, bar lines in `StaffGroup`, `PianoStaff`, or `GrandStaff` groups are connected between the staves, i.e. a `SpanBar` is printed. This behaviour can be overridden on a staff-by-staff basis.

```
\relative c' {
  \new StaffGroup <<
    \new Staff {
      e1 | e
      \once \override Staff.BarLine.allow-span-bar = ##f
      e1 | e | e
    }
    \new Staff {
      c1 | c | c
      \once \override Staff.BarLine.allow-span-bar = ##f
      c1 | c
    }
    \new Staff {
      a1 | a | a | a | a
    }
  >>
```

}

Stili di pausa

Esistono vari stili di pausa.

```

\new Staff \relative c {
  \omit Score.TimeSignature
  \cadenzaOn

  \override Staff.Rest.style = #'mensural
  r\maxima^{\markup \typewriter { mensural }}
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'neomensural
  r\maxima^{\markup \typewriter { neomensural }}
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'classical
  r\maxima^{\markup \typewriter { classical }}
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'z
  r\maxima^{\markup \typewriter { z-style }}
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'default
  r\maxima^{\markup \typewriter { default }}
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
}

```

The image shows four musical staves, each with a different beam ending style. The first staff is labeled 'neomensural' and shows a series of vertical stems with no beams. The second staff is labeled 'classical' and shows stems with beams that end in a small hook. The third staff is labeled 'z-style' and shows stems with beams that end in a small 'z' shape. The fourth staff is labeled 'default' and shows stems with beams that end in a small 'z' shape, similar to the 'z-style' but with a slightly different appearance.

Reverting default beam endings

To typeset beams grouped 3-4-3-2 in 12/8 it is necessary first to override the default beam endings in 12/8, and then to set up the new beaming endings:

```
\relative c' {
  \time 12/8

  % Default beaming
  a8 a a a a a a a a a a

  % Set new values for beam endings
  \set Score.beatStructure = 3,4,3,2
  a8 a a a a a a a a a a
}
```

The image shows a musical staff with a 12/8 time signature. The staff contains a series of eighth notes grouped in a 3-4-3-2 pattern. The first group of three notes has a beam ending in a small hook, the second group of four notes has a beam ending in a small 'z' shape, the third group of three notes has a beam ending in a small hook, and the final group of two notes has a beam ending in a small 'z' shape.

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians.

The standard support for this using `\repeat percent` is unsuitable here since the first beat has to be an ordinary note or rest.

This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the `r4` in the definitions with a rest of the appropriate duration).

```
% Macro to print single slash
rs = {
  \once \override Rest.stencil = #ly:percent-repeat-interface::beat-slash
  \once \override Rest.thickness = #0.48
  \once \override Rest.slope = #1.7
```

```

r4
}

% Function to print a specified number of slashes
comp = #(define-music-function (count) (integer?)
  #{
    \override Rest.stencil = #ly:percent-repeat-interface::beat-slash
    \override Rest.thickness = #0.48
    \override Rest.slope = #1.7
    \repeat unfold $count { r4 }
    \revert Rest.stencil
  }
)

\score {
  \relative c' {
    c4 d e f |
    \rs \rs \rs \rs |
    \comp #4 |
  }
}

```

Skips in lyric mode

The `s` syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the `\skip` command is recommended.

```

<<
  \relative c'' { a1 | a }
  \new Lyrics \lyricmode { \skip 1 bla1 }
>>

```

Skips in lyric mode (2)

Although `s` skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes (“”) or underscores (`_`) are available.

So for example:

```

<<
  \relative c'' { a4 b c d }
  \new Lyrics \lyricmode { a4 "" _ gap }
>>

```

Stemlets

In some notational conventions beams are allowed to extend over rests. Depending on preference, these beams may drop 'stemlets' to help the eye appreciate the rhythm better, and in some modern music the rest itself is omitted and only the stemlet remains.

This snippet shows a progression from traditional notation, to beams over the rest, to stemlets over the rest, to stemlets alone. Stemlets are generated by overriding the 'stemlet-length' property of Stem, while rests are hidden by setting 'transparent = ##t'.

Some `\markup` elements are included in the source to highlight the different notations.

```
\paper { ragged-right = ##f }

{
  c'16^\markup { traditional } d' r f'
  g'16[^\markup { beams over rests } f' r d']

  % N.B. use Score.Stem to set for the whole score.
  \override Staff.Stem.stemlet-length = #0.75

  c'16[^\markup { stemlets over rests } d' r f']
  g'16[^\markup { stemlets and no rests } f'
  \once \hide Rest
  r16 d']
}
```

Travatura che segue strettamente il battito

Si possono impostare i tratti di suddivisione della travatura in modo che siano rivolti verso la relativa pulsazione. La prima travatura fa sì che non spuntino i tratti di suddivisione (comportamento predefinito); la seconda travatura è orientata verso la pulsazione.

```
\relative c' {
  \time 6/8
  a8. a16 a a
  \set strictBeatBeaming = ##t
  a8. a16 a a
}
```

Suddividere le travature

Le travature di note consecutive di un sedicesimo (o più brevi) non vengono suddivise, ovvero i tre (o più) tratti della travatura si estendono, senza spezzarsi, sugli interi gruppi di note. Questo comportamento può essere modificato in modo da suddividere le travature in sottogruppi attraverso la proprietà `subdivideBeams`. Se impostata, le travature che comprendono più sottogruppi verranno suddivise a intervalli definiti dal valore attuale di `baseMoment`, riducendo le travature multiple al numero di travature che indica il valore metrico della suddivisione. Se il gruppo successivo alla suddivisione è più breve del valore metrico corrente (di solito perché la travatura è incompleta), il numero di travature riflette il gruppo di suddivisione più lungo possibile. Tuttavia, se rimane una sola nota dopo la divisione, questa restrizione non viene applicata. Si noti che `baseMoment`, se non impostata esplicitamente, equivale a uno fratto il denominatore dell'attuale indicazione di tempo. Deve quindi essere impostata su una frazione che stabilisca la durata del sottogruppo di travature; lo si può fare usando la funzione `ly:make-moment`, come è mostrato in questo frammento di codice. Inoltre quando `baseMoment` cambia, anche `beatStructure` deve essere modificato per accordarsi con `baseMoment`:

```
\relative c' {
  c32[ c c c c c c c]
  \set subdivideBeams = ##t
  c32[ c c c c c c c]

  % Set beam sub-group length to an eighth note
  \set baseMoment = #(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  c32[ c c c c c c c]

  % Set beam sub-group length to a sixteenth note
  \set baseMoment = #(ly:make-moment 1/16)
  \set beatStructure = 4,4,4,4
  c32[ c c c c c c c]

  % Shorten beam by 1/32
  \set baseMoment = #(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  c32[ c c c c c c] r32

  % Shorten beam by 3/32
  \set baseMoment = #(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  c32[ c c c c] r16.
  r2
}
```

Tam-tam example

A tam-tam example, entered with 'tt'

```
##(define mydrums '((tamtam default #f 0)))
```

```

\new DrumStaff \with { instrumentName = #"Tamtam" }

\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \override Staff.StaffSymbol.line-positions = #'( 0 )
  \override Staff.BarLine.bar-extent = #'(-1.5 . 1.5)

  tt 1 \pp \laissezVibrer
}

```

Tamtam 

Tambourine example

A tambourine example, entered 'tamb'

```

\paper { tagline = ##f }

#(define mydrums '((tambourine default #f 0)))

\new DrumStaff \with { instrumentName = #"Tambourine" }

\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \override Staff.StaffSymbol.line-positions = #'( 0 )
  \override Staff.BarLine.bar-extent = #'(-1.5 . 1.5)

  \time 6/8
  tamb8. 16 8 8 8 8 |
  tamb4. 8 8 8 |
  % the trick with the scaled duration and the shorter rest
  % is necessary for the correct ending of the trill-span!
  tamb2.*5/6 \startTrillSpan s8 \stopTrillSpan |
}

```

Tambourine 

Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

```

% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
        (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
        (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
        (x-rule (make-filled-box-stencil

```

```

      (interval-widen x-ext thickness) (cons 0 thickness)))
;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
(set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
(set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
(set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
stencil))

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
@code{box-padding} and @code{font-size} properties to determine line
thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding))
        (m (interpret-markup layout props arg)))
    (NWS-box-stencil m thickness pad)))

% Test it:

\relative c' {
  c1^\markup { \NWS-box ABCD }
  c1^\markup { \NWS-box \note {4} #1.0 }
}

```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```

\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}

```

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

```

\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
  \time 2/4
  a4 b8 c
}

```

}

Indicazione di tempo che mostra solo il numeratore (invece della frazione)

Talvolta un'indicazione di tempo non deve mostrare la frazione intera (ad esempio 7/4), ma solo il numeratore (numero 7 in questo caso). Si può ottenere facilmente con `\override Staff.TimeSignature.style = #'single-digit`, che cambia lo stile in modo permanente. Con `\revert Staff.TimeSignature.style`, questa impostazione può essere annullata. Per applicare lo stile a cifra singola (`single-digit`) a una sola indicazione di tempo, si usa il comando `\override` preceduto da `\once`.

```
\relative c' {
  \time 3/4
  c4 c c
  % Change the style permanently
  \override Staff.TimeSignature.style = #'single-digit
  \time 2/4
  c4 c
  \time 3/4
  c4 c c
  % Revert to default style:
  \revert Staff.TimeSignature.style
  \time 2/4
  c4 c
  % single-digit style only for the next time signature
  \once \override Staff.TimeSignature.style = #'single-digit
  \time 5/4
  c4 c c c c
  \time 2/4
  c4 c
}
```

Modificare l'aspetto degli abbellimenti di un intero brano

L'aspetto di tutte le espressioni contenute nei blocchi `\grace` di un brano può essere modificato con le funzioni `add-grace-property` e `remove-grace-property`. L'esempio seguente toglie la definizione della direzione di Stem nell'abbellimento, in modo che gli abbellimenti non siano sempre rivolti in su, e barra le teste di nota.

```
\relative c' {
  \new Staff {
    $(remove-grace-property 'Voice 'Stem 'direction)
    $(add-grace-property 'Voice 'NoteHead 'style 'cross)
    \new Voice {
```

```

    \acciaccatura { f16 } g4
    \grace { d16 e } f4
    \appoggiatura { f,32 g a } e2
  }
}
}

```

User defined time signatures

New time signature styles can be defined. The time signature in the second measure should be upside down in both staves.

```

#(add-simple-time-signature-style 'topsy-turvy
  (lambda (fraction)
    (make-rotate-markup 180 (make-compound-meter-markup fraction))))

```

```

<<
  \new Staff {
    \time 3/4 f'2.
    \override Score.TimeSignature.style = #'topsy-turvy
    \time 3/4 R2. \bar "|."
  }
  \new Staff {
    R2. e''
  }
>>

```

Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. Valid values are `modern-straight-flag`, `old-straight-flag` and `flat-flag`.

```

testnotes = {
  \autoBeamOff
  c8 d16 c32 d64 \acciaccatura { c8 } d64 r4
}

\score {
  \relative c' {
    \time 2/4
    \testnotes
  }
}

```

```

\override Flag.stencil = #modern-straight-flag
\testnotes

\override Flag.stencil = #old-straight-flag
\testnotes

\override Flag.stencil = #flat-flag
\testnotes

\revert Flag.stencil
\testnotes
}
\layout {
  indent = 0
  \context {
    \Score
    \override NonMusicalPaperColumn.line-break-permission = ##f
  }
}
}

```

Usare il gambo barrato degli abbellimenti con le teste normali

Il gambo barrato presente nelle acciaccature può essere applicato in altre situazioni.

```

\relative c' {
  \override Flag.stroke-style = #"grace"
  c8( d2) e8( f4)
}

```

Usare le legature di valore con un arpeggio

Le legature di valore vengono usate talvolta per scrivere un arpeggio. In questo caso, le due note da legare devono non essere consecutive. Per ottenere tale risultato occorre impostare la proprietà `tieWaitForNote` su `#t`. Questa funzionalità serve anche a legare un tremolo a un accordo e in generale qualsiasi coppia di note consecutive.

```

\relative c' {
  \set tieWaitForNote = ##t
  \grace { c16[ ~ e ~ g] ~ } <c, e g>2
  \repeat tremolo 8 { c32 ~ c' ~ } <c c,>1
  e8 ~ c ~ a ~ f ~ <e' c a f>2
  \tieUp
  c8 ~ a
  \tieDown
  \tieDotted
}

```

g8 ~ c g2
}

Expressive marks

Sezione “Expressive marks” in *Guida alla Notazione*

Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved.

For example, when entering a manual beam, the left square bracket has to be placed *after* the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
  r16[ g16 \tuplet 3/2 { r16 e'8] }
  g16( a \tuplet 3/2 { b d e' } )
  g8[( a \tuplet 3/2 { b d' ) e' ] ~ }
  \time 2/4
  \tuplet 5/4 { e'32\ ( a b d' e' ) a'4.\ }
}
```

Adding parentheses around an expressive mark or chordal note

The `\parenthesize` function is a special tweak that encloses objects in parentheses. The associated grob is `Parentheses`.

```
\relative c' {
  c2-\parenthesize ->
  \override Parentheses.padding = #0.1
  \override Parentheses.font-size = #-4
  <d \parenthesize f a>2
}
```

Aggiungere i segni di tempo per i glissandi lunghi

I battiti saltati nei glissandi molto lunghi vengono talvolta segnalati con delle indicazioni di tempo, che consistono solitamente in dei gambi privi di teste di nota. Questi gambi possono essere usati anche per contenere segni di espressione intermedi.

Se i gambi non si allineano bene al glissando, può essere necessario riposizionarli leggermente.

```
glissandoSkipOn = {
```

```

\override NoteColumn.glissando-skip = ##t
\hide NoteHead
\override NoteHead.no-ledgers = ##t
}

```

```

glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}

```

```

\relative c' {
  r8 f8\glissando
  \glissandoSkipOn
  f4 g a a8\noBeam
  \glissandoSkipOff
  a8

  r8 f8\glissando
  \glissandoSkipOn
  g4 a8
  \glissandoSkipOff
  a8 |

  r4 f\glissando \<
  \glissandoSkipOn
  a4\f \>
  \glissandoSkipOff
  b8\! r |
}

```

Cambiare la forma dei portamenti indeterminati verso il basso o verso l'alto

La proprietà `shortest-duration-space` può essere modificata per cambiare la forma dei portamenti indeterminati verso il basso o verso l'alto.

```

\relative c' {
  \override Score.SpacingSpanner.shortest-duration-space = #4.0
  c2-\bendAfter #5
  c2-\bendAfter #-4.75
  c2-\bendAfter #8.5
  c2-\bendAfter #-6
}

```

Allineare le estremità delle forcelle alle direzioni di NoteColumn

Le estremità delle forcelle possono essere allineate alle direzioni LEFT, CENTER o RIGHT dei grob NoteColumn modificando la proprietà `endpoint-alignments`, che è costituita da una coppia di numeri che rappresentano le estremità sinistra e destra della forcilla. `endpoint-alignments` devono essere direzioni (-1, 0 o 1). Valori diversi verranno trasformati emettendo un avviso. Non ha effetto quando l'estremità destra di una forcilla termina su una pausa; in questo caso termina sempre sul margine sinistro della pausa.

```
{
  c'2\< <c' d'\>\! |
  \override Hairpin.endpoint-alignments = #'(1 . -1)
  c'2\< <c' d'\>\! |
  \override Hairpin.endpoint-alignments = #'(,LEFT . ,CENTER)
  c'2\< <c' d'\>\! |
}
```

Note brevi alternative

Le note brevi sono disponibili anche con due linee verticali su ciascun lato della testa invece di una sola e in stile barocco.

```
\relative c' ' {
  \time 4/2
  c\breve |
  \override Staff.NoteHead.style = #'altdefault
  b\breve
  \override Staff.NoteHead.style = #'baroque
  b\breve
  \revert Staff.NoteHead.style
  a\breve
}
```

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a) }
```

```
\relative c' {
  \stemDown
  \slurUp
  \slurNotes
  \once \override Slur.eccentricity = #3.0
  \slurNotes
}
```

Breathing signs

Breathing signs are available in different tastes: commas (default), ticks, vees and “railroad tracks” (caesura).

```
\new Staff \relative c'' {
  \key es \major
  \time 3/4
  % this bar contains no \breathe
  << { g4 as g } \ \ { es4 bes es } >> |
  % Modern notation:
  % by default, \breathe uses the rcomma, just as if saying:
  % \override BreathingSign.text =
  % #(make-musicglyph-markup "scripts.rcomma")
  << { g4 as g } \ \ { es4 \breathe bes es } >> |

  % rvarcomma and lvarcomma are variations of the default rcomma
  % and lcomma
  % N.B.: must use Staff context here, since we start a Voice below
  \override Staff.BreathingSign.text =
    \markup { \musicglyph "scripts.rvarcomma" }
  << { g4 as g } \ \ { es4 \breathe bes es } >> |

  % raltcomma and laltcomma are alternative variations of the
  % default rcomma and lcomma
  \override Staff.BreathingSign.text =
    \markup { \musicglyph "scripts.raltcomma" }
  << { g4 as g } \ \ { es4 \breathe bes es } >> |

  % vee
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.upbow" }
  es8[ d es f g] \breathe f |

  % caesura
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.caesura.curved" }
  es8[ d] \breathe es[ f g f] |
  es2 r4 \bar "||"
}
```

Broken Crescendo Hairpin

In order to make parts of a crescendo hairpin invisible, the following method is used: A white rectangle is drawn on top of the respective part of the crescendo hairpin, making it invisible. The rectangle is defined as postscript code within a text markup.

The markup command `with-dimensions` tells LilyPond to consider only the bottom edge of the rectangle when spacing it against the hairpin. The property `staff-padding` prevents the rectangle from fitting between the hairpin and staff.

Make sure the hairpin is in a lower layer than the text markup to draw the rectangle over the hairpin.

```
\relative c' {
  <<
  {
    \dynamicUp
    r2 r16 c'8.\pp r4
  }
  \\\
  {
    \override DynamicLineSpanner.layer = #0
    des,2\mf\< ~
    \override TextScript.layer = #2
    \once\override TextScript.staff-padding = #6
    \once\override TextScript.vertical-skylines = #'()
    des16_\markup \with-dimensions #'(2 . 7) #'(0 . 0)
      \with-color #white
      \filled-box #'(2 . 7) #'(0 . 2) #0
    r8. des4 ~ des16->\sff r8.
  }
  >>
}
```

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
}
```

```

    }
  }
  \breathe c4
  % set the breathe mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."
}

```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to `DynamicText`.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```

\paper { tagline = ##f }

hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
      #(lambda (grob)
        (let* ((stencil (ly:hairpin::print grob))
              (par-y (ly:grob-parent grob Y))
              (dir (ly:grob-property par-y 'direction))
              (staff-line-thickness
                (ly:output-def-lookup (ly:grob-layout grob) 'line-thickness))
              (new-stencil (ly:stencil-aligned-to
                (ly:stencil-combine-at-edge
                  (ly:stencil-aligned-to stencil X CENTER)
                  Y dir
                  (ly:stencil-aligned-to
                    (grob-interpret-markup
                      grob
                      (make-fontsize-markup
                        (magnification->font-size
                          (+ (ly:staff-symbol-staff-space grob)
                            (/ staff-line-thickness 2))))
                        text)) X CENTER))
                X LEFT))
              (staff-space (ly:output-def-lookup
                (ly:grob-layout grob) 'staff-space))
              (par-x (ly:grob-parent grob X))
              (dyn-text (grob::has-interface par-x 'dynamic-text-interface))
              (dyn-text-stencil-x-length
                (if dyn-text

```

```

      (interval-length
        (ly:stencil-extent (ly:grob-property par-x 'stencil) X))
      0))
(x-shift
  (if dyn-text
    (-
      (+ staff-space dyn-text-stencil-x-length)
      (* 0.5 staff-line-thickness)) 0)))

(ly:grob-set-property! grob 'Y-offset 0)
(ly:grob-set-property! grob 'stencil
  (ly:stencil-translate-axis
    new-stencil
    x-shift X))))
#})

hairpinMolto =
\hairpinWithCenteredText \markup { \italic molto }

hairpinMore =
\hairpinWithCenteredText \markup { \larger moltissimo }

\layout { ragged-right = ##f }

\relative c' {
  \hairpinMolto
  c2\< c\f
  \hairpinMore
  c2\ppppp\< c\f

```

Nascondere la linea di estensione per le dinamiche testuali

Il testo usato per i *crescendo* e i *decrescendo* può essere cambiato modificando le proprietà di contesto `crescendoText` e `decrescendoText`.

Lo stile della linea dell'estensore può essere cambiato modificando la proprietà 'style di `DynamicTextSpanner`. Il valore predefinito è 'dashed-line; gli altri valori possibili sono 'line, 'dotted-line e 'none.

```
\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
  a2 a
  a2 a\mf
}
```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
  c4( d e c)
}
```

Cambiare il simbolo del segno di respiro

Il glifo del respiro può essere modificato sovrascrivendo la proprietà `text` dell'oggetto di formattazione `BreathingSign` con qualsiasi testo incluso in un blocco markup.

```
\relative c' {
  c2
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.rvarcomma" }
  \breathe
  d2
}
```

Modifica del numero di punti di aumentazione per nota

Il numero di punti di aumentazione su una singola nota può essere modificato in modo indipendente dai punti posizionati dopo la nota.

```
\relative c' {
  c4.. a16 r2 |
  \override Dots.dot-count = #4
  c4.. a16 r2 |
  \override Dots.dot-count = #0
  c4.. a16 r2 |
  \revert Dots.dot-count
  c4.. a16 r2 |
}
```

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a `\markup` block.

```
piuF = \markup { \italic più \dynamic f }
```

```
\layout { ragged-right = ##f }
```

```
\relative c' {
  c2\f c-\piuF
}
```

Glissando contemporaneo

Un glissando contemporaneo senza una nota finale può essere creato usando una nota nascosta e un tempo di cadenza.

```
\relative c' {
  \time 3/4
  \override Glissando.style = #'zigzag
  c4 c
  \cadenza0n
  c4\glissando
  \hideNotes
  c,,4
}
```

```

\unHideNotes
\cadenzaOff
\bar "|"
}

```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the after-line-breaking callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```

\paper { ragged-right = ##t }

\relative c'' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
  % show hairpin
  \override Hairpin.after-line-breaking = ##t
  % hide text span
  \override TextSpanner.after-line-breaking =
    #ly:spanner::kill-zero-spanned-time
  e2\<\startTextSpan
  % show glissando
  \override Glissando.after-line-breaking = ##t
  f2\glissando
  \break
  f,1\!\stopTextSpan
}

```

Controllo dell'ordine verticale degli script

L'ordine verticale degli script è determinato dalla proprietà `'script-priority`. Più il numero è piccolo, più sarà posto vicino alla nota. In questo esempio, il simbolo di *diesis* (oggetto `TextScript`) ha prima la priorità più bassa, dunque è posto più in basso nel primo esempio. Nel secondo, il *trillo* (oggetto `Script`) ha la priorità più bassa, quindi si trova all'interno. Quando due oggetti hanno la stessa priorità, l'ordine in cui sono inseriti determina quale viene prima.

```

\relative c''' {

```

```

\once \override TextScript.script-priority = #-100
a2^\prall^\markup { \sharp }

\once \override Script.script-priority = #-100
a2^\prall^\markup { \sharp }
}

```

Creare un gruppetto ritardato

Creare un gruppetto ritardato, dove la nota più bassa del gruppetto usa l'alterazione, richiede vari `\override`. La proprietà `outside-staff-priority` deve essere impostata su `##f`, perché altrimenti questa avrebbe la precedenza sulla proprietà `avoid-slur`. Cambiando la frazione `2/3` si aggiusta la posizione orizzontale.

```

\relative c' {
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8)
  \after 4
  {
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
    \once \hideNotes
    cis8\turn \noBeam
  }
  d4.( e8)
}

```

Creare degli arpeggi che attraversano note appartenenti a voci diverse

Si può disegnare un *arpeggio* che attraversa delle note in voci diverse dello stesso rigo se si aggiunge l'incisore `Span_arpeggio_engraver` nel contesto `Staff`:

```

\new Staff \with {
  \consists "Span_arpeggio_engraver"
}
\relative c' {
  \set Staff.connectArpeggios = ##t
  <<
  { <e' g>4\arpeggio <d f> <d f>2 }

```

```

\\
{ <d, f>2\arpeggio <g b>2 }
>>
}

```

Creare degli arpeggi che attraversano il rigo del pianoforte

In un rigo per pianoforte (`PianoStaff`), è possibile far sì che un *arpeggio* attraversi i rigi impostando la proprietà `PianoStaff.connectArpeggios = ##t`.

```

\new PianoStaff \relative c'' <<
  \set PianoStaff.connectArpeggios = ##t
  \new Staff {
    <c e g c>4\arpeggio
    <g c e g>4\arpeggio
    <e g c e>4\arpeggio
    <c e g c>4\arpeggio
  }
  \new Staff {
    \clef bass
    \repeat unfold 4 {
      <c,, e g c>4\arpeggio
    }
  }
}
>>

```

Creare degli arpeggi che attraversano i rigi in altri contesti

Si possono creare *arpeggi* che attraversano i rigi in contesti diversi da `GrandStaff`, `PianoStaff` e `StaffGroup` se l'incisore `Span_arpeggio_engraver` è incluso nel contesto `Score`.

```

\score {
  \new ChoirStaff {
    \set Score.connectArpeggios = ##t
    <<
      \new Voice \relative c' {
        <c e>2\arpeggio
        <d f>2\arpeggio
        <c e>1\arpeggio
      }
      \new Voice \relative c {

```

```

        \clef bass
        <c g'>2\arpeggio
        <b g'>2\arpeggio
        <c g'>1\arpeggio
    }
    >>
}
\layout {
  \context {
    \Score
    \consists "Span_arpeggio_engraver"
  }
}
}

```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```

\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}

```

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a `\markup` block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the `make-dynamic-script` function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as `\dynamicUp` or `\dynamicDown`.

```

paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{ \markup \concat {
      \normal-text \italic \fontsize #2 (
        \pad-x #0.2 #(ly:music-property dyn 'text)

```

```
\normal-text \italic \fontsize #2 )
  }
  #}))
```

```
\relative c' ' {
  c4\paren\f c c \dynamicUp c\paren\p
}
```

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach's 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\
  {
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[(
    \hideNotes a)
    \unHideNotes fis](
    \hideNotes a)
    \unHideNotes g[(
    \hideNotes a)
    \unHideNotes gis](
    \hideNotes a)
  }
  >>
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }
```

```

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'dashed-line
  \override TextSpanner.bound-details.left.text =
    \markup { \draw-line #'(0 . 1) }
  \override TextSpanner.bound-details.right.text =
    \markup { \draw-line #'(0 . -2) }
  \once \override TextSpanner.bound-details.right.padding = #-2

  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \set Staff.middleCPosition = #-13
  \override TextSpanner.dash-period = #10
  \override TextSpanner.dash-fraction = #0.5
  \override TextSpanner.thickness = #10
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan
}

```

Estensore testuale della dinamica personalizzato

Funzioni postfix per estensori testuali personalizzati del crescendo. Gli estensori devono iniziare sulla prima nota della misura; e bisogna usare `-\mycresc`, altrimenti l'inizio dell'estensore viene assegnato alla nota successiva.

```

% Two functions for (de)crescendo spanners where you can explicitly
% give the spanner text.

```

```

mycresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'CrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))

```

```

mydecresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'DecrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))

\relative c' {
  c4-\mycresc "custom cresc" c4 c4 c4 |
  c4 c4 c4 c4 |
  c4-\mydecresc "custom decresc" c4 c4 c4 |
  c4 c4\! c4 c4
}

```

Estensore testuale della dinamica personalizzato

Si possono definire estensori testuali personalizzati che fanno uso delle forcine e dei crescendo testuali. \< e \> generano le forcine, \cresc etc. generano gli estensori testuali.

% Some sample text dynamic spanners, to be used as postfix operators

```

crpoco =
#(make-music 'CrescendoEvent
  'span-direction START
  'span-type 'text
  'span-text "cresc. poco a poco")

```

```

\relative c' {
  c4\cresc d4 e4 f4 |
  g4 a4\! b4\crpoco c4 |
  c4 d4 e4 f4 |
  g4 a4\! b4\< c4 |
  g4\dim a4 b4\decresc c4\!
}

```

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

```

\relative c' {
  a2 \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f''4 d,
}

```

Hairpins with different line styles

Hairpins can take any style from `line-interface` - dashed-line, dotted-line, line, trill or zigzag.

```
\relative c' {
  c2\< c\!
  \override Hairpin.style = #'dashed-line
  c2\< c\!
  \override Hairpin.style = #'dotted-line
  c2\< c\!
  \override Hairpin.style = #'line
  c2\< c\!
  \override Hairpin.style = #'trill
  c2\< c\!
  \override Hairpin.style = #'zigzag
  c2\< c\!
  \revert Hairpin.style
  c2\< c\!
}
```

Nascondere la linea di estensione per le dinamiche testuali

I cambi di dinamica in stile testuale (come *cresc.* e *dim.*) appaiono con una linea tratteggiata che mostra la loro estensione. Questa linea può essere soppressa nel modo seguente:

```
\relative c' ' {
  \override DynamicTextSpanner.style = #'none
  \crescTextCresc
  c1\< | d | b | c\!
}
```

Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p")

Some dynamic expressions involve additional text, like “sempre **pp**”. Since dynamics are usually centered under the note, the `\pp` would be displayed way after the note it applies to.

To correctly align the “sempre **pp**” horizontally so that it is aligned as if it were only the `\pp`, there are several approaches:

- Simply use `\once\override DynamicText.X-offset = #-9.2` before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...
- Add some padding (`#:hspace 7.1`) into the definition of your custom dynamic mark so that after LilyPond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.
- Shift the dynamic script `\once\overrideX-offset =` Drawback: `\once\override` is needed for every invocation!
- Set the dimensions of the additional text to 0 (using `#:with-dimensions '(0 . 0) '(0 . 0)`). Drawback: For LilyPond, “sempre” has no extent now. This means it might put other stuff there, causing collisions (which are not detected by LilyPond’s collision detection algorithm!). There also seems to be some spacing, so it is not exactly the same alignment as without the additional text.
- Add an explicit shift directly inside the scheme function for the dynamic script.
- Set an explicit alignment inside the dynamic script. By default, this won’t have any effect, only if one sets `X-offset`! Drawback: One needs to set `DynamicText.X-offset`, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of `\pp`.

```
\paper {
  ragged-right = ##f
  indent = 2.5\cm
}
```

```
% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }
```

```
% Solution 2: Using a dynamic script & shifting with
%           \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))
```

```
% Solution 3: Padding the dynamic script so the center-alignment
%           puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
semppT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"
      #:hspace 7.1))))
```

```
% Solution 4: Dynamic, setting the dimensions of the additional text to 0
```

```
% Drawback: To Lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
```

```
semppM =
#(make-dynamic-script
  (markup #:line
    (:with-dimensions '(0 . 0) '(0 . 0)
      #:right-align
      #:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))
```

```
% Solution 5: Dynamic with explicit shifting inside the scheme function
```

```
semppG =
#(make-dynamic-script
  (markup #:hspace 0
    #:translate '(-18.85 . 0)
    #:line (:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))
```

```
% Solution 6: Dynamic with explicit alignment. This has only effect
%           if one sets X-offset!
```

```
% Drawback: One needs to set DynamicText.X-offset!
% Drawback: Aligned at the right edge of the additional text,
%           not at the center of pp
```

```
semppMII =
#(make-dynamic-script
  (markup #:line (:right-align
    #:normal-text
    #:italic "sempre"
    #:dynamic "pp"))))
```

Inserire una cesura

I segni di cesura possono essere creati sovrascrivendo la proprietà 'text dell'oggetto BreathingSign. È disponibile anche un segno di cesura curvo.

```
\relative c' {
  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.straight"
  }
  c8 e4. \breathe g8. e16 c4

  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.curved"
  }
  g8 e'4. \breathe g8. e16 c4
}
```

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
```

```

<c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

<c d e f>4\laissezVibrer r
\override LaissezVibrerTieColumn.tie-configuration
  = #'((-7 . ,DOWN)
        (-5 . ,DOWN)
        (-3 . ,UP)
        (-1 . ,UP))
<c d e f>4\laissezVibrer r
}

```

Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```

\relative c' {
  \override TextSpanner.bound-padding = #1.0
  \override TextSpanner.style = #'line
  \override TextSpanner.bound-details.right.arrow = ##t
  \override TextSpanner.bound-details.left.text = #"fof"
  \override TextSpanner.bound-details.right.text = #"gag"
  \override TextSpanner.bound-details.right.padding = #0.6

  \override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
  \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER

  \override Glissando.bound-details.right.arrow = ##t
  \override Glissando.arrow-length = #0.5
  \override Glissando.arrow-width = #0.25

  a8\startTextSpan gis a4 b\glissando b,
  g'4 c\stopTextSpan c2
}

```

Legature di portamento con complesse strutture di tratteggio

Le legature di portamento possono avere schemi di tratteggio complessi definendo la proprietà `dash-definition`. `dash-definition` è una lista di `dash-elements`. Un `dash-element` è una lista di parametri che definiscono il comportamento del tratteggio per un segmento della legatura.

La legatura di portamento è definita come il parametro `t` della curva di bezier che va da 0 sul margine sinistro della legatura fino a 1 su quello destro. `dash-element` è una lista di (`inizio-t` `fine-t` `frazione-trattino` `punto-trattino`). La regione della legatura di portamento che va da `inizio-t` a `fine-t` avrà una frazione `frazione-trattino` di ogni `punto-trattino` nero.

punto-trattino viene definito in spazi rigo. frazione-trattino è impostato su 1 per una legatura di portamento continua.

