This document shows a selected set of LilyPond snippets from the LilyPond Snippet Repository (https://lsr.di.unimi.it) (LSR). It is in the public domain.

We would like to address many thanks to Sebastiano Vigna for maintaining LSR web site and database, and the University of Milano for hosting LSR.

Please note that this document is not an exact subset of LSR: some snippets come from Documentation/snippets/new/ LilyPond sources directory, and snippets from LSR are converted through convert-ly, as LSR is based on a stable LilyPond version, and this document is for version 2.24.4.

Snippets are grouped by tags; tags listed in the table of contents match a section of LilyPond notation manual. Snippets may have several tags, and not all LSR tags may appear in this document.

In the HTML version of this document, you can click on the file name or figure for each example to see the corresponding input file.

For more information about how this manual fits with the other documentation, or to read this manual in other formats, see Section “Manuals” in General Information.

If you are missing any manuals, the complete documentation can be found at https://lilypond.org/.

This document has been placed in the public domain.

For LilyPond version 2.24.4
# Table of Contents

**Pitches** ......................................................... 1

- Adding ambitus per voice ........................................ 1
- Adding an ottava marking to a single voice ...................... 1
- Aiken head thin variant noteheads ............................ 2
- Altering the length of beamed stems ........................... 2
- Ambitus .................................................................... 3
- Ambitus after key signature ....................................... 3
- Ambitus with multiple voices ..................................... 4
- Applying note head styles depending on the step of the scale .... 4
- Automatically changing the stem direction of the middle note based on the melody .... 5
- Changing ottava text .............................................. 6
- Changing the ambitus gap ................................ ...... 6
- Changing the interval of lines on the stave .................... 7
- Clefs can be transposed by arbitrary amounts ................ 8
- Coloring notes depending on their pitch ........................ 8
- Creating a sequence of notes on various pitches .............. 9
- Creating custom key signatures ................................ 9
- Direction of merged 'fa' shape note heads .................... 10
- Force a cancellation natural before accidentals ............ 11
- Forcing a clef symbol to be displayed .......................... 11
- Generating random notes ...................................... 11
- Hiding accidentals on tied notes at the start of a new system 12
- Keep change clefs full sized ................................... 12
- Makam example .................................................. 13
- Modifying the Ottava spanner slope ............................ 13
- Non-traditional key signatures ................................ 14
- Numbers as easy note heads ................................... 14
- Orchestra, choir and piano template ............................. 15
- Preventing extra naturals from being automatically added .. 19
- Preventing natural signs from being printed when the key signature changes ........ 20
- Quoting another voice with transposition .................... 20
- Separating key cancellations from key signature changes ... 21
- Transposing pitches with minimum accidentals ("Smart" transpose) .... 21
- Turkish Makam example ...................................... 23
- Tweaking clef properties ..................................... 23
- Using autochange with more than one voice .................. 25

**Rhythms** ............................................................. 27

- Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms .......... 27
- Adding drum parts ............................................... 27
- Adjusting grace note spacing ................................... 28
- Aligning bar numbers .......................................... 28
- Alternative breve notes .................................... 29
- Appoggiatura or grace note before a bar line ................ 29
- Automatic beam subdivisions .................................. 30
- Automatically change durations ............................... 30
- Beam endings in Score context ................................ 31
- Beams across line breaks ..................................... 32
Changing beam knee gap .......................................................... 32
Changing form of multi-measure rests ....................................... 33
Changing the number of augmentation dots per note .................. 33
Changing the tempo without a metronome mark ......................... 33
Changing the tuplet number ..................................................... 34
Changing time signatures inside a polymetric section using \scaleDurations .................................................. 34
Chant or psalms notation .......................................................... 35
Compound time signatures ......................................................... 36
Conducting signs, measure grouping signs .................................. 36
Consistently left aligned bar numbers ........................................ 37
Controlling tuplet bracket visibility ......................................... 38
Cow and ride bell example ....................................................... 39
Creating metronome marks in markup mode ............................... 39
Engraving ties manually .......................................................... 40
Engraving tremolos with floating beams ..................................... 40
Entering several tuplets using only one \tuplet command ............... 41
Flat flags and beam nibs ............................................................ 41
Forcing rehearsal marks to start from a given letter or number ....... 42
Generating custom flags ............................................................ 43
Guitar strum rhythms ............................................................... 44
Heavily customized polymetric time signatures ......................... 45
High and Low woodblock example .......................................... 46
Making an object invisible with the `transparent property ............ 47
Making slurs with complex dash structure ................................ 47
Manually controlling beam positions ....................................... 48
Merging multi-measure rests in a polyphonic part ...................... 48
Modifying tuplet bracket length .............................................. 49
Moving dotted notes in polyphony .......................................... 49
Multi-measure rest length control ......................................... 50
Multi-measure rest markup ..................................................... 50
Non-default tuplet numbers .................................................... 51
Numbering single measure rests .......................................... 52
Partcombine and autoBeamOff ............................................... 52
Percussion example ............................................................... 53
Permitting line breaks within beamed tuplets ......................... 54
Positioning grace note beams at the height of normal note beams .. 55
Positioning grace notes with floating space ............................. 55
Positioning multi-measure rests ............................................ 55
Positioning opposing fermatas on a bar line ............................ 57
Preventing final mark from removing final tuplet ..................... 57
Printing bar numbers at regular intervals ............................... 58
Printing bar numbers for broken measures ............................. 58
Printing bar numbers inside boxes or circles .......................... 59
Printing bar numbers using modulo-bar-number-visible ............. 59
Printing bar numbers with changing regular intervals ............... 60
Printing metronome and rehearsal marks below the staff ............ 60
Printing music with different time signatures .......................... 61
Printing the bar number for the first measure ......................... 64
Printing tuplet brackets on the note head side ....................... 65
Redefining grace note global defaults .................................. 65
Removing bar numbers from a score ..................................... 66
Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff ........................................ 66
Rest styles ........................................................................ 67
Reverting default beam endings ............................................ 68
Expressive marks .................................................. 78

Rhythmic slashes .................................................. 69
Skips in lyric mode .............................................. 69
Skips in lyric mode (2) ........................................... 70
Stemlets .............................................................. 70
Strict beat beaming ............................................... 71
Subdividing beams ................................................. 71
Tam-tam example .................................................. 72
Tambourine example .............................................. 72
Three-sided box ..................................................... 73
Time signature in parentheses ................................... 73
Time signature in parentheses - method 3 ....................... 74
Time signature printing only the numerator as a number (instead of the fraction) ....... 74
Tweaking grace layout within music ................................ 75
User defined time signatures ..................................... 75
Using alternative flag styles ..................................... 76
Using grace note slashes with normal heads ..................... 76
Using ties with arpeggios ......................................... 77

Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms ................. 78
Adding parentheses around an expressive mark or chordal note ............................... 78
Adding timing marks to long glissandi ................................ 78
Adjusting the shape of falls and doits ................................ 79
Aligning the ends of hairpins to NoteColumn directions ...................................... 80
Alternative breve notes ............................................. 80
Asymmetric slurs ..................................................... 80
Breathing signs ...................................................... 81
Broken Crescendo Hairpin .......................................... 82
Caesura ("railtracks") with fermata ................................ 82
Center text below hairpin dynamics ................................ 83
Changing text and spanner styles for text dynamics ............................................. 84
Changing the appearance of a slur from solid to dotted or dashed ......................... 85
Changing the breath mark symbol ........................................................................ 85
Changing the number of augmentation dots per note ............................................ 86
Combining dynamics with markup texts ................................................................. 86
Contemporary glissando .............................................. 86
Controlling spanner visibility after a line break ..................................................... 87
Controlling the vertical ordering of scripts .......................................................... 87
Creating a delayed turn ......................................................................................... 88
Creating arpeggios across notes in different voices ............................................. 88
Creating cross-staff arpeggios in a piano staff ...................................................... 89
Creating cross-staff arpeggios in other contexts .................................................... 89
Creating double-digit fingerings ............................................................................ 90
Creating "real" parenthesized dynamics ................................................................. 90
Creating slurs across voices ................................................................................... 91
Creating text spanners ............................................................................................ 91
Dynamics custom text spanner postfix ................................................................. 92
Dynamics text spanner postfix ................................................................................ 93
Glissandi can skip grobs ......................................................................................... 93
Hairpins with different line styles ......................................................................... 94
Hiding the extender line for text dynamics ............................................................ 94
Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p") ........... 94
Inserting a caesura ................................................................................................... 98
Laissez vibrer ties ................................................................................................... 98

Pitches

Section “Pitches” in Notation Reference

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>

Adding an ottava marking to a single voice

If you have more than one voice on the staff, setting octavation in one voice transposes the position of notes in all voices for the duration of the ottava bracket. If the octavation is only intended to apply to one voice, the Ottava_spanner_engraver should be moved to Voice context.

\layout {
  \context {
    \Staff {
      \remove Ottava_spanner_engraver
    }
    \context {
      \Voice {
        \consists Ottava_spanner_engraver
      }
    }
  }

  {\clef bass}
  << { <g d'>1~ q2 <c' e'> } \}}
Aiken head thin variant noteheads

Aiken head white notes get harder to read at smaller staff sizes, especially with ledger lines. Losing interior white space makes them appear as quarter notes.

\score {
  {\aikenHeads
c''2 a' c' a

  % Switch to thin-variant noteheads
  \set shapeNoteStyles = ##(doThin reThin miThin
                                    faThin sol laThin tiThin)
  c'' a' c' a
}
}

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the beamed-lengths property of the details of the Stem. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

\relative c' {
  \override Stem.details.beamed-lengths = #'(2)
  a8[ a] a16[ a] a32[ a]
  \override Stem.details.beamed-lengths = #'(8 10 12)
  a8[ a] a16[ a] a32[ a] r8
  \override Stem.details.beamed-lengths = #'(8)
  a8[ a]
\override Stem.details.beamed-lengths = #'(8.5)
a8[ a]
\revert Stem.details.beamed-lengths
a8[ a] a16[ a] a32[ a] r16

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. AmbitusNoteHead grobs also have ledger lines.

\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

<<
\new Staff {
  \relative c' {
    \time 2/4
    c4 f'
  }
}
\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}
>>

Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The \ambitusAfter function allows for changing this placement. Syntax is \ambitusAfter grob-interface (see
Graphical Object Interfaces (http://lilypond.org/doc/v2.22/Documentation/internals/graphical-object-interfaces) for a list of possible values for grob-interface.

A common use case is printing the ambitus between key signature and time signature.

\new Staff \with {
    \consists Ambitus_engraver
} \relative {
    \ambitusAfter key-signature
    \key d \major
    es'8 g bes cis d2
}

Ambitus with multiple voices

Adding the Ambitus_engraver to the Staff context creates a single ambitus per staff, even in the case of staves with multiple voices.

\new Staff \with {
    \consists "Ambitus_engraver"
}
<<
\new Voice \relative c'' {
    \voiceOne
    c4 a d e
    f1
}
\new Voice \relative c' {
    \voiceTwo
    es4 f g as
    b1
}
>>

Applying note head styles depending on the step of the scale

The shapeNoteStyles property can be used to define various note head styles for each step of the scale (as set by the key signature or the tonic property).

This property requires a set of symbols, which can be purely arbitrary (geometrical expressions such as triangle, cross, and xcircle are allowed) or based on old American engraving tradition (some latin note names are also allowed).

That said, to imitate old American song books, there are several predefined note head styles available through shortcut commands such as \aikenHeads or \sacredHarpHeads.

This example shows different ways to obtain shape note heads, and demonstrates the ability to transpose a melody without losing the correspondence between harmonic functions and note head styles.
fragment = {
    \key c \major
    c2 d
    e2 f
    g2 a
    b2 c
}

\new Staff { 
    \transpose c d
    \relative c' { 
        \set shapeNoteStyles = ##(do re mi fa
                           #f la ti)
        \fragment
    }
    \break
    \relative c' { 
        \set shapeNoteStyles = ##(cross triangle fa #f
                                mensural xcircle diamond)
        \fragment
    }
}

Automatically changing the stem direction of the middle note based on the melody

LilyPond can alter the stem direction of the middle note on a staff so that it follows the melody, by adding the Melody_engraver to the Voice context.

The context property suspendMelodyDecisions may be used to turn off this behavior locally.

\relative c''' { 
    \time 3/4
    a8 b g f b g | 
    \set suspendMelodyDecisions = ##t
    a b g f b g |
    \unset suspendMelodyDecisions
    c b d c b c |
}

\layout { 
    \context { 
        \Voice
Changing ottava text

Internally, \ottava sets the properties ottavation (for example, to 8va or 8vb) and middleCPosition. To override the text of the bracket, set ottavation after invoking \ottava.

Short text is especially useful when a brief ottava is used.

{ c'2 \
  \ottava #1 \
  \set Staff.ottavation = #"8" \
  c''2 \
  \ottava #0 \
  c'1 \
  \ottava #1 \
  \set Staff.ottavation = #"Text" \
  c''1 
}

Changing the ambitus gap

It is possible to change the default gap between the ambitus noteheads and the line joining them.

\layout { 
  \context { 
    \Voice 
    \consists "Ambitus_engraver"
  }
}

\new Staff { 
  \time 2/4 
  \override AmbitusLine.gap = #0 
  c'4 g''
}

\new Staff { 
  \time 2/4 
  c'4 g''
}
Changing the interval of lines on the stave

staffLineLayoutFunction is used to change the position of notes. This snippet shows setting its value to ly:pitch-semitones in order to produce a chromatic scale with the distance between each space and line of the stave equal to one semitone.

```
scale = \relative c' {
    a4 ais b c
cis4 d dis e
f4 fis g gis
a1}
}
```

```
\new Staff \with {
\remove "Accidental_engraver"
staffLineLayoutFunction = #ly:pitch-semitones
}
{
<<
\scale
\context NoteNames {
    \set printOctaveNames = ##f
\scale}
Clefs can be transposed by arbitrary amounts

Clefs can be transposed by arbitrary amounts, not just by octaves.

\relative c' { 
\clef treble 
c4 c c c 
\clef "treble_8" 
c4 c c c 
\clef "treble_5" 
c4 c c c 
\clef "treble^-3" 
c4 c c c 
}

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

%Association list of pitches to colors.
#(define color-mapping
(list
(cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
(cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
(cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
(cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
(cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
(cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
(cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
(cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
(cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
(cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
(cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
(cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
(cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
(cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
(cons (ly:make-pitch 0 4 SHARP) (x11-color 'blue))
(cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
(cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))
\begin{verbatim}
% Compare pitch and alteration (not octave).
define (pitch-equals? p1 p2)
   (and
      (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
      (= (ly:pitch-notename p1) (ly:pitch-notename p2))))

(define (pitch-to-color pitch)
   (let ((color (assoc pitch color-mapping pitch-equals?)))
      (if color
         (cdr color))))

(define (color-notehead grob)
   (pitch-to-color
      (ly:event-property (event-cause grob) 'pitch)))

\score {
   \new Staff \relative c' {
      \override NoteHead.color = #color-notehead
      c8 b d dis ees f g aes
   }
}
\end{verbatim}

Creating a sequence of notes on various pitches

In music that contains many occurrences of the same sequence of notes at different pitches, the following music function may prove useful. It takes a note, of which only the pitch is used.

This example creates the rhythm used throughout Mars, from Gustav Holst’s The Planets.

\begin{verbatim}
rhythm =
   #define-music-function (p) (ly:pitch?)
      "Make the rhythm in Mars (the Planets) at the given pitch"
   #( \tuplet 3/2 { $p 8 8 8 } 4 4 8 8 4 #})

\new Staff {
   \time 5/4
   \rhythm c'
   \rhythm c''
   \rhythm g
}
\end{verbatim}

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

\begin{verbatim}
\new Staff \with {
\end{verbatim}
\override StaffSymbol.line-count = #8
\override KeySignature.flat-positions = #'((-7 . 6))
\override KeyCancellation.flat-positions = #'((-7 . 6))
% presumably sharps are also printed in both octaves
\override KeySignature.sharp-positions = #'((-6 . 7))
\override KeyCancellation.sharp-positions = #'((-6 . 7))

\override Clef.stencil = #
(lambda (grob)(grob-interpret-markup grob
#( \markup\combine
 \musicglyph "clefs.C"
 \translate #'(3 , -2)
 \musicglyph "clefs.F"
#}))
clefPosition = #3
middleCPosition = #3
middleCClefPosition = #3

{
\key d\minor
f bes, f bes,
}

\\[\text{\includegraphics[width=0.5\textwidth]{merged_fa_shapeNoteHeads.png}}\]

Direction of merged 'fa' shape note heads

Using property NoteCollision.fa-merge-direction, the direction of ‘fa’ shape note heads (‘fa’, ‘faThin’, etc.) can be controlled independently of the stem direction if two voices with the same pitch and different stem directions are merged. If this property is not set, the ‘down’ glyph variant is used.

{\clef bass

<< { \aikenHeads
f2
\override Staff.NoteCollision.fa-merge-direction = #UP
f2 }
\\ { \aikenHeads
f2
f2 }

>>
}

\\[\text{\includegraphics[width=0.5\textwidth]{merged_fa_shapeNoteHeads2.png}}\]
Force a cancellation natural before accidentals

The following example shows how to force a natural sign before an accidental.

\relative c' {  
  \key es \major  
  bes c des  
  \tweak Accidental.restore-first ##t  
  eis  
}

Forcing a clef symbol to be displayed

When a clef sign has already been displayed and it has not been changed to a different clef, then repeating the \clef command will be ignored by LilyPond, since it is not a change of clef. It is possible to force the clef to be redisplayed using the command \set Staff.forceClef = ##t.

\relative c' {  
  \clef treble  
  c1  
  \clef treble  
  c1  
  \set Staff.forceClef = ##t  
  c1  
  \clef treble  
  c1  
}

Generating random notes

This Scheme-based snippet generates 24 random notes (or as many as required), based on the current time (or any randomish number specified instead, in order to obtain the same random notes each time): i.e., to get different random note patterns, just change this number.

\score {  
  {  
    $(\let ((random-state (seed->random-state (current-time)))))  
    (make-sequential-music  
      (map (lambda (x)  
        (let ((idx (random 12 random-state)))  
          (make-event-chord  
            (list  
              (make-music 'NoteEvent  
                'duration (ly:make-duration 2 0 1/1)  
                'pitch (ly:make-pitch  
                  (quotient idx 7)  
                  (remainder idx 7)  
            )  
        )  
      )  
    )  
  )  
}
Hiding accidentals on tied notes at the start of a new system

This shows how to hide accidentals on tied notes at the start of a new system.

\relative c'' {  
\override Accidental.hide-tied-accidental-after-break = ##t  
cis\~ cis\~  
\break  
cis
}

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with full-size-change.

\relative c' {

}
Makam example

Makam is a type of melody from Turkey using 1/9th-tone microtonal alterations.
Consult the initialization file ‘ly/makam.ly’ for details of pitch names and alterations.

% Initialize makam settings
include "makam.ly"

\relative c' {
  \set Staff.keyAlterations = #'((6 . ,(- KOMA)) (3 . ,BAKIVE))
c4 cc db fk
gbm4 gfc gfb efk
fk4 db cc c
}

Modifying the Ottava spanner slope

It is possible to change the slope of the Ottava spanner.

\relative c'' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details = #'((left . ((Y . 0)
    (attach-dir . ,LEFT)
    (padding . 0)
    (stencil-align-dir-y . ,CENTER)))
    (right . ((Y . 5.0) ; Change the number here
      (padding . 0)
      (attach-dir . ,RIGHT)
      (text . ,(make-draw-dashed-line-markup
        (cons 0 -1.2))))))
  \override Staff.OttavaBracket.left-bound-info = #ly:horizontal-line-spanner::calc-left-bound-info-and-text
  \override Staff.OttavaBracket.right-bound-info = #ly:horizontal-line-spanner::calc-right-bound-info
  \ottava #1
  c1
  c''''1
}
Non-traditional key signatures

The commonly used \key command sets the keyAlterations property, in the Staff context.

To create non-standard key signatures, set this property directly. The format of this command is a list:

\set Staff.keyAlterations =
#`[((octave . step) . alter) ((octave . step) . alter) ...]

where, for each element in the list, octave specifies the octave (0 being the octave from middle C to the B above), step specifies the note within the octave (0 means C and 6 means B), and alter is ,SHARP ,FLAT ,DOUBLE-SHARP etc.

Alternatively, using the more concise format for each item in the list (step . alter) specifies the same alteration holds in all octaves.

For microtonal scales where a “sharp” is not 100 cents, alter refers to the alteration as a proportion of a 200-cent whole tone.

\include "arabic.ly"
\relative do' {
\set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
(1 . ,SEMI-FLAT)
(2 . ,FLAT)
(5 . ,FLAT)
(6 . ,SEMI-FLAT))
\set Staff.extraNatural = ##f
re reb \dwn reb resd \dwn dob |
dob sb dob sd do do |
}

Numbers as easy note heads

Easy notation note heads use the note-names property of the NoteHead object to determine what appears inside the note head. By overriding this property, it is possible to print numbers representing the scale-degree.

A simple engraver can be created to do this for every note head object it sees.

#(define Ez_numbers_engraver
(make-engraver
(acknowledgers
((note-head-interface engraver grob source-engraver)

Preventing extra naturals from being automatically added

In accordance with traditional typesetting rules, a natural sign is printed before a sharp or flat if a previous double sharp or flat on the same note is canceled. To change this behavior to contemporary practice, set the `extraNatural` property to `f` in the `Staff` context.

\begin{verbatim}
\relative c' {'
  aeses4 aes ais a
  \set Staff.extraNatural = ##f
  aeses4 aes ais a
}
\end{verbatim}
Preventing natural signs from being printed when the key signature changes

When the key signature changes, natural signs are automatically printed to cancel any accidentals from previous key signatures. This may be prevented by setting to \texttt{false} the 	exttt{printKeyCancellation} property in the \texttt{Staff} context.

\begin{verbatim}
\relative c' {
    \key d \major
    a4 b cis d
    \key g \minor
    a4 bes c d
    \set Staff.printKeyCancellation = ##f
    \key d \major
    a4 b cis d
    \key g \minor
    a4 bes c d
}
\end{verbatim}

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using \texttt{\transpose}. In this case, all the pitches (including the quoted ones) are transposed.

\begin{verbatim}
\addQuote clarinet {
    \transposition bes
    \repeat unfold 8 \{ d'16 d' d'8 \}
}
\addQuote sax {
    \transposition es'
    \repeat unfold 16 \{ a8 \}
}

quoteTest = {
    % french horn
    \transposition f
    g'4
    << \quoteDuring "clarinet" \{ \skip 4 \} s4"clar." >>
    << \quoteDuring "sax" \{ \skip 4 \} s4"sax." >>
    g'4
}

{
    \new Staff \with {
        instrumentName = \markup \{ \column { Horn "in F" } \}
    }
    \quoteTest
    \transpose c' d' << \quoteTest s4 _"up a tone" >>
\end{verbatim}
Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the 'break-align-orders property of the BreakAlignment grob.

The value of 'break-align-orders is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving key-cancellation before staff-bar; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

\new Staff {
\override Score.BreakAlignment.break-align-orders =
##((left-edge ambitus breathing-sign clef staff-bar
  key-cancellation key-signature time-signature custos)

  (left-edge ambitus breathing-sign clef key-cancellation
   staff-bar key-signature time-signature custos)

  (left-edge ambitus breathing-sign clef key-cancellation
   key-signature staff-bar time-signature custos))

\key des \major
c'1
\bar "||"
\key bes \major
c'1
}

Transposing pitches with minimum accidentals ("Smart" transpose)

This example uses some Scheme code to enforce enharmonic modifications for notes in order to have the minimum number of accidentals. In this case, the following rules apply:

- Double accidentals should be removed
- B sharp -> C
- E sharp -> F
- C flat -> B
- F flat -> E

In this manner, the most natural enharmonic notes are chosen.

#(define (naturalize-pitch p)
(let ((o (ly:pitch-octave p))
      (a (* 4 (ly:pitch-alteration p))))

}

Hüseyni Saz Semaisi

Lavtacı Andon

Tweaking clef properties

Changing the Clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines middleCClefPosition must also be specified, with positive or negative values moving middle C up or down respectively, relative to the staff’s center line.
For example, \clef "treble_8" is equivalent to setting the clefGlyph, clefPosition (the vertical position of the clef itself on the staff), middleCPosition and clefTransposition. Note that when any of these properties (except middleCPosition) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