```
\relative c' {
  \once \override
    Slur.dash-definition = #'((0 0.3 0.1 0.75)
                               (0.3 0.6 1 1)
                               (0.65 1.0 0.4 0.75))

  c4( d e f)
  \once \override
    Slur.dash-definition = #'((0 0.25 1 1)
                               (0.3 0.7 0.4 0.75)
                               (0.75 1.0 1 1))

  c4( d e f)
}
```

Modificare i valori predefiniti per le abbreviazioni delle articolazioni

Le abbreviazioni sono definite in 'ly/script-init.ly', dove sono assegnati valori predefiniti alle variabili dashHat, dashPlus, dashDash, dashBang, dashLarger, dashDot e dashUnderscore. Questi valori predefiniti possono essere modificati. Ad esempio, per associare l'abbreviazione ++ (dashPlus) al simbolo del *trillo* invece che al simbolo + predefinito, si assegna il valore trill alla variabile dashPlus:

```
\relative c' ' { c1-+ }
```

```
dashPlus = \trill
```

```
\relative c' ' { c1-+ }
```

Moving slur positions vertically

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

```
\relative c' {
  \stemDown
```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' {
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio
}
```

Posizionare il testo a margine dentro le legature di portamento

I testi a margine devono avere la proprietà `outside-staff-priority` impostata su `false` per poter apparire dentro le legature di portamento.

```
\relative c' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(^\markup { \halign #-10 \natural } d4.) c8
}
```

Stampare le forcelle in vari stili

Il segno di dinamica della forcilla può avere diversi stili

```
\relative c' {
  \override Hairpin.stencil = #flared-hairpin
  a4< a a a\f
  a4\p< a a a\ff
  a4\s fz< a a a\!
  \override Hairpin.stencil = #constante-hairpin
  a4< a a a\f
  a4\p< a a a\ff
  a4\s fz< a a a\!
```

```

\override Hairpin.stencil = #flared-hairpin
a4\> a a a\f
a4\p\> a a a\ff
a4\sفز\> a a a\!
\override Hairpin.stencil = #constante-hairpin
a4\> a a a\f
a4\p\> a a a\ff
a4\sفز\> a a a\!
}

```

Forcelle con notazione al niente

Le forcelle di dinamica possono essere rappresentate con una punta tonda (notazione “al niente”) impostando la proprietà `circled-tip` dell’oggetto `Hairpin` su `#t`.

```

\relative c' {
  \override Hairpin.circled-tip = ##t
  c2\< c\!
  c4\> c\< c2\!
}

```

Posizionare il metronomo e i numeri di chiamata sotto il rigo

Di norma, il metronomo e i numeri di chiamata vengono posizionati sopra il rigo. Per metterli sotto il rigo basta impostare correttamente la proprietà `direction` di `MetronomeMark` o `RehearsalMark`.

```

\layout {
  indent = 0
  ragged-right = ##f
}

{
  % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
}

```

```
\mark \default
c''1
}
```

Impostare il comportamento delle forcelle sulle stanghette

Se la nota che termina una forcella si trova sul primo battuto di una battuta, la forcella si ferma prima della stanghetta che precede la nota. Si può controllare questo comportamento modificando la proprietà 'to-barline.

```
\relative c'' {
  e4\< e2.
  e1\!
  \override Hairpin.to-barline = ##f
  e4\< e2.
  e1\!
}
```

Impostare la lunghezza minima delle forcelle

Se le forcelle sono troppo corte, possono essere allungate modificando la proprietà minimum-length dell'oggetto Hairpin.

```
<<
{
  \after 4 \< \after 2 \> \after 2. \! f'1
  \override Hairpin.minimum-length = #8
  \after 4 \< \after 2 \> \after 2. \! f'1
}
{
  \repeat unfold 8 c'4
}
>>
```

Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4_\fermata^\fermata` only shows a fermata below. The fermata above gets simply ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, `'add-stem-support` would be required.

The solution is thus to write the note as a chord and add the articulations inside of `<...>`, using the direction modifiers `^` and `_` as appropriate.

```
\relative c' {
  <>^\text{"Wrong"}
  c2_\fermata^\fermata % The second fermata is ignored!
  <e d'>2^\flageolet_\flageolet

  \stopStaff s1 \startStaff

  <>^\text{"Works if written inside a chord"}
  <e_\flageolet d'^\flageolet>2
  <e_\flageolet d'^\flageolet>2
  <e_\flageolet^\flageolet>2
  <e_\fermata^\fermata>2
}
```

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' {
  c4\snappizzicato
  <c' e g>4\snappizzicato
  <c' e g>4^\snappizzicato
  <c, e g>4_\snappizzicato
}
```

Usare un segno di spunta come simbolo di respiro

La musica vocale e per fiati usa frequentemente il segno di spunta come segno di respiro. Questo indica un respiro che sottrae un po' di tempo alla nota precedente invece di prendere una piccola pausa, indicata dal segno di respiro rappresentato dalla virgola. Il segno può essere spostato un po' su per allontanarlo dal rigo.

```
\relative c'' {
  c2
  \breathe
  d2
  \override BreathingSign.Y-offset = #2.6
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.tickmark" }
  c2
  \breathe
  d2
}
```

Usare arpeggioBracket per rendere i divisi più visibili

Si può usare `arpeggioBracket` per indicare la divisione delle voci quando non ci sono gambi che forniscano questa informazione. Questo caso è frequente nella musica corale.

```
\include "english.ly"

\score {
  \relative c'' {
    \key a \major
    \time 2/2
    <<
    \new Voice = "upper"
    <<
    { \voiceOne \arpeggioBracket
      a2( b2
      <b d>1\arpeggio)
      <cs e>\arpeggio ~
      <cs e>4
    }
    \addlyrics { \lyricmode { A -- men. } }
    >>
    \new Voice = "lower"
    { \voiceTwo
      a1 ~
      a
      a ~
      a4 \bar " | ."
    }
    >>
  }
}
```

```
\layout { ragged-right = ##t }
}
```

Uso delle doppie legature di portamento per gli accordi legati

Alcuni compositori scrivono due *legature di portamento* per indicare gli accordi legati. Si può ottenere questo risultato impostando `doubleSlurs`.

```
\relative c' {
  \set doubleSlurs = ##t
  <c e>4( <d f> <c e> <d f>)
}
```

Uso della proprietà `whiteout`

Qualsiasi oggetto grafico può essere posizionato sopra uno sfondo bianco per mascherare parti degli oggetti che si trovano sotto. Ciò può essere utile per migliorare l'aspetto delle collisioni in situazioni complesse in cui il riposizionamento degli oggetti è troppo difficile. Bisogna impostare esplicitamente la proprietà `layer` (livello) per controllare quali oggetti debbano essere mascherati dallo sfondo bianco.

In questo esempio la collisione della legatura di valore con l'indicazione di tempo viene migliorata mascherando la parte della legatura che incrocia l'indicazione di tempo impostando la proprietà `whiteout` di `TimeSignature`. Per farlo si sposta `TimeSignature` su un livello superiore a `Tie`, che viene lasciato al livello predefinito 1; e `StaffSymbol` viene spostato su un livello superiore a `TimeSignature` in modo che non venga mascherato.

```
{
  \override Score.StaffSymbol.layer = #4
  \override Staff.TimeSignature.layer = #3
  b'2 b'~
  \once \override Staff.TimeSignature.whiteout = ##t
  \time 3/4
  b' r4
}
```

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

`upline =`

```

\weak stencil
#(lambda (grob)
  (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #}))
\stopped

\relative c' {
  a'4^\upline a( c d')_\upline
}

```

Vertically aligning dynamics across multiple notes

Dynamics that occur at, begin on, or end on the same note will be vertically aligned. To ensure that dynamics are aligned when they do not occur on the same note, increase the `staff-padding` property of the `DynamicLineSpanner` object.

```

\relative c' {
  \override DynamicLineSpanner.staff-padding = #4
  c2\p f\mf
  g2\< b4\> c\!
}

```

Repeats

Sezione “Repeats” in *Guida alla Notazione*

Aggiungere le parentesi delle volte a altri righi

L’incisore `Volta_engraver` risiede nel contesto `Score`, quindi le parentesi delle ripetizioni appaiono di norma soltanto sul rigo superiore. Questo comportamento può essere modificato aggiungendo l’incisore `Volta_engraver` al contesto `Staff` in cui si desidera far apparire le parentesi; si veda anche il frammento “Volta multirigo”.

```
<<
  \new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
  \new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
  \new Staff \with { \consists "Volta_engraver" } { c'2 g' e' a' }
  \new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
>>
```

The image shows four staves of musical notation. The first staff has a treble clef, a common time signature 'c', and two measures. The second measure is enclosed in a box with '1.2.' written above it. The second and fourth staves have repeat signs with first and second endings. The third staff has a treble clef, a common time signature 'c', and a melodic line with a repeat sign.

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure’s extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

This snippet presents a legacy method: starting from LilyPond 2.23.3, `\set Score.centerBarNumbers = ##t` is enough.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
```

```

    \remove "Bar_number_engraver"
  }
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
  \new Dynamics {
    \startMeasureCount
    s1*7
    \stopMeasureCount
  }
>>

```

Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

```

% http://lsr.di.unimi.it/LSR/Item?id=964
%=> http://lists.gnu.org/archive/html/lilypond-user/2014-03/msg00126.html
%=> http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357.html

```

```

\layout {
  \context {
    \Score
    %% Changing the defaults from engraver-init.ly
    measureBarType = #"! "
    startRepeatBarType = #"[|:"
    endRepeatBarType = #":|]"
    doubleRepeatBarType = #":|][|:"
  }
}

%% example:
{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
}

```

```

\repeat volta 2 { \repeat unfold 2 c' }
\alternative {
  { c' }
  {
    %% v2.18 workaround
    \once\override Score.VoltaBracket.shorten-pair = #'(1 . -1)
    c'
  }
}
\bar "|."
}

```

Tremoli attraverso i righi

Dato che `\repeat tremolo` si aspetta esattamente due argomenti musicali per i tremoli di accordi, la nota o l'accordo che cambiano rigo in un tremolo che attraversa i righi devono essere posti tra parentesi graffe insieme al comando `\change Staff`.

```

\new PianoStaff <<
  \new Staff = "up" \relative c'' {
    \key a \major
    \time 3/8
    s4.
  }
  \new Staff = "down" \relative c'' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
      <a e'>32
      {
        \change Staff = "up"
        \voiceTwo
        <cis a' dis>32
      }
    }
  }
}
>>

```

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the 'gap-count' property of the Beam object, and the size of the gaps between beams and stems is set with the 'gap' property.

```
\relative c'' {
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #2
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #3
  \repeat tremolo 8 { a32 f }

  \override Beam.gap-count = #3
  \override Beam.gap = #1.33
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #1
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.67
  \repeat tremolo 8 { a32 f }
  \override Beam.gap = #0.33
  \repeat tremolo 8 { a32 f }
}
```

Ripetizioni con segni di percentuale isolati

Si possono stampare anche segni di percentuale isolati.

```
makePercent =
#(define-music-function (note) (ly:music?)
  "Make a percent repeat the same length as NOTE."
  (make-music 'PercentEvent
    'length (ly:music-length note)))
```

```
\relative c'' {
  \makePercent s1
}
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```

<<
  \context Voice = "foo" {
    \clef bass
    c4 r g r
    c4 r g r
    c4 r g r
    c4 r g r
  }
  \context Voice = "foo" {
    \set countPercentRepeats = ##t
    \hide PercentRepeat
    \override PercentRepeatCounter.staff-padding = #1
    \repeat percent 4 { s1 }
  }
>>

```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
}

```

```

}
g'4 f'
\bar ""
\break
e'4 d'
\repeat unfold 7 {
  g'4 f' e' d'
}
\stopMeasureCount
}

```

Visibilità del conto della ripetizione con segno percentuale

I contatori della ripetizione con segno percentuale possono essere mostrati a intervalli regolari impostando la proprietà di contesto `repeatCountVisibility`.

```

\relative c' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
  \repeat percent 10 { c1 } \break
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
  \repeat percent 6 { c1 d1 }
}

```

Contatore della ripetizione con segno percentuale

Le ripetizioni di misura che hanno più di due ripetizioni possono avere un contatore se si cambia la proprietà opportuna, come mostra questo esempio:

```

\relative c' {
  \set countPercentRepeats = ##t
  \repeat percent 4 { c1 }
}

```

Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

```
{
\relative c'' {
  c4 c c c c c c c c c c c
  \repeat segno 2 {
    c4 c c c c c c c
    \alternative {
      \volta 1 {
        c4 c c c c c c c c c c c
        % If you don't use \break at Coda, use \noBreak here
        % and after \bar "" below.
        \noBreak
        \section % double bar line
        \cadenzaOn % pause bar count
        \stopStaff % remove staff lines
        % Increasing the unfold counter will expand the staff-free space
        \repeat unfold 6 {
          s1
          \bar ""
        }
        % Place JumpScript where the staff would normally be.
        \once \override Score.JumpScript.outside-staff-priority = ##f
        \once \override Score.JumpScript.Y-offset = 0
        \startStaff % resume bar count
        \cadenzaOff % show staff lines again
      }
    }
  }
}
\sectionLabel "Coda"
% Show Coda on a new line
\break
\repeat unfold 8 { c4 c c c }
\fine
}
}
```

*D.S. § al ⊕
e poi la Coda*

Coda

Impostare la doppia ripetizione predefinita per le volte

Esistono tre diversi stili di doppie ripetizioni per le volte, che si possono impostare con `doubleRepeatBarType`.

```
\relative c'' {
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = #":...:"
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = #":|.|:"
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = #":|.:"
  \repeat volta 2 { c1 }
}
```

Accorciare le parentesi delle volte

Per impostazione predefinita, le parentesi delle volte si estendono per tutta l'alternativa, ma si possono accorciare impostando `voltaSpannerDuration`. Nell'esempio seguente, la parentesi dura una misura, che ha una durata di 3/4.

```
\relative c'' {
  \time 3/4
  c4 c c
  \set Score.voltaSpannerDuration = #(ly:make-moment 3/4)
  \repeat volta 5 { d4 d d }
  \alternative {
    {
      e4 e e
      f4 f f
    }
    { g4 g g }
  }
}
```

Volta sotto gli accordi

Aggiungendo l'incisore `Volta_engraver` al rigo, è possibile inserire le volte sotto gli accordi.

```
\score {
  <<
```

```

\chords {
  c1
  c1
}
\new Staff \with {
  \consists "Volta_engraver"
}
{
  \repeat volta 2 { c'1 }
  \alternative { c' }
}
>>
\layout {
  \context {
    \Score
    \remove "Volta_engraver"
  }
}
}

```

Volta multi staff

By adding the `Volta_engraver` to the relevant staff, voltes can be put over staves other than the topmost one in a score.

```

voltaMusic = \relative c'' {
  \repeat volta 2 {
    c1
  }
  \alternative {
    d1
    e1
  }
}

<<
\new StaffGroup <<
  \new Staff \voltaMusic
  \new Staff \voltaMusic
>>
\new StaffGroup <<
  \new Staff \with { \consists "Volta_engraver" }
    \voltaMusic
  \new Staff \voltaMusic
>>
>>

```

Volta text markup using repeatCommands

Though voltes are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#(list (list 'volta textIdentifier))`. Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { 1. 2. 3... \text \italic { ad lib. } }
```

```
\relative c'' {
  c1
  \set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
  c4 b d e
  \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
  f1
  \set Score.repeatCommands = #'((volta #f))
}
```

Simultaneous notes

Sezione “Simultaneous notes” in *Guida alla Notazione*

Voci ulteriori per evitare le collisioni

In alcuni casi di musica polifonica complessa sono necessarie delle voci ulteriori per evitare le collisioni tra note. Se servono più di quattro voci parallele, si possono aggiungere altre voci definendo una variabile con la funzione Scheme function `context-spec-music`.

```
voiceFive = #(context-spec-music (make-voice-props-set 4) 'Voice)
```

```
\relative c' ' {
  \time 3/4
  \key d \minor
  \partial 2
  <<
    \new Voice {
      \voiceOne
      a4. a8
      e'4 e4. e8
      f4 d4. c8
    }
    \new Voice {
      \voiceTwo
      d,2
      d4 cis2
      d4 bes2
    }
    \new Voice {
      \voiceThree
      f'2
      bes4 a2
      a4 s2
    }
    \new Voice {
      \voiceFive
      s2
      g4 g2
      f4 f2
    }
  >>
}
```

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets < >), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ^\markup { A tiny e }_\markup { A big c }
}
```

Modificare le indicazioni testuali di partCombine

Quando si usa la funzionalità di combinazione automatica delle parti, si può modificare il testo delle sezioni soliste e dell'unisono:

```
\new Staff <<
  \set Staff.soloText = #"girl"
  \set Staff.soloIIText = #"boy"
  \set Staff.aDueText = #"together"
  \partCombine
  \relative c'' {
    g4 g r r
    a2 g
  }
  \relative c'' {
    r4 r a( b)
    a2 g
  }
>>
```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Combinare due parti sullo stesso rigo

Lo strumento di unione delle parti (il comando `\partCombine`) permette di combinare varie parti sullo stesso rigo. Indicazioni testuali come “solo” e “a2” sono aggiunte automaticamente; per toglierle basta impostare la proprietà `printPartCombineTexts` su `f`. Per le partiture vocali (inni), non c’è bisogno di aggiungere i testi “solo/a2”, quindi dovrebbero essere disattivati. Tuttavia potrebbe convenire non usarlo se c’è una qualche parte solista, perché non verrebbe indicata. In tali casi è preferibile usare la notazione polifonica normale.

Questo frammento illustra i tre modi con cui due parti possono essere stampate su uno stesso rigo: normale polifonia, `\partCombine` senza testo e `\partCombine` con testo.

%% Combining pedal notes with clef changes

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```

fixA = {
  \once \override Stem.length = #11
}

fixB = {
  \once \override NoteHead.X-offset = #1.7
  \once \override Stem.length = #7
  \once \override Stem.rotation = #'(45 0 0)
  \once \override Stem.extra-offset = #'(-0.1 . -0.2)
  \once \override Flag.style = #'no-flag
  \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
  << { \fixA <b d!>8 } \ { \voiceThree \fixB dis } >> s
}

```

Forzare lo spostamento orizzontale delle note

Quando il motore tipografico non riesce a risolvere una situazione, si può usare la sintassi che sovrascrive le decisioni tipografiche. L'unità di misura usata è lo spazio del rigo.

```

\relative c' <<
{
  <d g>2 <d g>
}

```

```

\\
{
  <b f'>2
  \once \override NoteColumn.force-hshift = #1.7
  <b f'>2
}
>>

```

Making an object invisible with the 'transparent' property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```

\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\
  {
    b8 g g e
  }
  >>
}

```

Spostare le note puntate in polifonia

Quando una nota puntata della voce più alta viene spostata per evitare una collisione con una nota di un'altra voce, il comportamento predefinito è spostare la nota più alta a destra. Tale comportamento può essere modificato tramite la proprietà prefer-dotted-right di NoteCollision.

```

\new Staff \relative c' <<
{

```

```

f2. f4
\override Staff.NoteCollision.prefer-dotted-right = ##f
f2. f4
\override Staff.NoteCollision.prefer-dotted-right = ##t
f2. f4
}
\\
{ e4 e e e e e e e e e e }
>>

```

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘ignore-collision’ property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t
```

```

\relative c' {
  \new Staff <<
    \new Voice { \ignore \stemDown f2 g }
    \new Voice { c2 \stemDown c, }
  >>
}

```

Two \partCombine pairs on one staff

The \partCombine function takes two music expressions each containing a part, and distributes them among four Voices named “two”, “one”, “solo”, and “chords” depending on when and how the parts are merged into a common voice. The voices output from \partCombine can have their layout properties adjusted in the usual way. Here we define extensions of \partCombine to make it easier to put four voices on a staff.

```

soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 }
bass = { fis8 gis | a4 gis g fis | eis fis b,2 }

```

```

\new Staff <<
  \key b\minor
  \clef alto
  \partial 4

```

```

\transpose b b'
\partCombineUp \soprano \alto
\partCombineDown \tenor \bass
>>

\layout {
  \context {
    \Staff
    \accepts "VoiceBox"
  }
  \context {
    \name "VoiceBox"
    \type "Engraver_group"
    \defaultchild "Voice"
    \accepts "Voice"
    \accepts "NullVoice"
  }
}

customPartCombineUp =
#(define-music-function (partOne partTwo)
  (ly:music? ly:music?)
  "Take the music in @var{partOne} and @var{partTwo} and return
  a @code{VoiceBox} named @q{Up} containing @code{Voice}s
  that contain @var{partOne} and @var{partTwo} merged into one
  voice where feasible. This variant sets the default voicing
  in the output to use upward stems."
  #{
    \new VoiceBox = "Up" <<
      \context Voice = "one" { \voiceOne }
      \context Voice = "two" { \voiceThree }
      \context Voice = "shared" { \voiceOne }
      \context Voice = "solo" { \voiceOne }
      \context NullVoice = "null" {}
      \partCombine #partOne #partTwo
    >>
  #})

customPartCombineDown = #
(define-music-function (partOne partTwo)
  (ly:music? ly:music?)
  "Take the music in @var{partOne} and @var{partTwo} and return
  a @code{VoiceBox} named @q{Down} containing @code{Voice}s
  that contain @var{partOne} and @var{partTwo} merged into one
  voice where feasible. This variant sets the default voicing
  in the output to use downward stems."
  #{
    \new VoiceBox = "Down" <<
      \set VoiceBox.soloText = #"Solo III"
      \set VoiceBox.soloIIText = #"Solo IV"
      \context Voice = "one" { \voiceFour }
      \context Voice = "two" { \voiceTwo }
  #})

```

Staff notation

Sezione “Staff notation” in *Guida alla Notazione*

Un ambitus per voce

L’ambitus può essere specificato per voce. In tal caso occorre spostarlo manualmente per evitare collisioni.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
}>>
```

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

```
\score {
  <<
    \new Staff \relative c' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c' {
      \new Staff {
        c1 | c
        <<
          {
            c1 | d
          }
        \new Staff {
          \once \omit Staff.TimeSignature
          c1 | b
        }
      }
    }
  >>
  c1
}
```

```

    }
  }
  >>
}

```

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of `Staff.explicitKeySignatureVisibility` as is shown in the example.

```

\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
  >>
  c1 | c^"Fixed here" \break
  << { c1 | c }
  \new Staff {
    \once \set Staff.explicitKeySignatureVisibility = #end-of-line-invisible
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
  >>
}
}

```

The image shows two musical staves. The first staff is a grand staff (two treble clefs) with a 3-measure rest. The second staff is a grand staff (two treble clefs) with a 7-measure rest. The text "Fixed here" is positioned above the first staff.

Adding indicators to staves which get split after a break

This snippet defines the `\splitStaffBarLine`, `convUpStaffBarLine` and `convDownStaffBarLine` commands. These add arrows at a bar line, to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

```

#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* (
    (PI-OVER-180 (/ (atan 1 1) 34))
    (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
    (angle-rad (degrees->radians angle-deg))
    (target-x (* length (cos angle-rad)))
    (target-y (* length (sin angle-rad))))
    (interpret-markup layout props
      (markup
        #:translate (cons (/ target-x 2) (/ target-y 2))
        #:rotate angle-deg
        #:translate (cons (/ length -2) 0)
        #:concat (#:draw-line (cons length 0)
          #:arrow-head X RIGHT fill))))))

S A
 T B

a b c d
 a b c d

The image shows two systems of musical notation. The first system consists of three staves: SI SII (top), AI AII (middle), and T B (bottom). The SI SII staff has a treble clef and a triplet of eighth notes with lyrics 'e f g h' below. The AI AII staff has a treble clef and four quarter notes with lyrics 'e f g h' below. The T B staff has a bass clef and four quarter notes with lyrics 'e f g h' below. The second system consists of two staves: S A (top) and T B (bottom). The S A staff has a treble clef and a quintuplet of eighth notes with lyrics 'i j k l' below. The T B staff has a bass clef and four quarter notes with lyrics 'i j k l' below.

Aggiungere citazioni orchestrali a una partitura vocale

L'esempio seguente mostra un approccio per semplificare l'aggiunta di citazioni orchestrali a una riduzione per pianoforte di una partitura vocale. La funzione musicale `\cueWhile` prende quattro argomenti: la musica da cui prendere la citazione, come è definita da `\addQuote`, il nome da inserire prima delle notine, poi o `#UP` o `#DOWN` per specificare o `\voiceOne` col nome sopra il rigo o `\voiceTwo` col nome sotto il rigo, e infine la musica per pianoforte che deve apparire in parallelo alle notine. Il nome dello strumento citato è posto a sinistra delle notine. Molti passaggi possono essere citati, ma non possono sovrapporsi l'un l'altro nel tempo.

cueWhile =

```
#(define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
  #{
    \cueDuring $instrument #dir {
      \once \override TextScript.self-alignment-X = #RIGHT
      \once \override TextScript.direction = $dir
      <>-\markup { \tiny #name }
      $music
    }
  #})
```

```
flute = \relative c'' {
  \transposition c'
  s4 s4 e g
}
\addQuote "flute" { \flute }
```

```

clarinet = \relative c' {
  \transposition bes
  fis4 d d c
}
\addQuote "clarinet" { \clarinet }

singer = \relative c'' { c4. g8 g4 bes4 }
words = \lyricmode { here's the lyr -- ics }

pianoRH = \relative c'' {
  \transposition c'
  \cueWhile "clarinet" "Clar." #DOWN { c4. g8 }
  \cueWhile "flute" "Flute" #UP { g4 bes4 }
}
pianoLH = \relative c { c4 <c' e> e, <g c> }

\score {
  <<
  \new Staff {
    \new Voice = "singer" {
      \singer
    }
  }
  \new Lyrics {
    \lyricsto "singer"
    \words
  }
  \new PianoStaff <<
  \new Staff {
    \new Voice {
      \pianoRH
    }
  }
  \new Staff {
    \clef "bass"
    \pianoLH
  }
  >>
  >>
}

```

The image shows a musical score for the phrase "here's the lyrics". It consists of three staves. The top staff is a vocal line in treble clef with a common time signature (C). The lyrics "here's the lyrics" are written below the notes. The middle staff is for Flute, and the bottom staff is for Clarinet (labeled "Clar."). Both piano parts are in treble clef with a common time signature. The music is in a simple harmonic style with a mix of quarter and eighth notes.

Aggiungere i segni di tempo per i glissandi lunghi

I battiti saltati nei glissandi molto lunghi vengono talvolta segnalati con delle indicazioni di tempo, che consistono solitamente in dei gambi privi di teste di nota. Questi gambi possono essere usati anche per contenere segni di espressione intermedi.

Se i gambi non si allineano bene al glissando, può essere necessario riposizionarli leggermente.

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}
```

```
glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}
```

```
\relative c'' {
  r8 f8\glissando
  \glissandoSkipOn
  f4 g a a8\noBeam
  \glissandoSkipOff
  a8

  r8 f8\glissando
  \glissandoSkipOn
  g4 a8
  \glissandoSkipOff
  a8 |

  r4 f\glissando \<
  \glissandoSkipOn
  a4\f \>
  \glissandoSkipOff
  b8\! r |
}
```

Numeri di battuta alternativi

Si possono impostare due metodi alternativi di numerazione della battuta, utili specialmente per le ripetizioni.

```
\relative c' {
  \set Score.alternativeNumberingStyle = #'numbers
  \repeat volta 3 { c4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
  c1 \break
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \repeat volta 3 { c,4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
  c1
}
```

Five musical staves in treble clef, each showing a different method of alternative numbering for repeated measures:

- Staff 1: Shows a first ending bracket labeled '1.' over the final two measures of a phrase.
- Staff 2: Shows a second ending bracket labeled '2.' over the final two measures of a phrase.
- Staff 3: Shows a third ending bracket labeled '3.' over the final two measures of a phrase.
- Staff 4: Shows a first ending bracket labeled '1.' over the final two measures of a phrase, with a repeat sign at the beginning of the phrase.
- Staff 5: Shows a second ending bracket labeled '2.' over the final two measures of a phrase, with a repeat sign at the beginning of the phrase.

Ambitus dopo armatura di chiave

Per impostazione predefinita, gli ambitus sono posizionati a sinistra della chiave. La funzione `\ambitusAfter` permette di cambiare questo posizionamento. La sintassi è `\ambitusAfter grob-interface` (vedi Graphical Object Interfaces (<http://lilypond.org/doc/v2.22/Documentation/internals/graphical-object-interfaces>) per un elenco dei possibili valori per `grob-interface`.)

Un caso d'uso comune è il posizionamento dell'ambitus tra l'armatura di chiave e l'indicazione di tempo.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure's extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a Dynamics context.

This snippet presents a legacy method: starting from LilyPond 2.23.3, `\set Score.centerBarNumbers = ##t` is enough.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}
```

```
pattern = \repeat unfold 7 { c'4 d' e' f' }
```

```

\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
  \new Dynamics {
    \startMeasureCount
    s1*7
    \stopMeasureCount
  }
>>

```

Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

```

% http://lsr.di.unimi.it/LSR/Item?id=964
%=> http://lists.gnu.org/archive/html/lilypond-user/2014-03/msg00126.html
%=> http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357.html

```

```

\layout {
  \context {
    \Score
    %% Changing the defaults from engraver-init.ly
    measureBarType = #"!"
    startRepeatBarType = #"[:]"
    endRepeatBarType = #":|]"
    doubleRepeatBarType = #":|][|]"
  }
}

%% example:
{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
  \repeat volta 2 { \repeat unfold 2 c' }
  \alternative {
    { c' }
    {
      %% v2.18 workaround
      \once\override Score.VoltaBracket.shorten-pair = #'(1 . -1)
    }
  }
}

```

```

    c'
  }
}
\bar " | ."
}

```

Changing the number of lines in a staff

The number of lines in a staff may be changed by overriding the `StaffSymbol` property `line-count`.

```

upper = \relative c'' {
  c4 d e f
}

```

```

lower = \relative c {
  \clef bass
  c4 b a g
}

```

```

\score {
  \context PianoStaff <<
    \new Staff {
      \upper
    }
    \new Staff {
      \override Staff.StaffSymbol.line-count = #4
      \lower
    }
  >>
}

```

Changing the staff size

Though the simplest way to resize staves is to use `#{set-global-staff-size xx}`, an individual staff's size can be changed by scaling the properties `'staff-space` and `fontSize`.

```

<<
  \new Staff {
    \relative c'' {
      \dynamicDown
      c8\ff c c c c c c c
    }
  }

```

```

}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} {
  \clef bass
  c8 c c c c\ff c c c
}
>>

```

Creating blank staves

To create blank staves, generate empty measures then remove the Bar_number_engraver from the Score context, and the Time_signature_engraver, Clef_engraver and Bar_engraver from the Staff context.

```

#(set-global-staff-size 20)

\score {
  {
    \repeat unfold 12 { s1 \break }
  }
  \layout {
    indent = 0\in
    \context {
      \Staff
      \remove "Time_signature_engraver"
      \remove "Clef_engraver"
      \remove "Bar_engraver"
    }
    \context {
      \Score
      \remove "Bar_number_engraver"
    }
  }
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
}
}

```

```
    top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob) (grob-interpret-markup grob
    #{ \markup\combine
      \musicglyph "clefs.C"
      \translate #'(-3 . -2)
      \musicglyph "clefs.F"
    #}))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}
```

Cross staff stems

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

```

\layout {
  \context {
    \PianoStaff
    \consists "Span_stem_engraver"
  }
}

{

Mostrare la parentesi anche se c'è un solo rigo nel sistema

Se c'è un solo rigo in uno dei tipi di rigo `ChoirStaff` o `StaffGroup`, la parentesi e la stanghetta iniziale non appaiono. Si può modificare questo comportamento predefinito sovrascrivendo `collapse-height` e impostando un valore inferiore al numero di linee del rigo.

Nei contesti `PianoStaff` e `GrandStaff`, dove i sistemi iniziano con una parentesi graffa invece di una parentesi quadra, occorre impostare un'altra proprietà, come si vede nel secondo sistema dell'esempio.

```

\score {
  \new StaffGroup <<
    % Must be lower than the actual number of staff lines
    \override StaffGroup.SystemStartBracket.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
    \new Staff {
      c'1
    }
  >>
}

\score {
  \new PianoStaff <<

```

```

\override PianoStaff.SystemStartBrace.collapse-height = #4
\override Score.SystemStartBar.collapse-height = #4
\new Staff {
  c'1
}
>>
}

```

Extending a TrillSpanner

For `TrillSpanner`, the `minimum-length` property becomes effective only if the `set-spacing-rods` procedure is called explicitly.

To do this, the `springs-and-rods` property should be set to `ly:spanner::set-spacing-rods`.

```

\relative c' {
\key c \minor
\time 2/4
c16( as') c,-. des-.
\once\override TrillSpanner.minimum-length = #15
\once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
\afterGrace es4
\startTrillSpan { d16[( \stopTrillSpan es)] }
c( c' g es c g' es d
\hideNotes
c8)
}

```

Estendere i glissandi sulle volte delle ripetizioni

Un glissando che si estende in vari blocchi `\alternative` può essere simulato aggiungendo all'inizio di ogni blocco `\alternative` una nota di abbellimento nascosta da cui inizia un glissando. La nota di abbellimento deve avere la stessa altezza della nota da cui parte il glissando iniziale. In questo frammento si usa una funzione musicale che prende come argomento l'altezza della nota di abbellimento.

Attenzione: nella musica polifonica la nota di abbellimento deve avere una nota di abbellimento corrispondente in tutte le altre voci.

```

repeatGliss = #(define-music-function (grace)
  (ly:pitch?)

```

```

#{
  % the next two lines ensure the glissando is long enough
  % to be visible
  \once \override Glissando.springs-and-rods
    = #ly:spanner::set-spacing-rods
  \once \override Glissando.minimum-length = #3.5
  \once \hideNotes
  \grace $grace \glissando
#})

\score {
  \relative c' {
    \repeat volta 3 { c4 d e f\glissando }

  >>
  >>
}

```

Flat Ties

The function takes the default `Tie.stencil` as an argument, calculating the result relying on the extents of this default.

Further tweaking is possible by overriding `Tie.details.height-limit` or with `\shape`. It's also possible to change the custom-definition on the fly.

%% <http://lsr.di.unimi.it/LSR/Item?id=1031>

```

The image displays five staves of musical notation. The first staff is in treble clef with a common time signature (C). It features a sequence of notes: a half note, a quarter note, a quarter note, a half note, and a quarter note. There are ties between the first and second notes, and between the third and fourth notes. A complex multi-measure rest follows, consisting of six stacked beams, each with a notehead, and a final notehead on the top beam. The remaining four staves are numbered 3, 4, 5, and 6. Each of these staves contains a sequence of notes with ties, similar to the first staff but with different rhythmic values and tie placements.

Forcing measure width to adapt to MetronomeMark's width

By default, metronome marks do not influence horizontal spacing.

This can be solved through a simple override, as shown in the second half of the example.

```

example = {
  \tempo "Allegro"
  R1*6
  \tempo "Rall."
  R1*2
  \tempo "A tempo"
  R1*8
}

{
  \compressMMRests {
    \example
    R1
    R1
    \override Score.MetronomeMark.extra-spacing-width = #'(-3 . 0)
    \example
  }
}

```

Allegro 6 Rall. 2 A tempo 8

18 Allegro 6 Rall. 2 A tempo 8

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

```
\relative c' {
  a2 \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f''4 d,
}
```

Incipit

Quando si trascrive musica mensurale, un incipit all'inizio del brano è utile per indicare il tempo e l'armatura di chiave originali. I musicisti oggi sono abituati alle stanghette, ma queste non erano note all'epoca della musica mensurale. Come compromesso, spesso le stanghette vengono poste tra i righi, uno stile di formattazione chiamato mensurstriche.