```
{%
The default treble clef
\key f \major
c'1
%
The standard bass clef
\set Staff.clefGlyph = "clefs.F"
\set Staff.clefPosition = #2
\set Staff.middleCPosition = #6
\set Staff.middleCClefPosition = #6
\key g \major
c'1
%
The baritone clef
\set Staff.clefGlyph = "clefs.C"
\set Staff.clefPosition = #4
\set Staff.middleCPosition = #4
\set Staff.middleCClefPosition = #4
\key f \major
c'1
%
The standard choral tenor clef
\set Staff.clefGlyph = "clefs.G"
\set Staff.clefPosition = #-2
\set Staff.clefTransposition = #-7
\set Staff.middleCPosition = #1
\set Staff.middleCClefPosition = #1
\key f \major
c'1
%
A non-standard clef
\set Staff.clefPosition = #0
\set Staff.clefTransposition = #0
\set Staff.middleCPosition = #4
\set Staff.middleCClefPosition = #4
\key g \major
c'1 \break
%
The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = "clefs.F"
\set Staff.clefPosition = #2
c'1
\set Staff.clefGlyph = "clefs.G"
c'1
\set Staff.clefGlyph = "clefs.C"
```

Rhythms

Section “Rhythms” in Notation Reference

Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved.

For example, when entering a manual beam, the left square bracket has to be placed after the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (encoded within curly braces).

\begin{verbatim}
{ r16[ g16 \tuplet 3/2 { r16 e'8 } ]
g16( a \tuplet 3/2 { b d e' } )
g8(( a \tuplet 3/2 { b d' } e' ) - }
\time 2/4
\tuplet 5/4 { e'32( a b d' e' ) a'4.}
}
\end{verbatim}

Adding drum parts

Using the powerful pre-configured tools such as the \drummode function and the DrumStaff context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

drh = \drummode {
    cymc4."crash" hh16"h.h." hh hh hho hh8 hh16 hh
    hhc4 r4 r2
}
drl = \drummode {
    bd4 sn8 bd bd4 << bd ss >>
    bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
    timh4 ssh timl8 ssh r timh r4
    ssh8 timl r4 cb8 cb
}

\score {
    new DrumStaff \with {
        instrumentName = "timbales"
    }
}
\begin{verbatim}
drumStyleTable = #timbales-style
\override StaffSymbol.line-count = #2
\override BarLine.bar-extent = #'(-1 . 1)
}
<<
\timb
>>
\new DrumStaff \with { instrumentName = "drums" }
<<
\new DrumVoice { \stemUp \drh }
\new DrumVoice { \stemDown \drl }
>>

\layout { }
\midi { \tempo 4 = 120 }
\end{verbatim}

Adjusting grace note spacing

The space given to grace notes can be adjusted using the spacing-increment property of Score.GraceSpacing.

\begin{verbatim}
graceNotes = {
  \grace { c4 c8 c16 c32 }
c8
}
\relative c' { 
c8 
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}
\end{verbatim}

Aligning bar numbers

Bar numbers by default are right-aligned to their parent object. This is usually the left edge of a line or, if numbers are printed within a line, the left hand side of a bar line. The numbers may also be positioned directly over the bar line or left-aligned to the bar line.

\begin{verbatim}
\relative c' { 

Alternative breve notes

Breve notes are also available with two vertical lines on each side of the notehead instead of one line and in baroque style.

\relative c'' {
    \time 4/2
    c\breve |
    \override Staff.NoteHead.style = #'altdefault
    b\breve |
    \override Staff.NoteHead.style = #'baroque
    b\breve |
    \revert Staff.NoteHead.style
    a\breve |
}

Appoggiatura or grace note before a bar line

By default, appoggiaturas and grace notes that occur on the first beat of a measure are printed after the bar line. They can however be printed before, simply by adding an invisible BarLine and then the visible one, as demonstrated here.

{  
    R1  
    %% default  
    \appoggiatura d''8 c''4 r2.  
    %% cheated  
    \appoggiatura { \bar "" d''8 \bar "" } c''4 r2.  
}
Automatic beam subdivisions

Beams can be subdivided automatically. By setting the property `subdivideBeams`, beams are subdivided at beat positions (as specified in `baseMoment`).

```latex
\new Staff {
  \relative c'' {
    \clef \G
    \time 4/4
    \set timeSignature = \time 4/4
    \set baseMoment = \ly:make-moment \( \frac{1}{8} \)
    \set beatStructure = 2,2,2,2
    \relative a' {
      \global ly:paste "subdivide beams" [a g f c' b a g]
    }
    \set timeSignature = \time 4/4
    \set baseMoment = \ly:make-moment \( \frac{1}{16} \)
    \set beatStructure = 4,4,4,4
    \relative a' {
      \global ly:paste "subdivide beams" [a g f c' b a g]
    }
    \set timeSignature = \time 4/4
    \set baseMoment = \ly:make-moment \( \frac{1}{32} \)
    \set beatStructure = 8,8,8,8
    \relative a' {
      \global ly:paste "subdivide beams" [a g f c' b a g]
    }
    \set timeSignature = \time 4/4
    \set baseMoment = \ly:make-moment \( \frac{1}{64} \)
    \set beatStructure = 16,16,16,16
    \relative a' {
      \global ly:paste "subdivide beams" [a g f c' b a g]
    }
  }
}
```

Automatically change durations

`shiftDurations` can be used to change the note lengths of a piece of music.

It takes two arguments - the scaling factor as a power of two, and the number of dots to be added as a positive integer.

```latex
\paper { indent = 0 }

\music = \relative c'' { a1 b2 c4 d8 r }
\score {
  \new Voice {
    \time 4/2
    \global ly:paste "default" [a g f c' b a g]
    \global ly:paste "baseMoment 1/8" [a g f c' b a g]
    \global ly:paste "baseMoment 1/16" [a g f c' b a g]
  }
}
```
Beam endings in Score context

Beam-ending rules specified in the Score context apply to all staves, but can be modified at both Staff and Voice levels:

\relative c'' { 
  \time 5/4
  \% Set default beaming for all staves
  \set Score.baseMoment = #(ly:make-moment 1/8)
  \set Score.beatStructure = 3,4,3
  \%
  \new Staff {
    c8 c c c c c c c c
  }
  \new Staff {
    \%
    \set Staff.beatStructure = 6,4
    c8 c c c c c c c c
  }
  \new Staff {
    \%
    \set Score.beatStructure = 3,4,3
    \%
    \new Staff {
      c8 c c c c c c c c
    }
  }
}

% Inherit beaming from Score context
<<
c8 c c c c c c c c c c
%
Modify beaming for this voice only
\new Voice {
  \voiceTwo
  \set Voice.beatStructure = 6,4
  a8 a a a a a a a a a
}
}
}
}
}
}
}
}

Beams across line breaks

Line breaks are normally forbidden when beams cross bar lines. This behavior can be changed as shown:
\relative c'' {
  \override Beam.breakable = ##t
  c8 c[ c] c[ c] c[ c] c[ \break
  c8] c[ c] c[ c] c[ c] c
}

Changing beam knee gap

Kneed beams are inserted automatically when a large gap is detected between the note heads. This behavior can be tuned through the auto-knee-gap property. A kneed beam is drawn if the gap is larger than the value of auto-knee-gap plus the width of the beam object (which depends on the duration of the notes and the slope of the beam). By default auto-knee-gap is set to 5.5 staff spaces.

f8 f''8 f8 f''8
\override Beam.auto-knee-gap = #6
Changing form of multi-measure rests

If there are ten or fewer measures of rests, a series of longa and breve rests (called in German “Kirchenpausen” - church rests) is printed within the staff; otherwise a simple line is shown. This default number of ten may be changed by overriding the expand-limit property.

```
\relative c' {
  \compressMMRests {
    R1*2 | R1*5 | R1*9
  }
  \override MultiMeasureRest.expand-limit = #3
  R1*2 | R1*5 | R1*9
}
```

Changing the number of augmentation dots per note

The number of augmentation dots on a single note can be changed independently of the dots placed after the note.

```
\relative c' {
  c4.. a16 r2 |
  \override Dots.dot-count = #4
  c4.. a16 r2 |
  \override Dots.dot-count = #0

```

Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
  }
}
```
Changing the tuplet number

By default, only the numerator of the tuplet number is printed over the tuplet bracket, i.e., the numerator of the argument to the \tuplet command.

Alternatively, num:den of the tuplet number may be printed, or the tuplet number may be suppressed altogether.

```latex
\relative c'' {
  \tuplet 3/2 { c8 c c }
  \tuplet 3/2 { c8 c c }
  \override TupletNumber.text = #tuplet-number::calc-fraction-text
  \tuplet 3/2 { c8 c c }
  \omit TupletNumber
  \tuplet 3/2 { c8 c c }
}
```

Changing time signatures inside a polymetric section using \scaleDurations

The measureLength property, together with measurePosition, determines when a bar line is needed. However, when using \scaleDurations, the scaling of durations makes it difficult to change time signatures. In this case, measureLength should be set manually, using the ly:make-moment callback. The second argument must be the same as the second argument of \scaleDurations.

```latex
\layout {
  \context {
    \Score
    \remove "Timing_translator"
  }
  \context {
    \Staff
    \consists "Timing_translator"
  }
```
Chant or psalms notation

This form of notation is used for Psalm chant, where verses aren’t always the same length.

\begin{verbatim}
stemOff = \hide Staff.Stem
stemOn = \undo \stemOff
\end{verbatim}
Compound time signatures

Odd 20th century time signatures (such as “5/8”) can often be played as compound time signatures (e.g. “3/8 + 2/8”), which combine two or more inequal metrics.

LilyPond can make such music quite easy to read and play, by explicitly printing the compound time signatures and adapting the automatic beaming behavior.

Conducting signs, measure grouping signs

Beat grouping within a measure is controlled by the beatStructure context property. Values of beatStructure are established for many time signatures in file scm/time-signature-settings.scm. Values of beatStructure can be changed or set with \set. Alternatively, \time can be used to both set the time signature and establish the beat structure. For this, you specify the internal grouping of beats in a measure as a list of numbers (in Scheme syntax) before the time signature.

\time applies to the Timing context, so it will not reset values of beatStructure or baseMoment that are set in other lower-level contexts, such as Voice.

If the Measure_grouping_ engraver is included in one of the display contexts, measure grouping signs will be created. Such signs ease reading rhythmically complex modern music. In the example, the 9/8 measure is grouped in two different patterns using the two different methods, while the 5/8 measure is grouped according to the default setting in scm/time-signature-settings.scm:

\score {
  \new Voice \relative c' { 
    \time 9/8 
    g8 g d d g g a( bes g) | 
    \set Timing.beatStructure = 2,2,2,3 
    g8 g d d g g a( bes g) | 
    \time 4,5 9/8 
    g8 g d d g g a( bes g) | 
    \time 5/8 
    a4. g4 | 
  } 
  \layout { 
    \context { 
      \Staff 
      \consists "Measure_grouping_ engraver" 
    } 
  } 
}
Consistently left aligned bar numbers

When left aligning bar numbers, overlapping problems may occur with Staves brackets.

The snippet solves this by keeping right aligned the first bar number following line breaks.

```plaintext
constantlyLeftAlignedBarNumbers = {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \override Score.BarNumber.self-alignment-X = #(lambda (grob)
    (let ((break-dir (ly:item-break-dir grob)))
      (if (= break-dir RIGHT) RIGHT LEFT)))
}

\new ChoirStaff <<
  \new Staff {
    \relative c' {
      \set Score.barNumberVisibility = #(every-nth-bar-number-visible 3)
      \bar ""
      \consistentlyLeftAlignedBarNumbers

      \set Score.currentBarNumber = #112
      \repeat unfold 8 { R1 }
      \break
      \repeat unfold 9 { R1 }
      \break
      \repeat unfold 7 { R1 }
    }
  }

\new Staff {
  \relative c' {
    \repeat unfold 24 { R1 }
  }
}
>>

\layout {
  indent = #0
  ragged-right = ##t
  ragged-last = ##t
}
```
Controlling tuplet bracket visibility

The default behavior of tuplet bracket visibility is to print a bracket unless there is a beam of the same length as the tuplet.

To control the visibility of tuplet brackets, set the property `bracket-visibility` to either `#t` (always print a bracket), `'if-no-beam` (only print a bracket if there is no beam), or `#f` (never print a bracket). The latter is in fact equivalent to omitting the `TupletBracket` object altogether from the printed output.

```music
\relative c'' {
  \tuplet 3/2 { c16[ d e } f8]
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}
```

```music
\new Voice {
  \relative c' {
    \override Score.TextMark.non-musical = ##f  
    \textMark "default" \music
    \override TupletBracket.bracket-visibility = '#if-no-beam 
    \textMark \markup "'if-no-beam" \music
    \override TupletBracket.bracket-visibility = ##t 
    \textMark \markup \typewriter "#t" \music
    \override TupletBracket.bracket-visibility = ##f 
    \textMark \markup \typewriter "#f" \music
    \omit TupletBracket
    \textMark \markup \typewriter "omit" \music
  }
}
```
Cow and ride bell example

Two different bells, entered with 'cb' (cowbell) and 'rb' (ridebell).
\paper { tagline = ##f }

#(define mydrums '((ridebell default #f 3)
(cowbell default #f -2)))

\new DrumStaff \with { instrumentName = #'Different Bells' }

\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \set DrumStaff.clefPosition = 0.5
  \override DrumStaff.StaffSymbol.line-positions = #'(-2 3)
  \override Staff.BarLine.bar-extent = '#(-1.0 . 1.5)

  \time 2/4
  rb8 8 cb8 16 rb16-> ~ | 
  16 8 16 cb8 8 | 
}

Different Bells

Creating metronome marks in markup mode

New metronome marks can be created in markup mode, but they will not change the tempo in MIDI output.
\relative c' {
  \tempo \markup {
    \concat {
      ( \smaller \general-align #Y #DOWN \note {16.} #1
        " = " 
        \smaller \general-align #Y #DOWN \note {8} #1
      )
    }
    c1
    c4 c' c ,2
  }
}
Engraving ties manually

Ties may be engraved manually by changing the `tie-configuration` property of the `TieColumn` object. The first number indicates the distance from the center of the staff in half staff-spaces, and the second number indicates the direction (1 = up, -1 = down).

Note that LilyPond makes a distinction between exact and inexact values for the first number. If using an exact value (i.e., either an integer or a fraction like `\( \frac{4}{5} \))`, the value serves as a rough vertical position that gets further tuned by LilyPond to make the tie avoid staff lines. If using an inexact value like a floating point number, it is taken as the vertical position without further adjustments.

```
(relative c' {<c e g>2~<c e g>
\override TieColumn.tie-configuration =
    #'((0.0 . 1) (-2.0 . 1) (-4.0 . 1))
\relative c' {<c e g>2~<c e g>
\override TieColumn.tie-configuration =
    #'((0 . 1) (-2 . 1) (-4 . 1))
\relative c' {<c e g>2~<c e g>
```

Engraving tremolos with floating beams

If a tremolo’s total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the `gap-count` property of the `Beam` object, and the size of the gaps between beams and stems is set with the `gap` property.

```
(relative c'' {\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #1\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #2\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #3\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #3\override Beam.gap = #1.33\repeat tremolo 8 { a32 f }
\override Beam.gap = #1\repeat tremolo 8 { a32 f }
```
\override Beam.gap = #0.67
\repeat tremolo 8 \{ a32 f \}
\override Beam.gap = #0.33
\repeat tremolo 8 \{ a32 f \}
}

**Entering several tuplets using only one \tuplet command**

The property `tupletSpannerDuration` sets how long each of the tuplets contained within the brackets after `\tuplet` should last. Many consecutive tuplets can then be placed within a single `\tuplet` expression, thus saving typing.

There are several ways to set `tupletSpannerDuration`. The command `\tupletSpan` sets it to a given duration, and clears it when instead of a duration `\default` is specified. Another way is to use an optional argument with `\tuplet`.

```
\relative c' { 
  \time 2/4 
  \tupletSpan 4 
  \tuplet 3/2 \{ c8"\tupletSpan 4" c c c c \}
  \tupletSpan \default 
  \tuplet 3/2 \{ c8"\tupletSpan \default" c c c c \}
  \tuplet 3/2 4 \{ c8"\tuplet 3/2 4 {...}" c c c c \}
}
```

```
\tuplet 3/2 4 {...} \
\tupletSpan 4 \tupletSpan \default
```

**Flat flags and beam nibs**

Flat flags on lone notes and beam nibs at the ends of beamed figures are both possible with a combination of `stemLeftBeamCount`, `stemRightBeamCount` and paired `[]` beam indicators.

For right-pointing flat flags on lone notes, use paired `[]` beam indicators and set `stemLeftBeamCount` to zero (see Example 1).

For left-pointing flat flags, set `stemRightBeamCount` instead (Example 2).

For right-pointing nibs at the end of a run of beamed notes, set `stemRightBeamCount` to a positive value. And for left-pointing nibs at the start of a run of beamed notes, set `stemLeftBeamCount` instead (Example 3).

Sometimes it may make sense for a lone note surrounded by rests to carry both a left- and right-pointing flat flag. Do this with paired `[]` beam indicators alone (Example 4).

(Note that `\set stemLeftBeamCount` is always equivalent to `\once `\set`. In other words, the beam count settings are not “sticky”, so the pair of flat flags attached to the lone c’16[] in the last example have nothing to do with the `\set` two notes prior.)
Forcing rehearsal marks to start from a given letter or number

This snippet demonstrates how to obtain automatic ordered rehearsal marks, but from the letter or number desired.

\relative c' { 
  c1 \mark \default
Generating custom flags

The stencil property of the Flag grob can be set to a custom scheme function to generate the glyph for the flag.

```scheme
#(define-public (weight-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
         (log (- (ly:grob-property stem-grob 'duration-log) 2))
         (is-up? (eqv? (ly:grob-property stem-grob 'direction) UP))
         (yext (if is-up? (cons (* log -0.8) 0) (cons 0 (* log 0.8))))
         (flag-stencil (make-filled-box-stencil `(-0.4 . 0.4) yext))
         (stroke-style (ly:grob-property grob 'stroke-style))
         (stroke-stencil (if (equal? stroke-style "grace"
                                     (make-line-stencil 0.2 -0.9 -0.4 0.9 -0.4)
                                     empty-stencil))
         (ly:stencil-add flag-stencil stroke-stencil)))

% Create a flag stencil by looking up the glyph from the font
#(define (inverted-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
         (dir (if (eqv? (ly:grob-property stem-grob 'direction) UP) "d" "u"))
         (flag (retrieve-glyph-flag "" dir "" grob))
         (line-thickness (ly:staff-symbol-line-thickness grob))
         (stem-thickness (ly:grob-property stem-grob 'thickness))
         (stem-width (* line-thickness stem-thickness))
         (stroke-style (ly:grob-property grob 'stroke-style))
         (stencil (if (null? stroke-style)
                     flag
                     (add-stroke-glyph flag stem-grob dir stroke-style "")))
         (rotated-flag (ly:stencil-rotate-absolute stencil 180 0 0))

  wbl8 16 16-> 16 16 r8 |
}

Making an object invisible with the ’transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

\relative {
  \time 2/4
  \once \hide Stem
  \once \override Stem.length = #8
  b'8 ~ 8\noBeam
  \once \hide Stem
  \once \override Stem.length = #8
  g8 ~ 8\noBeam
}\
  {  b8 g g e
  }

Making slurs with complex dash structure

Slurs can be made with complex dash patterns by defining the dash-definition property. dash-definition is a list of dash-elements. A dash-element is a list of parameters defining the dash behavior for a segment of the slur.
The slur is defined in terms of the bezier parameter \( t \) which ranges from 0 at the left end of the slur to 1 at the right end of the slur. `dash-element` is a list \((\text{start-t} \ \text{stop-t} \ \text{dash-fraction} \ \text{dash-period})\). The region of the slur from `start-t` to `stop-t` will have a fraction `dash-fraction` of each `dash-period` black. `dash-period` is defined in terms of staff spaces. `dash-fraction` is set to 1 for a solid slur.

\[
\begin{align*}
\text{\textbf{\textbackslash relative \ $c'$ \ \{}} \\
\text{\textbf{\textbackslash once \ \textbackslash override}} \\
\text{Slur.dash-definition \ = \ '#'((0 \ 0.3 \ 0.1 \ 0.75)} \\
\text{\( \quad \text{(0.3 \ 0.6 \ 1 \ 1)} \)} \\
\text{\( \quad \text{(0.65 \ 1.0 \ 0.4 \ 0.75)}) \}} \\
\text{\textbf{\textbackslash once \ \textbackslash override}} \\
\text{Slur.dash-definition \ = \ '#'((0 \ 0.25 \ 1 \ 1)} \\
\text{\( \quad \text{(0.3 \ 0.7 \ 0.4 \ 0.75)}) \}} \\
\text{\textbf{\textbackslash relative \ $c'$ \ \}} \\
\text{\begin{music}
\relative c' {
once \override Slur.dash-definition = #'((0 0.3 0.1 0.75)
(0.3 0.6 1 1)
(0.65 1.0 0.4 0.75))
c4( d e f)
\once \override Slur.dash-definition = #'((0 0.25 1 1)
(0.3 0.7 0.4 0.75)
(0.75 1.0 1 1))
c4( d e f)
}\end{music}}
\end{align*}
\]

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the positions setting of the Beam grob.

\[
\begin{align*}
\text{\textbf{\textbackslash relative \ $c'$ \ \{}} \\
\text{\textbf{\textbackslash time \ \textbackslash 2/4}} \\
\% \text{ from upper staff-line (position 2) to center (position 0)} \\
\text{\textbf{\textbackslash override \ Beam.positions \ = \ '#'(2 \ . \ 0)}} \\
c8 c \\
\% \text{ from center to one above center (position 1)} \\
\text{\textbf{\textbackslash override \ Beam.positions \ = \ '#'(0 \ . \ 1)}} \\
c8 c 
\end{align*}
\]

Merging multi-measure rests in a polyphonic part

When using multi-measure rests in a polyphonic staff, the rests will be placed differently depending on the voice they belong to. However they can be printed on the same staff line, using the following setting.

\[
\text{normalPos \ = \ \textbf{\textbackslash revert \ MultiMeasureRest.direction}}
\]

\[
\begin{align*}
\{ \\
\text{\( \text{<<} \)} \\
\text{\( \quad \text{c''1} \)
\}
\end{align*}
\]
Modifying tuplet bracket length

Tuplet brackets can be made to run to prefatory matter or the next note. Default tuplet brackets end at the right edge of the final note of the tuplet; full-length tuplet brackets extend farther to the right, either to cover all the non-rhythmic notation up to the following note, or to cover only the whitespace before the next item of notation, be that a clef, time signature, key signature, or another note. The example shows how to switch tuplets to full length mode and how to modify what material they cover.

\new RhythmicStaff {
  \set tupletFullLength = ##t
  \set tupletFullLengthNote = ##t
  \time 2/4
  \tuplet 3/2 { c4 4 4 }
  \time 4/4
  \tuplet 5/4 { 4 1 }
  \time 3/4
  2.
}

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be over-ridden by using the prefer-dotted-right property of NoteCollision.

\new Staff \relative c' <<
Multi-measure rest length control

Multi-measure rests have length according to their total duration which is under the control of `MultiMeasureRest.space-increment`. Note that the default value is 2.0.