Inserting score fragments above a staff, as markups

The `\markup` command is quite versatile. In this snippet, it contains a `\score` block instead of texts or marks.

```
tuning = \markup {
  \score {
    \new Staff \with { \remove "Time_signature_engraver" }
    {
      \clef bass
      <c, g, d g>1
    }
    \layout { ragged-right = ##t indent = 0\cm }
  }
}

\header {
  title = "Solo Cello Suites"
  subtitle = "Suite IV"
  subsubtitle = \markup { Originalstimmung: \raise #0.5 \tuning }
}

\layout { ragged-right = ##f }

\relative c'' {
  \time 4/8
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  g8 a g a
  g8 a g a
}
```

Solo Cello Suites

Suite IV

Originalstimmung: 

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost-context-property`. For a context-wide setting this could be done in layout as well.

```
%\layout {
% \context {
%   \Score
%   stringOneTopmost = ##f
% }
```

```

% \context {
%   \TabStaff
%   tablatureFormat = #fret-letter-tablature-format
% }
%}

m = {
  \cadenzaOn
  e, b, e gis! b e'
  \bar "||"
}

<<
  \new Staff { \clef "G_8" <>_"default" \m <>_"italian (historic)"\m }
  \new TabStaff
  {
    \m
    \set Score.stringOneTopmost = ##f
    \set TabStaff.tablatureFormat = #fret-letter-tablature-format
    \m
  }
>>

```

The image displays a musical score with two staves. The upper staff is a treble clef staff with a common time signature 'C' and a key signature of one sharp (F#). It contains two measures of music. The first measure is labeled 'default' and the second 'italian (historic)'. The lower staff is a tablature staff with a treble clef and a key signature of one sharp. It shows fret numbers for the first measure: 0, 2, 2, 1, 0. For the second measure: a, c, c, b, a.

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```

music = \relative c {
  c4 d e f
  g4 a b c
  d4 e f g
}

<<
  \new Staff {
    \clef "G_8"
    \music
  }
  \new TabStaff \with {
    tablatureFormat = #fret-letter-tablature-format
  }
  {
    \music
  }
>>

```

```
}
>>
```

Lasciare che i glissandi vadano a capo

Per permettere a un glissando di andare a capo se capita su un'interruzione di riga, si impostano le proprietà `breakable` e `after-line-breaking` su `##t`:

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}

\relative c'' {
  \override Glissando.breakable = ##t
  \override Glissando.after-line-breaking = ##t
  f1\glissando |
  \break
  a4 r2. |
  f1\glissando
  \once \glissandoSkipOn
  \break
  a2 a4 r4 |
}
```

Rendere alcune linee del rigo più spesse delle altre

In ambito didattico può essere utile rendere più spesso una linea del rigo (per esempio, la linea centrale, o per sottolineare la linea della chiave di Sol). Per farlo si possono aggiungere altre linee e posizionarle molto vicino alla linea che deve essere evidenziata, usando la proprietà `line-positions` dell'oggetto `StaffSymbol`.

```
{
```

```
\override Staff.StaffSymbol.line-positions =
  #'(-4 -2 -0.2 0 0.2 2 4)
d'4 e' f' g'
}
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```
<<
  \context Voice = "foo" {
    \clef bass
    c4 r g r
    c4 r g r
    c4 r g r
    c4 r g r
  }
  \context Voice = "foo" {
    \set countPercentRepeats = ##t
    \hide PercentRepeat
    \override PercentRepeatCounter.staff-padding = #1
    \repeat percent 4 { s1 }
  }
>>
```

Formattazione mensurale (stanghette tra i righi)

La formattazione mensurale, in cui le stanghette non appaiono sui righi ma nello spazio tra i righi, si può ottenere usando `StaffGroup` al posto di `ChoirStaff`. La stanghetta sui righi viene nascosta con `\hide`.

```
\layout {
  \context {
    \Staff
    measureBarType = "-span|"
  }
}

music = \fixed c'' {
  c1
  d2 \section e2
  f1 \fine
}

\new StaffGroup <<
```

```
\new Staff \music
\new Staff \music
>>
```

Modificare l'inclinazione dell'estensore dell'ottava

È possibile cambiare l'inclinazione dell'estensore dell'ottava.

```
\relative c' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details =
    #`((left . ((Y . 0)
              (attach-dir . ,LEFT)
              (padding . 0)
              (stencil-align-dir-y . ,CENTER)))
      (right . ((Y . 5.0) ; Change the number here
              (padding . 0)
              (attach-dir . ,RIGHT)
              (text . ,(make-draw-dashed-line-markup
                        (cons 0 -1.2))))))
  \override Staff.OttavaBracket.left-bound-info =
    #ly:horizontal-line-spanner::calc-left-bound-info-and-text
  \override Staff.OttavaBracket.right-bound-info =
    #ly:horizontal-line-spanner::calc-right-bound-info
  \ottava #1
  c1
  c''1
}
```

Annidare i righi

Si può usare la proprietà `systemStartDelimiterHierarchy` per creare gruppi di righi annidati più complessi. Il comando `\set StaffGroup.systemStartDelimiterHierarchy` prende come argomento una lista alfabetica dell'insieme di righi prodotti. Prima di ogni rigo si può assegnare un delimitatore di inizio del sistema. Deve essere racchiuso tra parentesi e collega tutti i righi compresi tra le parentesi. Gli elementi nella lista possono essere omessi, ma la prima parentesi quadra collega sempre tutti i righi. Le possibilità sono `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace` e `SystemStartSquare`.

```
\new StaffGroup
```

```

\relative c' ' <<
  \override StaffGroup.SystemStartSquare.collapse-height = #4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
      (SystemStartSquare b) ) c ) d)

  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
>>

```

Armature di chiave non tradizionali

Il comando `\key` comunemente usato imposta la proprietà `keyAlterations` del contesto `Staff`. Per creare armature di chiave non standard, tale proprietà va impostata esplicitamente.

Il formato di questo comando è una lista:

```

\set Staff.keyAlterations = #`(((ottava . grado) . alterazione) ((ottava .
grado) . alterazione) ...)

```

dove, per ogni elemento della lista, *ottava* indica l'ottava (0 è l'ottava dal Do centrale al Si precedente), *grado* indica la nota all'interno dell'ottava (0 significa Do e 6 significa Si) e *alterazione* può essere `,SHARP`, `,FLAT`, `,DOUBLE-SHARP` etc.

Altrimenti, usando il formato breve per ogni elemento della lista, `(grado . alterazione)`, ciò indica che la stessa alterazione deve essere presente in tutte le ottave. Per le scale microtonalidove un "diesis" non è 100 centesimi, alterazione si riferisce alla proporzione di un duecentesimo di tono intero.

```

\include "arabic.ly"
\relative do' {
  \set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
    (1 . ,SEMI-FLAT)
    (2 . ,FLAT)
    (5 . ,FLAT)
    (6 . ,SEMI-FLAT))

```

```
%\set Staff.extraNatural = ##f
re reb \dwn reb resd
dod dob dosd \dwn dob |
dobsb dods do do |
}
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {
    g'4 f' e' d'
  }
  \stopMeasureCount
}
```

Modello per orchestra, coro e pianoforte

Questo modello mostra come usare i contesti annidati `StaffGroup` e `GrandStaff` per creare sottogruppi degli strumenti dello stesso tipo. Mostra anche come usare `\transpose` in modo che le variabili mantengano la musica per gli strumenti traspositori nell'intonazione reale.

```

#(set-global-staff-size 17)
\paper {
  indent = 3.0\cm % add space for instrumentName

<<
  \new ChordNames
    \with { \consists #Bass_changes_equal_root_engraver }
    \myChords
  \new Staff \myChords
>>

```

The image displays two staves of musical notation. The first staff is in treble clef with a common time signature (C). It contains six measures of chords: Dm, /C#, /C, Dm/B, E⁷, and E. The second staff is also in treble clef with a common time signature, starting with a measure number '5'. It contains eight measures of chords: E/F, /G#, E, Em/F, Dm, /C#, /C, and Dm/B. The chords are represented by vertical stems with various accidentals and note heads.

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```

<<
  \new Staff <<
    \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
  >>

```

```

\new Lyrics \with {
  \override LyricText.extra-offset = #'(0 . 8.6)
  \override LyricExtender.extra-offset = #'(0 . 8.6)
  \override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la _ _ la }
>>

```

Quoting another voice

The `quotedEventTypes` property determines the music event types which should be quoted. The default value is `(note-event rest-event tie-event beam-event tuplet-span-event)`, which means that only the notes, rests, ties, beams and tuplets of the quoted voice will appear in the `\quoteDuring` expression.

In the following example, a 16th rest is not quoted since `rest-event` is not in `quotedEventTypes`.

For a list of event types, consult the “Music classes” section of the Internals Reference.

```

quoteMe = \relative c' {
  fis4 r16 a8.-> b4\ff c
}
\addQuote quoteMe \quoteMe

original = \relative c'' {
  c8 d s2
  \once \override NoteColumn.ignore-collision = ##t
  es8 gis8
}

<<
\new Staff \with { instrumentName = "quoteMe" }
\quoteMe

\new Staff \with { instrumentName = "orig" }
\original

\new Staff \with {
  instrumentName = "orig+quote"
  quotedEventTypes = #'(note-event articulation-event)
}
\relative c''
<<
\original
\new Voice {
  s4
  \set fontSize = #-4
  \override Stem.length-fraction = #(magstep -4)
}

```

```

    \quoteDuring "quoteMe" { \skip 2. }
  }
  >>
>>

```

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

```

\addQuote clarinet {
  \transposition bes
  \repeat unfold 8 { d'16 d' d'8 }
}

\addQuote sax {
  \transposition es'
  \repeat unfold 16 { a8 }
}

quoteTest = {
  % french horn
  \transposition f
  g'4
  << \quoteDuring "clarinet" { \skip 4 } s4^"clar." >>
  << \quoteDuring "sax" { \skip 4 } s4^"sax." >>
  g'4
}

{
  \new Staff \with {
    instrumentName = \markup { \column { Horn "in F" } }
  }
  \quoteTest
  \transpose c' d' << \quoteTest s4_"up a tone" >>
}

```

Removing brace on first line of piano score

This snippet removes the first brace from a PianoStaff or a GrandStaff.

It may be useful when cutting and pasting the engraved image into existing music.

It uses `\alterBroken`.

```
someMusic = {
  \once \override Staff.Clef.stencil = ##f
  \once \override Staff.TimeSignature.stencil = ##f
  \repeat unfold 3 c1 \break
  \repeat unfold 5 c1 \break
  \repeat unfold 5 c1
}

\score {
  \new PianoStaff
  <<
    \new Staff = "right" \relative c' { \someMusic
    \new Staff = "left" \relative c' { \clef F \someMusic }
  >>
  \layout {
    indent=75
    \context {
      \PianoStaff
      \alterBroken transparent #'(#t) SystemStartBrace
    }
  }
}
```

Eliminare la prima linea vuota

Il primo rigo vuoto si può togliere dalla partitura impostando la proprietà `remove-first` di `VerticalAxisGroup`. Questa impostazione agisce a livello globale se posta nel blocco `\layout`,

a livello locale se posta nel rigo specifico che deve essere tolto. Nel secondo caso, si deve specificare il contesto (`Staff` si applica solo al rigo corrente) prima della proprietà.

Il rigo inferiore del secondo gruppo di righe non viene rimosso, perché l'impostazione ha effetto solo sul rigo in cui si trova.

```
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    % To use the setting globally, uncomment the following line:
    % \override VerticalAxisGroup.remove-first = ##t
  }
}
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
}
>>
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
}
>>
```

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```
\paper {
  system-separator-markup = \slashSeparator
  line-width = 120
}

notes = \relative c' {
  c1 | c \break
  c1 | c \break
  c1 | c
}

\book {
  \score {
    \new GrandStaff <<
      \new Staff \notes
      \new Staff \notes
    >>
  }
}
```

The image displays three systems of musical notation for piano, each consisting of a treble and bass staff. The first system shows a treble clef with a common time signature 'C'. The first measure contains a whole note on G4 in the treble and a whole note on G3 in the bass. The second measure contains a whole rest in the treble and a whole note on G3 in the bass. The second system is marked with a double bar line and a fermata, followed by a '3' indicating a triplet. The first measure contains a whole note on G4 in the treble and a whole note on G3 in the bass. The second measure contains a whole rest in the treble and a whole note on G3 in the bass. The third system is also marked with a double bar line and a fermata, followed by a '5' indicating a quintuplet. The first measure contains a whole note on G4 in the treble and a whole note on G3 in the bass. The second measure contains a whole rest in the treble and a whole note on G3 in the bass.

Tick bar lines

'Tick' bar lines are often used in music where the bar line is used only for coordination and is not meant to imply any rhythmic stress.

```
\relative c' {
  \set Score.measureBarType = #"|"
  c4 d e f
  g4 f e d
  c4 d e f
  g4 f e d
  \bar "|."
}
```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```
\relative c' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

```
\relative c' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
  \time 2/4
  a4 b8 c
}
```

Modifiche manuali della proprietà della chiave

Cambiando il glifo della chiave, la sua posizione o l'ottavazione non cambia la posizione delle note successive nel rigo. Per far sì che le armature di chiave si trovino sulle linee del rigo corrette, bisogna specificare anche `middleCPosition`, con valori positivi o negativi che spostano il Do centrale rispettivamente su o giù in senso relativo alla linea centrale del rigo.

Per esempio, `\clef "treble_8"` equivale a impostare `clefGlyph`, `clefPosition` (che regola la posizione verticale della chiave), `middleCPosition` e `clefTransposition`. Viene stampata una chiave quando cambia una di queste proprietà, eccetto `middleCPosition`.

Gli esempi seguenti mostrano le possibilità date dall'impostazione manuale di tali proprietà. Sulla prima linea le modifiche manuali preservano il posizionamento relativo standard di chiavi e note, mentre sulla seconda linea non lo fanno.

```
{
% The default treble clef
\key f \major
c'1
% The standard bass clef
\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
\set Staff.middleCPosition = #6
\set Staff.middleCClefPosition = #6
\key g \major
c'1
% The baritone clef
\set Staff.clefGlyph = #"clefs.C"
\set Staff.clefPosition = #4
\set Staff.middleCPosition = #4
\set Staff.middleCClefPosition = #4
\key f \major
c'1
% The standard choral tenor clef
\set Staff.clefGlyph = #"clefs.G"
\set Staff.clefPosition = #-2
\set Staff.clefTransposition = #-7
\set Staff.middleCPosition = #1
\set Staff.middleCClefPosition = #1
\key f \major
c'1
% A non-standard clef
\set Staff.clefPosition = #0
\set Staff.clefTransposition = #0
\set Staff.middleCPosition = #-4
\set Staff.middleCClefPosition = #-4
\key g \major
c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
c'1
\set Staff.clefGlyph = #"clefs.G"
c'1
\set Staff.clefGlyph = #"clefs.C"
c'1
```

```

\set Staff.clefTransposition = #7
c'1
\set Staff.clefTransposition = #0
\set Staff.clefPosition = #0
c'1

% Return to the normal clef:

\set Staff.middleCPosition = #0
c'1
}

```

Two `\partCombine` pairs on one staff

The `\partCombine` function takes two music expressions each containing a part, and distributes them among four Voices named “two”, “one”, “solo”, and “chords” depending on when and how the parts are merged into a common voice. The voices output from `\partCombine` can have their layout properties adjusted in the usual way. Here we define extensions of `\partCombine` to make it easier to put four voices on a staff.

```

soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 }
bass = { fis8 gis | a4 gis g fis | eis fis b,2 }

```

```

\new Staff <<

Using marklines in a Frenched score

Using MarkLine contexts (such as in LSR1010 (<https://lsr.di.unimi.it/LSR/Item?id=1010>)) in a Frenched score can be problematic if all the staves between two MarkLines are removed in one system. The `Keep_alive_together_engraver` can be used within each StaffGroup to keep the MarkLine alive only as long as the other staves in the group stay alive.

```

bars = {
    \tempo "Allegro" 4=120
    s1*2
    \repeat unfold 5 { \mark \default s1*2 }
    \bar "||"
    \tempo "Adagio" 4=40
    s1*2
    \repeat unfold 8 { \mark \default s1*2 }
    \bar "|."
}

winds = \repeat unfold 120 { c''4 }
trumpet = { \repeat unfold 8 g'2 R1*16 \repeat unfold 4 g'2 R1*8 }
trombone = { \repeat unfold 4 c'1 R1*8 d'1 R1*17 }
strings = \repeat unfold 240 { c''8 }

```

The musical score is divided into four systems, each with a different tempo and section labels:

- System 1 (Measures 1-4):** Tempo: *Allegro* (♩ = 120). Sections A and B.
- System 2 (Measures 5-8):** Sections C and D.
- System 3 (Measures 9-12):** Tempo: *Adagio* (♩ = 40). Sections E and F.
- System 4 (Measures 13-16):** Sections G and H.

The instrumentation includes Winds, Trumpet, Trombone, and Strings. The Winds and Strings parts are active throughout, while the Trumpet and Trombone parts have rests in measures 5-8 and 9-12.

The image shows two systems of musical notation. The first system, starting at measure 21, consists of three staves: Winds, Tpt (Trumpet), and Strings. The second system, starting at measure 26, consists of two staves: Winds and Strings. Vertical lines labeled J, K, L, M, and N are placed above the staves to indicate specific measures across the systems. The Winds and Strings parts in both systems play a rhythmic pattern of eighth notes, while the Tpt part in the first system has rests in measures 24 and 25.

Vertical aligned StaffGroups without connecting SystemStartBar

This snippet shows how to achieve vertically aligned StaffGroups with a SystemStartBar for each StaffGroup, but without connecting them.

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

Musical notation for the teacher's simple setting of the choral. It consists of two staves: a treble clef staff and a bass clef staff, both in common time (C). The melody is simple, with notes on the treble staff and accompaniment on the bass staff. The lyrics are: "Wer nur den lie - ben Gott läßt wal -".

Pupil: Here's my version!

Musical notation for the pupil's version of the choral. It consists of two staves: a treble clef staff and a bass clef staff, both in common time (C). The melody is more complex than the teacher's, with eighth notes and sixteenth notes. The lyrics are: "Wer nur den lie - ben Gott läßt wal -".

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

Musical notation for the teacher's reference to J.S. Bach's version of the choral. It consists of two staves: a treble clef staff and a bass clef staff, both in common time (C). The melody is more complex than the pupil's, with eighth notes and sixteenth notes. The lyrics are: "Wer nur den lie - ben Gott läßt wal -".

Editorial annotations

Sezione “Editorial annotations” in *Guida alla Notazione*

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' {
  c4-1 d-2 f-4 e-3
}
```

Adding links to objects

To add a link to a grob stencil you can use `add-link` as defined here. It works both with `\override` and `\tweak`.

Drawback: `point-and-click` is disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command. Note that the links are not displayed and are not clickable from inside the LSR.

```
##(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
          (let* ((x-ext (ly:stencil-extent stil X))
                 (y-ext (ly:stencil-extent stil Y))
                 (url-expr `(url-link ,url-strg ,x-ext ,y-ext))
                 (new-stil
                  (ly:stencil-add
                   (ly:make-stencil url-expr x-ext y-ext)
                   stil)))
            (ly:grob-set-property! grob 'stencil new-stil))))))
```

Far sì che la diteggiatura appaia dentro il rigo

Per impostazione predefinita, le diteggiature orientate verticalmente sono poste fuori dal rigo; questo comportamento tuttavia può essere disabilitato. Occorre fare attenzione alle situazioni

Parentesi analitiche sopra il rigo

Delle semplici parentesi analitiche orizzontali vengono aggiunte, per impostazione predefinita, sotto il rigo. L'esempio seguente mostra un modo per posizionarle sopra il rigo.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c'' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}
```

Parentesi analitiche con etichette

Si può aggiungere del testo alle parentesi analitiche tramite la proprietà `text` del grob `HorizontalBracketText`. L'aggiunta di vari frammenti di testo alle parentesi che iniziano nello stesso momento musicale richiede l'uso del comando `\tweak`. Dopo un'interruzione di linea il testo viene messo tra parentesi.

```
\paper { tagline = ##f }
```

```

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c''\startGroup d''\stopGroup
  \once\override HorizontalBracketText.text = "a'"

  c''-\tweak HorizontalBracketText.text
    \markup \bold \huge "b" \startGroup
    -\tweak HorizontalBracketText.text "a" \startGroup
    d''\stopGroup
    e''-\tweak HorizontalBracketText.text "a'" \startGroup
    d''\stopGroup\stopGroup |
  c''-\tweak HorizontalBracketText.text foo \startGroup
  d'' e'' f'' | \break
  g'' a'' b'' c'''\stopGroup
}

```

Applicazione degli stili delle teste di nota in base al grado della scala

La proprietà `shapeNoteStyles` può essere usata per definire vari stili di teste di nota per ogni grado della scala (definita dall'armatura di chiave o dalla proprietà `tonic`). Questa proprietà richiede un insieme di simboli, che può essere puramente arbitrario (sono permesse espressioni geometriche come `triangle`, `cross` e `xcircle`) o basato sull'antica tradizione tipografica americana (sono consentiti anche alcuni nomi di nota latini).

Detto questo, per imitare gli antichi canzonieri americani, ci sono vari stili predefiniti disponibili attraverso dei comodi comandi come `\aikenHeads` o `\sacredHarpHeads`.

Questo esempio mostra modi diversi di ottenere teste di nota di varie forme e illustra la possibilità di trasporre una melodia senza perdere la corrispondenza tra le funzioni armoniche e gli stili delle teste.

```

fragment = {
  \key c \major
  c2 d

```

```

e2 f
g2 a
b2 c
}

\new Staff {
  \transpose c d
  \relative c' {
    \set shapeNoteStyles = ##(do re mi fa
                          #f la ti)

    \fragment
  }

  \break

  \relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f
                          mensural xcircle diamond)

    \fragment
  }
}

```

Blanking staff lines using the `\whiteout` command

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```

\layout {
  ragged-right = ##f
}

\relative c' {
  \override TextScript.extra-offset = #'(2 . 4)
  c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}

```

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the font-size property.

Inside the chord (within the brackets < >), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
    \tweak font-size #-2 e>1
  ~\markup { A tiny e }_\markup { A big c }
}
```

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
  c4( d e c)
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

%Association list of pitches to colors.

```
#(define color-mapping
  (list
    (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
    (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
    (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
    (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
    (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
    (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
  ))
```

```

    (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
    (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
    (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
    (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
    (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))

%Compare pitch and alteration (not octave).
#(define (pitch-equals? p1 p2)

}

```

Creare un gruppetto ritardato

Creare un gruppetto ritardato, dove la nota più bassa del gruppetto usa l'alterazione, richiede vari `\override`. La proprietà `outside-staff-priority` deve essere impostata su `##f`, perché altrimenti questa avrebbe la precedenza sulla proprietà `avoid-slur`. Cambiando la frazione `2/3` si aggiusta la posizione orizzontale.

```

\relative c' ' {
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8)
  \after 4
  {
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
    \once \hideNotes
    cis8\turn \noBeam
  }
  d4.( e8)
}

```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the Score context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the Staff context.

```

#(set-global-staff-size 20)

\score {
  {
    \repeat unfold 12 { s1 \break }
  }
  \layout {

```

```
    indent = 0\in
    \context {
      \Staff
      \remove "Time_signature_engraver"
      \remove "Clef_engraver"
      \remove "Bar_engraver"
    }
    \context {
      \Score
      \remove "Bar_number_engraver"
    }
  }
}
```

```
% uncomment these lines for "letter" size
```

```
{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%}
```

```
% uncomment these lines for "A4" size
```

```
{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}
```

Direzione predefinita dei gambi sulla linea centrale del rigo

La direzione predefinita dei gambi sulla linea centrale del rigo si imposta con la proprietà `neutral-direction` dell'oggetto `Stem`.

```
\relative c' {
  a4 b c b
  \override Stem.neutral-direction = #up
  a4 b c b
  \override Stem.neutral-direction = #down
  a4 b c b
}
```

Different font size settings for `instrumentName` and `shortInstrumentName`

Choose different font sizes for `instrumentName` and `shortInstrumentName` as a context override.

```

InstrumentNameFontSize =
#(define-music-function (font-size-pair) (pair?)
"Sets the @code{font-size} of @code{InstrumentName}.
The font-size for the initial @code{instrumentName} is taken from the first
value in @var{font-size-pair}. @code{shortInstrumentName} will get the second
value of @var{font-size-pair}."
"

;; This code could be changed/extended to set different values for each
;; occurrence of `shortInstrumentName'

#{
  \override InstrumentName.after-line-breaking =

```
{ c''1 \break c'' \break c'' }
>>
```

Drawing boxes around grobs

The `print`-function can be overridden to draw a box around an arbitrary grob.

```
\relative c'' {
  \override TextScript.stencil =
    #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
  c'4^"foo"

  \override Stem.stencil =
    #(make-stencil-boxer 0.05 0.25 ly:stem::print)
  \override Score.RehearsalMark.stencil =
    #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
  b8

  \revert Stem.stencil
  \revert Flag.stencil
  c4. c4
  \mark \default
  c1
}
```

Drawing circles around note heads

Here is how to circle a note.

```
circle =
\once \override NoteHead.stencil = #(lambda (grob)
  (let* ((note (ly:note-head::print grob))
        (combo-stencil (ly:stencil-add
          note
          (circle-stencil note 0.1 0.8))))
    (ly:make-stencil (ly:stencil-expr combo-stencil)
      (ly:stencil-extent note X)
      (ly:stencil-extent note Y))))

{ \circle c' }
```

Drawing circles around various objects

The `\circle` markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

```
\relative c' {
  c1
  \set Score.rehearsalMarkFormatter =
    #(lambda (mark context)
      (make-circle-markup (format-mark-numbers mark context)))
  \mark \default

  c2 d~\markup {
    \override #'(thickness . 3) {
      \circle \finger 2
    }
  }
  \override Score.BarNumber.break-visibility = #all-visible
  \override Score.BarNumber.stencil =
    #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
}
```

Embedding native PostScript in a `\markup` block

PostScript code can be directly inserted inside a `\markup` block.

% PostScript is a registered trademark of Adobe Systems Inc.

```
\relative c' {

}
}

```

Martellato e strappato

Il martellato (hammer on) e lo strappato (pull off) si possono ottenere con le legature di portamento.

```

\new TabStaff {
  \relative c' {
    d4( e\2)
    a( g)
  }
}

```

Martellato e strappato usando accordi

Quando il martellato o lo strappato si applicano a delle note in un accordo, viene disegnato un solo arco. Ma è possibile avere un “doppio arco” impostando la proprietà `doubleSlurs` su `##t`.

```

\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g' b>8( <a c> <g b>)
  }
}

```

Martellato e strappato usando le voci

L'arco del martellato o dello strappato è rivolto in alto nella prima e terza voce, mentre è rivolto in basso nella seconda e quarta voce.

```
\new TabStaff {
  \relative c' {
    << { \voiceOne g2( a) }
    \\ { \voiceTwo a,( b) }
    >> \oneVoice
  }
}
```

Rendere alcune linee del rigo più spesse delle altre

In ambito didattico può essere utile rendere più spesso una linea del rigo (per esempio, la linea centrale, o per sottolineare la linea della chiave di Sol). Per farlo si possono aggiungere altre linee e posizzarle molto vicino alla linea che deve essere evidenziata, usando la proprietà `line-positions` dell'oggetto `StaffSymbol`.

```
{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}
```

Marking notes of spoken parts with a cross on the stem (Sprechstimme)

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the `\speakOn` keyword, and end it with the `\speakOff` keyword.

```
speakOn = {
  \override Stem.stencil =
    #(lambda (grob)
      (let* ((x-parent (ly:grob-parent grob X))
             (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
        (if is-rest?
            empty-stencil
            (ly:stencil-combine-at-edge
              (ly:stem::print grob)
              (ly:stem::print grob)
              (ly:stem::print grob)
              (ly:stem::print grob))))))
```

```

        Y
        (- (ly:grob-property grob 'direction))
        (grob-interpret-markup grob
          (markup #:center-align #:fontsize -4
                 #:musicglyph "noteheads.s2cross"))
        -2.3))))
}

speakOff = {
  \revert Stem.stencil
  \revert Flag.stencil
}

\score {
  \new Staff {
    \relative c'' {
      a4 b a c
      \speakOn
      g4 f r g
      b4 r d e
      \speakOff
      c4 a g f
    }
  }
}

```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```

<<
  \context Voice = "foo" {
    \clef bass
    c4 r g r
    c4 r g r
    c4 r g r
    c4 r g r
  }
  \context Voice = "foo" {
    \set countPercentRepeats = ##t
    \hide PercentRepeat
    \override PercentRepeatCounter.staff-padding = #1
    \repeat percent 4 { s1 }
  }
>>

```

Measure spanner

Measure spanners are an alternate way to print annotated brackets. As opposed to horizontal brackets, they extend between two bar lines rather than two notes. The text is displayed in the center of the bracket.

```
\paper { tagline = ##f }

\layout {
  \context {
    \Staff
    \consists Measure_spanner_engraver
  }
}

<<
\new Staff \relative c' {
  \key d \minor
  R1*2
  \tweak text "Answer"
  \startMeasureSpanner
  \tuplet 3/2 8 {
    a16[ b c] d[ c b] c[ d e] f[ e d]
  }
  e8 a gis g
  fis f e d~ d c b e
  \stopMeasureSpanner
}
\new Staff \relative c' {
  \key d \minor
  \tweak text "Subject"
  \tweak direction #DOWN
  \startMeasureSpanner
  \tuplet 3/2 8 {
    d16[ e f] g[ f e] f[ g a] bes[ a g]
  }
  a8 d cis c
  b bes a g~ g f e a
  \stopMeasureSpanner
  \tweak text "Counter-subject"
  \tweak direction #DOWN
  \startMeasureSpanner
  f8 e a r r16 b, c d e fis g e
  a gis a b c fis, b a gis e a4 g8
  \stopMeasureSpanner
}
>>
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
```

```

\bar ""
\break
e'4 d'
\repeat unfold 7 {
  g'4 f' e' d'
}
\stopMeasureCount
}

```

The image shows three staves of musical notation. The first staff contains measures 1 through 7, each with a measure number above it. The second staff starts with a measure number '8' at the beginning and contains measures 2 through 7, with measure numbers above. The third staff starts with a measure number '(7)' at the beginning and contains measures 8 through 14, with measure numbers above. The music is written in a treble clef with a common time signature (C) and consists of a sequence of eighth notes in a C major scale.

Positioning fingering indications precisely

Generally the options available for positioning the fingering of chords work well by default, but if one of the indications needs to be positioned more precisely the following tweak may be used. This is particularly useful for correcting the positioning when intervals of a second are involved.

```

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 d-2 a'-5>4
  <c-1 d-\tweak extra-offset #'(0 . 0.2)-2 a'-5>4
  \set fingeringOrientations = #'(down)
  <c-1 d-2 a'-5>4
  <c-\tweak extra-offset #'(0 . -1.1)-1
    d-\tweak extra-offset #'(-1.2 . -1.8)-2 a'-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 d-\tweak extra-offset #'(-0.3 . 0)-2 a'-5>4
  <c-1 d-\tweak extra-offset #'(-1 . 1.2)-2 a'-5>4
  \set fingeringOrientations = #'(up)
  <c-1 d-\tweak extra-offset #'(0 . 1.1)-2
    a'-\tweak extra-offset #'(0 . 1)-5>4
  <c-1 d-\tweak extra-offset #'(-1.2 . 1.5)-2
    a'-\tweak extra-offset #'(0 . 1.4)-5>4
}

```

The image shows a single staff of musical notation in a treble clef with a common time signature (C). The music consists of a sequence of eighth notes in a C major scale. Above and below the notes are various fingering numbers (1, 2, 5) and offsets, indicating precise positioning for each note. The notes are grouped into pairs, and the offsets are used to adjust the placement of the fingering numbers relative to the notes.

Posizionare il testo a margine dentro le legature di portamento

I testi a margine devono avere la proprietà `outside-staff-priority` impostata su `false` per poter apparire dentro le legature di portamento.

```
\relative c'' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(~\markup { \halign #-10 \natural } d4.) c8
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_\markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #(\define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
```

```

b c d e f\stopTextSpan
\stringNumberSpanner "4"
g\startTextSpan a
bes4 a g2\stopTextSpan
}

```

Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```

parallelogram =
  #(ly:make-stencil (list 'embedded-ps
    "gsave
      currentpoint translate
      newpath
      0 0.25 moveto
      1.3125 0.75 lineto
      1.3125 -0.25 lineto
      0 -0.75 lineto
      closepath
      fill
      grestore" )
    (cons 0 1.3125)
    (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

\relative c' {
  \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d
}

```

Uso della proprietà whiteout

Qualsiasi oggetto grafico può essere posizionato sopra uno sfondo bianco per mascherare parti degli oggetti che si trovano sotto. Ciò può essere utile per migliorare l'aspetto delle collisioni in situazioni complesse in cui il riposizionamento degli oggetti è troppo difficile. Bisogna impostare esplicitamente la proprietà `layer` (livello) per controllare quali oggetti debbano essere mascherati dallo sfondo bianco.

In questo esempio la collisione della legatura di valore con l'indicazione di tempo viene migliorata mascherando la parte della legatura che incrocia l'indicazione di tempo impostando la proprietà `whiteout` di `TimeSignature`. Per farlo si sposta `TimeSignature` su un livello superiore a `Tie`, che viene lasciato al livello predefinito 1; e `StaffSymbol` viene spostato su un livello superiore a `TimeSignature` in modo che non venga mascherato.

```
{  
  \override Score.StaffSymbol.layer = #4  
  \override Staff.TimeSignature.layer = #3  
  b'2 b'~  
  \once \override Staff.TimeSignature.whiteout = ##t  
  \time 3/4  
  b' r4  
}
```

Adding markups in a tablature

By default markups does not show in a tablature.

To make them appear, simply use the command `\revert TabStaff.TextScript.stencil`

```
%% http://lsr.di.unimi.it/LSR/Item?id=919
```

```
% by P.P.Schneider on June 2014
```

```
high = { r4 r8 <g c'> q r8 r4 }
```

```
low = { c4 r4 c8 r8 g,8 b, }
```

```
pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }
```

```
\score {
  \new TabStaff {
    \repeat unfold 2 << \high \low \pulse >>
  }
  \layout {
    \context {
      \TabStaff
    }
  }
}
```

```

\clef moderntab
\revert TextScript.stencil
\override TextScript.font-series = #'bold
\override TextScript.font-size = #-2
\override TextScript.color = #red

}
\context {
  \Score
  proportionalNotationDuration = #(ly:make-moment 1/8)
}
}
}

```

	1 & 2 & 3 & 4 &				1 & 2 & 3 & 4 &			
T	1-1	1-1	1-1	1-1	1-1	1-1	1-1	1-1
A	0-0	0-0	0-0	0-0	0-0	0-0	0-0	0-0
B	3	3	2	3	3	3	2	2
	3			3			3	

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```

% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))

```

```

% use it in the title block:
\header {
  title = "Including the date!"
  subtitle = \date
}

```

```

\score {
  \relative c'' {
    c4 c c c
  }
}

```

```

% and use it in a \markup block:
\markup {
  \date
}

```

Including the date!

18-11-2023

18-11-2023

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

```
% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
    #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

The image displays two musical staves, each with a treble clef and a common time signature (C). The melody consists of quarter notes: C4, D4, E4, F4, G4, F4, E4, D4, followed by a whole note C4. The lyrics 'aa aa aa aa aa aa aa aa' are positioned directly below the notes, with the final 'aa' aligned under the whole note. The vertical spacing between the staff lines and the lyrics is significantly reduced compared to the default layout.