```latex
relative c' {
\compressEmptyMeasures
R1*2 R1*4 R1*64 R1*16
\override Staff.MultiMeasureRest.space-increment = 2.5
R1*2 R1*4 R1*64 R1*16
}
```

Multi-measure rest markup

Markups attached to a multi-measure rest will be centered above or below it. Long markups attached to multi-measure rests do not cause the measure to expand. To expand a multi-measure rest to fit the markup, use an empty chord with an attached markup before the multi-measure rest. Text attached to a spacer rest in this way is left-aligned to the position where the note would be placed in the measure, but if the measure length is determined by the length of the text, the text will appear to be centered.

```latex
relative c' {
\compressMMRests {
  \textLengthOn
  <>^\markup { [MAJOR GENERAL] }
  R1*19
  <>^\markup { \italic { Cue: ... it is yours } }
  <>^\markup { A }
  R1*30^\markup { [MABEL] }
  \textLengthOff
```
Non-default tuplet numbers

LilyPond also provides formatting functions to print tuplet numbers different than the actual fraction, as well as to append a note value to the tuplet number or tuplet fraction.

```latex
\relative c' \{
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-tuplet-denominator-text 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    #(tuplet-number::non-default-tuplet-fraction-text 12 7)
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    (tuplet-number::append-note-wrapper
      (tuplet-number::non-default-tuplet-fraction-text 12 7)
      (ly:make-duration 3 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    (tuplet-number::append-note-wrapper
      tuplet-number::calc-fraction-text
      (ly:make-duration 2 0))
  \tuplet 3/2 { c8 c8 c8 c8 c8 c8 }
  \once \override TupletNumber.text =
    (tuplet-number::non-default-fraction-with-notes
      (ly:make-duration 2 1) (ly:make-duration 3 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
  \once \override TupletNumber.text =
    (ly:make-duration 3 0) 4 (ly:make-duration 2 0))
  \tuplet 3/2 { c4. c4. c4. c4. }
}\
Numbering single measure rests

Multi measure rests show their length by a number except for single measures. This can be changed by setting restNumberThreshold.

```latex
\compressEmptyMeasures
R1 R1*10 R1*11 \bar "||"
\set restNumberThreshold = 0
R1 R1*10 R1*11 \bar "||"
\set restNumberThreshold = 10
R1 R1*10 R1*11
```

![Example notation for numbered rests]

Partcombine and autoBeamOff

The function of \autoBeamOff when used with \partCombine can be difficult to understand. It may be preferable to use

```latex
\set Staff.autoBeaming = ##f
```

instead, to ensure that autobeaming will be turned off for the entire staff.

\partCombine apparently works with 3 voices – stem up single, stem down single, stem up combined.

An \autoBeamOff call in the first argument to \partCombine will apply to the voice that is active at the time the call is processed, either stem up single or stem up combined. An \autoBeamOff call in the second argument will apply to the voice that is stem down single.

In order to use \autoBeamOff to stop all autobeaming when used with \partCombine, it will be necessary to use three calls to \autoBeamOff.

```latex
%\set Staff.autoBeaming = ##f % turns off all autobeaming
\partCombine
{

Permitting line breaks within beamed tuplets

This artificial example shows how both manual and automatic line breaks may be permitted to within a beamed tuplet. Note that such off-beat tuplets have to be beamed manually.

\layout {
  \context {
    \Voice
    \% Permit line breaks within tuplets
    \remove "Forbid_line_break_engraver"
    \% Allow beams to be broken at line breaks
    \override Beam.breakable = ##t
  }
}
\relative c'' { a8
\repeat unfold 5 { \tuplet 3/2 { c[ b a] } }
\% Insert a manual line break within a tuplet
\tuplet 3/2 { c[ b \bar "" \break a] }
\repeat unfold 5 { \tuplet 3/2 { c[ b a] } }
c8
}
Positioning grace note beams at the height of normal note beams

When notes are placed on ledger lines, their beams are usually centred on the stave. Grace notes beams are shorter and grace notes on ledger lines may well have beams outside the stave. You can override this beaming for grace notes.

\begin{verbatim}
\relative c {
  \override Stem.no-stem-extend = ##f
  f8[ e]
  \grace { \override Stem.no-stem-extend = ##f f8[ e]
  \revert Stem.no-stem-extend
  }
  f8[ e]
}
\end{verbatim}

Positioning grace notes with floating space

Setting the property 'strict-grace-spacing makes the musical columns for grace notes 'floating', i.e., decoupled from the non-grace notes: first the normal notes are spaced, then the (musical columns of the) graces are put left of the musical columns for the main notes.

\begin{verbatim}
\relative c'' {
  \override Score.SpacingSpanner.strict-grace-spacing = ##t
  \new Staff \new Voice {
    \afterGrace c4 { c16[ c8 c16] }
    c8[ \grace { b16 d } c8]
    c4 r
  }
  \new Staff {
    c16 c c c c c c c c c c4 r
  }
}
\end{verbatim}

Positioning multi-measure rests

Unlike ordinary rests, there is no predefined command to change the staff position of a multi-measure rest symbol of either form by attaching it to a note. However, in polyphonic music multi-measure rests in odd-numbered and even-numbered voices are vertically separated.
The positioning of multi-measure rests can be controlled as follows:

\relative c'' { 
% Multi-measure rests by default are set under the fourth line
R1
% They can be moved using an override
\override MultiMeasureRest.staff-position = #-2
R1
\override MultiMeasureRest.staff-position = #0
R1
\override MultiMeasureRest.staff-position = #2
R1
\override MultiMeasureRest.staff-position = #3
R1
\override MultiMeasureRest.staff-position = #6
R1
\revert MultiMeasureRest.staff-position
\break
%
% In two Voices, odd-numbered voices are under the top line
<< { R1 } \ { a1 } >>
% Even-numbered voices are under the bottom line
<< { a1 } \ { R1 } >>
% Multi-measure rests in both voices remain separate
<< { R1 } \ { R1 } >>
%
% Separating multi-measure rests in more than two voices
% requires an override
<< { R1 } \ { R1 } \\ 
  \once \override MultiMeasureRest.staff-position = #0
  { R1 }
>>
%
% Using compressed bars in multiple voices requires another override
% in all voices to avoid multiple instances being printed
\compressMMRests
<<
\revert MultiMeasureRest.direction
  { R1*3 }
  \ \\ 
\revert MultiMeasureRest.direction
  { R1*3 }
>>
}
Positioning opposing fermatas on a bar line

This snippet demonstrates a command that prints fermatas both above and below a bar line. If there would not otherwise be a bar line, it adds a double bar line. Semantically, the command codes a longer-than-normal caesura, which might be considered misuse depending on the situation.

```plaintext
twoWayFermata = {
  \once \set Staff.caesuraType = #'(underlying-bar-line . "||")
  \once \set Staff.caesuraTypeTransform = ##f
  \caesura \fermata \fermata
}

music = {
  f'1 \twoWayFermata R1
  f'2 \twoWayFermata f'2 R1
  b'1 \twoWayFermata \fine
}
\new GrandStaff <<
  \new Staff \music
  \new Staff \music
>>
```

Preventing final mark from removing final tuplet

The addition of a final mark can result in the loss of a final tuplet marking. This can be overcome by setting `TupletBracket.full-length-to-extent` to `false`.

% due to issue 2362 a long mark such as
% \textEndMark "Composed Feb 2007 - Feb 2008"
% cannot be used here.

```plaintext\new Staff {
  \set tupletFullLength = ##t
  \time 1/8
  \tuplet 3/2 8 { c'16 c' c' c' c' c' c' c' }
  \tweak direction #DOWN \textEndMark "1234"
}
\new Staff {
  \set tupletFullLength = ##t
  \override TupletBracket.full-length-to-extent = ##f
  \time 1/8
```
Printing bar numbers at regular intervals

By setting the barNumberVisibility property, bar numbers can be printed at regular intervals. Here the bar numbers are printed every two measures except at the end of the line.

```latex
\relative c' {
    \override Score.BarNumber.break-visibility = #end-of-line-invisible
    \set Score.currentBarNumber = #11
    % Print a bar number every second measure
    \set Score.barNumberVisibility = #((every-nth-bar-number-visible 2)
    c1 | c | c | c | c
    \break
    c1 | c | c | c | c
}
```

Printing bar numbers for broken measures

By default a BarNumber of a broken measure is not repeated at the beginning of the new line. Use first-bar-number-invisible-save-broken-bars for barNumberVisibility to get a parenthesized BarNumber there.

```latex
\layout {
    \context {
        \Score
            barNumberVisibility = #first-bar-number-invisible-save-broken-bars
        \override BarNumber.break-visibility = ##(#f #t #t)
    }
}
```

```latex
\relative c' {
    c1 | d | e | f2 \bar "" \break
    fis | g1 | e2 \bar "" \break
```
Printing bar numbers inside boxes or circles

Bar numbers can also be printed inside boxes or circles.

\relative c' {  
% Prevent bar numbers at the end of a line and permit them elsewhere  
\override Score.BarNumber.break-visibility = #end-of-line-invisible  
\set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)  

% Increase the size of the bar number by 2  
\override Score.BarNumber.font-size = #2  

% Draw a box round the following bar number(s)  
\override Score.BarNumber.stencil  
  = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)  
\repeat unfold 5 { c1 }  

% Draw a circle round the following bar number(s)  
\override Score.BarNumber.stencil  
  = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)  
\repeat unfold 4 { c1 } \bar "|."  
}

Printing bar numbers using modulo-bar-number-visible

If the remainder of the division of the current BarNumber by the first argument of modulo-bar-number-visible equals its second argument print the BarNumber.
Useful to print the BarNumber at certain distances, p.e:

- \texttt{(modulo-bar-number-visible 3 2)} -> prints 2,5,8
- \texttt{(modulo-bar-number-visible 4 2)} -> prints 2,6,10
- \texttt{(modulo-bar-number-visible 3 1)} -> prints 3,5,7
- \texttt{(modulo-bar-number-visible 5 2)} -> prints 2,7,12

\begin{verbatim}
\layout {
  \context {
    \Score
      \override BarNumber.break-visibility = ##(#f #t #t)
      barNumberVisibility = #(modulo-bar-number-visible 3 2)
  }
}
\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \context {
    \Score
      \applyContext #(set-bar-number-visibility 4)
    \repeat unfold 10 c'1
    \context {
      \Score
        \applyContext #(set-bar-number-visibility 2)
      \repeat unfold 10 c
    }
  }
}
\end{verbatim}

Printing bar numbers with changing regular intervals

Using the set-bar-number-visibility context function, bar number intervals can be changed.

\begin{verbatim}
\layout {
  \context {
    \Score
      \override BarNumber.break-visibility = #end-of-line-invisible
      barNumberVisibility = #(set-bar-number-visibility 4)
    \repeat unfold 10 c'1
    \context {
      \Score
        \override BarNumber.break-visibility = #end-of-line-invisible
        barNumberVisibility = #(set-bar-number-visibility 2)
      \repeat unfold 10 c
    }
  }
}
\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \context {
    \Score
      \applyContext #(set-bar-number-visibility 4)
    \repeat unfold 10 c'1
    \context {
      \Score
        \applyContext #(set-bar-number-visibility 2)
      \repeat unfold 10 c
    }
  }
}
\end{verbatim}

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the direction property of MetronomeMark or RehearsalMark appropriately.

\begin{verbatim}
\layout {
}
\end{verbatim}
Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the Timing_translator is moved from the Score context to the Staff context.

If bar numbers are required, the Bar_number_engraver should also be moved, since it relies on properties set by the Timing_translator; a \with block can be used to add bar numbers to the relevant staff.

\paper {
  indent = #0
  ragged-right = ##f
}

global = { \time 3/4 { s2.*3 } \bar '' \break { s2.*3 } }

\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \remove "Bar_number_engraver"
    \override SpacingSpanner.uniform-stretching = ##t
    \override SpacingSpanner.strict-note-spacing = ##t
    proportionalNotationDuration = #(ly:make-moment 1/64)
  }

Printing the bar number for the first measure

By default, the first bar number in a score is suppressed if it is less than or equal to 1. By setting barNumberVisibility to all-bar-numbers-visible, any bar number can be printed for the first measure and all subsequent measures.