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName.self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper { left-margin = 3\cm }

\score {
  \new StaffGroup <<

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
      }
    }
  }
}
```

```

    shortInstrumentName = "Left"
  }

  { c'1 \break c'1 }

\new Staff \with {
  \override InstrumentName.self-alignment-X = #CENTER
  instrumentName = \markup \center-column {
    Centered
    "instrument name"
  }
  shortInstrumentName = "Centered"
}

{ g'1 g'1}

\new Staff \with {
  \override InstrumentName.self-alignment-X = #RIGHT
  instrumentName = \markup \right-column {
    "Right aligned"
    "instrument name"
  }
  shortInstrumentName = "Right"
}

{ e'1 e'1 }

>>

\layout {
  ragged-right = ##t
  indent = 4\cm
  short-indent = 2\cm
}
}

```

Left aligned
instrument name

Centered
instrument name

Right aligned
instrument name

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
\score {
  <<
    \new Staff {
      \relative c''
      \new Voice = "vocal" {
        c d~\markup default d e
        c d~\markup "right aligned" d e
        c d~\markup "center aligned" d e
        c d~\markup "reset to default" d e
      }
    }
    \new Lyrics \lyricsto "vocal" {
      word word word
      \set lyricMelismaAlignment = #RIGHT
      word word word
      \set lyricMelismaAlignment = #CENTER
      word word word
      \unset lyricMelismaAlignment
      word word word
    }
  >>
}
```

Blanking staff lines using the `\whiteout` command

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```
\layout {
  ragged-right = ##f
}
```

```
\relative c' {
```

```
\override TextScript.extra-offset = #'(2 . 4)
c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```
\paper { tagline = ##f }

hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
      #(lambda (grob)
        (let* ((stencil (ly:hairpin::print grob))
              (par-y (ly:grob-parent grob Y))
              (dir (ly:grob-property par-y 'direction))
              (staff-line-thickness
                (ly:output-def-lookup (ly:grob-layout grob) 'line-thickness))
              (new-stencil (ly:stencil-aligned-to
                (ly:stencil-combine-at-edge
                  (ly:stencil-aligned-to stencil X CENTER)
                  Y dir
                  (ly:stencil-aligned-to
                    (grob-interpret-markup
                      grob
                      (make-fontsize-markup
                        (magnification->font-size
                          (+ (ly:staff-symbol-staff-space grob)
                            (/ staff-line-thickness 2)))
                          text)) X CENTER))
                  X LEFT))
              (staff-space (ly:output-def-lookup
                (ly:grob-layout grob) 'staff-space))
              (par-x (ly:grob-parent grob X))

  \hairpinMolto
  c2^\< c\f
  \hairpinMore
  c2\ppppp\< c\f
}

```

Changing ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief ottava is used.

```

{
  c'2

```

```

\ottava #1
\set Staff.ottavation = #"8"
c''2
\ottava #0
c'1
\ottava #1
\set Staff.ottavation = #"Text"
c''1
}

```

Changing the default text font family

The default font families for text can be overridden with `make-pango-font-tree`.

```

%{
You may have to install additional fonts.

```

Red Hat Fedora

```

dejavu-fonts-all

```

Debian GNU/Linux, Ubuntu

```

fonts-dejavu-core
fonts-dejavu-extra
%}

```

```

\paper {
% change for other default global staff size.
myStaffSize = #20
%{
run
lilypond -dshow-available-fonts
to show all fonts available in the process log.
%}

```

```

#(define fonts
(make-pango-font-tree "DejaVu Serif"
"DejaVu Sans"
"DejaVu Sans Mono"
(/ myStaffSize 20)))
}

```

```

{
g''''4^\markup {

\italic italic
\italic \bold { bold italic }
}

```

```

}
g4_\markup {
  \override #'(font-family . sans) {
    DeJaVu Sans: \bold bold
                \italic italic
                \italic \bold { bold italic }
  }
}
g''2^\markup {
  \override #'(font-family . typewriter) {
    DeJaVu Sans Mono: \bold bold
                     \italic italic
                     \italic \bold { bold italic }
  }
}
}
}

```

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a `\markup` block.

```
piuF = \markup { \italic più \dynamic f }
```

```
\layout { ragged-right = ##f }
```

```
\relative c'' {
  c2\f c-\piuF
}
```

Combinare due parti sullo stesso rigo

Lo strumento di unione delle parti (il comando `\partCombine`) permette di combinare varie parti sullo stesso rigo. Indicazioni testuali come “solo” e “a2” sono aggiunte automaticamente; per toglierle basta impostare la proprietà `printPartCombineTexts` su `f`. Per le partiture vocali (inni), non c’è bisogno di aggiungere i testi “solo/a2”, quindi dovrebbero essere disattivati. Tuttavia potrebbe convenire non usarlo se c’è una qualche parte solista, perché non verrebbe indicata. In tali casi è preferibile usare la notazione polifonica normale.

Questo frammento illustra i tre modi con cui due parti possono essere stampate su uno stesso rigo: normale polifonia, `\partCombine` senza testo e `\partCombine` con testo.

```
%% Combining pedal notes with clef changes
```

```

musicUp = \relative c'' {

PartCombine without text

PartCombine with text

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a `\markup` block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the `make-dynamic-script` function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as `\dynamicUp` or `\dynamicDown`.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{ \markup \concat {
      \normal-text \italic \fontsize #2 (
\pad-x #0.2 #(ly:music-property dyn 'text)
\normal-text \italic \fontsize #2 )
      }
    #}))
```

```
\relative c' {
  c4\paren\f c c \dynamicUp c\paren\p
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'dashed-line
  \override TextSpanner.bound-details.left.text =
    \markup { \draw-line #'(0 . 1) }
```

```

\override TextSpanner.bound-details.right.text =
  \markup { \draw-line #'(0 . -2) }
\once \override TextSpanner.bound-details.right.padding = #-2

a4 \startTextSpan
b4 c
a4 \stopTextSpan

\set Staff.middleCPosition = #-13
\override TextSpanner.dash-period = #10
\override TextSpanner.dash-fraction = #0.5
\override TextSpanner.thickness = #10
a4 \startTextSpan
b4 c
a4 \stopTextSpan
}

```

    }
  }
}

```

Il y avait en Westphalie, dans le château de M. le
 baron de Thunder-ten-tronckh, un jeune garçon à qui
 la nature avait donné les mœurs les plus douces. Sa
 physionomie annonçait son âme. Il avait le jugement

assez droit, avec l'esprit le plus simple ; c'est, je crois, pour cette raison qu'on le nommait Candide. Les anciens domestiques de la maison soupçonnaient qu'il était fils de la sœur de monsieur le baron et d'un bon et honnête gentilhomme du voisinage, que cette demoiselle ne voulut jamais épouser parce qu'il n'avait pu prouver que soixante et onze quartiers, et que le reste de son arbre généalogique avait été perdu par l'injure du temps.

Monsieur le baron était un des plus puissants seigneurs de la Westphalie, car son château avait une porte et des fenêtres. Sa grande salle même était ornée d'une tapisserie. Tous les chiens de ses basses-cours composaient une meute dans le besoin ; ses palefreniers étaient ses piqueurs ; le vicaire du village était son grand-aumônier. Ils l'appelaient tous monseigneur, et ils riaient quand il faisait des contes.

Testo a margine delle pause multiple

Il testo a margine di una pausa multipla viene centrato sopra o sotto di essa. Se il testo è lungo, la misura non si espanderà. Per espandere la pausa multipla in modo che si allinei col testo, conviene usare un accordo vuoto con del testo attaccato prima della pausa multipla.

Il testo così attaccato a una nota spaziatrice viene allineato a sinistra della posizione in cui la nota sarebbe posta nella misura, ma se la lunghezza della misura è determinata dalla lunghezza del testo, il testo verrà centrato.

```

  }
}
```

Of the ubiquity of markup objects

Text objects are entered either as simple strings between double quotes or as `\markup` blocks that can accept a variety of advanced text formatting and graphical enhancements.

As such, markup blocks may be used:

- in any `TextScript` object (attached to notes with `-`, `^` or `_`),
- any `TextMark` introduced with the `\textMark` or `\textEndMark` command, or other similar objects such as `MetronomeMark` introduced with `\tempo`,
- as standalone markup blocks, entered at the top level outside of any `\score` block,
- in any definition inside the `\header` block (e.g. title, subtitle, composer) or in some variables defined inside the `\paper` block such as `evenHeaderMarkup` for page numbers.

`\markup` may additionally be used for lyrics, in chord names, and as dynamics. In fact, it is possible to use `\markup` to customize the appearance of virtually any object, as demonstrated in this example using various methods.

Outputting the version number

It is possible to print the version number of LilyPond in markup.

```
\markup { Processed with LilyPond version #(lilypond-version) }
```

Processed with LilyPond version 2.24.3

Modello per pianoforte con testo al centro

Invece di destinare un rigo a parte alla linea melodica e al suo testo, è possibile collocare il testo al centro di un doppio pentagramma per pianoforte.

```
upper = \relative c'' {
```

```

\clef treble
\key c \major
\time 4/4

a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score {
  \new PianoStaff <<
    \new Staff = upper { \new Voice = "singer" \upper }
    \new Lyrics \lyricsto "singer" \text
    \new Staff = lower { \lower }
  >>
  \layout { }
  \midi { }
}

```

A musical score for a piano piece. The score is written for two staves: a treble clef staff (upper) and a bass clef staff (lower). The time signature is 4/4. The key signature is C major. The melody in the treble staff consists of four quarter notes: A4, B4, C5, and D5. The bass staff has a whole note chord of A2 and C3. The lyrics 'Aaa Bee Cee Dee' are written below the treble staff.

Stampare i numeri di battuta a intervalli regolari variabili

Tramite la funzione di contesto `{set-bar-number-visibility}` si possono modificare gli intervalli dei numeri di battuta.

```

\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \context Score \applyContext #(set-bar-number-visibility 4)
  \repeat unfold 10 c'1
  \context Score \applyContext #(set-bar-number-visibility 2)
  \repeat unfold 10 c
}

```

A musical score showing ten measures of music on a single treble clef staff. The time signature is 4/4. The key signature is C major. The melody consists of ten whole notes: C4, C4, C4, C4, C4, C4, C4, C4, C4, and C4. The bar numbers 5 and 9 are printed above the staff, indicating the end of a line of music.

Stampare le indicazioni su ogni rigo

Sebbene le indicazioni testuali siano di norma collocate solo sopra il rigo più alto, è possibile farle apparire su ogni rigo.

```
\score {
  <<
    \new Staff { \mark \default c'1 \textMark "molto" c' }
    \new Staff { \mark \default c'1 \textMark "molto" c' }
  >>
  \layout {
    \context {
      \Score
      \remove Mark_engraver
      \remove Text_mark_engraver
      \remove Staff_collecting_engraver
    }
    \context {
      \Staff
      \consists Mark_engraver
      \consists Text_mark_engraver
      \consists Staff_collecting_engraver
    }
  }
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_\markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```
<<
\new Staff <<
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {
  \override LyricText.extra-offset = #'(0 . 8.6)
  \override LyricExtender.extra-offset = #'(0 . 8.6)
  \override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la _ _ la }
>>
```

Testo separato su due colonne

Il testo separato può essere disposto su varie colonne con i comandi di `\markup`:

```
\markup {
  \fill-line {
    \hspace #1
    \column {
      \line { 0 sacrum convivium }
      \line { in quo Christus sumitur, }
      \line { recolitur memoria passionis ejus, }
      \line { mens impletur gratia, }
      \line { futurae gloriae nobis pignus datur. }
      \line { Amen. }
    }
    \hspace #2
    \column \italic {
      \line { 0 sacred feast }
      \line { in which Christ is received, }
      \line { the memory of His Passion is renewed, }
      \line { the mind is filled with grace, }
      \line { and a pledge of future glory is given to us. }
      \line { Amen. }
    }
  }
  \hspace #1
}
```

}

O sacrum convivium
 in quo Christus sumitur,
 recolitur memoria passionis ejus,
 mens impletur gratia,
 futurae gloriae nobis pignus datur.
 Amen.

*O sacred feast
 in which Christ is received,
 the memory of His Passion is renewed,
 the mind is filled with grace,
 and a pledge of future glory is given to us.
 Amen.*

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
  b c d e f\stopTextSpan
  \stringNumberSpanner "4"
  g\startTextSpan a
  bes4 a g2\stopTextSpan
}
```

Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

```
% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
        (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
```

```

      (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
      (x-rule (make-filled-box-stencil
                (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
@code{box-padding} and @code{font-size} properties to determine line
thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding))
        (m (interpret-markup layout props arg)))
    (NWS-box-stencil m thickness pad)))

% Test it:

\relative c' {
  c1^\markup { \NWS-box ABCD }
  c1^\markup { \NWS-box \note {4} #1.0 }
}

```

UTF-8

Various scripts may be used for texts (like titles and lyrics) by entering them in UTF-8 encoding, and using a Pango based backend. Depending on the fonts installed, this fragment will render Bulgarian (Cyrillic), Hebrew, Japanese and Portuguese.

```

%{
You may have to install additional fonts.

```

The image shows a musical score for a single staff in common time (C). The melody consists of quarter notes: C4, D4, E4, F4, G4, A4, B4, C5. The lyrics are: hi hi hi hi, ha ha ha ha, hu hu hu hu, ho ho ho ho. The notes are aligned with the lyrics: 'hi' is above the first four notes, 'ha' is below the next four notes, 'hu' is below the next four notes, and 'ho' is below the final four notes.

Volta text markup using repeatCommands

Though volte are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#(list (list 'volta textIdentifier))`. Start- and end-repeat commands can be added as separate list elements:

```

voltaAdLib = \markup { 1. 2. 3... \text \italic { ad lib. } }

\relative c' {
  c1
  \set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
  c4 b d e
  \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
  f1
}

```

```
\set Score.repeatCommands = #'((volta #f))  
}
```

Vocal music

```

Adding indicators to staves which get split after a break

This snippet defines the `\splitStaffBarLine`, `convUpStaffBarLine` and `convDownStaffBarLine` commands. These add arrows at a bar line, to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

```
##(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* (
    (PI-OVER-180 (/ (atan 1 1) 34))
    (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
    (angle-rad (degrees->radians angle-deg))
    (target-x (* length (cos angle-rad)))
    (target-y (* length (sin angle-rad))))
    (interpret-markup layout props
      (markup

Aggiungere citazioni orchestrali a una partitura vocale

L'esempio seguente mostra un approccio per semplificare l'aggiunta di citazioni orchestrali a una riduzione per pianoforte di una partitura vocale. La funzione musicale `\cueWhile` prende quattro argomenti: la musica da cui prendere la citazione, come è definita da `\addQuote`, il nome da inserire prima delle notine, poi `#UP` o `#DOWN` per specificare o `\voiceOne` col nome sopra il rigo o `\voiceTwo` col nome sotto il rigo, e infine la musica per pianoforte che deve apparire in parallelo alle notine. Il nome dello strumento citato è posto a sinistra delle notine. Molti passaggi possono essere citati, ma non possono sovrapporsi l'un l'altro nel tempo.

`cueWhile =`

```
#{define-music-function
```

```
  (instrument name dir music)
```

```
  (string? string? ly:dir? ly:music?)
```

```
  #{
```

```
    \cueDuring $instrument #dir {
```

```
      \once \override TextScript.self-alignment-X = #RIGHT
```

```

A musical score snippet in common time (C). The top staff is a vocal line with the lyrics "here's the lyrics". The bottom two staves are for Flute and Clarinet accompaniment. The melody consists of quarter notes: C4, D4, E4, F4, G4, F4, E4, D4.

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:

```
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
    #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

A musical score snippet in common time (C) showing two staves of music. The top staff has a melody of quarter notes: C4, D4, E4, F4, G4, F4, E4, D4. The bottom staff has a similar melody. The lyrics "aa aa aa aa aa aa aa aa" are placed below the notes, with the first syllable of each word aligned with the start of the note.

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
\score {
```

```

<<
  \new Staff {
    \relative c''
    \new Voice = "vocal" {
      c d~^\markup default d e
      c d~^\markup "right aligned" d e
      c d~^\markup "center aligned" d e
      c d~^\markup "reset to default" d e
    }
  }
  \new Lyrics \lyricsto "vocal" {
    word word word

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. `AmbitusNoteHead` grobs also have ledger lines.

```

\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

```

```

<<
  \new Staff {
    \relative c' {
      \time 2/4
      c4 f'
    }
  }
  \new Staff {
    \relative c' {
      \time 2/4
      \key d \major
      cis4 as'
    }
  }

```

```
}
>>
```

Ambitus dopo armatura di chiave

Per impostazione predefinita, gli ambitus sono posizionati a sinistra della chiave. La funzione `\ambitusAfter` permette di cambiare questo posizionamento. La sintassi è `\ambitusAfter grob-interface` (vedi Graphical Object Interfaces (<http://lilypond.org/doc/v2.22/Documentation/internals/graphical-object-interfaces>) per un elenco dei possibili valori per `grob-interface`.)

Un caso d'uso comune è il posizionamento dell'ambitus tra l'armatura di chiave e l'indicazione di tempo.

```
\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
```

Ambitus su più voci

Se si aggiunge l'incisore `Ambitus_engraver` al contesto `Staff` viene creato un solo ambitus per il rigo, anche nel caso di righe che hanno più voci.

```
\new Staff \with {
  \consists "Ambitus_engraver"
}

sal | vation.

8. Today if ye will hear his voice *
harden ' not your ' hearts : as in the pro-
vocation * and as in the **day** of tempt- '
-ation ' in the ' wilderness.

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```
\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f
  }
}
```

```
aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }
```

```
<<
\new Staff <<
  \new Voice = "alice" {
    f'4^\aliceSings g' r2 |
    s1 |
    f'4^\aliceSings g' r2 |
    s1 | \break
    % ...

    \voiceOne
    s2 a'8^\aliceSings a' b'4 |
    \oneVoice
    g'1
  }
  \new Voice = "eve" {
    s1 |
```

```

a'2^\eveSings g' |
s1 |
a'2^\eveSings g'
% ...

\voiceTwo
f'4^\eveSings a'8 g' f'4 e' |
\oneVoice
s1
}
>>
\new Lyrics \lyricsto "alice" {
  may -- be
  sec -- ond
  % ...
  Shut up, you fool!
}
\new Lyrics \lyricsto "eve" {
  that the
  words are
  % ...
  ...and then I was like--
}
>>

```

The musical score consists of two staves. The first staff is in common time (C) and features two voices: ALICE and EVE. ALICE sings the notes G4, A4, B4, and C5, corresponding to the lyrics 'may-be'. EVE sings the notes G4, A4, B4, and C5, corresponding to the lyrics 'that the'. The second staff continues the melody. ALICE sings G4, A4, B4, and C5, corresponding to 'sec-ond'. EVE sings G4, A4, B4, and C5, corresponding to 'words are'. The third staff starts with a measure rest for ALICE, then EVE sings G4, A4, B4, and C5, corresponding to '...and then I'. ALICE then sings G4, A4, B4, and C5, corresponding to 'Shut up, you like-'. The fourth staff shows EVE singing G4, A4, B4, and C5, corresponding to 'fool!'.

Changing stanza fonts

Fonts can be changed independently for each stanza, including the font used for printing the stanza number.

Great is Thy

Great is Thy

Great is Thy

Great is Thy

Detailed description: This musical system features two staves, treble and bass clef, in a key signature of two sharps (D major) and a 3/4 time signature. The lyrics 'Great is Thy' are written above the treble staff and below the bass staff. The treble staff contains three chords: a D major chord (D4, F#4, A4) for 'Great', a D major chord (D4, F#4, A4) for 'is', and a D major chord (D4, F#4, A4) for 'Thy'. The bass staff contains three chords: a D major chord (D3, F#3, A3) for 'Great', a D major chord (D3, F#3, A3) for 'is', and a D major chord (D3, F#3, A3) for 'Thy'. The lyrics are aligned with the notes on the staff.

Modello per pianoforte con melodia e testo

Ecco un tipico formato per canzoni: un rigo con linea melodica e testo, e sotto l'accompagnamento per pianoforte.

```
melody = \relative c'' {
  \clef treble
  \key c \major
  \time 4/4

  a b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

upper = \relative c'' {
```

```

\clef treble
\key c \major
\time 4/4

a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

\score {
  <<
  \new Voice = "mel" { \autoBeamOff \melody }
  \new Lyrics \lyricsto mel \text
  \new PianoStaff <<
    \new Staff = "upper" \upper
    \new Staff = "lower" \lower
  >>
  >>
  \layout {
    \context { \Staff \RemoveEmptyStaves }
  }
  \midi { }
}

```

The image shows a musical score for the piece 'Aaa Bee Cee Dee'. It consists of three staves. The top staff is a vocal line in treble clef, 4/4 time, with a key signature of one flat (Bb). The melody consists of four quarter notes: A4, B4, C5, and D5. The lyrics 'Aaa Bee Cee Dee' are written below the staff, with 'Aaa' under the first note, 'Bee' under the second, 'Cee' under the third, and 'Dee' under the fourth. The bottom two staves form a piano accompaniment. The upper staff is in treble clef and contains four quarter notes: A4, B4, C5, and D5. The lower staff is in bass clef and contains two half notes: A2 and C3.

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```

<<
  \new Staff <<
    \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
  >>
  \new Lyrics \with {
    \override LyricText.extra-offset = #'(0 . 8.6)
  }

```

```

\override LyricExtender.extra-offset = #'(0 . 8.6)
\override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la _ _ la }
>>

}

```

The image shows three guitar chord diagrams for C, G, and C. Each diagram is a 6-string grid with 'x' marks for muted strings and dots for fretted notes. The first C chord has x's on strings 1, 2, and 3, and notes on strings 4, 5, and 6. The G chord has x's on strings 1, 2, and 3, and notes on strings 4, 5, and 6. The second C chord has x's on strings 1, 2, and 3, and notes on strings 4, 5, and 6. Below the diagrams is a musical staff in treble clef with a common time signature (C). The melody consists of four quarter notes: C4, D4, E4, and F4.

1. This is the first verse
2. This is the second verse.

Modello di riga singolo con note e testo

Questo piccolo modello presenta una semplice linea melodica con un testo. Copialo e incollalo, aggiungi le note e le parole. Questo esempio disabilita la disposizione automatica delle travature, come è consuetudine per le parti vocali. Per usare la disposizione automatica delle travature, cambia o commenta la relativa linea di codice.

```

melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score{
  <<
  \new Voice = "one" {
    \autoBeamOff
    \melody
  }
  \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
}

```

```
\midi { }
}
```

Skips in lyric mode

The `s` syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the `\skip` command is recommended.

```
<<
  \relative c'' { a1 | a }
  \new Lyrics \lyricmode { \skip 1 bla1 }
>>
```

Skips in lyric mode (2)

Although `s` skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes (“”) or underscores (_) are available.

So for example:

```
<<
  \relative c'' { a4 b c d }
  \new Lyrics \lyricmode { a4 "" _ gap }
>>
```

Usare arpeggioBracket per rendere i divisi più visibili

Si può usare `arpeggioBracket` per indicare la divisione delle voci quando non ci sono gambi che forniscano questa informazione. Questo caso è frequente nella musica corale.

```
\include "english.ly"
```

```
\score {
  \relative c'' {
    \key a \major
    \time 2/2
    <<
      \new Voice = "upper"
      <<
        { \voiceOne \arpeggioBracket
          a2( b2
```

```

        <b d>1\arpeggio)
        <cs e>\arpeggio ~
        <cs e>4
    }
    \addlyrics { \lyricmode { A -- men. } }
>>
\new Voice = "lower"
{ \voiceTwo
  a1 ~
  a
  a ~
  a4 \bar "|."
}
>>
}
\layout { ragged-right = ##t }
}

```

Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente

Usando le etichette (tag), è possibile usare la stessa musica per produrre sia la musica mensurale che quella moderna. In questo frammento, viene introdotta la funzione `menrest`, che permette alle pause mensurali di essere posizionate precisamente sul rigo come nell'originale, ma con le pause moderne nella posizione standard. Le etichette vengono usate per produrre diversi tipi di stanghetta alla fine della musica, ma possono essere usate anche quando sono necessarie altre differenze: per esempio se si vogliono usare “pause d'intero” (`R1`, `R\breve`, etc.) nella musica moderna, ma pause normali (`r1`, `r\breve`, etc.) nella versione mensurale. La conversione di musica mensurale nel suo equivalente moderno viene solitamente chiamata trascrizione.

```

menrest = #(define-music-function (note)
  (ly:music?)
  #{
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  #})

```

```

MenStyle = {
  \autoBeamOff
  \override NoteHead.style = #'petrucci
  \override Score.BarNumber.transparent = ##t
  \override Stem.neutral-direction = #up
}

```

```

finalis = \section

Allineare verticalmente gli ossia e il testo vocale

Questo frammento mostra come usare le proprietà di contesto `alignBelowContext` e `alignAboveContext` per controllare il posizionamento del testo vocale e degli ossia.

```
\paper {
  ragged-right = ##t
}

\relative c' <<
  \new Staff = "1" { c4 c s2 }
  \new Staff = "2" { c4 c s2 }
  \new Staff = "3" { c4 c s2 }
  { \skip 2
    <<
      \lyrics {
        \set alignBelowContext = #"1"
        lyrics4 below
      }
      \new Staff \with {
        alignAboveContext = #"3"
        fontSize = #-2
        \override StaffSymbol.staff-space = #(magstep -2)
        \remove "Time_signature_engraver"
      } {
        \tuplet 6/4 {
          \override TextScript.padding = #3
          c8[^"ossia above" d e d e f]
        }
      }
    }
  }
  >>
}
```

The image shows a musical score with three staves. The top staff contains three quarter notes with the text "lyrics below" centered below them. The middle staff contains three quarter notes with the text "ossia above" centered below them. Below the middle staff, there is a sixteenth-note triplet with a "6" above it. The bottom staff contains three quarter notes.

Vertically centered common lyrics

In a vocal piece where there are several (two, four or more) lines of lyrics and common lyrics for all voices at some point, the common lyrics may be made to appear vertically centered, as shown in the following example:

```

dropLyrics = {
  \override LyricText.extra-offset = #'(0 . -4.5)
  \override LyricHyphen.extra-offset = #'(0 . -4.5)
  \override LyricExtender.extra-offset = #'(0 . -4.5)
  \override StanzaNumber.extra-offset = #'(0 . -4.5)
}

raiseLyrics = {
  \revert LyricText.extra-offset
  \revert LyricHyphen.extra-offset
  \revert LyricExtender.extra-offset
  \revert StanzaNumber.extra-offset
}

skipFour = \repeat unfold 4 { \skip 8 }

lyricsA = \lyricmode {
  The first verse has
  \dropLyrics
  \set stanza = #"  All:"
  the com -- mon __ words
  \raiseLyrics
  used in all four.
}

lyricsB = \lyricmode { In stan -- za two,   \skipFour al -- so ap -- pear. }
lyricsC = \lyricmode { By the third verse, \skipFour are get -- ting dull. }
lyricsD = \lyricmode { Last stan -- za, and \skipFour get used once more. }

melody = \relative c' {
  c4 d e f |
  g f e8( e f) d |
  c4 e d c |
}

\score {
  <<
  \new Voice = m \melody
  \new Lyrics \lyricsto m \lyricsA
  \new Lyrics \lyricsto m \lyricsB
  \new Lyrics \lyricsto m \lyricsC
  \new Lyrics \lyricsto m \lyricsD
  >>
}

```

The first verse has used in all four.
 In stan - za two, al - so ap - pear.
 By the third verse, **All:** the common words are get - ting dull.
 Last stan - za, and get used once more.

Modello per complesso vocale

Ecco una tipica partitura corale a quattro parti, SATB. Se il complesso è più ampio, è spesso comodo scrivere gli elementi comuni in un'unica sezione, che verrà poi inclusa in tutte le parti. Ad esempio, l'indicazione di tempo e l'armatura di chiave sono quasi sempre le stesse per tutte le parti. Come nel modello dell'“Inno”, le quattro voci sono ripartite in due soli righi.

Modello per gruppo vocale con riduzione per pianoforte automatica

Questo modello aggiunge una riduzione automatica per pianoforte alla tipica partitura vocale SATB illustrata in “Modello per complesso vocale”. Si dimostra così uno dei punti di forza di LilyPond – è possibile usare una definizione musicale più di una volta. Qualsiasi modifica venga fatta alle note delle voci (ad esempio, `tenorMusic`) verrà applicata anche alla riduzione per pianoforte.

Modello per gruppo vocale con testo allineato sotto e sopra i righi

Questo modello è fondamentalmente analogo al semplice modello “Complesso vocale”, con l’unica differenza che qui tutti i versi del testo sono posizionati usando `alignAboveContext` e `alignBelowContext`.

```

Modello per gruppo vocale con strofa e ritornello

Questo modello crea una partitura che inizia con una sezione solistica e prosegue in un ritornello a due voci. Illustra anche l'uso delle pause spaziatrici all'interno della variabile `\global` per definire i cambi di tempo (e altri elementi comuni a tutte le parti) nel corso di tutta la partitura.

```

global = {
  \key g \major

Chords

Sezione “Chord notation” in *Guida alla Notazione*

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don't want the override to apply to the whole score.

```

bass = {
  \clef bass
  g4 b, c d
  e d8 c d2
}

continuo = \figuremode {
  <_>4 <6>4 <5/>4
  \override Staff.BassFigureAlignmentPositioning.direction = #UP
  %\bassFigureStaffAlignmentUp
  <_+ >4 <6>
  \set Staff.useBassFigureExtenders = ##t
  \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
  %\bassFigureStaffAlignmentDown
  <4>4. <4>8 <_+>4
}

\score {
  <<
    \new Staff = bassStaff \bass
    \context Staff = bassStaff \continuo
  >>
}

```

Aggiungere stanghette al contesto ChordNames

Per mostrare le stanghette nel contesto `ChordNames`, aggiungere l'incisore `Bar_engraver`.

```

\new ChordNames \with {
  \override BarLine.bar-extent = #'(-2 . 2)
  \consists "Bar_engraver"
}

\chordmode {
  f1:maj7 f:7 bes:7
}

```

F^Δ | F⁷ | B^b⁷ |

Adjusting figured bass alteration glyphs

In figured bass, specially designed glyphs for 6\\, 7\\, and 9\\ are used by default. Similarly, specially designed glyphs for symbols 2\\+, 4\\+, and 5\\+ are used by default if plus signs appear after the number.

To change that, pass an alist to `figuredBassPlusStrokedAlist` and set the glyph in question to `#f` (or omit it).

```
\figures {
  \set figuredBassPlusDirection = #RIGHT
  <6\\> <7\\> <9\\> r
  <2\\+> <4\\+> <5\\+> r

  \set figuredBassPlusStrokedAlist =
    #'((2 . "figbass.twoplus")
      ;; (4 . "figbass.fourplus")
      ;; (5 . "figbass.fiveplus")
      (6 . "figbass.sixstroked")
      ;; (7 . "figbass.sevenstroked")
      ;; (9 . "figbass.ninestroked")
    )
  <6\\> <7\\> <9\\> r
  <2\\+> <4\\+> <5\\+> r
}
```

6̣ 7̣ 9̣ 2. 4. 5. 6̣ 7̣ 9̣ 2. 4+ 5+

Modifica del separatore dell'accordo

L'elemento che separa le diverse parti di un accordo può essere impostato su qualsiasi testo di tipo markup.

```
\chords {
  c:7sus4
  \set chordNameSeparator
    = \markup { \typewriter | }
  c:7sus4
}
```

C⁷ sus4 C⁷|sus4

Changing the chord names to German or semi-German notation

The english naming of chords (default) can be changed to german (`\germanChords` replaces B and Bes with H and B) or semi-german (`\semiGermanChords` replaces B and Bes with H and Bb).

```
scm = \chordmode {
  c1/c | cis/cis
  b1/b | bis/bis | bes/bes
```

```

}

\layout {
  ragged-right = ##t
  \context {
    \ChordNames
    \consists "Instrument_name_engraver"
  }
}

```

```

}
\new ChordNames {
  \set instrumentName = #"italian"
  \italianChords \scm
}
\new ChordNames {
  \set instrumentName = #"french"
  \frenchChords \scm
}
\context Voice { \scm }
>>

```

default	C/C	C#/C#	B/B	B#/B#	Bb/Bb
german	C/c	C#/cis	H/h	H#/his	B/b
semi-german	C/c	C#/cis	H/h	H#/his	Bb/b
italian	Do/Do	Do #/Do #	Si/Si	Si #/Si #	Si b/Si b
french	Do/Do	Do #/Do #	Si/Si	Si #/Si #	Si b/Si b

Cambiare la posizione delle alterazioni del basso continuo

Le alterazioni e i segni più possono apparire prima o dopo i numeri, a seconda delle proprietà `figuredBassAlterationDirection` e `figuredBassPlusDirection`.

```

\figures {
  <5\+> <5+ 4\+> <6 4- 2\+> r
  \set figuredBassAlterationDirection = #RIGHT
  <5\+> <5+ 4\+> <6 4- 2\+> r
  \set figuredBassPlusDirection = #RIGHT
  <5\+> <5+ 4\+> <6 4- 2\+> r
  \set figuredBassAlterationDirection = #LEFT
  <5\+> <5+ 4\+> <6 4- 2\+> r
}

```

```

+5 #5 6      +5 5# 6      5# 5# 6      5# #5 6
  +4  b4      +4  4b      4#  4#  4b      4#  4#  b4
   +2         +2         2#         2#

```

Eccezioni dei nomi degli accordi

La proprietà `chordNameExceptions` permette di salvare un elenco di notazioni speciali per accordi specifici.

```

% modify maj9 and 6(add9)
% Exception music is chords with markups
chExceptionMusic = {
  <c e g b d'>1-\markup { \super "maj9" }
  <c e g a d'>1-\markup { \super "6(add9)" }
}

% Convert music to list and prepend to existing exceptions.
chExceptions = #(append
  (sequential-music-to-chord-exceptions chExceptionMusic #t)
  ignatzekExceptions)

theMusic = \chordmode {
  g1:maj9 g1:6.9
  \set chordNameExceptions = #chExceptions

```

Nome dell'accordo di settima maggiore

La formattazione dell'accordo di settima maggiore può essere regolata con la proprietà `majorSevenSymbol`.

```
\chords {
  c:7+
  \set majorSevenSymbol = \markup { j7 }
  c:7+
}
```

C^Δ C^{j7}

Chord names alternative

Chord names are generated from a list of pitches. The functions which construct these names can be customised.

Here are shown chords following Ignatzek (pp. 17-18, 1995), used by default since LilyPond 1.7.20, compared with an alternative Jazz chord notation and Harald Banter's (1987) notation. A smaller font is used in the latter case, as these tend to be overly verbose.

This mirrors the mechanism originally used in early LilyPond versions (pre-1.7); not having been properly maintained, however, some features have been lost (mainly chord exception lists) and bugs have been introduced.

```

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context-property `maximumFretStretch` is set to 4, though. Resulting in a warning about "No string for pitch ..." and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string-numbers to all notes of a chord.

*% The code below will print two warnings, which may be omitted by uncommenting:
 %#(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))*

```
mus = {
  <c' bes'>
  <c'\2 bes'>
  \set maximumFretStretch = 5
  <c' bes'>
  <c'\2 bes'\1>
}
```

```
<<
  \new FretBoards \mus
  \new TabVoice \mus
>>
```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Controllare il posizionamento delle diteggiature di un accordo

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi `<>` anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger #1 e\rightHandFinger #2 c'\rightHandFinger #4 >
}
```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
  \relative c' {
    <<
      { r4
```

```

\override Stem.cross-staff = ##t
\override Stem.length = #19 % this is in half-spaces,
    % so it makes stems 9.5 staffspaces long
\override Stem.Y-offset = #-6 % stems are normally lengthened
    % upwards, so here we must lower the stem by the amount
    % equal to the lengthening - in this case (19 - 7) / 2
    % (7 is default stem length)
e e e }
{ s4
  \change Staff = "bottom"
  \override NoteColumn.ignore-collision = ##t
  c, c c
}
>>
}
\new Staff = bottom
\relative c' {
  \clef bass
  \voiceOne
  g8 a g a g a g a
}
>>

```

Customizing the chord grid style

Custom divisions of chord squares can be defined through the `measure-division-lines-alist` and `measure-division-chord-placement-alist` properties of `ChordSquare`. These are both alists. Their keys are measure divisions, namely lists which give the fraction of the measure that each chord (or rest, or skip) represents. More precisely, a measure division alist is made of positive, exact numbers adding up to 1, for example: '(1/2 1/4 1/4). The exactness requirement means that, e.g., 1/2 is valid but not 0.5.

The values in `measure-division-lines-alist` are lists of lines, which are represented as $(x1\ y1\ x2\ y2)$. The line starts at the point $(x1 . y1)$ and ends at $(x2 . y2)$. Coordinates are expressed in the $[-1, 1]$ scale relative to the extent of the square.

The values in `measure-division-chord-placement-alist` are lists of $(x . y)$ pairs giving the placement of the respective chords.

This example defines a peculiar chord grid style that has a rule for measures divided in three equal parts.

```

\paper {
  line-width = 10\cm
  ragged-right = ##f
}

\new ChordGrid \with {

```

```

\override ChordSquare.measure-division-lines-alist =
  #'(((1) . ())
      ((1/3 1/3 1/3) . ((-1 -0.4 0 1) (0 -1 1 0.4))))
\override ChordSquare.measure-division-chord-placement-alist =
  #'(((1) . ((0 . 0)))
      ((1/3 1/3 1/3) . ((-0.7 . 0.5) (0 . 0) (0.7 . -0.5))))
}
\chordmode {
  \time 3/4
  c2.
  c4 c4 c4
}

```

Customizing the no-chord symbol

By default, rests in a ChordNames context cause the “N.C.” symbol to be printed. This markup can be customized.

```

<<
\chords {
  R1
  \set noChordSymbol = "----"
  R1
  \set noChordSymbol = \markup \italic "Ssh!"
  R1
}
{
  R1*3
}
>>

```

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```

fixA = {
  \once \override Stem.length = #11
}

fixB = {
  \once \override NoteHead.X-offset = #1.7
  \once \override Stem.length = #7
  \once \override Stem.rotation = #'(45 0 0)
}

```

```

\once \override Stem.extra-offset = #'(-0.1 . -0.2)
\once \override Flag.style = #'no-flag
\once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
  << { \fixA <b d!>8 } \ \ { \voiceThree \fixB dis } >> s
}

```

Manually break figured bass extenders for only some numbers

Figured bass often uses extenders to indicate continuation of the corresponding step. However, in this case lilypond is in greedy-mode and uses extenders whenever possible. To break individual extenders, one can simply use a modifier `\!` to a number, which breaks any extender attributed to that number right before the number.

```

bassfigures = \figuremode {
  \set useBassFigureExtenders = ##t
  <6 4>4 <6 4\!> <6 4\!> <6 4\!> | <6\! 4\!> <6 4> <6 4\!> <6 4>
}

<<
  \new Staff \relative c' { c1 c1 }
  \new FiguredBass \bassfigures
>>

```

Print ChordNames with same root and different bass as slash and bass-note

To print subsequent ChordNames only differing in its bass note as slash and bass note use the here defined engraver. The behaviour may be controlled in detail by the `chordChanges` context property.

```

#(define Bass_changes_equal_root_engraver
  (lambda (ctx)
    "For sequential @code{ChordNames} with same root, but different bass, the root
    markup is dropped: D D/C D/B -> D /C /B
    The behaviour may be controlled by setting the @code{chordChanges}
    context-property."
    (let ((chord-pitches '())
          (last-chord-pitches '())
          (bass-pitch #f))
      (make-engraver
        ((initialize this-engraver)

```

```

(let ((chord-note-namer (ly:context-property ctx 'chordNoteNamer)))
  ;; Set 'chordNoteNamer, respect user setting if already done
  (ly:context-set-property! ctx 'chordNoteNamer

Mostrare gli accordi nei cambi

Per impostazione predefinita, ogni accordo inserito viene visualizzato; tale comportamento può essere modificato in modo che i nomi degli accordi siano mostrati solo all'inizio delle linee e quando l'accordo cambia.

```

harmonies = \chordmode {
  c1:m c:m \break c:m c:m d
}

```

```

<<
\new ChordNames {
  \set chordChanges = ##t
  \harmonies
}
\new Staff {
  \relative c' { \harmonies }
}
>>

```

The first staff shows a C minor chord (Cm) in C major mode, with notes C2, Eb, G. The second staff shows a C minor chord (Cm) in C major mode, with notes C2, Eb, G, followed by a D major chord (D) in C major mode, with notes D2, F#, A.

Canzoniere semplice

Mettendo insieme nomi degli accordi, melodia e testo si ottiene un canzoniere (in inglese “lead sheet”):

```

<<
\chords { c2 g:sus4 f e }
\new Staff \relative c'' {
  a4 e c8 e r4
  b2 c4( d)
}
\addlyrics { One day this shall be free __ }
>>

```

One day this shall be free_

Modello di rigo singolo con note, testo e accordi

Ecco il modello di un comune spartito semplificato (lead sheet): include linea melodica, testo vocale e sigle degli accordi.

```

melody = \relative c' {

Accordion-discant symbols

This snippet has been obsoleted by predefined markup commands, see ‘Discant symbols’ in the Notation Reference. It’s still useful as a simple demonstration of how to combine symbols: the placement of the symbols added with `\markup` can be tweaked by changing the `\translate-scaled` arguments. `\translate-scaled` is used here rather than `\translate` in order to let the positioning of the symbol parts adapt to changes of font-size.

```

discant = \markup {
  \musicglyph "accordion.discant"
}
dot = \markup {
  \musicglyph "accordion.dot"
}

\layout { ragged-right = ##t }

The image shows three staves of musical notation for a harpsichord. The first staff begins at measure 1 and contains five measures of music. The second staff begins at measure 6 and also contains five measures. The third staff begins at measure 11 and contains four measures. Each measure consists of a sequence of notes, and above each measure is a circular register symbol containing a certain number of dots, representing the register setting for that measure.

Simboli di registro della fisarmonica

I simboli di registro della fisarmonica sono disponibili sia come `\markup` sia come eventi musicali autonomi (perché i cambi di registro capitano solitamente tra reali eventi musicali). I registri bassi non sono troppo standardizzati. I comandi disponibili si trovano nella sezione «Registri della fisarmonica» della Guida alla notazione.

Changing the text for sustain markings

`Staff.pedalSustainStrings` can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.

```
sustainNotes = { c4\sustainOn d e\sustainOff\sustainOn f\sustainOff }
```

```

\relative c' {
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("P" "P-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("d" "de" "e")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("M" "M-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("Ped" "*Ped" "*")
  \sustainNotes
}

```

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
```

```

c4 f <e d'>4
<g a>8 <e a> a4 c2 <d b>4
e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>

```

Controllare il posizionamento delle diteggiature di un accordo

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi <> anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger #1 e\rightHandFinger #2 c'\rightHandFinger #4 >
}

```

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach's 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\\
  {
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[(
    \hideNotes a)
    \unHideNotes fis](
    \hideNotes a)
    \unHideNotes g[(
    \hideNotes a)
    \unHideNotes gis](
    \hideNotes a)
  }
  >>
}
```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
  \relative c' {
    <<
    { r4
      \override Stem.cross-staff = ##t
      \override Stem.length = #19 % this is in half-spaces,
        % so it makes stems 9.5 staffspaces long
      \override Stem.Y-offset = #-6 % stems are normally lengthened
        % upwards, so here we must lower the stem by the amount
        % equal to the lengthening - in this case (19 - 7) / 2
        % (7 is default stem length)
```

```

        e e e }
      { s4
        \change Staff = "bottom"
        \override NoteColumn.ignore-collision = ##t
        c, c c
      }
    >>
  }
\new Staff = bottom
\relative c' {
  \clef bass
  \voiceOne
  g8 a g a g a g a
}
>>

```

Tremoli attraverso i righi

Dato che `\repeat tremolo` si aspetta esattamente due argomenti musicali per i tremoli di accordi, la nota o l'accordo che cambiano rigo in un tremolo che attraversa i righi devono essere posti tra parentesi graffe insieme al comando `\change Staff`.

```

\new PianoStaff <<
  \new Staff = "up" \relative c' {
    \key a \major
    \time 3/8
    s4.
  }
  \new Staff = "down" \relative c' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
      <a e'>32
      {
        \change Staff = "up"
        \voiceTwo
        <cis a' dis>32
      }
    }
  }
}
>>

```

Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.

```
\paper { ragged-right = ##f }
\relative c' {
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.shorten-pair = #'(-7 . -2)
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.edge-height = #'(0 . 3)
  c2\sostenutoOn c
  c2\sostenutoOff c
}
```

Indicare accordi trasversali al rigo con la parentesi quadrata dell'arpeggio

Una parentesi quadrata dell'arpeggio può indicare che delle note su due righe diversi devono essere suonate con la stessa mano. Per farlo, bisogna far sì che PianoStaff accetti gli arpeggi trasversali ai righe e gli arpeggi siano impostati nella forma della parentesi quadrata nel contesto PianoStaff.

(Debussy, *Les collines d'Anacapri*, m. 65)

```
\new PianoStaff <<
  \set PianoStaff.connectArpeggios = ##t
  \override PianoStaff.Arpeggio.stencil =
    #ly:arpeggio::brew-chord-bracket
  \new Staff {
    \relative c' {
      \key b \major
      \time 6/8
      b8-.(\arpeggio fis'-.\> cis-.
        e-. gis-. b-.)\!\fermata^\laissezVibrer \bar "||"
    }
  }
}
```

```

\clef bass
\key b \major
<<
  {
    <a e cis>2.\arpeggio
  }
  \\  

  {
    <a, e a,>2.
  }
  >>
}
}
>>

```

Modello per combo jazz

Ecco un modello piuttosto complesso, per un gruppo jazz. Si noti che tutti gli strumenti sono in `\key c \major`. Si tratta della tonalità reale; sarà trasposta automaticamente includendo la musica all'interno di una sezione `\transpose`.

```

```

The image shows a musical score for the piece 'Aaa Bee Cee Dee'. It consists of two staves. The top staff is a vocal line in treble clef with a common time signature (C). The notes are A4, B4, C5, and D5, each with a lyric underneath: 'Aaa', 'Bee', 'Cee', and 'Dee' respectively. The bottom staff is a piano accompaniment in bass clef with a common time signature (C). It features a single note A2 in the first measure, followed by a whole rest, and then a single note C3 in the second measure, followed by a whole rest.

Removing brace on first line of piano score

This snippet removes the first brace from a `PianoStaff` or a `GrandStaff`.

It may be useful when cutting and pasting the engraved image into existing music.

It uses `\alterBroken`.

```

Modello per gruppo vocale con riduzione per pianoforte automatica

Questo modello aggiunge una riduzione automatica per pianoforte alla tipica partitura vocale SATB illustrata in “Modello per complesso vocale”. Si dimostra così uno dei punti di forza di LilyPond – è possibile usare una definizione musicale più di una volta. Qualsiasi modifica venga fatta alle note delle voci (ad esempio, `tenorMusic`) verrà applicata anche alla riduzione per pianoforte.

Percussion

Sezione “Percussion” in *Guida alla Notazione*

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```

drh = \drummode {
  cymc4.^"crash" hhc16^"h.h." hh hhc8 hho hhc8 hh16 hh
  hhc4 r4 r2
}
drl = \drummode {
  bd4 sn8 bd bd4 << bd ss >>
  bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
  timh4 ssh timl8 ssh r timh r4
  ssh8 timl r4 cb8 cb
}

\score {
  <<
  \new DrumStaff \with {
    instrumentName = "timbales"
    drumStyleTable = #timbales-style
    \override StaffSymbol.line-count = #2
    \override BarLine.bar-extent = #'(-1 . 1)
  }
  <<
  \timb
  >>
  \new DrumStaff \with { instrumentName = "drums" }
  <<
  \new DrumVoice { \stemUp \drh }
  \new DrumVoice { \stemDown \drl }
  >>
  >>
  \layout { }
  \midi { \tempo 4 = 120 }
}

```

The image shows a musical score for two percussion parts: timbales and drums. The timbales part is on a single staff with a C-clef and a common time signature. It features notes for 'crash', 'h.h.', and other percussion sounds. The drums part is on a single staff with a C-clef and a common time signature. It features notes for 'bd', 'sn', 'tom', and 'cb'. The score is for a 4/4 tempo of 120.

Cow and ride bell example

Two different bells, entered with 'cb' (cowbell) and 'rb' (ridebell).

```
\paper { tagline = ##f }

#(define mydrums '((ridebell default #f 3)
                  (cowbell default #f -2)))

\new DrumStaff \with { instrumentName = #"Different Bells" }

\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \set DrumStaff.clefPosition = 0.5
  \override DrumStaff.StaffSymbol.line-positions = #'(-2 3)
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)

  \time 2/4
  rb8 8 cb8 16 rb16-> ~ |
  16 8 16 cb8 8 |
}
```

Customized drum notation in printed and MIDI output

Customized drum “pitch” names (suitable for a custom drum style, for example) may be used both in printed and MIDI output by defining such variables as `drumPitchNames`, `drumStyleTable` and `midiDrumPitches`, as demonstrated here. In short, this snippet:

- defines some "pitch" names,
- defines how they will be rendered,
- tells LilyPond to use them for layout,
- assigns pitches to the names,
- tells LilyPond to use them for MIDI output.

```
%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#custom-percussion-staves
```

```
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%%
%% To use custom drum pitch names for your score and midi you need to follow
%% this route:
%%
%% LAYOUT:
%%
%% (1) Define a name and put it in `drumPitchNames'
%% This can be done at toplevel with
```

```

%%      drumPitchNames.my-name = #'my-name
%%      It's possible to add an alias as well.
%% (2) Define how it should be printed
%%      Therefore put them into a top-level list, where each entry should
%%      be of the form:
%%      (my-name
%%        note-head-style-or-default
%%        articulation-type-or-#f
%%        staff-position)
%%      Example:
%%      #(define my-style
%%        '(
%%          (my-name default tenuto -1)
%%          ; ...
%%        ))
%% (3) Tell LilyPond to use these custom definitions, with
%%      drumStyleTable = #(alist->hash-table my-style)
%%      in a \layout or \with block
%%
%%      Now we're done for layout. Here is a short but complete example:
%%      \new DrumStaff
%%        \with { drumStyleTable = #(alist->hash-table my-style) }
%%        \drummode { my-name }
%%
%%      %%%%%%%%%%%
%% MIDI:
%%      %%%%%%%%%%%
%%
%% (1) Again at top-level, assign a pitch to your custom note name
%%      midiDrumPitches.my-name = ges
%%      Note that you have to use the name, which is in drumPitchNames, no alias
%% (2) Tell LilyPond to use this pitch(es), with
%%      drumPitchTable = #(alist->hash-table midiDrumPitches)
%%
%%      Example:
%%      \score {
%%        \new DrumStaff
%%        \with {
%%          drumStyleTable = #(alist->hash-table my-style)
%%          drumPitchTable = #(alist->hash-table midiDrumPitches)
%%        }
%%        \drummode { my-name4 }
%%        \layout {}
%%        \midi {}
%%      }
%%
%%      %%%%%%%%%%%
%% TESTING
%%      %%%%%%%%%%%
%%
%%      To test whether all is fine, run the following sequence in terminal:
%%      lilypond my-file.ly

```

```

%%      midi2ly my-file.midi
%%      gedit my-file-midi.ly
%%
%% This will do the following:
%% 1. create pdf and midi
%% 2. transform the midi back to a .ly-file
%%    (note: midi2ly is not always good in correctly identifying enharmonic pitches)
%% 3. open this file in gedit (or use another editor)
%% Now watch what you've got.
%%

High and Low woodblock example

Two Woodblocks, entered with 'wbh' (high woodblock) and 'wbl' (low woodblock). The length of the barline has been altered with an `\override` command otherwise it would be too short. The positions of the two stafflines also have to be explicitly defined.

```
\paper { tagline = ##f }
```

```
% These lines define the position of the woodblocks in the staff;
% if you like, you can change it or you can use special note heads
% for the woodblocks.
```

```
##(define mydrums '((hiwoodblock default #f 3)
                   (lowoodblock default #f -2)))
```

```
woodstaff = {
  % This defines a staff with only two lines.
  % It also defines the positions of the two lines.
  \override Staff.StaffSymbol.line-positions = #'(-2 3)

  % This is necessary; if not entered,
  % the barline would be too short!
  \override Staff.BarLine.bar-extent = #'(-1.0 . 1.5)
  % small correction for the clef:
  \set DrumStaff.clefPosition = 0.5
}
```

```
\new DrumStaff {
  % with this you load your new drum style table
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)

  \woodstaff

  \drummode {
    \time 2/4
    wbl8 16 16 8-> 8 |
    wbl8 16 16-> ~ 16 16 r8 |
  }
}
```

Modello per combo jazz

Ecco un modello piuttosto complesso, per un gruppo jazz. Si noti che tutti gli strumenti sono in `\key c \major`. Si tratta della tonalità reale; sarà trasposta automaticamente includendo la musica all'interno di una sezione `\transpose`.

Song

(tune)

Me

moderato

Swing

The musical score is arranged in a standard orchestral layout. The top section includes Trumpet, Alto Sax, Bari Sax, and Trombone. The bottom section includes Guitar, Piano (with grand staff), Bass, and Drums. The key signature is two sharps (F# and C#), and the time signature is common time (C). The score consists of three measures. In the first measure, all instruments play a whole note chord. In the second measure, the saxophones and guitar play a whole note chord, while the trumpet and trombone are silent. In the third measure, the saxophones and guitar play a whole note chord, while the trumpet and trombone are silent. The Bari Sax part has a 'Solo' marking in the third measure, indicated by four slashes. The Guitar part has a 'Cm^Δ D^{Δ9}' marking in the second measure, also indicated by four slashes. The Piano part plays a steady accompaniment of quarter notes in both hands. The Bass part plays a steady accompaniment of quarter notes. The Drums part plays a steady accompaniment of quarter notes with a snare drum on the second and fourth beats of each measure.

Percussion beaters

Graphic symbols for percussion instruments are not natively supported; however it is possible to include such symbols, either as an external EPS file or as embedded PostScript code inside a markup, as demonstrated in this example.

```
stick = \markup {

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the `Timing_translator` is moved from the Score context to the Staff context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```

\paper {
  indent = #0
  ragged-right = ##t
}

```

```

global = { \time 3/4 { s2.*3 } \bar "" \break { s2.*3 } }

```

Fretted strings

Sezione “Fretted string instruments” in *Guida alla Notazione*

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' ' {
  c4-1 d-2 f-4 e-3
}
```

Adding fingerings to tablatures

To add fingerings to tablatures, use a combination of `\markup` and `\finger`.

```
one = \markup { \finger 1 }
two = \markup { \finger 2 }
threeTwo = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 2
  }
}
threeFour = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 4
  }
}

\score {
  \new TabStaff {
    \tabFullNotation
    \stemUp
    e8\4^\one b\2 <g\3 e'\1>^\two [ b\2 e\4]
    <a\3 fis'\1>^\threeTwo [ b\2 e\4]
  }
}
```

Adding markups in a tablature

By default markups does not show in a tablature.

To make them appear, simply use the command `\revert TabStaff.TextScript.stencil`

```
%% http://lsr.di.unimi.it/LSR/Item?id=919
```

```
% by P.P.Schneider on June 2014
```

```
high = { r4 r8 <g c'> q r8 r4 }
```

```
low = { c4 r4 c8 r8 g,8 b, }
```

```
pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }
```

```

Far sì che la diteggiatura appaia dentro il rigo

Per impostazione predefinita, le diteggiature orientate verticalmente sono poste fuori dal rigo; questo comportamento tuttavia può essere disabilitato. Occorre fare attenzione alle situazioni in cui le diteggiature e i gambi sono rivolti nella stessa direzione: normalmente le diteggiature evitano soltanto i gambi con travature. Questa impostazione predefinita può essere cambiata in modo da evitare tutti i gambi oppure nessuno. L'esempio seguente mostra queste due opzioni, così come tornare al comportamento predefinito.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
```

```

\override Fingering.add-stem-support = ##f
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = ##t
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = #only-if-beamed
a[-1 b]-2 g-0 r
}

```

Automatic Fretboards Barre

When automatic fretboards are used, barre indicators will be drawn whenever one finger is responsible for multiple strings.

If no finger indications are given in the chord from which the automatic fretboard is created, no barre indicators will be included, because there is no way to identify where barres should be placed.

```

\new FretBoards {
  <f,-1 c-3 f-4 a-2 c'-1 f'-1>1
  <f, c f a c' f'>1
}

```

Cambiare l'orientamento della tastiera

I diagrammi dei tasti possono essere orientati in tre modi.

```

\include "predefined-guitar-fretboards.ly"

```

```

<<
  \chords {
    c1
    c1
    c1
  }
  \new FretBoards {
    \chordmode {
      c1
      \override FretBoard.fret-diagram-details.orientation =
        #'landscape
      c1
      \override FretBoard.fret-diagram-details.orientation =
        #'opposing-landscape
      c1
    }
  }
}

```

```

\new Voice {
  c'1
  c'1
  c'
}
>>

```

Glissando di accordi in intavolatura

I glissati (o slide) di accordi vengono indicati sia nel rigo (contesto Staff) sia nell'intavolatura (contesto TabStaff). I numeri di corda sono necessari per TabStaff, perché i calcoli automatici della corda sono diversi per gli accordi e per le note singole.

```

myMusic = \relative c' {
  <c e g>1 \glissando <f a c>
}

```

```

\score {
  <<
    \new Staff {
      \clef "treble_8"
      \myMusic
    }
    \new TabStaff \myMusic
  >>
}

```

```

\score {
  <<
    \new Staff {
      \clef "treble_8"
      \myMusic
    }
    \new TabStaff \with { \override Glissando.style = #'none } {
      \myMusic
    }
  >>
}

```

Cambi di accordo nei diagrammi dei tasti

Si può impostare il contesto FretBoards in modo che mostri il diagramma solo quando l'accordo cambia o all'inizio di una nuova linea.

```
\include "predefined-guitar-fretboards.ly"
```

```
myChords = \chordmode {
  c1 c1 \break
  \set chordChanges = ##t
  c1 c1 \break
  c1 c1
}
```

```
<<
  \new ChordNames { \myChords }
  \new FretBoards { \myChords }
  \new Staff { \myChords }
>>
```

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context-property `maximumFretStretch` is set to 4, though. Resulting in a warning about "No string for pitch ..." and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string-numbers to all notes of a chord.

```
%% The code below will print two warnings, which may be omitted by uncommenting:
%#(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))
```

```
mus = {
  <c' bes'>
  <c'\2 bes'>
  \set maximumFretStretch = 5
  <c' bes'>
  <c'\2 bes'\1>
}
```

```
<<
  \new FretBoards \mus
  \new TabVoice \mus
>>
```

Controllare il posizionamento delle diteggiature di un accordo

Il posizionamento dei numeri della diteggiatura può essere regolato in modo preciso. Perché l'orientamento funzioni, occorre usare il costrutto per gli accordi `<>` anche per le note singole. Si può impostare in modo simile l'orientamento dei numeri di corda e delle diteggiature della mano destra.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger #1 e\rightHandFinger #2 c'\rightHandFinger #4 >
```

}

Personalizzare la tastiera del diagramma dei tasti

Le proprietà del diagramma dei tasti possono essere impostate tramite 'fret-diagram-details'. Per i diagrammi dell'oggetto FretBoard, gli override vengono applicati all'oggetto FretBoards.FretBoard. Come Voice, FretBoards è un contesto di basso livello, dunque può essere omesso negli override delle proprietà.

```
\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }
      #guitar-tuning
      #"x;1-1-(;3-2;3-3;3-4;1-1-);"

% shorthand
oo = #(define-music-function
      (grob-path value)
      (list? scheme?)
      #{ \once \override $grob-path = #value #})

<<
\new ChordNames {
  \chordmode { c1 | c | c | d }
}
\new FretBoards {
  % Set global properties of fret diagram
  \override FretBoards.FretBoard.size = #'1.2
  \override FretBoard.fret-diagram-details.finger-code = #'in-dot
  \override FretBoard.fret-diagram-details.dot-color = #'white
  \chordmode {
    c
    \oo FretBoard.size #'1.0
    \oo FretBoard.fret-diagram-details.barre-type #'straight
    \oo FretBoard.fret-diagram-details.dot-color #'black
    \oo FretBoard.fret-diagram-details.finger-code #'below-string
    c'
    \oo FretBoard.fret-diagram-details.barre-type #'none
    \oo FretBoard.fret-diagram-details.number-type #'arabic
    \oo FretBoard.fret-diagram-details.orientation #'landscape
    \oo FretBoard.fret-diagram-details.mute-string #'M"
    \oo FretBoard.fret-diagram-details.label-dir #LEFT
    \oo FretBoard.fret-diagram-details.dot-color #'black
    c'
    \oo FretBoard.fret-diagram-details.finger-code #'below-string
    \oo FretBoard.fret-diagram-details.dot-radius #0.35
    \oo FretBoard.fret-diagram-details.dot-position #0.5
```

```

\oo FretBoard.fret-diagram-details.fret-count #3
d
}
}
\new Voice {
  c'1 | c' | c' | d'
}
>>

```

Personalizzare il diagramma dei tasti di tipo markup

Le proprietà del diagramma dei tasti si possono impostare tramite 'fret-diagram-details. Per diagrammi di tipo markup, gli override possono essere applicati all'oggetto `Voice.TextScript` o direttamente al markup.

```

<<
\chords { c1 | c | c | d }

\new Voice = "mel" {
  \textLengthOn
  % Set global properties of fret diagram
  \override TextScript.size = #'1.2
  \override TextScript.fret-diagram-details.finger-code = #'in-dot
  \override TextScript.fret-diagram-details.dot-color = #'white

  }
}
}
}
>>

```

Definire diagrammi dei tasti predefiniti per altri strumenti

Si possono aggiungere diagrammi dei tasti predefiniti per nuovi strumenti oltre a quelli standard per chitarra. Questo frammento mostra come farlo definendo una nuova accordatura e alcuni diagrammi predefiniti per il *cuatro* venezuelano.

Mostra anche come includere le diteggiature negli accordi usati come punti di riferimento per la consultazione degli accordi e come mostrarle nel diagramma dei tasti e in TabStaff, ma non nella musica.

Questi diagrammi non sono trasponibili perché contengono informazioni sulle corde. È prevista una correzione in futuro.

```
% add FretBoards for the Cuatro
% Note: This section could be put into a separate file
%     predefined-cuatro-fretboards.ly
%     and \included into each of your compositions
```

```
cuatroTuning = #`(,(ly:make-pitch 0 6 0)
                  ,(ly:make-pitch 1 3 SHARP)
                  ,(ly:make-pitch 1 1 0)
                  ,(ly:make-pitch 0 5 0))
```

```

Flamenco notation

For flamenco guitar, special notation is used:

- a *golpe* symbol to indicate a slap on the guitar body with the nail of the ring finger

- an arrow to indicate (the direction of) strokes
- different letters for fingering (“p”: thumb, “i”: index finger, “m”: middle finger, “a”: ring finger and “x”: little finger)
- 3- and 4-finger *rasgueados*; stroke upwards with all fingers, ending with an up- and down using the index finger
- *abanicos*: strokes (in tuples) with thumb (down), little and index finger (both up). There’s also an *abanico 2* where middle and ring finger are used instead of the little finger.
- *alza pua*: fast playing with the thumb

Most figures use arrows in combination with fingering; with *abanicos* and *rasgueados*, note-heads are printed only for the first chord.

This snippet contains some header-like code that can be copied as ‘flamenco.ly’ and included in source files.

This musical score is for guitar in G major (one sharp) and common time. It features a treble clef and a G-clef on the eighth line. The score is divided into four measures. Above the staff, there are fingering instructions: 'i' with arrows pointing up and down, and 'Ras.' with arrows pointing up and down. Below the staff, fret diagrams are provided for the strings G, A, B, and the low E. The fret diagrams show fingerings such as 0-0, 2-2, 2-2, 2-2, 0-0, 0-0-0-0, 0-2-2-2, 0-2-2-2, and 0-2-2-2.

This musical score is for guitar in G major (one sharp) and common time. It features a treble clef and a G-clef on the eighth line. The score is divided into two sections: 'Abanico' and 'Alzapua'. The 'Abanico' section has five measures with fingering instructions 'p', 'x', 'i', 'p', 'x', 'i', 'p', 'x', 'i', 'p', 'x', 'i' and arrows pointing down and up. The 'Alzapua' section has five measures with a 'p' marking and arrows pointing up and down, and a 'm' marking with an arrow pointing up. Below the staff, fret diagrams are provided for the strings G, A, B, and the low E. The fret diagrams show fingerings such as 0-0, 2-2, 2-2, 2-2, 2-2, 0-2-2, 0-2-2, 0-2-2, 0-2-2, and 0-2-2.

Fret diagrams explained and developed

This snippet shows many possibilities for obtaining and tweaking fret diagrams.

```

The image displays two musical staves with fretboard diagrams for various chords. The first staff shows chords A, A, C, C, C, D, D, C. The second staff shows chords C, C, D, D, C, C, C, D, D. Each chord is accompanied by a fretboard diagram with fingerings and fret numbers.

Tabelle alternative per i diagrammi dei tasti

Si possono creare tabelle alternative per i diagrammi dei tasti. Queste possono essere usate per avere diagrammi alternativi per uno stesso accordo.

Per poter usare una tabella alternativa, deve prima essere creata. Quindi si aggiungono i diagrammi alla tabella.

La tabella può essere vuota oppure ricopiata da una tabella esistente.

La tabella da usare nel mostrare i diagrammi predefiniti viene selezionata dalla proprietà `\predefinedDiagramTable`.

```
\include "predefined-guitar-fretboards.ly"
```

```
% Make a blank new fretboard table
#(define custom-fretboard-table-one
  (make-fretboard-table))
```

```
% Make a new fretboard table as a copy of default-fret-table
#(define custom-fretboard-table-two
```

```

(make-fretboard-table default-fret-table))

% Add a chord to custom-fretboard-table-one
\storePredefinedDiagram #custom-fretboard-table-one
    \chordmode {c}
    #guitar-tuning
    "3-(;3;5;5;5;3-);"

% Add a chord to custom-fretboard-table-two
\storePredefinedDiagram #custom-fretboard-table-two
    \chordmode {c}
    #guitar-tuning

```

The image shows six guitar chord diagrams for C and D major chords. The first C chord has fingerings 3, 2, 1 and muting on strings 4 and 5. The first D chord has fingerings 1, 3, 2 and muting on strings 1 and 2. The second C chord has a barre on the third fret and a third finger on the second string. The second D chord has a barre on the second fret and a fourth finger on the second string. The third C chord has a barre on the third fret and a third finger on the second string. The third D chord has a barre on the second fret and a third finger on the second string. Below the diagrams is a musical staff with a treble clef and a common time signature. The first chord is labeled 'Default table', the second 'New table from empty', and the third 'New table from default'.

Armonici su corde premute in intavolatura

Questo frammento mostra come scrivere su intavolatura armonici su corde premute.

```

Guitar slides

Unlike glissandos, slides may go from an imprecise point of the fretboard to a specific fret. A good way to do this is to add a hidden grace note before the note which is actually played, as demonstrated in the following example.

```

%% Hide fret number: useful to draw slide into/from a casual point of
%% the fretboard.

```

```

hideFretNumber = {
  \once \hide TabNoteHead
  \once \hide NoteHead
  \once \hide Stem
  \once \override NoteHead.no-ledgers = ##t
  \once \override Glissando.bound-details.left.padding = #0.3
}

```

```

music= \relative c' {

```

```

\grace { \hideFretNumber d8\2 \glissando s2 } g2\2
\grace { \hideFretNumber g8\2 \glissando s2 } d2 |

\grace { \hideFretNumber c,8 \glissando s } f4\5^\markup \tiny { Slide into }
\grace { \hideFretNumber f8 \glissando s } a4\4
\grace { \hideFretNumber e'8\3 \glissando s } b4\3^\markup \tiny { Slide from }
\grace { \hideFretNumber b'8 \glissando s2 } g4 |
}

  }
}
\new Lyrics {
  \lyricsto "melody" {
    This is my song.
    I like to sing.
  }
}
>>

```

The image shows a musical score for a guitar piece. It consists of two staves. The top staff is a guitar tablature with four chords: C (x02321), F (134211), G (21003), and C (x02321). The bottom staff is a melody line in treble clef with a common time signature. The lyrics are: "This is my song. I like to sing." The melody line has a dotted quarter note for "I" and a quarter note for "like".

Martellato e strappato

Il martellato (hammer on) e lo strappato (pull off) si possono ottenere con le legature di portamento.

```

\new TabStaff {
  \relative c' {
    d4( e\2)
    a( g)
  }
}

```

The image shows a musical notation for a double slur. It consists of a single staff with a treble clef. The notes are a triplet of eighth notes: G4, A4, and G4. The first two notes are slurred together, and the last two notes are slurred together, creating a "double slur" effect. The notes are labeled with their respective fret numbers: 3, 5, and 3.

Martellato e strappato usando accordi

Quando il martellato o lo strappato si applicano a delle note in un accordo, viene disegnato un solo arco. Ma è possibile avere un "doppio arco" impostando la proprietà `doubleSlurs` su `#t`.

```
\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g' b>8( <a c> <g b>)
  }
}
```

Martellato e strappato usando le voci

L'arco del martellato o dello strappato è rivolto in alto nella prima e terza voce, mentre è rivolto in basso nella seconda e quarta voce.

```
\new TabStaff {
  \relative c' {
    << { \voiceOne g2( a) }
    \\ { \voiceTwo a,( b) }
    >> \oneVoice
  }
}
```

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

- 1) modify #'padding or #'extra-offset values (as shown in the first snippet)
- 2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```
harmonies = \chordmode
{
  a8:13
  % THE FOLLOWING IS THE COMMAND TO MOVE THE CHORD NAME
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s2.
  % THIS LINE IS THE SECOND METHOD
  s4 s4 b4:13
}

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
  <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

  <c d e f>4\laissezVibrer r
  \override LaissezVibrerTieColumn.tie-configuration
    = #'((-7 . ,DOWN)
          (-5 . ,DOWN)
          (-3 . ,UP)
          (-1 . ,UP))
  <c d e f>4\laissezVibrer r
}
```

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost`-context-property. For a context-wide setting this could be done in layout as well.