```latex
\layout {
    indent = 0
    ragged-right = ##t
}
\relative c' {
    \set Score.barNumberVisibility = #all-bar-numbers-visible
    c | d | e | f \break
    g | e | d | c
}```
Printing tuplet brackets on the note head side

Whichever option you choose for controlling the tuplet bracket visibility, it will show or hide the tuplet bracket irrespectively of tuplet bracket placement (stem side or note head side). However, when placing the tuplet bracket on the note head side some authors recommend always printing the tuplet bracket. The option `visible-over-note-heads` can be used to achieve this.

```latex
\new Voice {
  \relative c' {
    \time 2/4
    \override TupletBracket.visible-over-note-heads = ##t
    \override Score.TextMark.non-musical = ##f
    { \textMark \markup "default" \music }
    \override TupletBracket.bracket-visibility = #'if-no-beam
    { \textMark \markup "'if-no-beam" \music }
  }
}
```

Redefining grace note global defaults

The global defaults for grace notes are stored in the following identifiers.

- `startGraceMusic`
- `stopGraceMusic`
- `startAcciaccaturaMusic`
- `stopAcciaccaturaMusic`
- `startAppoggiaturaMusic`
- `stopAppoggiaturaMusic`

They are defined in file `ly/grace-init.ly`. By redefining them other effects may be obtained.

```latex
\set startAcciaccaturaMusic = {
  <>
  \override Flag.stroke-style = #"grace"
  \slurDashed
}
```
\stopAcciaccaturaMusic = { \\revert Flag.stroke-style \\slurSolid 
<>
}

\\relative c'' { 
  \acciaccatura d8 c1
}

Removing bar numbers from a score

Bar numbers can be removed entirely by removing the Bar_number_engraver from the Score context.

\\layout { 
  \context { 
    \Score 
    \omit BarNumber
    \% or:
    \%\remove "Bar_number_engraver"
  }
}

\\relative c'' { 
  c4 c c c \break 
  c4 c c c
}

Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves, i.e. a SpanBar is printed. This behaviour can be overridden on a staff-by-staff basis.

\\relative c' { 
  \new StaffGroup << 
  \new Staff { 
    e1 | e 
    \once \override Staff.BarLine.allow-span-bar = \##f 
    e1 | e | e
}
Rest styles

Rests may be used in various styles.

\new Staff \relative c { 
  \omit Score.TimeSignature 
  \cadenzaOn 

  \override Staff.Rest.style = #'mensural 
  r\maxima\markup \typewriter { mensural } 
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128 
  \bar "" 
  \break 

  \override Staff.Rest.style = #'neomensural 
  r\maxima\markup \typewriter { neomensural } 
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128 
  \bar "" 
  \break 

  \override Staff.Rest.style = #'classical

Reverting default beam endings

To typeset beams grouped 3-4-3-2 in 12/8 it is necessary first to override the default beam endings in 12/8, and then to set up the new beaming endings:

\relative c'' { 
 \time 12/8
% Default beaming
a8 a a a a a a a a

% Set new values for beam endings
\set Score.beatStructure = 3,4,3,2
a8 a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a a
Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians.

The standard support for this using \repeat percent is unsuitable here since the first beat has to be an ordinary note or rest.

This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the r4 in the definitions with a rest of the appropriate duration).

% Macro to print single slash
rs = {
  \once \override Rest.stencil = #ly:percent-repeat-interface::beat-slash
  \once \override Rest.thickness = #0.48
  \once \override Rest.slope = #1.7
  r4
}

% Function to print a specified number of slashes

Skips in lyric mode

The s syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the \skip command is recommended.

<<
  \relative c'' { a1 | a }
  \new Lyrics \lyricmode { \skip 1 bla1 }
>>
Skips in lyric mode (2)
Although skips cannot be used in \lyricmode (it is taken to be a literal “s”, not a space), double quotes (""") or underscores (_) are available.

So for example:

```latex
<<
relative c' { a4 b c d }
\new Lyrics \lyricmode { a4 "" _ gap }
>>
```

Stemlets
In some notational conventions beams are allowed to extend over rests. Depending on preference, these beams may drop 'stemlets' to help the eye appreciate the rhythm better, and in some modern music the rest itself is omitted and only the stemlet remains.

This snippet shows a progression from traditional notation, to beams over the rest, to stemlets over the rest, to stemlets alone. Stemlets are generated by overriding the 'stemlet-length property of Stem, while rests are hidden by setting 'transparent = ##t.

Some \markup elements are included in the source to highlight the different notations.

\paper { \ragged-right = ##f }

```latex
\{
\c'16\markup { traditional } d' r f'
g'16[\markup { beams over rests } f' r d']
\}
```

% N.B. use Score.Stem to set for the whole score.
\override Staff.Stem.stemlet-length = #0.75

```latex
\c'16[\markup { stemlets over rests } d' r f']
g'16[\markup { stemlets and no rests } f']
\once \hide Rest
r16 d']
```

---

traditional beams over rests stemlets over rests stemlets and no rests
Strict beat beaming

Beamlets can be set to point in the direction of the beat to which they belong. The first beam avoids sticking out flags (the default); the second beam strictly follows the beat.

```
\relative c' {  
  \time 6/8  
a8. a16 a a  
  \set strictBeatBeaming = ##t  
a8. a16 a a  
}  
```

Subdividing beams

The beams of consecutive 16th (or shorter) notes are, by default, not subdivided. That is, the three (or more) beams stretch unbroken over entire groups of notes. This behavior can be modified to subdivide the beams into sub-groups by setting the property `subdivideBeams`. When set, multiple beams will be subdivided at intervals defined by the current value of `baseMoment` by reducing the multiple beams to the number of beams that indicates the metric value of the subdivision. If the group following the division is shorter than the current metric value (usually because the beam is incomplete) the number of beams reflects the longest possible subdivision group. However, if there is only one note left after the division this restriction isn’t applied. Note that `baseMoment` defaults to one over the denominator of the current time signature if not set explicitly. It must be set to a fraction giving the duration of the beam sub-group using the `ly:make-moment` function, as shown in this snippet. Also, when `baseMoment` is changed, `beatStructure` should also be changed to match the new `baseMoment`:

```
\relative c' {  
c32[ c c c c c c c ]  
  \set subdivideBeams = ##t  
c32[ c c c c c c c ]  
}  

% Set beam sub-group length to an eighth note  
\set baseMoment = #(ly:make-moment 1/8)  
\set beatStructure = 2,2,2,2  
c32[ c c c c c c c ]  

% Set beam sub-group length to a sixteenth note  
\set baseMoment = #(ly:make-moment 1/16)  
\set beatStructure = 4,4,4,4  
c32[ c c c c c c c ]  

% Shorten beam by 1/32  
\set baseMoment = #(ly:make-moment 1/8)  
\set beatStructure = 2,2,2,2  
c32[ c c c c c c ] r32  

% Shorten beam by 3/32  
\set baseMoment = #(ly:make-moment 1/8)  
\set beatStructure = 2,2,2,2  
```
c32 [ c c c c ] r16. r2

Tam-tam example
A tam-tam example, entered with 'tt'

```lilypond
#(define mydrums '((tamtam default #f 0)))

\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \override Staff.StaffSymbol.line-positions = #'( 0 )
  \override Staff.BarLine.bar-extent = #'(-1.5 . 1.5)
  tt 1 \pp \laissezVibrer
}

Tam-tam
```

Tambourine example
A tambourine example, entered 'tamb'

```lilypond
#(define mydrums '((tambourine default #f 0)))
\new DrumStaff \with { instrumentName = "Tambourine" }
\drummode {
  \set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)
  \override Staff.StaffSymbol.line-positions = #'( 0 )
  \override Staff.BarLine.bar-extent = #'(-1.5 . 1.5)
  \time 6/8
  tamb8. 16 8 8 8 8 |
  tamb4. 8 8 8 |
  \% the trick with the scaled duration and the shorter rest
  \% is necessary for the correct ending of the trill-span!
  tamb2.*5/6 \startTrillSpan s8 \stopTrillSpan |
}
```

Tambourine
Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";;" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
         (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
         (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
         (x-rule (make-filled-box-stencil (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round \var{arg}. Looks at @code{thickness},
  @code{box-padding} and @code{font-size} properties to determine line
  thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding))
         (m (interpret-markup layout props arg)))
    (NWS-box-stencil m thickness pad)))

% Test it:
\relative c' {
  c1-\markup { \NWS-box ABCD }
  c1-\markup { \NWS-box \note {4} #1.0 }
}

\begin{music}
\begin{music}
  ABCD
\end{music}
\end{music}

Time signature in parentheses

The time signature can be enclosed within parentheses.

\overide Staff.TimeSignature.stencil = #(lambda (grob)
  (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
\time 2/4
a4 b8 c
Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

```
\relative c'' { 
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
  \time 2/4
  a4 b8 c
}
```

Time signature printing only the numerator as a number (instead of the fraction)

Sometimes, a time signature should not print the whole fraction (for example, 7/4), but only the numerator (digit 7 in this case). This can be easily done by using `\override Staff.TimeSignature.style = #'single-digit` to change the style permanently. By using `\revert Staff.TimeSignature.style`, this setting can be reversed. To apply the single-digit style to only one time signature, use the `\override` command and prefix it with a `\once`.

```
\relative c'' { 
  \time 3/4
  c4 c c 
  % Change the style permanently 
  \override Staff.TimeSignature.style = #'single-digit 
  \time 2/4
  c4 c
  \time 3/4
  c4 c c 
  % Revert to default style: 
  \revert Staff.TimeSignature.style 
  \time 2/4
  c4 c 
  % single-digit style only for the next time signature 
  \once \override Staff.TimeSignature.style = #'single-digit 
  \time 5/4
  c4 c c c c 
  \time 2/4
  c4 c 
}
```
**Tweaking grace layout within music**

The layout of grace expressions can be changed throughout the music using the functions `add-grace-property` and `remove-grace-property`.

The following example undefines the Stem direction for this grace, so that stems do not always point up, and changes the default note heads to crosses.

\[\text{relative c''} \{ \text{\new Staff} \{ \$\text{(remove-grace-property 'Voice 'Stem 'direction)} \$\text{(add-grace-property 'Voice 'NoteHead 'style 'cross)} \text{\new Voice} \{ \text{acciaccatura} \{ f16 \} g4 \text{\grace} \{ d16 e \} f4 \text{\appoggiatura} \{ f,32 g a \} e2 \} \} \}
\]

\[\text{User defined time signatures}\]

New time signature styles can be defined. The time signature in the second measure should be upside down in both staves.

\[\text{\#(add-simple-time-signature-style 'topsy-turvy} \text{(lambda (fraction)} \text{\(\text{(make-rotate-markup 180 (make-compound-meter-markup fraction}})))})\]

\[<< \text{\new Staff} \{ \text{\time 3/4 f'2.} \text{\override Score.TimeSignature.style = #'topsy-turvy} \text{\time 3/4 R2. \bar "|."} \} \text{\new Staff} \{ \text{R2. e''} \} \]
\[\text{>>}\]

\[\text{User defined time signatures}\]
Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the stencil property of Flag. Valid values are modern-straight-flag, old-straight-flag and flat-flag.

```
testnotes = {
\autoBeamOff
  c8 d16 c32 d64 \acciaccatura ({ c8 } d64 r4
}

\score {
  \relative c' {
    \time 2/4
    \testnotes
      \override Flag.stencil = #modern-straight-flag
    \testnotes
      \override Flag.stencil = #old-straight-flag
    \testnotes
      \override Flag.stencil = #flat-flag
    \testnotes
      \revert Flag.stencil
    \testnotes
  }
  \layout {
    \indent = 0
    \context {
      \override Score NonMusicalPaperColumn.line-break-permission = ##f
    }
  }
}
```