```
%\layout {
% \context {
% \Score
% stringOneTopmost = ##f
% }
% \context {
% \TabStaff
% tablatureFormat = #fret-letter-tablature-format
% }
%}
```

```
m = {
\cadenzaOn
e, b, e gis! b e'
\bar "||"
}
```

```
<<
\new Staff { \clef "G_8" <>_"default" \m <>_"italian (historic)"\m }
\new TabStaff
{
\m
\set Score.stringOneTopmost = ##f
\set TabStaff.tablatureFormat = #fret-letter-tablature-format
\m
}
>>
```

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```
music = \relative c {
c4 d e f
```

```

g4 a b c
d4 e f g
}

<<
\new Staff {
  \clef "G_8"
  \music
}
\new TabStaff \with {
  tablatureFormat = #fret-letter-tablature-format
}
{
  \music
}
>>

```

}
```

The image displays two staves. The top staff is a treble clef staff with a common time signature (C). It shows a sequence of notes: C8, D8, E8, F8, G8, A8, B8, C9. A glissando line is drawn above the notes from C8 to D8. The bottom staff is a guitar tablature staff with strings labeled G, A, and B. It shows fret numbers 5, 7, 5, 7, 5, 7. A glissando line is drawn above the fret numbers from 5 to 7.

Comportamento di gambi e travature in intavolatura

La direzione dei gambi nell'intavolatura è regolata nello stesso modo della notazione tradizionale. Le travature possono essere rese orizzontali, come illustrato in questo esempio.

```
\new TabStaff {
  \relative c {
    \tabFullNotation
    g16 b d g b d g b
    \stemDown
    \override Beam.concaveness = #10000
```

```

    g,,16 b d g b d g b
  }
}

```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```

stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})

```

```

\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
  b c d e f\stopTextSpan
  \stringNumberSpanner "4"
  g\startTextSpan a
  bes4 a g2\stopTextSpan
}

```

Unfretted strings

Sezione “Unfretted string instruments” in *Guida alla Notazione*

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaccona from Bach’s 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\\
  {
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[(
    \hideNotes a)
    \unHideNotes fis](
    \hideNotes a)
    \unHideNotes g[(
    \hideNotes a)
    \unHideNotes gis](
    \hideNotes a)
  }
  >>
}
```

Dotted harmonics

Artificial harmonics using `\harmonic` do not show dots. To override this behavior, set the context property `harmonicDots`.

```
\relative c'' {
  \time 3/4
  \key f \major
  \set harmonicDots = ##t
  <bes f'\harmonic>2. ~
  <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
  <fis cis'\harmonic>2.
  <bes f'\harmonic>2.
}
```

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' {
  c4\snappizzicato
  <c' e g>4\snappizzicato
  <c' e g>4^\snappizzicato
  <c, e g>4_\snappizzicato
}
```

Modello per quartetto d'archi (semplice)

Questo modello presenta un semplice quartetto d'archi. Impiega anche una sezione `\global` per definire il tempo e l'armatura di chiave.

```
global= {
  \time 4/4
  \key c \major
}

violinOne = \new Voice \relative c'' {
  c2 d
  e1
  \bar "|."
}

violinTwo = \new Voice \relative c'' {
  g2 f
  e1
  \bar "|."
}

viola = \new Voice \relative c' {
  \clef alto
  e2 d
  c1
  \bar "|."
}
```

```

cello = \new Voice \relative c' {
  \clef bass
  c2 b
  a1
  \bar "|."
}

\score {
  \new StaffGroup <<
    \new Staff \with { instrumentName = "Violin 1" }
    << \global \violinOne >>
    \new Staff \with { instrumentName = "Violin 2" }

    \new Staff \with { instrumentName = "Viola" }
    << \global \viola >>
    \new Staff \with { instrumentName = "Cello" }
    << \global \cello >>
  >>
  \layout { }
  \midi { }
}

```

The image displays a musical score for a string quartet. It consists of four staves, each labeled on the left: Violin 1, Violin 2, Viola, and Cello. The Violin 1 and Violin 2 staves use a treble clef, the Viola staff uses an alto clef, and the Cello staff uses a bass clef. All staves are in common time (indicated by a 'C' time signature). The music is written in a simple, melodic style, with a few notes in each part, followed by a double bar line at the end of the first measure.

Modello per quartetto d'archi con parti separate

Il frammento di codice del “Modello per quartetto d'archi” crea un bel quartetto, ma cosa fare se si ha bisogno di creare le singole parti? Questo nuovo modello mostra come usare la funzionalità `\tag` per dividere facilmente un pezzo in parti staccate.

Occorre dividere questo modello in file separati; i nomi dei file sono indicati nei commenti all'inizio di ogni file. `piece.ly` contiene tutte le definizioni musicali. Gli altri file – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly` e `vlc.ly` – creano ciascuna parte.

Non dimenticare di togliere i commenti quando usi i file separati!

Violin 1

Violin 2

Viola

Cello

The image shows a musical score for four string instruments: Violin 1, Violin 2, Viola, and Cello. The score is written in a system with four staves. The top two staves are for Violin 1 and Violin 2, both in treble clef. The bottom two staves are for Viola and Cello, both in bass clef. The time signature is common time (C). The key signature is one flat (B-flat). The music consists of a few notes in each part, with a double bar line at the end of the system.

Winds

6

The image shows a musical score for a winds section. At the top, four instrument labels are listed: 'bass-clarinet, 'saxophone, 'bassoon, and 'contrabassoon. Below these labels are four vertical columns of musical notation, each corresponding to an instrument. The notation consists of various notes, rests, and symbols. A horizontal staff with a treble clef and a key signature of one flat is positioned below the notation. The number '6' is written to the left of the staff. Below the staff, there are four small circular symbols, each aligned with one of the instrument columns.

Ancient notation

Sezione “Ancient notation” in *Guida alla Notazione*

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don't want the override to apply to the whole score.

```

bass = {
  \clef bass
  g4 b, c d
  e d8 c d2
}

continuo = \figuremode {
  <_>4 <6>4 <5/>4
  \override Staff.BassFigureAlignmentPositioning.direction = #UP
  %\bassFigureStaffAlignmentUp
  <_+>4 <6>
  \set Staff.useBassFigureExtenders = ##t
  \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
  %\bassFigureStaffAlignmentDown
  <4>4. <4>8 <_+>4
}

    \revert BarLine.transparent
    alterationGlyphs =
      #alteration-mensural-glyph-name-alist
    clefGlyph = #"clefs.petrucci.c2"
  }
  \context {
    \VaticanaStaff
    \revert BarLine.transparent
    \override StaffSymbol.thickness = #2.0
    alterationGlyphs =
      #alteration-vaticana-glyph-name-alist
    \override Custos.neutral-position = #4
  }
}

```

The image displays three systems of musical notation, each consisting of two staves. The top staff of each system is a mensural staff with square neomensural note heads and stems. The bottom staff is a vaticana staff with square note heads and stems, featuring a large 'C' clef and various alteration symbols (asterisks and diamonds). The notation is arranged in three systems, showing different rhythmic and melodic patterns.

Modello per notazione antica – trascrizione moderna di musica gregoriana

Questo esempio mostra come realizzare una trascrizione moderna di musica gregoriana. La musica gregoriana non presenta la suddivisione in misure né gambi; impiega soltanto le teste della minima e della semiminima, e dei segni appositi che indicano pause di diversa lunghezza.

```
\include "gregorian.ly"
```

```
chant = \relative c' {
  \set Score.timing = ##f
  f4 a2 \divisioMinima
  g4 b a2 f2 \divisioMaior
  g4( f) f( g) a2 \finalis
}
```

```
verba = \lyricmode {
  Lo -- rem ip -- sum do -- lor sit a -- met
}
```

```
\score {
  \new GregorianTranscriptionStaff <<
    \new GregorianTranscriptionVoice = "melody" \chant
    \new GregorianTranscriptionLyrics = "one" \lyricsto melody \verba
  >>
}
```

Ancient time signatures

Time signatures may also be engraved in an old style.

```
{
  \override Staff.TimeSignature.style = #'neomensural
  s1
}
```

Notazione per canti e salmi

Questa forma di notazione è utilizzata per i salmi, dove i versi non sono sempre della stessa lunghezza.

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff
```

```
\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn
    \stemOff a'\breve bes'4 g'4
    \stemOn a'2 \section
    \stemOff a'\breve g'4 a'4
    \stemOn f'2 \section
    \stemOff a'\breve^\markup { \italic flexe }
    \stemOn g'2 \fine
  }
}
```

Custodes

Custodes may be engraved in various styles.

```
\layout { ragged-right = ##t }
```

```
\new Staff \with { \consists "Custos_engraver" } \relative c' {
  \override Staff.Custos.neutral-position = #4
```

```
  \override Staff.Custos.style = #'hufnagel
  c1~"hufnagel" \break
  <d a' f'>1
```

```
  \override Staff.Custos.style = #'medicaea
  c1~"medicaea" \break
  <d a' f'>1
```

```

\override Staff.Custos.style = #'vaticana
c1^"vaticana" \break
<d a' f'>1

\override Staff.Custos.style = #'mensural
c1^"mensural" \break
<d a' f'>1
}

```

The image displays five musical staves, each illustrating a different style of mensural notation. The first staff is labeled 'hufnagel' and shows a single note with a horizontal line and a vertical stem. The second staff is labeled 'medicaea' and shows a note with a horizontal line and a vertical stem, with a '2' above the staff. The third staff is labeled 'vaticana' and shows a note with a horizontal line and a vertical stem, with a '4' above the staff. The fourth staff is labeled 'mensural' and shows a note with a horizontal line and a vertical stem, with a '6' above the staff. The fifth staff is labeled '8' and shows a note with a horizontal line and a vertical stem.

Incipit

Quando si trascrive musica mensurale, un incipit all’inizio del brano è utile per indicare il tempo e l’armatura di chiave originali. I musicisti oggi sono abituati alle stanghette, ma queste non erano note all’epoca della musica mensurale. Come compromesso, spesso le stanghette vengono poste tra i righi, uno stile di formattazione chiamato mensurstriche.

```

Usare le etichette per produrre musica mensurale e moderna dallo stesso sorgente

Usando le etichette (tag), è possibile usare la stessa musica per produrre sia la musica mensurale che quella moderna. In questo frammento, viene introdotta la funzione `menrest`, che permette alle pause mensurali di essere posizionate precisamente sul rigo come nell'originale, ma con le pause moderne nella posizione standard. Le etichette vengono usate per produrre diversi tipi di stanghetta alla fine della musica, ma possono essere usate anche quando sono necessarie altre differenze: per esempio se si vogliono usare "pause d'intero" (`R1`, `R\breve`, etc.) nella musica moderna, ma pause normali (`r1`, `r\breve`, etc.) nella versione mensurale. La conversione di musica mensurale nel suo equivalente moderno viene solitamente chiamata trascrizione.

```
menrest = #(define-music-function (note)
  (ly:music?)
  #{
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  #})

MenStyle = {

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```

upline =
\ tweak stencil
  #(\lambda (grob)
    (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #}))
  \stopped

\relative c' {
  a'4^\upline a( c d')_\upline
}

```

World music

Sezione “World music” in *Guida alla Notazione*

Improvvisazione araba

Per improvvisazioni o *taqasim* a tempo libero, si può omettere l’indicazione di tempo e usare `\cadenzaOn`. Può essere necessaria la modifica dello stile delle alterazioni, perché l’assenza delle stanghette farà sì che l’alterazione sia contrassegnata una volta sola. Ecco un esempio di quello che potrebbe essere l’inizio di un’improvvisazione *hijaz*:

```
\include "arabic.ly"

\relative sol' {
  \key re \kurd
  \accidentalStyle forget
  \cadenzaOn
  sol4 sol sol sol fad mib sol1 fad8 mib re4. r8 mib1 fad sol
}
```

Esempio di makam

Makam è un tipo di melodia proveniente dalla Turchia che usa alterazioni microtonali di 1/9. Consultare il file di inizializzazione ‘ly/makam.ly’ per vedere come sono definiti i nomi delle altezze e le alterazioni.

```
% Initialize makam settings
\include "makam.ly"

\relative c' {
  \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
  c4 cc db fk
  gbm4 gfc gfb efk
  fk4 db cc c
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_\markup {
    \override #'(text-direction . -1)

```

```

\line { i n g i r u m i m u s n o c t e }
}
}

```

Turkish Makam example

This template uses the start of a well-known Turkish Saz Semai that is familiar in the repertoire in order to illustrate some of the elements of Turkish music notation.

```

\paper { tagline = ##f }

% Initialize makam settings
\include "turkish-makam.ly"

\header {
  title = "Hüseyini Saz Semaisi"
  composer = "Lavtacı Andon"
}

\relative {
  \set Staff.extraNatural = ##f
  \set Staff.autoBeaming = ##f

  \key a \huseyni
  \time 10/8

Contexts and engravers

Sezione “Changing defaults” in *Guida alla Notazione*

Sezione “Contexts and engravers” in *Manuale di Apprendimento*

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don't want the override to apply to the whole score.

```

bass = {
  \clef bass
  g4 b, c d
  e d8 c d2
}

continuo = \figuremode {
  <_>4 <6>4 <5/>4
  \override Staff.BassFigureAlignmentPositioning.direction = #UP
  %\bassFigureStaffAlignmentUp
  <_+ >4 <6>
  \set Staff.useBassFigureExtenders = ##t
  \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
  %\bassFigureStaffAlignmentDown
  <4>4. <4>8 <_+>4
}

\score {
  <<
    \new Staff = bassStaff \bass
    \context Staff = bassStaff \continuo
  >>
}

```

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

```

\score {
  <<
    \new Staff \relative c'' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c'' {
      \new Staff {

```

```

    c1 | c
  <<
    {
      c1 | d
    }
    \new Staff {
      \once \omit Staff.TimeSignature
      c1 | b
    }
  >>
  c1
}
}
>>
}

```

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of `Staff.explicitKeySignatureVisibility` as is shown in the example.

```

\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
  >>
  c1 | c^"Fixed here" \break
  << { c1 | c }
  \new Staff {
    \once \set Staff.explicitKeySignatureVisibility = #end-of-line-invisible
    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
}

```

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure's extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

This snippet presents a legacy method: starting from LilyPond 2.23.3, `\set Score.centerBarNumbers = ##t` is enough.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
  \new Dynamics {
    \startMeasureCount
    s1*7
    \stopMeasureCount
  }
>>
```

The image displays a musical score for two staves. The top staff is a treble clef with a common time signature (C). The bottom staff is an alto clef with a common time signature (C). Both staves contain a sequence of eighth notes: C4, D4, E4, F4. The notes are grouped into seven measures, with measure numbers 1 through 7 centered below each measure.

Changing time signatures inside a polymeric section using `\scaleDurations`

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the `ly:make-moment` callback. The second argument must be the same as the second argument of `\scaleDurations`.

```
\layout {
  \context {
    \Score
    \remove "Timing_translator"
  }
  \context {
    \Staff
    \consists "Timing_translator"
  }
}

<<
\new Staff {
  \scaleDurations 8/5 {
    \time 6/8
    \set Timing.measureLength = #(ly:make-moment 6/5)
    b8 b b b b b
    \time 2/4
    \set Timing.measureLength = #(ly:make-moment 4/5)
    b4 b
  }
}
\new Staff {
  \clef bass
  \time 2/4
  c2 d e f
}
>>
```

Notazione per canti e salmi

Questa forma di notazione è utilizzata per i salmi, dove i versi non sono sempre della stessa lunghezza.

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff
```

```
\score {
  \new Staff \with { \remove "Time_signature_engraver" }
```

```

{
  \key g \minor
  \cadenzaOn
  \stemOff a'\breve bes'4 g'4
  \stemOn a'2 \section
  \stemOff a'\breve g'4 a'4
  \stemOn f'2 \section
  \stemOff a'\breve^\markup { \italic flexe }
  \stemOn g'2 \fine
}
}

```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```

#(set-global-staff-size 20)

\score {
  {
    \repeat unfold 12 { s1 \break }
  }
  \layout {
    indent = 0\in
    \context {
      \Staff
      \remove "Time_signature_engraver"
      \remove "Clef_engraver"
      \remove "Bar_engraver"
    }
    \context {
      \Score
      \remove "Bar_number_engraver"
    }
  }
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
}

```

```
%}  
  
% uncomment these lines for "A4" size  
%{  
\paper {  
  #(set-paper-size "a4")  
  ragged-last-bottom = ##f  
  line-width = 180  
  left-margin = 15  
  bottom-margin = 10  
  top-margin = 10  
}  
%}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
  #{ \markup\combine
    \musicglyph "clefs.C"
    \translate #'(-3 . -2)
    \musicglyph "clefs.F"
    #}))
    clefPosition = #3
    middleCPosition = #3
    middleCClefPosition = #3
  }

  {
    \key d\minor
    f bes, f bes,
  }
```

Cross staff stems

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

```
\layout {
  \context {
    \PianoStaff
    \consists "Span_stem_engraver"
  }
}

{
  \new PianoStaff <<

Defining an engraver in Scheme: ambitus engraver

This example demonstrates how the ambitus engraver may be defined on the user side, with a Scheme engraver. This is basically a rewrite in Scheme of the code from `lily/ambitus-engraver.cc`.

```

#(use-modules (oop goops))

```

```

Displaying a whole GrandStaff system if only one of its staves is alive

In orchestral scores sometimes single or groups of instruments are silent for a while and their staves can be removed for that time (with `\removeEmptyStaves`).

When they play again it is often preferred to show the staves of *all instruments of such a group*. This can be done adding the `Keep_alive_together_engraver` in the grouper (e.g., a `GrandStaff` or a `StaffGroup`).

In the example the violins are silent in the 2nd system and in the 3rd system. Only the first violin plays the last measure but the staff of the second violin is also displayed.

```
\score {
  <<
    \new StaffGroup = "StaffGroup_woodwinds"
    <<
      \new Staff = "Staff_flute" \with {
        instrumentName = "Flute"
        shortInstrumentName = "Fl"
      }
      \relative c' {
        \repeat unfold 3 { c'4 c c c | c c c c | c c c c | \break }
      }
    >>
  >>
  \new StaffGroup = "StaffGroup_strings"
  <<
    \new GrandStaff = "GrandStaff_violins"
    <<
      \new Staff = "StaffViolinI" \with {
        instrumentName = "Violin I"
        shortInstrumentName = "Vi I"
      }
    >>
  >>
}
```

```

\relative c'' {
  a1 \repeat unfold 7 { s1 } \repeat unfold 12 a16 a4
}
\new Staff = "StaffViolinII" \with {
  instrumentName = "Violin II"
  shortInstrumentName = "Vi II"
}
\relative c' { e1 \repeat unfold 8 { s1 } }
>>
\new Staff = "Staff_cello" \with {

  \context {
    \Staff
    \RemoveEmptyStaves
  }
}

```

The image displays two systems of musical notation. The first system consists of four staves: Flute (treble clef), Violin I (treble clef), Violin II (treble clef), and Cello (bass clef). The Flute part features a melodic line of eighth notes. The Violin I and II parts each play a single whole note. The Cello part plays a bass line with whole notes. The second system shows two staves: Flute (treble clef) and Cello (bass clef). The Flute part continues with a melodic line, and the Cello part continues with its bass line. A small '4' is positioned above the first measure of the Flute staff in the second system.

The image shows a musical score snippet with four staves. The top staff is labeled 'Fl' (Flute) and begins with a measure number '7'. It contains a sequence of quarter notes. The second staff is labeled 'Vi I' (Violin I) and contains a series of eighth notes starting in the third measure. The third staff is labeled 'Vi II' (Violin II) and is mostly empty. The bottom staff is labeled 'Ce' (Cello) and contains a few notes in the first measure.

Engravers one-by-one

The notation problem, creating a certain symbol, is handled by plugins. Each plugin is called an Engraver. In this example, engravers are switched on one by one, in the following order:

- note heads,
- staff symbol,
- clef,
- stem,
- beams, slurs, accents,
- accidentals, bar lines, time signature and key signature.

Engravers are grouped. For example, note heads, slurs, beams etc. form a *Voice* context. Engravers for key signature, accidentals, bar line, etc. form a *Staff* context.

```

The image displays seven musical staves illustrating different contexts and engraving options. The first staff shows a sequence of notes with a final note marked with a fermata. The second staff shows a sequence of notes with a final note marked with a fermata. The third staff shows a sequence of notes with a final note marked with a fermata. The fourth staff shows a sequence of notes with a final note marked with a fermata. The fifth staff shows a sequence of notes with a final note marked with a fermata. The sixth staff shows a sequence of notes with a final note marked with a fermata. The seventh staff shows a sequence of notes with a final note marked with a fermata.

Formattazione mensurale (stanghette tra i righi)

La formattazione mensurale, in cui le stanghette non appaiono sui rigi ma nello spazio tra i rigi, si può ottenere usando `StaffGroup` al posto di `ChoirStaff`. La stanghetta sui rigi viene nascosta con `\hide`.

```

\layout {
  \context {
    \Staff
    measureBarType = "-span|"
  }
}

```

```

music = \fixed c'' {
  c1

```

```

d2 \section e2
f1 \fine
}

\new StaffGroup <<
  \new Staff \music
  \new Staff \music
>>

```

Annidare i righi

Si può usare la proprietà `systemStartDelimiterHierarchy` per creare gruppi di righi annidati più complessi. Il comando `\set StaffGroup.systemStartDelimiterHierarchy` prende come argomento una lista alfabetica dell'insieme di righi prodotti. Prima di ogni rigo si può assegnare un delimitatore di inizio del sistema. Deve essere racchiuso tra parentesi e collega tutti i righi compresi tra le parentesi. Gli elementi nella lista possono essere omessi, ma la prima parentesi quadra collega sempre tutti i righi. Le possibilità sono `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace` e `SystemStartSquare`.

```

\new StaffGroup
\relative c' ' <<
  \override StaffGroup.SystemStartSquare.collapse-height = #4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
      (SystemStartSquare b) ) c ) d)
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
>>

```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
```

```

\bar ""
\break
e'4 d'
\repeat unfold 7 {
  g'4 f' e' d'
}
\stopMeasureCount
}

```

The image displays three staves of musical notation. The first staff contains measures 1 through 7, the second staff contains measures 8 through 14, and the third staff contains measures 15 through 21. The music is written in a treble clef with a common time signature (C). The notes are eighth notes, and the sequence of notes across all staves is: C4, D4, E4, F4, G4, A4, B4, C5, D5, E5, F5, G5, A5, B5, C6, D6, E6, F6, G6, A6, B6, C7. The notes are grouped into measures of 7 notes each.

Print ChordNames with same root and different bass as slash and bass-note

To print subsequent ChordNames only differing in its bass note as slash and bass note use the here defined engraver. The behaviour may be controlled in detail by the chordChanges context property.

```

#(define Bass_changes_equal_root_engraver
  (lambda (ctx)
    "For sequential @code{ChordNames} with same root, but different bass, the root
    markup is dropped: D D/C D/B -> D /C /B
    The behaviour may be controlled by setting the @code{chordChanges}
    context-property."

The image shows two staves of musical notation. The top staff is in treble clef with a common time signature 'c'. It contains six measures of chords: Dm, /C#, /C, Dm/B, E⁷, and E. The bottom staff is also in treble clef with a common time signature 'c'. It starts with a measure number '5' and contains eight measures of chords: E/F, /G#, E, Em/F, Dm, /C#, /C, and Dm/B. Each chord is represented by a vertical line with a stack of notes and a sharp sign for accidentals.

Togliere i numeri di battuta da uno spartito

I numeri di battuta possono essere tolti rimuovendo l'incisore `Bar_number_engraver` dal contesto `Score`.

```

\layout {
  \context {
    \Score
    \omit BarNumber
    % or:
    \%remove "Bar_number_engraver"
  }
}

\relative c'' {
  c4 c c c \break
  c4 c c c
}

```

The image shows a single staff of musical notation in treble clef with a common time signature 'c'. It contains four measures, each with a single quarter note. The notes are C4, C4, C4, and C4.

Usare una parentesi quadra all'inizio di un gruppo di righe

Si può usare il segno `SystemStartSquare` (uno dei segni che delimitano l'inizio del sistema) impostandolo esplicitamente in un contesto `StaffGroup` o `ChoirStaff`.

```
\score {
  \new StaffGroup { <<
    \set StaffGroup.systemStartDelimiter = #'SystemStartSquare
    \new Staff { c'4 d' e' f' }
    \new Staff { c'4 d' e' f' }
  >> }
}
```

Using marklines in a Frenched score

Using `MarkLine` contexts (such as in LSR1010 (<https://lsr.di.unimi.it/LSR/Item?id=1010>)) in a Frenched score can be problematic if all the staves between two `MarkLines` are removed in one system. The `Keep_alive_together_engraver` can be used within each `StaffGroup` to keep the `MarkLine` alive only as long as the other staves in the group stay alive.

```
bars = {
  \tempo "Allegro" 4=120
  s1*2
  \repeat unfold 5 { \mark \default s1*2 }
  \bar "||"
  \tempo "Adagio" 4=40
  s1*2
  \repeat unfold 8 { \mark \default s1*2 }
  \bar "|."
}

winds = \repeat unfold 120 { c''4 }
trumpet = { \repeat unfold 8 g'2 R1*16 \repeat unfold 4 g'2 R1*8 }
trombone = { \repeat unfold 4 c'1 R1*8 d'1 R1*17 }

The image displays a musical score for a string and wind ensemble, organized into four systems. Each system contains staves for Winds, Trumpet, Trombone, and Strings. The score is marked with tempo changes and section labels.

- System 1 (Measures 6-10):** Tempo is **Allegro** (♩ = 120). Sections **A** and **B** are indicated. The Winds and Trumpet parts play a rhythmic pattern of quarter notes. The Trombone part has rests. The Strings play a continuous sixteenth-note pattern.
- System 2 (Measures 11-15):** Sections **C** and **D** are indicated. The Winds and Strings continue their respective parts.
- System 3 (Measures 16-20):** Tempo changes to **Adagio** (♩ = 40). Sections **E** and **F** are indicated. The Winds and Strings play a slower rhythmic pattern. The Trombone part has rests.
- System 4 (Measures 21-25):** Sections **G** and **H** are indicated. The Winds and Strings continue their parts.

The image shows a musical score for Winds, Tpt, and Strings. The score is divided into two systems. The first system (measures 21-25) features Winds, Tpt, and Strings. The second system (measures 26-30) features Winds and Strings. Lyrics J, K, L, M, and N are placed above and below the staves.

Modello per gruppo vocale con testo allineato sotto e sopra i righi

Tweaks and overrides

Sezione “Changing defaults” in *Guida alla Notazione*

Sezione “Tweaking output” in *Manuale di Apprendimento*

Aggiungere un segno di ottava a una sola voce

Se il rigo ha più di una voce, l’ottavazione in una voce trasporrà la posizione delle note in tutte le voci per la durata della parentesi dell’ottava. Se si intende applicare l’ottavazione a una sola voce, occorre spostare l’incisore `Ottava_spanner_engraver` nel contesto `Voice`.

```
\layout {
  \context {
    \Staff
    \remove Ottava_spanner_engraver
  }
  \context {
    \Voice
    \consists Ottava_spanner_engraver
  }
}

{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\
  {
    r2.
    \ottava -1
    <b,, b,,>4 ~ |
    q2
    \ottava 0
    <c e>2
  }
  >>
}
```

Adding links to objects

To add a link to a grob stencil you can use `add-link` as defined here. It works both with `\override` and `\tweak`.

Drawback: `point-and-click` is disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command. Note that the links are not displayed and are not clickable from inside the LSR.

```
#(define (add-link url-strg)
```

```

(lambda (grob)
  (let* ((stil (ly:grob-property grob 'stencil)))
    (if (ly:stencil? stil)
      (let* ((x-ext (ly:stencil-extent stil X))
            (y-ext (ly:stencil-extent stil Y))
            (url-expr `(url-link ,url-strg ,x-ext ,y-ext))
            (new-stil
              (ly:stencil-add
                (ly:make-stencil url-expr x-ext y-ext)
                stil)))
        (ly:grob-set-property! grob 'stencil new-stil))))))

Aggiungere i segni di tempo per i glissandi lunghi

I battiti saltati nei glissandi molto lunghi vengono talvolta segnalati con delle indicazioni di tempo, che consistono solitamente in dei gambi privi di teste di nota. Questi gambi possono essere usati anche per contenere segni di espressione intermedi.

Se i gambi non si allineano bene al glissando, può essere necessario riposizionarli leggermente.

```

glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the details of the `Stem`. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

```

\relative c' {
  \override Stem.details.beamed-lengths = #'(2)
  a8[ a] a16[ a] a32[ a]
  \override Stem.details.beamed-lengths = #'(8 10 12)
  a8[ a] a16[ a] a32[ a] r8
  \override Stem.details.beamed-lengths = #'(8)
  a8[ a]
  \override Stem.details.beamed-lengths = #'(8.5)
  a8[ a]
  \revert Stem.details.beamed-lengths
  a8[ a] a16[ a] a32[ a] r16
}

```

Numeri di battuta alternativi

Si possono impostare due metodi alternativi di numerazione della battuta, utili specialmente per le ripetizioni.

```

\relative c' {
  \set Score.alternativeNumberingStyle = #'numbers

```

```

\repeat volta 3 { c4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
c1 \break
\set Score.alternativeNumberingStyle = #'numbers-with-letters
\repeat volta 3 { c,4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
c1
}

```

The image displays a musical score with six staves, each containing a single melodic line. The staves are labeled 1, 2, 3, 5, 6b, and 6c. Staff 1 is the first ending, marked with a '1.' and a repeat sign. Staff 2 is the second ending, marked with a '2.' and a repeat sign. Staff 3 is the third ending, marked with a '3.' and a repeat sign. The first ending is repeated three times, the second ending is repeated twice, and the third ending is repeated once. The music is written in a single system, with the first ending leading to the second ending, and the second ending leading to the third ending.

Parentesi analitiche sopra il rigo

Delle semplici parentesi analitiche orizzontali vengono aggiunte, per impostazione predefinita, sotto il rigo. L'esempio seguente mostra un modo per posizionarle sopra il rigo.

```

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

```

```

}
}

\relative c'' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}

```

Parentesi analitiche con etichette

Si può aggiungere del testo alle parentesi analitiche tramite la proprietà `text` del grob `HorizontalBracketText`. L'aggiunta di vari frammenti di testo alle parentesi che iniziano nello stesso momento musicale richiede l'uso del comando `\tweak`. Dopo un'interruzione di linea il testo viene messo tra parentesi.

```

\paper { tagline = ##f }

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c''\startGroup d''\stopGroup
  \once\override HorizontalBracketText.text = "a'"
  e''\startGroup d''\stopGroup |
  c''-\tweak HorizontalBracketText.text
    \markup \bold \huge "b" \startGroup
    -\tweak HorizontalBracketText.text "a" \startGroup
  d''\stopGroup
  e''-\tweak HorizontalBracketText.text "a'" \startGroup
  d''\stopGroup\stopGroup |
  c''-\tweak HorizontalBracketText.text foo \startGroup
  d'' e'' f'' | \break
  g'' a'' b'' c''\stopGroup
}

```

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a) }
```

```
\relative c' {
  \stemDown
  \slurUp
  \slurNotes
  \once \override Slur.eccentricity = #3.0
  \slurNotes
}
```

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  % set the breathe mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."
}
```

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `<>`), before the note to be altered, place the `\tweak` command, followed by `font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
    \tweak font-size #-2 e>1
  ~\markup { A tiny e }_~\markup { A big c }
}
```

Changing beam thickness and spacing

To make beams thicker or thinner alter the `Beam.beam-thickness` property. To adjust the spacing between beams alter the `Beam.length-fraction` property.

```
\relative f' {
  \time 1/8
  \override Beam.beam-thickness = #0.4
  \override Beam.length-fraction = #0.8
  c32 c c c
  \revert Beam.beam-thickness % 0.48 is default thickness
  \revert Beam.length-fraction % 1.0 is default spacing
  c32 c c c
  \override Beam.beam-thickness = #0.6
  \override Beam.length-fraction = #1.3
  c32 c c c
}
```

Modificare la forma delle pause multiple

Se la pausa multipla dura dieci misure o un numero inferiore a dieci, nel rigo apparirà una serie di pause di lunga e di breve (chiamate in tedesco “Kirchenpausen” - pause ecclesiastiche); altrimenti apparirà una semplice linea. Il numero predefinito di dieci può essere cambiato sovrascrivendo la proprietà `expand-limit`.

```
\relative c' {
  \compressMMRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = #3
    R1*2 | R1*5 | R1*9
  }
}
```

Changing properties for individual grobs

The `\applyOutput` command allows the tuning of any layout object, in any context. It requires a Scheme function with three arguments.

```
#(define (mc-squared grob grob-origin context)
  (let ((sp (ly:grob-property grob 'staff-position)))
    (ly:grob-set-property!
     grob 'stencil
     (grob-interpret-markup grob
      #{ \markup \lower #0.5
```

```
#(case sp
  ((-5) "m")
  ((-3) "c ")
  ((-2) #{ \markup \teeny \bold 2 #})
  (else "bla"))) #}))))
```

```
\relative c' {
  <d f g b>2
  \applyOutput Voice.NoteHead #mc-squared
  <d f g b>2
}
```

Nascondere la linea di estensione per le dinamiche testuali

Il testo usato per i *crescendo* e i *decrescendo* può essere cambiato modificando le proprietà di contesto `crescendoText` e `decrescendoText`.

Lo stile della linea dell'estensore può essere cambiato modificando la proprietà `'style` di `DynamicTextSpanner`. Il valore predefinito è `'dashed-line`; gli altri valori possibili sono `'line`, `'dotted-line` e `'none`.

```
\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
  a2 a
  a2 a\mf
}
```

}

DejaVu Serif: **bold italic bold italic**

DejaVu Sans Mono: **bold italic bold italic**

DejaVu Sans: **bold italic bold italic**

Changing the staff size

Though the simplest way to resize staves is to use `#{set-global-staff-size xx}`, an individual staff's size can be changed by scaling the properties `'staff-space` and `fontSize`.

```
<<
\new Staff {
  \relative c'' {
    \dynamicDown
    c8\ff c c c c c c c c
  }
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} {
  \clef bass
  c8 c c c c\ff c c c
}
>>
```

Modificare il tempo senza mostrare l'indicazione metronomica

Per cambiare il tempo del file MIDI senza che appaia l'indicazione metronomica, basta renderla invisibile.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempoHideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout { }
```

```
\midi { }
}
```

Changing the text for sustain markings

`Staff.pedalSustainStrings` can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.

```
sustainNotes = { c4\sustainOn d e\sustainOff\sustainOn f\sustainOff }
```

```
\relative c' {
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("P" "P-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("d" "de" "e")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("M" "M-" "-")
  \sustainNotes
  \set Staff.pedalSustainStrings = #'("Ped" "*Ped" "*")
  \sustainNotes
}
```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the after-line-breaking callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```
\paper { ragged-right = ##t }

\relative c' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
  % show hairpin
  \override Hairpin.after-line-breaking = ##t
  % hide text span
  \override TextSpanner.after-line-breaking =
    #ly:spanner::kill-zero-spanned-time
  e2\<\startTextSpan
```

```

% show glissando
\override Glissando.after-line-breaking = ##t
f2\glissando
\break
f,1\!\stopTextSpan
}

```

Controllo dell'ordine verticale degli script

L'ordine verticale degli script è determinato dalla proprietà `'script-priority`. Più il numero è piccolo, più sarà posto vicino alla nota. In questo esempio, il simbolo di *diesis* (oggetto `TextScript`) ha prima la priorità più bassa, dunque è posto più in basso nel primo esempio. Nel secondo, il *trillo* (oggetto `Script`) ha la priorità più bassa, quindi si trova all'interno. Quando due oggetti hanno la stessa priorità, l'ordine in cui sono inseriti determina quale viene prima.