Using grace note slashes with normal heads

The slash through the stem found in acciaccaturas can be applied in other situations.

```
\relative c'' {
  \override Flag.stroke-style = #"grace"
  c8( d2) e8( f4)
}```
Using ties with arpeggios

Ties are sometimes used to write out arpeggios. In this case, two tied notes need not be consecutive. This can be achieved by setting the `tieWaitForNote` property to `#t`. The same feature is also useful, for example, to tie a tremolo to a chord, but in principle, it can also be used for ordinary consecutive notes.

\relative c’ {
\set tieWaitForNote = ##t
\grace { c16[ ~ e ~ g ] ~ } <c, e g>2
\repeat tremolo 8 { c32 ~ c’ ~ } <c c’>1
\tieUp
e8 ~ c ~ a ~ f ~ <e’ c a f>2
\tieDown
c8 ~ a
\tieDotted
g8 ~ c g2
}
Expressive marks

Section “Expressive marks” in Notation Reference

Adding beams, slurs, ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved.

For example, when entering a manual beam, the left square bracket has to be placed after the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section.

This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{ r16[ g16 \tuplet 3/2 { r16 e'8 } ]
g16( a \tuplet 3/2 { b d e' } )
g8( a \tuplet 3/2 { b d e' } a'4. )
\time 2/4
\tuplet 5/4 { e'32 \{ a b d e' a'4.\} }
}
```

Adding parentheses around an expressive mark or chordal note

The \parenthesize function is a special tweak that encloses objects in parentheses. The associated grob is Parentheses.

```
\relative c' { 
c2-\parenthesize ->
\override Parentheses.padding = #0.1
\override Parentheses.font-size = #-4
<d \parenthesize f a>2
}
```

Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks, often consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly.

```
\glissandoSkipOn = {
```
Expressive marks

\override NoteColumn.glissando-skip = ##t
\hide NoteHead
\override NoteHead.no-ledgers = ##t
}

\glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}

\relative c'' {
  \relative c''
  \override Score.SpacingSpanner.shortest-duration-space = #4.0
  \c2-!\bendAfter #5
  \c2-!\bendAfter #-4.75
  \c2-!\bendAfter #8.5
  \c2-!\bendAfter #-6
}

\relative c'' {
  \relative c''
  \glissando
  \glissandoSkipOn
  \f4 \text{g} \text{a} \text{a8} \noBeam
  \glissandoSkipOff
  \a8

  \r8 \f8 \glissando
  \glissandoSkipOn
  \f4 \text{g} \text{a} \text{a8} \noBeam
  \glissandoSkipOff
  \a8

  \r8 \f8 \glissando
  \glissandoSkipOn

  \glissandoSkipOff
  \a8 |

  \r4 \f \glissando \text{<}
  \glissandoSkipOn
  \a4 \f \text{>}
  \glissandoSkipOff
  \b8 \text{!} \text{r} |
}

Adjusting the shape of falls and doits

The shortest-duration-space property may be tweaked to adjust the shape of falls and doits.

\relative c'' {
  \relative c''
  \override Score.SpacingSpanner.shortest-duration-space = #4.0
  \c2-!\bendAfter #5
  \c2-!\bendAfter #-4.75
  \c2-!\bendAfter #8.5
  \c2-!\bendAfter #-6
}
Aligning the ends of hairpins to NoteColumn directions

The ends of hairpins may be aligned to the LEFT, CENTER or RIGHT of NoteColumn grobs by overriding the property endpoint-alignments, which is a pair of numbers representing the left and right ends of the hairpin. endpoint-alignments are expected to be directions (either -1, 0 or 1). Other values will be transformed with a warning. The right end of a hairpin terminating at a rest is not affected, always ending at the left edge of the rest.

\{ 
  c'2\< <c' d'>\!
\override Hairpin.endpoint-alignments = #'(1 . -1)
  c'2\< <c' d'>\!
\override Hairpin.endpoint-alignments = #'(,LEFT . ,CENTER)
\}

Alternative breve notes

Breve notes are also available with two vertical lines on each side of the notehead instead of one line and in baroque style.

\relative c'' { 
  \time 4/2
  c\breve |
  \override Staff.NoteHead.style = #'altdefault
  b\breve |
  \override Staff.NoteHead.style = #'baroque
  b\breve |
  \revert Staff.NoteHead.style
  a\breve |
}

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

\relative c' { 
  \stemdown 
  \slurup 
  \slurnotes 
  \once \override Slur.eccentricity = #3.0
  \slurnotes 
}
Breathing signs

Breathing signs are available in different tastes: commas (default), ticks, vees and “railroad tracks” (caesura).

\new Staff \relative c' { 
  \key es \major 
  \time 3/4 
  \( % \text{this bar contains no \breathe} \)
  \( % \text{by default, \breathe uses the rcomma, just as if saying:} \)
  \( % \text{override BreathingSign.text =} \)
  \( % \text{(make-musicglyph-markup "scripts.rcomma")} \)
  \( % \text{override Staff.BreathingSign.text =} \)
  \( % \text{rvarcomma and lvarcomma are variations of the default rcomma} \)
  \( % \text{and lcomma} \)
  \( % \text{N.B.: must use Staff context here, since we start a Voice below} \)
  \( % \text{override Staff.BreathingSign.text =} \)
  \( % \text{raltcomma and laltcomma are alternative variations of the} \)
  \( % \text{default rcomma and lcomma} \)
  \( % \text{override Staff.BreathingSign.text =} \)
  \( % \text{vee} \)
  \( % \text{override BreathingSign.text =} \)
  \( % \text{caesura} \)
}
Broken Crescendo Hairpin

In order to make parts of a crescendo hairpin invisible, the following method is used: A white rectangle is drawn on top of the respective part of the crescendo hairpin, making it invisible. The rectangle is defined as postscript code within a text markup.

The markup command \with-dimensions tells LilyPond to consider only the bottom edge of the rectangle when spacing it against the hairpin. The property \staff-padding prevents the rectangle from fitting between the hairpin and staff.

Make sure the hairpin is in a lower layer than the text markup to draw the rectangle over the hairpin.

\relative c' {

\center-align \musicglyph "scripts.caesura.curved"
\center-align \musicglyph "scripts.ufermata"
}
}

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.
Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

\paper { tagline = #f }

changing text and spanner styles for text dynamics

The text used for crescendos and decrescendos can be changed by modifying the context properties crescendoText and decrescendoText.
The style of the spanner line can be changed by modifying the 'style' property of DynamicTextSpanner. The default value is 'dashed-line', and other possible values include 'line', 'dotted-line' and 'none.'

\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
  a2 a\mf
}

-changing the appearance of a slur from solid to dotted or dashed-

The appearance of slurs may be changed from solid to dotted or dashed.

\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
  c4( d e c)
}

-changing the breath mark symbol-

The glyph of the breath mark can be tuned by overriding the text property of the BreathingSign layout object with any markup text.

\relative c'' {
  c2
  \override BreathingSign.text = \markup { \musicglyph "scripts.rvarcomma" }
  \breathe
  d2
}
Changing the number of augmentation dots per note

The number of augmentation dots on a single note can be changed independently of the dots placed after the note.

```
\relative c' {
    c4.. a16 r2 |
    \override Dots.dots-count = #4
    c4.. a16 r2 |
    \override Dots.dots-count = #0
    c4.. a16 r2 |
    \revert Dots.dots-count
    c4.. a16 r2 |
}
```

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a `\markup` block.

```
\markup { \italic pi`u \dynamic f }
\layout { \ragged-right = ##f }
\relative c'' { 
    c2\f c-\piuF
}
```

Contemporary glissando

A contemporary glissando without a final note can be typeset using a hidden note and cadenza timing.

```
\relative c'' { 
    \time 3/4
    \override Glissando.style = #'zigzag
    c4 c
    \cadenzaOn
    c4\glissando
    \hideNotes
    c,,4
```
Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the after-line-breaking callback ly:spanner::kill-zero-spanned-time.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

\paper { ragged-right = ##t }

\relative c' \{ 
\override Hairpin.to-barline = ##f 
\override Glissando.breakable = ##t
% show hairpin 
\override Hairpin.after-line-breaking = ##t 
% hide text span 
\override TextSpanner.after-line-breaking = 
  #ly:spanner::kill-zero-spanned-time 
e2<\startTextSpan 
% show glissando 
\override Glissando.after-line-breaking = ##t 
f2\glissando 
\break 
f,1\!\stopTextSpan
\}

Controlling the vertical ordering of scripts

The vertical ordering of scripts is controlled with the 'script-priority property. The lower this number, the closer it will be put to the note. In this example, the TextScript (the sharp symbol) first has the lowest priority, so it is put lowest in the first example. In the second, the prall trill (the Script) has the lowest, so it is on the inside. When two objects have the same priority, the order in which they are entered determines which one comes first.

\relative c''' { 

Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The outside-staff-priority property must be set to \#f, as otherwise this would take precedence over the avoid-slur property. Changing the fraction 2/3 adjusts the horizontal position.

\relative c'' { 
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8) 
  \after 4 
  { 
    \once \set suggestAccidentals = ##t 
    \once \override AccidentalSuggestion.outside-staff-priority = ##f 
    \once \override AccidentalSuggestion.avoid-slur = #'inside 
    \once \override AccidentalSuggestion.font-size = -3 
    \once \override AccidentalSuggestion.script-priority = -1 
    \once \hideNotes 
    cis8\turn \noBeam 
  } 
  d4.( e8) 
}

Creating arpeggios across notes in different voices

An arpeggio can be drawn across notes in different voices on the same staff if the \Span_arpeggio_engraver is added to the Staff context:

\new Staff \with { 
  \consists "Span_arpeggio_engraver"
}
\relative c' { 
  \set Staff.connectArpeggios = ##t 
  << 
    { <e' g>4\arpeggio <d f> <d f>2 } 
  \}
Creating cross-staff arpeggios in a piano staff

In a PianoStaff, it is possible to let an arpeggio cross between the staves by setting the property PianoStaff.connectArpeggios.

```
\new PianoStaff \relative c' <<
  \set PianoStaff.connectArpeggios = ##t
  \new Staff {
    <\ce g c>4\arpeggio
    <\ge g c>4\arpeggio
    <\eg c e>4\arpeggio
    <\ec g c>4\arpeggio
  }
\new Staff {
  \clef bass
  \repeat unfold 4 {
    <\c, e g c>4\arpeggio
  }
}
```

Creating cross-staff arpeggios in other contexts

Cross-staff arpeggios can be created in contexts other than GrandStaff, PianoStaff and StaffGroup if the Span_arpeggio_ engraver is included in the Score context.

```
\score { 
  \new ChoirStaff {
    \set Score.connectArpeggios = ##t
    <<
      \new Voice \relative c' {
        <\ce>2\arpeggio
        <\df>2\arpeggio
        <\ce>1\arpeggio
      }
      \new Voice \relative c {
        \clef bass
```
Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
    c1-10
    c1-50
    c1-36
    c1-29
}
```

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a \markup block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the make-dynamic-script function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as \dynamicUp or \dynamicDown.