```

\relative c'' {
  \once \override TextScript.script-priority = #-100
  a2^\prall^\markup { \sharp }

  \once \override Script.script-priority = #-100
  a2^\prall^\markup { \sharp }
}

```

Controllare la visibilità della parentesi del gruppo irregolare

Il comportamento predefinito relativo alla visibilità della parentesi quadra del gruppo irregolare è di mostrare una parentesi a meno che non ci sia una travatura della stessa lunghezza del gruppo.

Per controllare la visibilità di tale parentesi, si imposta la proprietà `'bracket-visibility` su `#t` (mostra sempre la parentesi), `#'if-no-beam` (mostra la parentesi solo se non c'è una travatura, che è il comportamento predefinito) o `#f` (non mostrare mai la parentesi). L'ultima opzione equivale a omettere l'oggetto `@code{TupletBracket}` dall'output.

```

music = \relative c'' {
  \tuplet 3/2 { c16[ d e ] f8]
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}

```

```

\new Voice {

```

```

\relative c' {
  \override Score.TextMark.non-musical = ##f
  \textMark "default" \music
  \override TupletBracket.bracket-visibility = #'if-no-beam
  \textMark \markup \typewriter "'if-no-beam" \music
  \override TupletBracket.bracket-visibility = ##t
  \textMark \markup \typewriter "#t" \music
  \override TupletBracket.bracket-visibility = ##f
  \textMark \markup \typewriter "#f" \music
  \omit TupletBracket
  \textMark \markup \typewriter "omit" \music
}
}

```

Creare un gruppetto ritardato

Creare un gruppetto ritardato, dove la nota più bassa del gruppetto usa l'alterazione, richiede vari `\override`. La proprietà `outside-staff-priority` deve essere impostata su `##f`, perché altrimenti questa avrebbe la precedenza sulla proprietà `avoid-slur`. Cambiando la frazione `2/3` si aggiusta la posizione orizzontale.

```

\relative c' {
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8)
  \after 4
  {
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
    \once \hideNotes
    cis8\turn \noBeam
  }
  d4.( e8)
}

```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob) (grob-interpret-markup grob
    #{ \markup\combine
      \musicglyph "clefs.C"
      \translate #'(-3 . -2)
      \musicglyph "clefs.F"
      #}))
    clefPosition = #3
    middleCPosition = #3
    middleCClefPosition = #3
  }

  {
    \key d\minor
    f bes, f bes,
  }
}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }
```

```

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'dashed-line
  \override TextSpanner.bound-details.left.text =
    \markup { \draw-line #'(0 . 1) }
  \override TextSpanner.bound-details.right.text =
    \markup { \draw-line #'(0 . -2) }
  \once \override TextSpanner.bound-details.right.padding = #-2

  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \set Staff.middleCPosition = #-13
  \override TextSpanner.dash-period = #10
  \override TextSpanner.dash-fraction = #0.5
  \override TextSpanner.thickness = #10
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan
}

```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```

\new PianoStaff <<
  \new Staff = up
  \relative c' {
    <<
      { r4
        \override Stem.cross-staff = ##t

```

```

\override Stem.length = #19 % this is in half-spaces,
% so it makes stems 9.5 staffspaces long
\override Stem.Y-offset = #-6 % stems are normally lengthened
% upwards, so here we must lower the stem by the amount
% equal to the lengthening - in this case (19 - 7) / 2
% (7 is default stem length)
e e e }
{ s4
\change Staff = "bottom"
\override NoteColumn.ignore-collision = ##t
c, c c
}
>>
}
\new Staff = bottom
\relative c' {
\clef bass
\voiceOne
g8 a g a g a g a
}
>>

```

Cross staff stems

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

```

\layout {
\context {
\PianoStaff
\consists "Span_stem_engraver"
}
}

{
\new PianoStaff <<
\new Staff {
<b d'>4 r d'16\> e'8. g8 r\!
e'8 f' g'4 e'2
}
\new Staff {
\clef bass
\voiceOne
\autoBeamOff

```

```

        \crossStaff { <e g>4 e, g16 a8. c8} d
        \autoBeamOn
        g8 f g4 c2
    }
    >>
}

```

Custodes

Custodes may be engraved in various styles.

```
\layout { ragged-right = ##t }
```

```
\new Staff \with { \consists "Custos_engraver" } \relative c' {
  \override Staff.Custos.neutral-position = #4

```

```

  \override Staff.Custos.style = #'hufnagel
  c1^"hufnagel" \break
  <d a' f'>1

```

```

  \override Staff.Custos.style = #'medicaea
  c1^"medicaea" \break
  <d a' f'>1

```

```

  \override Staff.Custos.style = #'vaticana
  c1^"vaticana" \break
  <d a' f'>1

```

```

  \override Staff.Custos.style = #'mensural
  c1^"mensural" \break
  <d a' f'>1

```

```
}
```

Personalizzare la tastiera del diagramma dei tasti

Le proprietà del diagramma dei tasti possono essere impostate tramite 'fret-diagram-details'. Per i diagrammi dell'oggetto FretBoard, gli override vengono applicati all'oggetto FretBoards.FretBoard. Come Voice, FretBoards è un contesto di basso livello, dunque può essere omesso negli override delle proprietà.

```
\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }
      #guitar-tuning
      #"x;1-1-(;3-2;3-3;3-4;1-1-);"

% shorthand
oo = #(define-music-function
  (grob-path value)
  (list? scheme?)
  #{ \once \override $grob-path = #value #})

<<
\new ChordNames {
  \chordmode { c1 | c | c | d }
}
\new FretBoards {
  % Set global properties of fret diagram
  \override FretBoards.FretBoard.size = #'1.2
  \override FretBoard.fret-diagram-details.finger-code = #'in-dot
  \override FretBoard.fret-diagram-details.dot-color = #'white
  \chordmode {
    c
    \oo FretBoard.size #'1.0
    \oo FretBoard.fret-diagram-details.barre-type #'straight
    \oo FretBoard.fret-diagram-details.dot-color #'black
    \oo FretBoard.fret-diagram-details.finger-code #'below-string
    c'
    \oo FretBoard.fret-diagram-details.barre-type #'none
    \oo FretBoard.fret-diagram-details.number-type #'arabic
    \oo FretBoard.fret-diagram-details.orientation #'landscape
    \oo FretBoard.fret-diagram-details.mute-string #'M"
    \oo FretBoard.fret-diagram-details.label-dir #LEFT
    \oo FretBoard.fret-diagram-details.dot-color #'black
    c'
    \oo FretBoard.fret-diagram-details.finger-code #'below-string
    \oo FretBoard.fret-diagram-details.dot-radius #0.35
    \oo FretBoard.fret-diagram-details.dot-position #0.5
```

```

\oo FretBoard.fret-diagram-details.fret-count #3
d
}
}
\new Voice {
c'1 | c' | c' | d'
}
>>

```

Personalizzare il diagramma dei tasti di tipo markup

Le proprietà del diagramma dei tasti si possono impostare tramite 'fret-diagram-details. Per diagrammi di tipo markup, gli override possono essere applicati all'oggetto `Voice.TextScript` o direttamente al markup.

```

<<
\chords { c1 | c | c | d }

\new Voice = "mel" {
  \textLengthOn
  % Set global properties of fret diagram
  \override TextScript.size = #'1.2
  \override TextScript.fret-diagram-details.finger-code = #'in-dot
  \override TextScript.fret-diagram-details.dot-color = #'white

  %% C major for guitar, no barre, using defaults
  % terse style

  }
}
}
}
>>

```

Mostrare la parentesi anche se c'è un solo rigo nel sistema

Se c'è un solo rigo in uno dei tipi di rigo `ChoirStaff` o `StaffGroup`, la parentesi e la stanghetta iniziale non appaiono. Si può modificare questo comportamento predefinito sovrascrivendo `collapse-height` e impostando un valore inferiore al numero di linee del rigo.

Nei contesti `PianoStaff` e `GrandStaff`, dove i sistemi iniziano con una parentesi graffa invece di una parentesi quadra, occorre impostare un'altra proprietà, come si vede nel secondo sistema dell'esempio.

```
\score {
  \new StaffGroup <<
    % Must be lower than the actual number of staff lines
    \override StaffGroup.SystemStartBracket.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
    \new Staff {
      c'1
    }
  >>
}
\score {
  \new PianoStaff <<
    \override PianoStaff.SystemStartBrace.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
    \new Staff {
      c'1
    }
  >>
}
```

Displaying grob ancestry

When working with grob callbacks, it can be helpful to understand a grob's ancestry. Most grobs have parents which influence the positioning of the grob. X- and Y-parents influence the horizontal and vertical positions for the grob, respectively. Additionally, each parent may have parents of its own.

Unfortunately, there are several aspects of a grob's ancestry that can lead to confusion:

- The types of parents a grob has may depend on context.

- For some grobs, the X- and Y-parents are the same.
- A particular *ancestor* may be related to a grob in multiple ways.
- The concept of *generations* is misleading.

For example, the System grob can be both parent (on the Y-side) and grandparent (twice on the X-side) to a VerticalAlignment grob.

This macro prints (to the console) a textual representation of a grob's ancestry.

When called this way:

```
{ \once \override NoteHead.before-line-breaking = #display-ancestry c }
```

The following output is generated:

```
NoteHead
X,Y: NoteColumn
  X: PaperColumn
    X,Y: System
  Y: VerticalAxisGroup
    X: NonMusicalPaperColumn
      X,Y: System
    Y: VerticalAlignment
      X: NonMusicalPaperColumn
        X,Y: System
      Y: System

```

Dotted harmonics

Artificial harmonics using `\harmonic` do not show dots. To override this behavior, set the context property `harmonicDots`.

```

\relative c'' {
  \time 3/4
  \key f \major
  \set harmonicDots = ##t
  <bes f'\harmonic>2. ~
  <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
  <fis cis'\harmonic>2.
  <bes f'\harmonic>2.
}

```

Drawing boxes around grobs

The `print`-function can be overridden to draw a box around an arbitrary grob.

```
\relative c' {
  \override TextScript.stencil =
    #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
  c'4^"foo"

  \override Stem.stencil =
    #(make-stencil-boxer 0.05 0.25 ly:stem::print)
  \override Score.RehearsalMark.stencil =
    #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
  b8

  \revert Stem.stencil
  \revert Flag.stencil
  c4. c4
  \mark \default
  c1
}
```

Drawing circles around various objects

The `\circle` markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

```
\relative c' {
  c1
  \set Score.rehearsalMarkFormatter =
    #(lambda (mark context)
      (make-circle-markup (format-mark-numbers mark context)))
  \mark \default

  c2 d^\markup {
    \override #'(thickness . 3) {
      \circle \finger 2
    }
  }
}

\override Score.BarNumber.break-visibility = #all-visible
\override Score.BarNumber.stencil =
  #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
```

}

Estensore testuale della dinamica personalizzato

Funzioni postfix per estensori testuali personalizzati del crescendo. Gli estensori devono iniziare sulla prima nota della misura; e bisogna usare `-\mycresc`, altrimenti l'inizio dell'estensore viene assegnato alla nota successiva.

```
% Two functions for (de)crescendo spanners where you can explicitly
% give the spanner text.
```

```
mycresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'CrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))
```

```
mydecresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'DecrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))
```

```
\relative c' {
  c4-\mycresc "custom cresc" c4 c4 c4 |
  c4 c4 c4 c4 |
  c4-\mydecresc "custom decresc" c4 c4 c4 |
  c4 c4\! c4 c4
}
```

Estensore testuale della dinamica personalizzato

Si possono definire estensori testuali personalizzati che fanno uso delle forcine e dei crescendo testuali. `\<` e `\>` generano le forcine, `\cresc` etc. generano gli estensori testuali.

```
% Some sample text dynamic spanners, to be used as postfix operators
```

```
crpoco =
#(make-music 'CrescendoEvent
  'span-direction START
  'span-type 'text
  'span-text "cresc. poco a poco")
```

```
\relative c' {
  c4\cresc d4 e4 f4 |
```

```

g4 a4\! b4\crpoco c4 |
c4 d4 e4 f4 |
g4 a4\! b4\< c4 |
g4\dim a4 b4\decreasc c4\!
}

```

Extending a TrillSpanner

For `TrillSpanner`, the `minimum-length` property becomes effective only if the `set-spacing-rods` procedure is called explicitly.

To do this, the `springs-and-rods` property should be set to `ly:spanner::set-spacing-rods`.

```

\relative c' {
\key c\minor
\time 2/4
c16( as') c,-. des-.
\once\override TrillSpanner.minimum-length = #15
\once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
\afterGrace es4
\startTrillSpan { d16[( \stopTrillSpan es)] }
c( c' g es c g' es d
\hideNotes
c8)
}

```

Estendere i glissandi sulle volte delle ripetizioni

Un glissando che si estende in vari blocchi `\alternative` può essere simulato aggiungendo all'inizio di ogni blocco `\alternative` una nota di abbellimento nascosta da cui inizia un glissando. La nota di abbellimento deve avere la stessa altezza della nota da cui parte il glissando iniziale. In questo frammento si usa una funzione musicale che prende come argomento l'altezza della nota di abbellimento.

Attenzione: nella musica polifonica la nota di abbellimento deve avere una nota di abbellimento corrispondente in tutte le altre voci.

```

repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
      = #ly:spanner::set-spacing-rods
  })

```

```

\once \override Glissando.minimum-length = #3.5
\once \hideNotes
\grace $grace \glissando
#})

\score {
  \relative c' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
      { \repeatGliss f g2 e }
      { \repeatGliss f e2 d }
    }
  }
}

music = \relative c' {
  \voiceOne
  \repeat volta 2 {
    g a b c\glissando
  }
  \alternative {
    { d1 }
    { \repeatGliss c \once \omit StringNumber e1\2 }
  }
}

\score {
  \new StaffGroup <<
    \new Staff <<
      \new Voice { \clef "G_8" \music }
    >>
    \new TabStaff <<
      \new TabVoice { \clef "moderntab" \music }
    >>
  >>
}

```

A single staff of music in treble clef with a common time signature (C). The melody consists of quarter notes: C4, D4, E4, F4, G4, A4, B4, C5. The first ending (1.) is a repeat sign over the last two notes (B4, C5). The second ending (2.) is a repeat sign over the last note (C5). The third ending (3.) is a repeat sign over the last note (C5).

A guitar and bass staff. The guitar staff is in treble clef with a common time signature (C). The bass staff is in bass clef. The guitar part has a first ending (1.) over the last two notes (B4, C5) and a second ending (2.) over the last note (C5). The bass part has a first ending (1.) over the last two notes (B4, C5) and a second ending (2.) over the last note (C5). The fret numbers for the guitar are: 0 2 | 0 1 3 | 5.

Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.

```
\paper { ragged-right = ##f }
\relative c'' {
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.shorten-pair = #'(-7 . -2)
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.edge-height = #'(0 . 3)
  c2\sostenutoOn c
  c2\sostenutoOff c
}
```

Flat Ties

The function takes the default `Tie.stencil` as an argument, calculating the result relying on the extents of this default.

Further tweaking is possible by overriding `Tie.details.height-limit` or with `\shape`. It's also possible to change the custom-definition on the fly.

%% <http://lsr.di.unimi.it/LSR/Item?id=1031>

```
#(define ((flared-tie coords) grob)

  (define (pair-to-list pair)
    (list (car pair) (cdr pair)))

Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p")

Some dynamic expressions involve additional text, like “sempre **pp**”. Since dynamics are usually centered under the note, the `\pp` would be displayed way after the note it applies to.

To correctly align the “sempre **pp**” horizontally so that it is aligned as if it were only the `\pp`, there are several approaches:

- Simply use `\once\override DynamicText.X-offset = #-9.2` before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...
- Add some padding (`#:hspace 7.1`) into the definition of your custom dynamic mark so that after LilyPond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.
- Shift the dynamic script `\once\overrideX-offset =` Drawback: `\once\override` is needed for every invocation!
- Set the dimensions of the additional text to 0 (using `#:with-dimensions '(0 . 0) '(0 . 0)`). Drawback: For LilyPond, “sempre” has no extent now. This means it might put other stuff there, causing collisions (which are not detected by LilyPond’s collision detection algorithm!). There also seems to be some spacing, so it is not exactly the same alignment as without the additional text.
- Add an explicit shift directly inside the scheme function for the dynamic script.
- Set an explicit alignment inside the dynamic script. By default, this won’t have any effect, only if one sets `X-offset`! Drawback: One needs to set `DynamicText.X-offset`, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of `\pp`.

```
\paper {
  ragged-right = ##f
  indent = 2.5\cm
}
```

```
% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }
```

```
% Solution 2: Using a dynamic script & shifting with
%           \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
```

```

(markup #:line
  (#:normal-text
    #:italic "sempre"
    #:dynamic "pp")))

% Solution 3: Padding the dynamic script so the center-alignment
%           puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
sempT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"
      #:hspace 7.1)))

% Solution 4: Dynamic, setting the dimensions of the additional text to 0
% Drawback: To Lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
sempM =
#(make-dynamic-script
  (markup #:line
    (#:with-dimensions '(0 . 0) '(0 . 0)
      #:right-align
      #:normal-text

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

- 1) modify #'padding or #'extra-offset values (as shown in the first snippet)
- 2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

```

harmonies = \chordmode
{
  a8:13
  % THE FOLLOWING IS THE COMMAND TO MOVE THE CHORD NAME
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s2.
  % THIS LINE IS THE SECOND METHOD
  s4 s4 b4:13
}

\score
{
  <<
    \new ChordNames \harmonies
    \new Staff
    {a8^\markup { \fret-diagram "6-x;5-0;4-2;3-0;2-0;1-2;" }
  % THE FOLLOWING IS THE COMMAND TO MOVE THE FRET DIAGRAM
  \once \override TextScript.extra-offset = #'(10 . 0)
  b4.~^\markup { \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" } b4. a8\break
  % HERE IS THE SECOND METHOD
  <<
    { a8 b4.~ b4. a8}
    { s4 s4 s4^\markup { \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" }
    }
  >>
  }
  >>
}

```

The image displays two musical staves. The first staff shows two chords, A⁹ 13 and B⁹ 13, with fret diagrams above them. The A⁹ 13 chord is on the 6th fret, and the B⁹ 13 chord is on the 5th fret. The second staff shows the B⁹ 13 chord on the 5th fret, with a '2' above the staff indicating a second measure or a specific rhythmic position.

Inserire una cesura

I segni di cesura possono essere creati sovrascrivendo la proprietà 'text dell'oggetto BreathingSign. È disponibile anche un segno di cesura curvo.

```
\relative c'' {
```

```

\override BreathingSign.text = \markup {
  \musicglyph "scripts.caesura.straight"
}
c8 e4. \breathe g8. e16 c4

\override BreathingSign.text = \markup {
  \musicglyph "scripts.caesura.curved"
}
g8 e'4. \breathe g8. e16 c4
}

```

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with `full-size-change`.

```

\relative c' {
  \clef "treble"
  c1
  \clef "bass"
  c1
  \clef "treble"
  c1
  \override Staff.Clef.full-size-change = ##t
  \clef "bass"
  c1
  \clef "treble"
  c1
  \revert Staff.Clef.full-size-change
  \clef "bass"
  c1
  \clef "treble"
  c1
}

```

Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```

\relative c'' {
  \override TextSpanner.bound-padding = #1.0
  \override TextSpanner.style = #'line
  \override TextSpanner.bound-details.right.arrow = ##t
  \override TextSpanner.bound-details.left.text = #"fof"
  \override TextSpanner.bound-details.right.text = #"gag"
  \override TextSpanner.bound-details.right.padding = #0.6
}

```

```

\override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
\override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER

\override Glissando.bound-details.right.arrow = ##t
\override Glissando.arrow-length = #0.5
\override Glissando.arrow-width = #0.25

a8\startTextSpan gis a4 b\glissando b,
g'4 c\stopTextSpan c2
}

```

Making an object invisible with the 'transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```

\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\\
  {
    b8 g g e
  }
  >>
}

```

Lasciare che i glissandi vadano a capo

Per permettere a un glissando di andare a capo se capita su un'interruzione di riga, si impostano le proprietà breakable e after-line-breaking su #t:

```
glissandoSkipOn = {
```

```

\override NoteColumn.glissando-skip = ##t
\hide NoteHead
\override NoteHead.no-ledgers = ##t
}

\relative c' {
  \override Glissando.breakable = ##t
  \override Glissando.after-line-breaking = ##t
  f1\glissando |
  \break
  a4 r2. |
  f1\glissando
  \once \glissandoSkipOn
  \break
  a2 a4 r4 |
}

```

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the positions setting of the Beam grob.

```

\relative c' {
  \time 2/4
  % from upper staff-line (position 2) to center (position 0)
  \override Beam.positions = #'(2 . 0)
  c8 c
  % from center to one above center (position 1)
  \override Beam.positions = #'(0 . 1)
  c8 c
}

```

Measure-centered bar numbers

For film scores, a common convention is to center bar numbers within their measure. This is achieved through setting the centerBarNumbers context property to true. When this is used, the type of the bar number grobs is CenteredBarNumber rather than BarNumber.

This example demonstrates a number of settings: the centered bar numbers are boxed and placed below the staves.

```
\layout {
  \context {
    \Score
    centerBarNumbers = ##t
    barNumberVisibility = #all-bar-numbers-visible
    \override CenteredBarNumber.stencil
      = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
    \override CenteredBarNumberLineSpanner.direction = #DOWN
  }
}

\new StaffGroup <<
  \new Staff \relative c' {
    d4-. f8( e d4) bes'-> |
    d,-. f8( e d4) cis'-> |
    g-. f8( d e4) g-> |
    a,1-> |
  }
  \new Staff \relative c {
    \clef bass
    d4 f8 e d2~ |
    4 f8 e d2~ |
    4 4 2 |
    a1 |
  }
}
>>
```

The image shows a musical score for two staves. The top staff is in treble clef and the bottom staff is in bass clef. The music consists of four measures. The first three measures have a measure bar between the staves, and the fourth measure has a measure bar below the bass staff. The bar numbers 1, 2, 3, and 4 are boxed and placed below the staves.

Formattazione mensurale (stanghette tra i righi)

La formattazione mensurale, in cui le stanghette non appaiono sui righi ma nello spazio tra i righi, si può ottenere usando `StaffGroup` al posto di `ChoirStaff`. La stanghetta sui righi viene nascosta con `\hide`.

```
\layout {
  \context {
    \Staff
    measureBarType = "-span|"
  }
}

```

Moving slur positions vertically

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

```

\relative c' {
  \stemDown

```

Annidare i righi

Si può usare la proprietà `systemStartDelimiterHierarchy` per creare gruppi di righi annidati più complessi. Il comando `\set StaffGroup.systemStartDelimiterHierarchy` prende come argomento una lista alfabetica dell'insieme di righi prodotti. Prima di ogni rigo si può assegnare un delimitatore di inizio del sistema. Deve essere racchiuso tra parentesi e collega tutti i righi compresi tra le parentesi. Gli elementi nella lista possono essere omessi, ma la prima parentesi quadra collega sempre tutti i righi. Le possibilità sono `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace` e `SystemStartSquare`.

```
\new StaffGroup
\relative c' ' <<
  \override StaffGroup.SystemStartSquare.collapse-height = #4
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
      (SystemStartSquare b) ) c ) d)

  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
  \new Staff { c1 }
>>
```

Overriding articulations by type

Sometimes you may want to affect a single articulation-type. Although it is always possible to use `\tweak`, it might become tedious to do so for every single sign of a whole score. The following shows how to tweak articulations with a list of custom settings. One use-case might be to create a style sheet.

With 2.16.2 and above it is possible to put the proposed function, `\customScripts`, into a `\layout-block`.

% Code by David Nalesnik and Thomas Morley

```

#(define (custom-script-tweaks ls)
  (lambda (grob)
    (let* ((type (ly:event-property
                  (ly:grob-property grob 'cause)
                  'articulation-type))
           (tweaks (assoc-ref ls type)))
      (if tweaks
          (for-each
            (lambda (x) (ly:grob-set-property! grob (car x) (cdr x)))
            tweaks))))))

```

`customScripts =`

```

#(define-music-function (settings) (list?)
  #{
    \override Script.before-line-breaking =
      #(custom-script-tweaks settings)
  #})

```

`revertCustomScripts = \revert Script.before-line-breaking`

```

%%%%%%%%%%%%%%
% Example:
%%%%%%%%%%%%%%

```

% Predefine a list of desired tweaks.

```

#(define my-settings-1

```

```
\new Staff <<
  \new Voice { \voiceOne \one }
  \new Voice { \voiceTwo \two }
  >>
```

Visibilità del conto della ripetizione con segno percentuale

I contatori della ripetizione con segno percentuale possono essere mostrati a intervalli regolari impostando la proprietà di contesto `repeatCountVisibility`.

```
\relative c' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
  \repeat percent 10 { c1 } \break
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
  \repeat percent 6 { c1 d1 }
}
```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' {
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio
}
```

Posizionamento delle pause multiple

Diversamente dalle pause normali, non esiste un comando predefinito per cambiare la posizione sul rigo di un simbolo di pausa multipla di qualsiasi tipo connettendolo a una nota. Tuttavia, nella musica polifonica le pause multiple nelle voci dispari e pari sono separate verticalmente. Il posizionamento delle pause multiple si controlla nel modo seguente:

```

\relative c' {
  % Multi-measure rests by default are set under the fourth line
  R1
  % They can be moved using an override
  \override MultiMeasureRest.staff-position = #-2
  R1
  \override MultiMeasureRest.staff-position = #0
  R1
  \override MultiMeasureRest.staff-position = #2
  R1
  \override MultiMeasureRest.staff-position = #3
  R1
  \override MultiMeasureRest.staff-position = #6
  R1
  \revert MultiMeasureRest.staff-position
  \break

  % In two Voices, odd-numbered voices are under the top line
  << { R1 } \ \ { a1 } >>
  % Even-numbered voices are under the bottom line
  << { a1 } \ \ { R1 } >>
  % Multi-measure rests in both voices remain separate
  << { R1 } \ \ { R1 } >>

  % Separating multi-measure rests in more than two voices
  % requires an override
  << { R1 } \ \ { R1 } \ \
    \once \override MultiMeasureRest.staff-position = #0
    { R1 }
  >>

  % Using compressed bars in multiple voices requires another override
  % in all voices to avoid multiple instances being printed
  \compressMMRests
  <<
    \revert MultiMeasureRest.direction
    { R1*3 }
    \ \
    \revert MultiMeasureRest.direction
    { R1*3 }
  >>
}

```

Posizionare il testo a margine dentro le legature di portamento

I testi a margine devono avere la proprietà `outside-staff-priority` impostata su `false` per poter apparire dentro le legature di portamento.

```
\relative c' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(~\markup { \halign #-10 \natural } d4.) c8
}
```

Numeri di battuta racchiusi in rettangoli o cerchi

I numeri di battuta possono apparire anche all'interno di rettangoli o cerchi.

```
\relative c' {
  % Prevent bar numbers at the end of a line and permit them elsewhere
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

  % Increase the size of the bar number by 2
  \override Score.BarNumber.font-size = #2

  % Draw a box round the following bar number(s)
  \override Score.BarNumber.stencil
    = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
  \repeat unfold 5 { c1 }

  % Draw a circle round the following bar number(s)
  \override Score.BarNumber.stencil
    = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
  \repeat unfold 4 { c1 } \bar "|."
}
```

Posizionare il metronomo e i numeri di chiamata sotto il rigo

Di norma, il metronomo e i numeri di chiamata vengono posizionati sopra il rigo. Per metterli sotto il rigo basta impostare correttamente la proprietà `direction` di `MetronomeMark` o `RehearsalMark`.

```
\layout {
```

```

indent = 0
ragged-right = ##f
}

{
% Metronome marks below the staff
\override Score.MetronomeMark.direction = #DOWN
\tempo 8. = 120
c''1

% Rehearsal marks below the staff
\override Score.RehearsalMark.direction = #DOWN
\mark \default
c''1
}

```

Printing note names with and without an octave marker

The NoteNames context can be used to print the text value of notes. The `printOctaveNames` property turns on or off the representation of the octave of the note.

```

scale = \relative c' {
  a4 b c d
  e4 f g a
}

\new Staff {
  <<
  \scale
  \context NoteNames {
    \set printOctaveNames = ##f
  }
  >>
  R1
  <<
  \scale
  \context NoteNames {
    \set printOctaveNames = ##t
  }
  >>
}

```

Printing tuplet brackets on the note head side

Whichever option you choose for controlling the tuplet bracket visibility, it will show or hide the tuplet bracket irrespectively of tuplet bracket placement (stem side or note head side). However, when placing the tuplet bracket on the note head side some authors recommend always printing the tuplet bracket. The option `visible-over-note-heads` can be used to achieve this.

```
music = \relative c'' {
  \tupletNeutral \tuplet 3/2 { c16[ d e ] f8]
  \tupletUp \tuplet 3/2 { c8 d e }
}

\new Voice {
  \relative c' {
    \time 2/4
    \override TupletBracket.visible-over-note-heads = ##t
    \override Score.TextMark.non-musical = ##f
    { \textMark \markup "default" \music }
    \override TupletBracket.bracket-visibility = #'if-no-beam
    { \textMark \markup \typewriter "'if-no-beam" \music }
  }
}
```

Proportional strict notespacing

If `strict-note-spacing` is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```
\relative c'' <<
  \override Score.SpacingSpanner.strict-note-spacing = ##t
  \set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
  \new Staff {
    c8[ c \clef alto c c \grace { d16 } c8 c] c4
    c2 \grace { c16[ c16] } c2
  }
  \new Staff {
    c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
    c1
  }
  >>
```

Removing brace on first line of piano score

This snippet removes the first brace from a PianoStaff or a GrandStaff.

It may be useful when cutting and pasting the engraved image into existing music.

It uses `\alterBroken`.

```

someMusic = {
  \once \override Staff.Clef.stencil = ##f
  \once \override Staff.TimeSignature.stencil = ##f
  \repeat unfold 3 c1 \break
  \repeat unfold 5 c1 \break
  \repeat unfold 5 c1
}

\score {
  \new PianoStaff
  <<
    \new Staff = "right" \relative c' \someMusic
    \new Staff = "left" \relative c' { \clef F \someMusic }
  >>
  \layout {
    indent=75
    \context {
      \PianoStaff
      \alterBroken transparent #'(#t) SystemStartBrace
    }
  }
}

```

9

Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves, i.e. a SpanBar is printed. This behaviour can be overridden on a staff-by-staff basis.

```
\relative c' {
  \new StaffGroup <<
    \new Staff {
      e1 | e
      \once \override Staff.BarLine.allow-span-bar = ##f
      e1 | e | e
    }
    \new Staff {
      c1 | c | c
      \once \override Staff.BarLine.allow-span-bar = ##f
      c1 | c
    }
    \new Staff {
      a1 | a | a | a | a
    }
  >>
}
```

Eliminare la prima linea vuota

Il primo rigo vuoto si può togliere dalla partitura impostando la proprietà `remove-first` di `VerticalAxisGroup`. Questa impostazione agisce a livello globale se posta nel blocco `\layout`, a livello locale se posta nel rigo specifico che deve essere tolto. Nel secondo caso, si deve specificare il contesto (`Staff` si applica solo al rigo corrente) prima della proprietà.

Il rigo inferiore del secondo gruppo di righe non viene rimosso, perché l'impostazione ha effetto solo sul rigo in cui si trova.

```
\layout {
  \context {
```

```

\Staff \RemoveEmptyStaves
% To use the setting globally, uncomment the following line:
% \override VerticalAxisGroup.remove-first = ##t
}
}
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
>>
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
>>

```

Stili di pausa

Esistono vari stili di pausa.

```
\new Staff \relative c {
  \omit Score.TimeSignature
  \cadenzaOn

  \override Staff.Rest.style = #'mensural
  r\maxima^\markup \typewriter { mensural }
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'neomensural
  r\maxima^\markup \typewriter { neomensural }
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'classical
  r\maxima^\markup \typewriter { classical }
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'z
  r\maxima^\markup \typewriter { z-style }
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
  \bar ""
  \break

  \override Staff.Rest.style = #'default
  r\maxima^\markup \typewriter { default }
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
}
```

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians.

The standard support for this using `\repeat percent` is unsuitable here since the first beat has to be an ordinary note or rest.

This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the `r4` in the definitions with a rest of the appropriate duration).

```
% Macro to print single slash
rs = {
  \once \override Rest.stencil = #ly:percent-repeat-interface::beat-slash
  \once \override Rest.thickness = #0.48
  \once \override Rest.slope = #1.7
  r4
}

% Function to print a specified number of slashes
comp = #(define-music-function (count) (integer?)
  #{
    \override Rest.stencil = #ly:percent-repeat-interface::beat-slash
    \override Rest.thickness = #0.48
    \override Rest.slope = #1.7
    \repeat unfold $count { r4 }
    \revert Rest.stencil
  }
)

\score {
  \relative c' {
    c4 d e f |
    \rs \rs \rs \rs |
    \comp #4 |
  }
}
```

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `'break-align-orders` property of the `BreakAlignment` grob.

The value of 'break-align-orders is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving key-cancellation before staff-bar; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

```
\new Staff {
  \override Score.BreakAlignment.break-align-orders =
    ##((left-edge ambitus breathing-sign clef staff-bar
        key-cancellation key-signature time-signature custos)

        (left-edge ambitus breathing-sign clef key-cancellation
        staff-bar key-signature time-signature custos)

        (left-edge ambitus breathing-sign clef key-cancellation
        key-signature staff-bar time-signature custos))

  \key des \major
  c'1
  \bar "||"
  \key bes \major
  c'1
}
```

Impostare il comportamento delle forcelle sulle stanghette

Se la nota che termina una forcella si trova sul primo battito di una battuta, la forcella si ferma prima della stanghetta che precede la nota. Si può controllare questo comportamento modificando la proprietà 'to-barline.

```
\relative c' ' {
  e4\< e2.
  e1\!
  \override Hairpin.to-barline = ##f
  e4\< e2.
  e1\!
}
```

Setting system separators

System separators can be inserted between systems. Any markup can be used, but \slashSeparator has been provided as a sensible default.

```
\paper {
  system-separator-markup = \slashSeparator
  line-width = 120
}
```

```
notes = \relative c' {  
  c1 | c \break  
  c1 | c \break  
  c1 | c  
}  
  
\book {  
  \score {  
    \new GrandStaff <<  
      \new Staff \notes  
      \new Staff \notes  
    >>  
  }  
}
```

The image displays three systems of musical notation for piano, each consisting of a grand staff (treble and bass clefs). The first system shows a C major chord (C4, E4, G4) in the right hand and a C major chord (C3, E3, G3) in the left hand. The second system is marked with a double bar line and the number '3', showing a C major chord (C4, E4, G4) in the right hand and a C major chord (C3, E3, G3) in the left hand. The third system is marked with a double bar line and the number '5', showing a C major chord (C4, E4, G4) in the right hand and a C major chord (C3, E3, G3) in the left hand. The time signature is common time (C).

Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4_\fermata^\fermata` only shows a fermata below. The fermata above gets simply ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, 'add-stem-support' would be required.

The solution is thus to write the note as a chord and add the articulations inside of `<...>`, using the direction modifiers `^` and `_` as appropriate.

```
\relative c' {
  <>^\fermata^\fermata
  c2_\fermata^\fermata % The second fermata is ignored!
  <e d'>2^\flageolet_\flageolet

  \stopStaff s1 \startStaff

  <>^\fermata^\fermata
  <e_\flageolet d'^\flageolet>2
  <e_\flageolet d'^\flageolet>2
  <e_\flageolet^\flageolet>2
  <e_\fermata^\fermata>2
}
```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
  #(\define-music-function (StringNumber) (string?)
    #{
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text =
        \markup { \circle \number $StringNumber }
    #})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
```

```

b c d e f\stopTextSpan
\stringNumberSpanner "4"
g\startTextSpan a
bes4 a g2\stopTextSpan
}

```

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘ignore-collision’ property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t
```

```

\relative c' {
  \new Staff <<
    \new Voice { \ignore \stemDown f2 g }
    \new Voice { c2 \stemDown c, }
  >>
}

```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```

\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}

```

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

```

\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)

```

```
(parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
\time 2/4
a4 b8 c
}
```

Indicazione di tempo che mostra solo il numeratore (invece della frazione)

Talvolta un'indicazione di tempo non deve mostrare la frazione intera (ad esempio 7/4), ma solo il numeratore (numero 7 in questo caso). Si può ottenere facilmente con `\override Staff.TimeSignature.style = #'single-digit`, che cambia lo stile in modo permanente. Con `\revert Staff.TimeSignature.style`, questa impostazione può essere annullata. Per applicare lo stile a cifra singola (single-digit) a una sola indicazione di tempo, si usa il comando `\override` preceduto da `\once`.

```
\relative c' ' {
  \time 3/4
  c4 c c
  % Change the style permanently
  \override Staff.TimeSignature.style = #'single-digit

Tuplet bracket and change staff

This snippet shows how to set a tuplet starting in a lower staff and finishing in the upper one.

```
aigues = \relative c' {
  \time 6/8
  s4.
  \stemDown
  c16[ bes' e]
```

```

\stemUp
g c e
\stemDown
g8
}

basses = \relative c {
  \time 3/4
  \clef F
  \tweak positions #'(4.5 . 9.5)
  \tweak edge-height #'(1 . -1)
  \tuplet 7/6 {
    c16[ bes' e]
    \change Staff = md
    \stemUp
    g[ c e g]
  }
  s4.s8
}

\new PianoStaff
\with { \omit TimeSignature }
<<
  \new Staff = md \aigues
  \new Staff = mg \basses
>>

```

Modifiche manuali della proprietà della chiave

Cambiando il glifo della chiave, la sua posizione o l'ottavazione non cambia la posizione delle note successive nel rigo. Per far sì che le armature di chiave si trovino sulle linee del rigo corrette, bisogna specificare anche `middleCPosition`, con valori positivi o negativi che spostano il Do centrale rispettivamente su o giù in senso relativo alla linea centrale del rigo.

Per esempio, `\clef "treble_8"` equivale a impostare `clefGlyph`, `clefPosition` (che regola la posizione verticale della chiave), `middleCPosition` e `clefTransposition`. Viene stampata una chiave quando cambia una di queste proprietà, eccetto `middleCPosition`.

Gli esempi seguenti mostrano le possibilità date dall'impostazione manuale di tali proprietà. Sulla prima linea le modifiche manuali preservano il posizionamento relativo standard di chiavi e note, mentre sulla seconda linea non lo fanno.

```

{
  % The default treble clef
  \key f \major
  c'1

```

```

% The standard bass clef
\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
\set Staff.middleCPosition = #6
\set Staff.middleCClefPosition = #6
\key g \major
c'1
% The baritone clef
\set Staff.clefGlyph = #"clefs.C"
\set Staff.clefPosition = #4
\set Staff.middleCPosition = #4
\set Staff.middleCClefPosition = #4
\key f \major
c'1
% The standard choral tenor clef
\set Staff.clefGlyph = #"clefs.G"
\set Staff.clefPosition = #-2
\set Staff.clefTransposition = #-7
\set Staff.middleCPosition = #1
\set Staff.middleCClefPosition = #1
\key f \major
c'1
% A non-standard clef
\set Staff.clefPosition = #0
\set Staff.clefTransposition = #0
\set Staff.middleCPosition = #-4
\set Staff.middleCClefPosition = #-4
\key g \major
c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
c'1
\set Staff.clefGlyph = #"clefs.G"
c'1
\set Staff.clefGlyph = #"clefs.C"
c'1
\set Staff.clefTransposition = #7
c'1
\set Staff.clefTransposition = #0
\set Staff.clefPosition = #0
c'1

% Return to the normal clef:

\set Staff.middleCPosition = #0
c'1
}

```

Modificare l'aspetto degli abbellimenti di un intero brano

L'aspetto di tutte le espressioni contenute nei blocchi `\grace` di un brano può essere modificato con le funzioni `add-grace-property` e `remove-grace-property`. L'esempio seguente toglie la definizione della direzione di Stem nell'abbellimento, in modo che gli abbellimenti non siano sempre rivolti in su, e barra le teste di nota.

```
\relative c' {
  \new Staff {
    $(remove-grace-property 'Voice 'Stem 'direction)
    $(add-grace-property 'Voice 'NoteHead 'style 'cross)
    \new Voice {
      \acciaccatura { f16 } g4
      \grace { d16 e } f4
      \appoggiatura { f,32 g a } e2
    }
  }
}
```

Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. Valid values are `modern-straight-flag`, `old-straight-flag` and `flat-flag`.

```
testnotes = {
  \autoBeamOff
  c8 d16 c32 d64 \acciaccatura { c8 } d64 r4
}

\score {
  \relative c' {
    \time 2/4
    \testnotes

    \override Flag.stencil = #modern-straight-flag
    \testnotes

    \override Flag.stencil = #old-straight-flag
    \testnotes

    \override Flag.stencil = #flat-flag
```

```

\testnotes

\revert Flag.stencil
\testnotes
}
\layout {
  indent = 0
  \context {
    \Score
    \override NonMusicalPaperColumn.line-break-permission = ##f
  }
}
}

```

Using `ly:grob-object` to access grobs with `\tweak`

Some grobs can be accessed “laterally” from within another grob’s callback. These are usually listed as “layout objects” in the “Internal properties” section of a grob-interface. The function `ly:grob-object` is used to access these grobs.

Demonstrated below are some ways of accessing grobs from within a `NoteHead` callback, but the technique is not limited to `NoteHeads`. However, the `NoteHead` callback is particularly important, since it is the implicit callback used by the `\tweak` command.

The example function defined below (“`display-grobs`”) is probably not that useful, but it demonstrates that the grobs are indeed being accessed.

Example console output:

```

#Grob Accidental () #Grob Stem
#(define (notehead-get-accidental notehead)
  ;; notehead is grob
  (ly:grob-object notehead 'accidental-grob))

#(define (notehead-get-arpeggio notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'arpeggio)))

#(define (notehead-get-notecolumn notehead)
  ;; notehead is grob
  (ly:grob-parent notehead X))

#(define (notehead-get-stem notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'stem)))

#(define (display-grobs notehead)
  ;; notehead is grob
  (let ((accidental (notehead-get-accidental notehead))

```

```

        (arpeggio (notehead-get-arpeggio notehead))
        (stem (notehead-get-stem notehead)))
    (format (current-error-port) "~2&~a\n" (make-string 20 #\~))
    (for-each
      (lambda (x) (format (current-error-port) "~a\n" x))
      (list accidental arpeggio stem))))

\relative c' {
  %% display grobs for each note head:
  \override NoteHead.before-line-breaking = #display-grobs
  <c
  %% or just for one:
  \tweak before-line-breaking #display-grobs
  es
  g>1\arpeggio
}

```

Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```

parallelogram =
  #(ly:make-stencil (list 'embedded-ps
    "gsave
      currentpoint translate
      newpath
      0 0.25 moveto
      1.3125 0.75 lineto
      1.3125 -0.25 lineto
      0 -0.75 lineto
      closepath
      fill
      grestore" )
    (cons 0 1.3125)
    (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

\relative c'' {
  \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d
}

```

Using the `\tweak` command to tweak individual grobs

With the `\tweak` command, every grob can be tuned directly. Here are some examples of available tweaks.

```
\relative c' {
  \time 2/4
  \set fingeringOrientations = #'(right)
  <
    \tweak font-size #3 c
    \tweak color #red d-\tweak font-size #8 -4
    \tweak style #'cross g
    \tweak duration-log #2 a
  >2
}
```

Dinamiche e segni testuali allineati verticalmente

Tutti gli oggetti `DynamicLineSpanner` (forcelle e testi di dinamica) sono posti a una distanza minima dal rigo determinata da `'staff-padding`. Se si imposta `'staff-padding` su un valore abbastanza grande, le dinamiche saranno allineate.

```
music = \relative c' {
  a'2\p b\f
  e4\p f\f\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = #3
  \textLengthOn
  \override TextScript.staff-padding = #1
  \music
}
```

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName.self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper { left-margin = 3\cm }

\score {
  \new StaffGroup <<

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
      }
      shortInstrumentName = "Left"
    }

    { c'1 \break c'1 }

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #CENTER
      instrumentName = \markup \center-column {
        Centered
        "instrument name"
      }
      shortInstrumentName = "Centered"
    }

    { g'1 g'1 }

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #RIGHT
      instrumentName = \markup \right-column {
        "Right aligned"
        "instrument name"
      }
      shortInstrumentName = "Right"
    }

    { e'1 e'1 }

  >>

  \layout {
    ragged-right = ##t
  }
}
```

```

    indent = 4\cm
    short-indent = 2\cm
}
}

```

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```

\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f
  }
}

```

```

aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }

```

```

<<
\new Staff <<
  \new Voice = "alice" {
    f'4^\aliceSings g' r2 |
    s1 |
    f'4^\aliceSings g' r2 |
    s1 | \break
    % ...

    \voiceOne

```

```

s2 a'8^\aliceSings a' b'4 |
\oneVoice
g'1
}
\new Voice = "eve" {
s1 |
a'2^\eveSings g' |
s1 |
a'2^\eveSings g'
% ...

\voiceTwo
f'4^\eveSings a'8 g' f'4 e' |
\oneVoice
s1
}
>>
\new Lyrics \lyricsto "alice" {
may -- be
sec -- ond
% ...
Shut up, you fool!
}
\new Lyrics \lyricsto "eve" {
that the
words are
% ...
...and then I was like--
}
>>

```

The musical score consists of two staves. The first staff is in treble clef with a common time signature (C). It features two voices: ALICE and EVE. ALICE sings the lyrics "may - be" and "sec - ond". EVE sings the lyrics "that the" and "words are". The second staff starts at measure 5 and continues the dialogue. EVE sings "...and then I was like--" and ALICE sings "Shut up, you fool!".

Book parts

`\bookpart` can be used to split a book into several parts. Each part last page can be affected by `ragged-last-bottom`. Header and footer markups can detect a part last page, and make the difference with the book last page.

```

#(set-default-paper-size "a6")

```

```

\book {
  %% book paper, which is inherited by all children bookparts

```

```

\paper {
  ragged-last-bottom = ##t
  %% Page footer: add a different part-tagline at part last page
  oddFooterMarkup = \markup {
    \column {
      \fill-line {
        %% Copyright header field only on book first page.
        \if \on-first-page \fromproperty #'header:copyright
      }
      \fill-line {
        %% Part tagline header field only on each part last page.
        \if \on-last-page-of-part \fromproperty #'header:parttagline
      }
      \fill-line {
        %% Tagline header field only on book last page.
        \if \on-last-page \fromproperty #'header:tagline
      }
    }
  }
}

%% book header, which is inherited by the first bookpart
\header {

Changing the staff size

Though the simplest way to resize staves is to use `#{set-global-staff-size xx}`, an individual staff's size can be changed by scaling the properties `'staff-space` and `fontSize`.

```
<<
  \new Staff {
    \relative c' {
      \dynamicDown
      c8\ff c c c c c c c
    }
  }
  \new Staff \with {
    fontSize = #-3
    \override StaffSymbol.staff-space = #(magstep -3)
  } {
    \clef bass
    c8 c c c c\f c c c
  }
>>
```

Clip systems

This code shows how to clip (extract) snippets from a full score.

This file needs to be run separately with `-dclip-systems`; the snippets page may not adequately show the results. The result will be files named `'base-from-start-to-end[-count].eps'`.

If system starts and ends are included, they include extents of the System grob, e.g., instrument names.

Grace notes at the end point of the region are not included.

Regions can span multiple systems. In this case, multiple EPS files are generated.

```
#(ly:set-option 'clip-systems)
#(define output-suffix "1")

origScore = \score {
  \relative c' {
    \new Staff \with { instrumentName = "Instrument" }
    c1
    d1
    \grace c16 e1
    \key d \major
    f1 \break
    \clef bass
    g,1
    fis1
  }
}

\book {
  \score {
    \origScore
    \layout {
      % Each clip-region is a (START . END) pair
      % where both are rhythmic-locations.

      % (make-rhythmic-locations BAR-NUMBER NUM DEN)
      % means NUM/DEN whole-notes into bar numbered BAR-NUMBER

      clip-regions = #(list
        (cons
          (make-rhythmic-location 2 0 1)
          (make-rhythmic-location 4 0 1))

        (cons
          (make-rhythmic-location 0 0 1)
```

```
(make-rhythmic-location 4 0 1))

  (cons
    (make-rhythmic-location 0 0 1)
    (make-rhythmic-location 6 0 1))
  )
}
}
}

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```

\paper {
  system-separator-markup = \slashSeparator
  line-width = 120
}

```

```

notes = \relative c' {

```

```
c1 | c \break
c1 | c \break
c1 | c
}

\book {
  \score {
    \new GrandStaff <<
      \new Staff \notes
      \new Staff \notes
    >>
  }
}
```

The image displays three systems of musical notation for piano, arranged vertically. Each system consists of a grand staff with a treble clef on top and a bass clef on the bottom. The time signature is common time (C). Each system contains a single note with a fermata in both the treble and bass staves. The first system has a fermata over a middle C in the treble and a C two ledger lines below in the bass. The second system has a fermata over a G4 in the treble and a G2 in the bass. The third system has a fermata over a B4 in the treble and a B1 in the bass. Each system is separated from the next by a double bar line and a fermata symbol (two slanted parallel lines) above the treble staff. The number '3' is placed above the first system, and the number '5' is placed above the third system.

Table of contents

A table of contents is included using `\markuplist \table-of-contents`. The TOC items are added with the `\tocItem` command.

```

#(set-default-paper-size "a6")

\book {
  \markuplist \table-of-contents
  \pageBreak
  \tocItem \markup { The first score }
  \score {
    {
      c'1 \pageBreak
      \mark \default \tocItem \markup { Mark A }
      d'1
    }
  }
  \pageBreak
  \tocItem \markup { The second score }
  \score {

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

Musical score for the teacher's simple setting of the choral. It consists of two staves: a treble clef staff and a bass clef staff, both in common time (C). The melody is simple, with the lyrics: "Wer nur den lie - ben Gott läßt wal -". The bass line provides a simple harmonic accompaniment.

Pupil: Here's my version!

Musical score for the pupil's version of the choral. It consists of two staves: a treble clef staff and a bass clef staff, both in common time (C). The melody is more active than the teacher's version, with the lyrics: "Wer nur den lie - ben Gott läßt wal -". The bass line is also more active, providing a more complex harmonic accompaniment.

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

Musical score for the teacher's reference version of the choral. It consists of two staves: a treble clef staff and a bass clef staff, both in common time (C). The melody is more complex than the pupil's version, with the lyrics: "Wer nur den lie - ben Gott läßt wal -". The bass line is also more complex, providing a more sophisticated harmonic accompaniment.

ten und hof - fet auf ihn al - le Zeit

This system shows the first three measures of a musical piece. The vocal line (treble clef) has a half note 'ten' in the first measure, a quarter note 'und' in the second, and a half note 'hof - fet' in the third. The second measure is split between 'auf' and 'ihn', and the third between 'al - le' and 'Zeit'. The piano accompaniment (bass clef) consists of chords in the first two measures and a single note in the third. The key signature has one sharp (F#).

ten und hof - fet auf ihn al - le Zeit

This system shows the second three measures. The vocal line has a half note 'ten' in the first measure, a quarter note 'und' in the second, and a half note 'hof - fet' in the third. The second measure is split between 'auf' and 'ihn', and the third between 'al - le' and 'Zeit'. The piano accompaniment features a more active bass line with eighth notes in the second and third measures. The key signature has one sharp (F#).

ten und hof - fet auf ihn al - le Zeit

This system shows the third three measures. The vocal line has a half note 'ten' in the first measure, a quarter note 'und' in the second, and a half note 'hof - fet' in the third. The second measure is split between 'auf' and 'ihn', and the third between 'al - le' and 'Zeit'. The piano accompaniment has a more complex bass line with eighth notes and chords in the second and third measures. The key signature has one sharp (F#).

Titles

Sezione “Titles and headers” in *Guida alla Notazione*

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))
```

```
% use it in the title block:
\header {
  title = "Including the date!"
  subtitle = \date
}
```

```
\score {
  \relative c' {
    c4 c c c
  }
}
```

```
% and use it in a \markup block:
\markup {
  \date
}
```

Including the date!

18-11-2023

18-11-2023

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName.self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\paper { left-margin = 3\cm }

\score {
  \new StaffGroup <<

  \new Staff \with {
    \override InstrumentName.self-alignment-X = #LEFT
    instrumentName = \markup \left-column {
      "Left aligned"
      "instrument name"
    }
  }
}
```

```

    }
    shortInstrumentName = "Left"
  }

  { c''1 \break c''1 }

\new Staff \with {
  \override InstrumentName.self-alignment-X = #CENTER
  instrumentName = \markup \center-column {
    Centered
    "instrument name"
  }
  shortInstrumentName = "Centered"
}

{ g'1 g'1}

\new Staff \with {
  \override InstrumentName.self-alignment-X = #RIGHT
  instrumentName = \markup \right-column {
    "Right aligned"
    "instrument name"
  }
  shortInstrumentName = "Right"
}

{ e'1 e'1 }

>>

\layout {
  ragged-right = ##t
  indent = 4\cm
  short-indent = 2\cm
}
}

```

Outputting the version number

It is possible to print the version number of LilyPond in markup.

```
\markup { Processed with LilyPond version #(lilypond-version) }
```

Processed with LilyPond version 2.24.3

Spacing

Sezione “Spacing issues” in *Guida alla Notazione*

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:

```
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
    #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

The image displays two musical staves, each with a treble clef and a common time signature (C). The melody consists of quarter notes: C4, D4, E4, F4, G4, F4, E4, D4, followed by a whole note C4. Below each staff, the lyrics 'aa aa aa aa aa aa aa aa' are written. The lyrics are positioned very close to the staff lines, demonstrating the effect of the provided code snippet.

Far sì che la diteggiatura appaia dentro il rigo

Per impostazione predefinita, le diteggiature orientate verticalmente sono poste fuori dal rigo; questo comportamento tuttavia può essere disabilitato. Occorre fare attenzione alle situazioni in cui le diteggiature e i gambi sono rivolti nella stessa direzione: normalmente le diteggiature evitano soltanto i gambi con travature. Questa impostazione predefinita può essere cambiata in modo da evitare tutti i gambi oppure nessuno. L'esempio seguente mostra queste due opzioni, così come tornare al comportamento predefinito.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
```

```

\override Fingering.add-stem-support = ##f
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = ##t
a[-1 b]-2 g-0 r
\override Fingering.add-stem-support = #only-if-beamed
a[-1 b]-2 g-0 r
}

```

Page label

Page labels may be placed inside music or at top-level, and referred to in markups.

```

\label license
\markup "This snippet is available under the Creative Commons
Public Domain Dedication license."

```

```

{
  \repeat volta 2 {
    \label startRepeat
    \repeat unfold 20 { c'2 2 }
    \pageBreak
    2 2

See page ? for licensing information.

Proportional strict notespacing

If `strict-note-spacing` is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```
\relative c' <<
  \override Score.SpacingSpanner.strict-note-spacing = ##t
  \set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
  \new Staff {
    c8[ c \clef alto c c \grace { d16 } c8 c] c4
    c2 \grace { c16[ c16] } c2
  }
  \new Staff {
    c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
    c1
  }
  >>
```

Dinamiche e segni testuali allineati verticalmente

Tutti gli oggetti `DynamicLineSpanner` (forcelle e testi di dinamica) sono posti a una distanza minima dal rigo determinata da `'staff-padding`. Se si imposta `'staff-padding` su un valore abbastanza grande, le dinamiche saranno allineate.

```
music = \relative c' {
  a'2\p b\f
  e4\p f\f\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}
```

```
{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = #3
  \textLengthOn
  \override TextScript.staff-padding = #1
  \music
}
```

Allineare verticalmente gli ossia e il testo vocale

Questo frammento mostra come usare le proprietà di contesto `alignBelowContext` e `alignAboveContext` per controllare il posizionamento del testo vocale e degli ossia.

```
\paper {
  ragged-right = ##t
}

\relative c' <<
  \new Staff = "1" { c4 c s2 }
  \new Staff = "2" { c4 c s2 }
  \new Staff = "3" { c4 c s2 }
  { \skip 2
    <<
      \lyrics {
        \set alignBelowContext = #"1"
        lyrics4 below
      }
      \new Staff \with {
        alignAboveContext = #"3"
        fontSize = #-2
        \override StaffSymbol.staff-space = #(magstep -2)
        \remove "Time_signature_engraver"
      } {
        \tuplet 6/4 {
          \override TextScript.padding = #3
          c8[~"ossia above" d e d e f]
        }
      }
    }
  >>
}
```

>>

The image displays three musical staves in a system. Each staff begins with a treble clef and a common time signature 'C'. The first staff contains two quarter notes followed by the text 'lyrics below'. The second staff contains two quarter notes followed by the text 'ossia above'. Below the second staff, there is a smaller staff containing a sixteenth-note scale starting on G4, with a '6' above it indicating a sixteenth-note rest. The third staff contains two quarter notes.

Modificare il tempo senza mostrare l'indicazione metronomica

Per cambiare il tempo del file MIDI senza che appaia l'indicazione metronomica, basta renderla invisibile.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempoHideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout { }
  \midi { }
}
```

Creare dinamiche personalizzate nell'output MIDI

L'esempio seguente mostra come creare un segno di dinamica, non incluso nell'elenco predefinito, e assegnargli un valore specifico così che possa essere usato per cambiare l'output MIDI.

Al segno di dinamica `\rfz` viene assegnato il valore 0.9.

```
##(define (myDynamics dynamic)
  (if (equal? dynamic "rfz")
      0.9
      (default-dynamic-absolute-volume dynamic)))

\score {
  \new Staff {
    \set Staff.midiInstrument = #"cello"
    \set Score.dynamicAbsoluteVolumeFunction = #myDynamics
    \new Voice {
      \relative {
        a'4\pp b c-\rfz
      }
    }
  }
  \layout {}
  \midi {}
}
```

Customized drum notation in printed and MIDI output

Customized drum “pitch” names (suitable for a custom drum style, for example) may be used both in printed and MIDI output by defining such variables as `drumPitchNames`, `drumStyleTable` and `midiDrumPitches`, as demonstrated here. In short, this snippet:

- defines some "pitch" names,
- defines how they will be rendered,
- tells LilyPond to use them for layout,
- assigns pitches to the names,
- tells LilyPond to use them for MIDI output.

```
%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#custom-percussion-staves
```

```
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%%
%% To use custom drum pitch names for your score and midi you need to follow
%% this route:
%%
%% %%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%% LAYOUT:
%% %%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%%
%% (1) Define a name and put it in `drumPitchNames'
%%     This can be done at toplevel with
%%         drumPitchNames.my-name = #'my-name
%%     It's possible to add an alias as well.
%% (2) Define how it should be printed
%%     Therefore put them into a top-level list, where each entry should
%%     be of the form:
%%         (my-name
%%          note-head-style-or-default
%%          articulation-type-or-#f
%%          staff-position)
%%     Example:
%%         #(define my-style
%%           '(
%%             (my-name default tenuto -1)
%%             ; ...
%%           ))
%% (3) Tell LilyPond to use these custom definitions, with
%%     drumStyleTable = #(alist->hash-table my-style)
%%     in a \layout or \with block
%%
%%     Now we're done for layout. Here is a short but complete example:
%%     \new DrumStaff
%%       \with { drumStyleTable = #(alist->hash-table my-style) }
%%       \drummode { my-name }
```

```

%% MIDI:
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%%
%% (1) Again at top-level, assign a pitch to your custom note name
%%     midiDrumPitches.my-name = ges
%%     Note that you have to use the name, which is in drumPitchNames, no alias
%% (2) Tell LilyPond to use this pitch(es), with
%%     drumPitchTable = #(alist->hash-table midiDrumPitches)
%%
%% Example:
%%     \score {
%%       \new DrumStaff
%%       \with {
%%         drumStyleTable = #(alist->hash-table my-style)
%%         drumPitchTable = #(alist->hash-table midiDrumPitches)
%%       }
%%       \drummode { my-name4 }
%%     \layout {}
%%     \midi {}
%%   }
%%
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%% TESTING
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%%
%% To test whether all is fine, run the following sequence in terminal:
%%     lilypond my-file.ly
%%     midi2ly my-file.midi
%%     gedit my-file-midi.ly
%%
%% This will do the following:
%% 1. create pdf and midi
%% 2. transform the midi back to a .ly-file
%%    (note: midi2ly is not always good in correctly identifying enharmonic pitches)
%% 3. open this file in gedit (or use another editor)
%% Now watch what you've got.
%%

Modificare l'equalizzazione predefinita degli strumenti MIDI

L'equalizzatore predefinito degli strumenti MIDI può essere modificato impostando la proprietà `instrumentEqualizer` nel contesto `Score` come una procedura Scheme definita dall'utente che usi il nome dello strumento MIDI come argomento insieme a una coppia di frazioni indicanti i volumi minimi e massimi da applicare a quello specifico strumento.

L'esempio seguente imposta i volumi massimo e minimo per il flauto e per il clarinetto.

```

#(define my-instrument-equalizer-alist '())

#(set! my-instrument-equalizer-alist
  (append
    '(
      ("flute" . (0.7 . 0.9))
      ("clarinet" . (0.3 . 0.6)))
    my-instrument-equalizer-alist))

#(define (my-instrument-equalizer s)
  (let ((entry (assoc s my-instrument-equalizer-alist)))
    (if entry
      (cdr entry))))

\score {
  <<
    \new Staff {
      \key g \major
      \time 2/2
      \set Score.instrumentEqualizer = #my-instrument-equalizer
      \set Staff.midiInstrument = "flute"
      \new Voice \relative {
        r2 g'\mp g fis~
        4 g8 fis e2~
        4 d8 cis d2
      }
    }
    \new Staff {
      \key g \major
      \set Staff.midiInstrument = "clarinet"
      \new Voice \relative {
        b'1\p a2. b8 a
        g2. fis8 e
        fis2 r
      }
    }
  >>
  \layout { }
  \midi { }
}

```

The image shows a musical score for two staves. Both staves are in G major (one sharp) and C major time signature. The top staff is marked *mp* and the bottom staff is marked *p*. The top staff contains a melody starting with a whole rest, followed by a half note G, a half note A, a quarter note B, a quarter note A, a quarter note G, a quarter note F#, and a quarter note E. The bottom staff contains a bass line starting with a whole note G, followed by a dotted half note A, a dotted half note B, a dotted half note A, and a whole note G.

Modello per notazione antica – trascrizione moderna di musica gregoriana

Questo esempio mostra come realizzare una trascrizione moderna di musica gregoriana. La musica gregoriana non presenta la suddivisione in misure né gambi; impiega soltanto le teste della minima e della semiminima, e dei segni appositi che indicano pause di diversa lunghezza.

```
\include "gregorian.ly"

chant = \relative c' {
  \set Score.timing = ##f
  f4 a2 \divisioMinima
  g4 b a2 f2 \divisioMaior
  g4( f) f( g) a2 \finalis
}

verba = \lyricmode {
  Lo -- rem ip -- sum do -- lor sit a -- met
}

\score {
  \new GregorianTranscriptionStaff <<
    \new GregorianTranscriptionVoice = "melody" \chant
    \new GregorianTranscriptionLyrics = "one" \lyricsto melody \verba
  >>
}
```

Modello per salmo anglicano

Questo modello presenta un modo per impostare un salmo anglicano. Mostra anche come le strofe possano essere aggiunte come testo separato al di sotto della musica. Le due strofe sono scritte con stili diversi per illustrare le varie possibilità.

```
SopranoMusic = \relative g' {

The image shows a musical score for a diatonic accordion. It consists of four staves. The top three staves are in treble clef, and the bottom staff is in bass clef. The time signature is common time (C). The first staff has a dynamic marking *p* (piano) at the start and *f* (forte) at the end, with a crescendo hairpin. The notes are quarter notes: C4, D4, E4, F4. The lyrics are "do do do do". The second staff has a dynamic marking *p* and notes: C4, D4, E4, F4. The lyrics are "re re re re". The third staff has a dynamic marking *mp* (mezzo-piano) and notes: C4, D4, E4, F4. The lyrics are "mi mi mi mi". The fourth staff has a dynamic marking *mf* (mezzo-forte) and notes: C3, D3, E3, F3. The lyrics are "mi mi mi mi".

Score for diatonic accordion

A template to write a score for a diatonic accordion.

- There is a horizontal staff indicating if the accordion must be pushed (thick line) or pulled (thin line)

- There is a small rhythmic staff with lyrics that describes the bass buttons to press. The bar lines are made from gridlines

- The tabulator staff for diatonic accordions shows the geographic position of the buttons and not (as for every other instrument) the pitch of the notes; the keys on the melody-side of the accordion are placed in three columns and about 12 rows

In the tabulator staff notation the outermost column is described with notes between lines, the innermost column is described with notes between lines and a cross as accidental, and the middle column is described with notes on a line, whereby the row in the middle is represented on the middle line in the staff.

Some words to transpose piano notes to the diatonic accordion:

1. Every diatonic accordion is built for some keys only (for example, for the keys of C major and F major), so it is important to transpose a piano melody to match one of these keys. Transpose the source code, not only the output because this code is required later on to translate it once more to the tabulator staff. This can be done with the command `displayLilyMusic`.

2. You have to alternate the push- and pull-direction of the accordion regularly. If the player has a too long part to pull the accordion gets broken. On the other hand, some harmonies are only available in one direction. Considering this, decide which parts of the melody are the push-parts and which the pull-parts.

3. For each pull- or push-part translate the piano notes to the according tabulature representation.

```
verse = \lyricmode { Wie gross bist du! Wie gross bist du! }

The image shows a musical score for a string quartet. It consists of four staves, each labeled on the left: Violin 1, Violin 2, Viola, and Cello. The music is written in common time (C) and C major. The first measure of each staff contains the following notes: Violin 1 (quarter, quarter, quarter, quarter), Violin 2 (quarter, quarter, quarter, quarter), Viola (quarter, quarter, quarter, quarter), and Cello (quarter, quarter, quarter, quarter). The second measure contains: Violin 1 (quarter, quarter, quarter, quarter), Violin 2 (quarter, quarter, quarter, quarter), Viola (quarter, quarter, quarter, quarter), and Cello (quarter, quarter, quarter, quarter). The third measure contains: Violin 1 (quarter, quarter, quarter, quarter), Violin 2 (quarter, quarter, quarter, quarter), Viola (quarter, quarter, quarter, quarter), and Cello (quarter, quarter, quarter, quarter). The fourth measure contains: Violin 1 (quarter, quarter, quarter, quarter), Violin 2 (quarter, quarter, quarter, quarter), Viola (quarter, quarter, quarter, quarter), and Cello (quarter, quarter, quarter, quarter).

Modello per quartetto d'archi con parti separate

Il frammento di codice del “Modello per quartetto d'archi” crea un bel quartetto, ma cosa fare se si ha bisogno di creare le singole parti? Questo nuovo modello mostra come usare la funzionalità `\tag` per dividere facilmente un pezzo in parti staccate.

Occorre dividere questo modello in file separati; i nomi dei file sono indicati nei commenti all'inizio di ogni file. `piece.ly` contiene tutte le definizioni musicali. Gli altri file – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly` e `vlc.ly` – creano ciascuna parte.

Non dimenticare di togliere i commenti quando usi i file separati!

Modello per complesso vocale

Ecco una tipica partitura corale a quattro parti, SATB. Se il complesso è più ampio, è spesso comodo scrivere gli elementi comuni in un'unica sezione, che verrà poi inclusa in tutte le parti. Ad esempio, l'indicazione di tempo e l'armatura di chiave sono quasi sempre le stesse per tutte le parti. Come nel modello dell'“Inno”, le quattro voci sono ripartite in due soli righi.

```
\paper {
  top-system-spacing.basic-distance = #10
  score-system-spacing.basic-distance = #20
  system-system-spacing.basic-distance = #20
  last-bottom-spacing.basic-distance = #10
}
```

```

Modello per gruppo vocale con riduzione per pianoforte automatica

Questo modello aggiunge una riduzione automatica per pianoforte alla tipica partitura vocale SATB illustrata in “Modello per complesso vocale”. Si dimostra così uno dei punti di forza di LilyPond – è possibile usare una definizione musicale più di una volta. Qualsiasi modifica venga fatta alle note delle voci (ad esempio, `tenorMusic`) verrà applicata anche alla riduzione per pianoforte.

```
\paper {
  top-system-spacing.basic-distance = #10
  score-system-spacing.basic-distance = #20
  system-system-spacing.basic-distance = #20
  last-bottom-spacing.basic-distance = #10

Modello per gruppo vocale con strofa e ritornello

Questo modello crea una partitura che inizia con una sezione solistica e prosegue in un ritornello a due voci. Illustra anche l'uso delle pause spaziatrici all'interno della variabile `\global` per definire i cambi di tempo (e altri elementi comuni a tutte le parti) nel corso di tutta la partitura.

```

global = {
  \key g \major

  % verse
  \time 3/4
  s2.*2
  \break

  % refrain
  \time 2/4
  s2*2
  \bar "|."
}

SoloNotes = \relative g' {
  \clef "treble"

  % verse
  g4 g g |
  b4 b b |

  % refrain
  R2*2 |
}

SoloLyrics = \lyricmode {
  One two three |
  four five six |
}

SopranoNotes = \relative c'' {
  \clef "treble"

  % verse
  R2.*2 |

  % refrain
  c4 c |
  g4 g |
}

SopranoLyrics = \lyricmode {
  la la |
  la la |
}

BassNotes = \relative c {