```
paren =
\#(define-event-function (dyn) (ly:event?))
(make-dynamic-script

#( \markup \concat {
    \normal-text \italic \fontsize #2 ( \pad-x #0.2 #(ly:music-property dyn 'text)
    \normal-text \italic \fontsize #2 )
```
Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using \hideNotes.

This example is measure 235 of the Ciaconna from Bach’s 2nd Partita for solo violin, BWV 1004.

Creating text spanners

The \startTextSpan and \stopTextSpan commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the TextSpanner object to modify its output.

\paper { ragged-right = ##f }
Dynamics custom text spanner postfix

Postfix functions for custom crescendo text spanners. The spanners should start on the first note of the measure. One has to use \mycresc, otherwise the spanner start will rather be assigned to the next note.

% Two functions for (de)crescendo spanners where you can explicitly give the spanner text.
\mycresc =
#(define-music-function (mymarkup) (markup?)
 (make-music 'CrescendoEvent
 'span-direction START
 'span-type 'text
 'span-text mymarkup))
Expressive marks

mydecresc =
#(define-music-function (mymarkup) (markup?)
  (make-music 'DecrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text mymarkup))

\relative c' {
  c4-\mycresc "custom cresc" c4 c4 c4 |
  c4 c4 c4 c4 |
  c4-\mydecresc "custom decresc" c4 c4 c4 |
  c4 c4\! c4 c4
}

c4\g"custom cresc - - - custom decresc"

dynamics text spanner postfix

Custom text spanners can be defined and used with hairpin and text crescendos. \< and \> produce hairpins by default, \cresc etc. produce text spanners by default.

% Some sample text dynamic spanners, to be used as postfix operators

crpoco =
#(make-music 'CrescendoEvent
  'span-direction START
  'span-type 'text
  'span-text "cresc. poco a poco")

\relative c' {
  c4\cresc d4 e4 f4 |
  g4 a4\! b4\crpoco c4 |
  c4 d4 e4 f4 |
  g4 a4\! b4< c4 |
  g4\dim a4 b4\decresc c4\!
}

c4\g"cresc. - - - cresc. poco a poco - - - dim. decresc."

glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

\relative c' {
  a2 \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f''4 d,
}

c4\g"cresc. - - - cresc. poco a poco - - - dim. decresc."

Hairpins with different line styles

Hairpins can take any style from line-interface - dashed-line, dotted-line, line, trill or zigzag.

\relative c' {
    \override Hairpin.style = #'dashed-line
    c2< c!\align
    \override Hairpin.style = #'dotted-line
    c2< c!\align
    \override Hairpin.style = #'line
    c2< c!\align
    \override Hairpin.style = #'trill
    c2< c!\align
    \override Hairpin.style = #'zigzag
    c2< c!\align
    \revert Hairpin.style
    c2< c!\align
}

Hiding the extender line for text dynamics

Text style dynamic changes (such as cresc. and dim.) are printed with a dashed line showing their extent. This line can be suppressed in the following way:

\relative c'' {
    \override DynamicTextSpanner.style = #'none
    \crescTextCresc
    c1< | d | b | c!\align
}

Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p")

Some dynamic expressions involve additional text, like “sempre pp”. Since dynamics are usually centered under the note, the \pp would be displayed way after the note it applies to.

To correctly align the “sempre pp” horizontally so that it is aligned as if it were only the \pp, there are several approaches:
• Simply use \once\override DynamicText.X-offset = #\minus 9.2 before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...

• Add some padding (#:hspace 7.1) into the definition of your custom dynamic mark so that after LilyPond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.

• Shift the dynamic script \once\override ... X-offset = .... Drawback: \once\override is needed for every invocation!

• Set the dimensions of the additional text to 0 (using #:with-dimensions '(0 . 0) '(0 . 0)). Drawback: For LilyPond, “sempre” has no extent now. This means it might put other stuff there, causing collisions (which are not detected by LilyPond’s collision detection algorithm!). There also seems to be some spacing, so it is not exactly the same alignment as without the additional text.

• Add an explicit shift directly inside the scheme function for the dynamic script.

• Set an explicit alignment inside the dynamic script. By default, this won’t have any effect, only if one sets X-offset! Drawback: One needs to set DynamicText.X-offset, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of \pp.

\paper {
  \ragged-right = ##f
  \indent = 2.5\cm
}

% Solution 1: Using a simple markup with a particular halign value
% Drawback: It’s a markup, not a dynamic command, so \dynamicDown etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }

% Solution 2: Using a dynamic script & shifting with
% \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp")))

% Solution 3: Padding the dynamic script so the center-alignment
% puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
semppT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
      #:italic "sempre"
      #:dynamic "pp"
      #:hspace 7.1)))

% Solution 4: Dynamic, setting the dimensions of the additional text to 0
Expressive marks

% Drawback: To lilypond "sempre" has no extent, so it might put % other stuff there \Rightarrow collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the % same alignment as without the additional text

```
semppM =
#(make-dynamic-script
  (markup #:line
    (:with-dimensions '(0 . 0) '(0 . 0)
      #:right-align
      #:normal-text
      #:italic "sempre"
      #:dynamic "pp")))
```

% Solution 5: Dynamic with explicit shifting inside the scheme function

```
semppG =
#(make-dynamic-script
  (markup #:hspace 0
    #:translate '(-18.85 . 0)
    #:line (:normal-text
      #:italic "sempre"
      #:dynamic "pp")))
```

% Solution 6: Dynamic with explicit alignment. This has only effect % if one sets X-offset!
% Drawback: One needs to set DynamicText.X-offset!
% Drawback: Aligned at the right edge of the additional text, % not at the center of pp

```
semppMII =
#(make-dynamic-script
  (markup #:line
    #:right-align
    #:normal-text
    #:italic "sempre"
    #:dynamic "pp"))
```

\layout { \override Staff.InstrumentName self-alignment-X = #LEFT }

Expressive marks

\relative c' {
\override BreathingSign.text = \markup {
  \musicglyph "scripts.caesura.straight"
}
c8 e4. \breathe g8. e16 c4

\override BreathingSign.text = \markup {
  \musicglyph "scripts.caesura.curved"
}
g8 e'4. \breathe g8. e16 c4
}

Inserting a caesura

Caesura marks can be created by overriding the 'text property of the BreathingSign object. A curved caesura mark is also available.

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration.
Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

Making slurs with complex dash structure

Slurs can be made with complex dash patterns by defining the dash-definition property. dash-definition is a list of dash-elements. A dash-element is a list of parameters defining the dash behavior for a segment of the slur.

The slur is defined in terms of the bezier parameter t which ranges from 0 at the left end of the slur to 1 at the right end of the slur. dash-element is a list (start-t stop-t dash-fraction dash-period). The region of the slur from start-t to stop-t will have a
fraction dash-fraction of each dash-period black. dash-period is defined in terms of staff spaces, dash-fraction is set to 1 for a solid slur.

\relative c' { 
    \once \override 
    Slur.dash-definition = #'((0 0.3 0.1 0.75) 
        (0.3 0.6 1 1) 
        (0.65 1.0 0.4 0.75))

    c4( d e f) 
    \once \override 
    Slur.dash-definition = #'((0 0.25 1 1) 
        (0.3 0.7 0.4 0.75) 
        (0.75 1.0 1 1))

    c4( d e f) 
}

Modifying default values for articulation shorthand notation

The shorthands are defined in ‘ly/script-init.ly’, where the variables dashHat, dashPlus, dashDash, dashBang, dashLarger, dashDot, and dashUnderscore are assigned default values. The default values for the shorthands can be modified. For example, to associate the -+ (dashPlus) shorthand with the trill symbol instead of the default + symbol, assign the value \trill to the variable dashPlus:

\relative c'' { c1++ }

dashPlus = \trill

\relative c'' { c1++ }

Moving slur positions vertically

The vertical position of a slur can be adjusted using the positions property of Slur. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

\relative c' { 
    \stemDown 
    e4( a)
Moving the ends of hairpins

The ends of hairpins may be offset by setting the shorten-pair property of the Hairpin object. Positive values move endpoints to the right, negative to the left. Unlike the minimum-length property, this property only affects the appearance of the hairpin; it does not adjust horizontal spacing (including the position of bounding dynamics). This method is thus suitable for fine-tuning a hairpin within its allotted space.

\{  
c'1-\<  
c'2- c'\!  
\once \override \Hairpin.shorten-pair = #'(2 . 2)  
c'1-\<  
c'2- c'\!  
\once \override \Hairpin.shorten-pair = #'(-2 . -2)  
c'1-\<  
c'2- c'\!  
c'1-\p\tweak \shorten-pair #'(2 . 0)\<  
c'2- c'\fff
\}
Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```latex
\relative c' {
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio
}
```

Positioning text markups inside slurs

Text markups need to have the outside-staff-priority property set to false in order to be printed inside slurs.

```latex
\relative c'' { 
  \override TextScript.avoid-slur = #'inside 
  \override TextScript.outside-staff-priority = ##f
  c2(\markup { \halign{-#10 \natural} d4.) c8}
```

Printing hairpins in various styles

Hairpin dynamics may be created in a variety of styles.

```latex
\relative c'' {
  \override Hairpin.stencil = #flared-hairpin
  a4\< a a a\f
  a4\p< a a a\ff
  a4\sfz< a a a!
  \override Hairpin.stencil = #constante-hairpin
  a4\< a a a\f
  a4\p< a a a\ff
  a4\sfz< a a a!
  \override Hairpin.stencil = #flared-hairpin
  a4\> a a a\f
  a4\p> a a a\ff
  a4\sfz> a a a!
  \override Hairpin.stencil = #constante-hairpin
  a4\> a a a\f
```
Printing hairpins using al niente notation

Hairpin dynamics may be printed with a circled tip ("al niente" notation) by setting the circled-tip property of the Hairpin object to #t.
\relative c'' {  
  \override Hairpin.circled-tip = ##t  
  c2\ < c\!  
  c4\ > c\ < c2\!}

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the direction property of MetronomeMark or RehearsalMark appropriately.
\layout {  
  indent = 0  
  ragged-right = ##f}

{  
  % Metronome marks below the staff  
  \override Score.MetronomeMark.direction = #DOWN  
  \tempo 8. = 120  
  c''1

  % Rehearsal marks below the staff  
  \override Score.RehearsalMark.direction = #DOWN  
  \mark \default  
  c''1}

\tempo \relative c' { 
  \override StringTie.direction = #DOWN  
  {  
    \relative c' {  
      a4\p\ > a a a\ff  
      a4\sfz\ > a a a\!  
    }
  }
  \relative c' {  
    \tempo 8. = 120  
    c''1  
  }}
Setting hairpin behavior at bar lines

If the note which ends a hairpin falls on a downbeat, the hairpin stops at the bar line immediately preceding. This behavior can be controlled by overriding the 'to-barline property.

```latex
\relative c' {
  e4< e2.
  e1!
  \override Hairpin.to-barline = ##f
  e4< e2.
  e1!
}
```

![Musical notation example](image)

Setting the minimum length of hairpins

If hairpins are too short, they can be lengthened by modifying the minimum-length property of the Hairpin object.

```latex
<<
{  
  \after 4< \after 2 \after 2. \! f'1 
  \override Hairpin.minimum-length = #8 
  \after 4< \after 2 \after 2. \! f'1 
  
  \repeat unfold 8 c'4
}
>>
```

![Musical notation example](image)

Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, \texttt{c4\fermata\fermata} only shows a fermata below. The fermata above gets simply ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, 'add-stem-support would be required.

The solution is thus to write the note as a chord and add the articulations inside of \texttt{<...>}, using the direction modifiers ^ and _ as appropriate.

```latex
\relative c' {
```
Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

Using a tick as the breath mark symbol

Vocal and wind music frequently uses a tick mark as a breathing sign. This indicates a breath that subtracts a little time from the previous note rather than causing a short pause, which is indicated by the comma breath mark. The mark can be moved up a little to take it away from the stave.
Using arpeggioBracket to make divisi more visible

The arpeggioBracket can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.

```latex
\include {english.ly}

\score {
  \relative c' {
    \key a \major
    \time 2/2
    \new Voice = "upper"
    \{
      \voiceOne \arpeggioBracket
      a2( b2 <b d>1\arpeggio)
      <cs e>\arpeggio ~
      <cs e>4
    }
    \addlyrics { \lyricmode { A -- men. } }
  } >>
  \new Voice = "lower"
  \{
    \voiceTwo
    a1 ~
    a ~
    a4 \bar "| ."
  }
  >>
  \layout { ragged-right = ##t }
}
```

Using double slurs for legato chords

Some composers write two slurs when they want legato chords. This can be achieved by setting doubleSlurs.

```latex
\relative c' {
  \set doubleSlurs = ##t
  <c e>4( <d f> <c e> <d f>)
```
Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the layer property to control which objects are masked by the white background. In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the time signature by setting the whiteout property of TimeSignature. To do this TimeSignature is moved to a layer above Tie, which is left in the default layer of 1, and StaffSymbol is moved to a layer above TimeSignature so it is not masked.

\begin{verbatim}
\override Score.StaffSymbol.layer = #4
\override Staff.TimeSignature.layer = #3
b'2 b'~
\once \override Staff.TimeSignature.whiteout = ##t
\time 3/4
b' r4
\end{verbatim}

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

\begin{verbatim}
\tweak stencil
  #(lambda (grob)
    (grob-interpret-markup grob#{ \markup \draw-line #'(0 . 1) #}))
  \stopped
\relative c' {
  a'4^-\upline a{ c d'}_\upline
}
\end{verbatim}
Vertically aligning dynamics across multiple notes

Dynamics that occur at, begin on, or end on the same note will be vertically aligned. To ensure that dynamics are aligned when they do not occur on the same note, increase the `staff-padding` property of the `DynamicLineSpanner` object.

\relative c' {
\override DynamicLineSpanner.staff-padding = #4

g2\< b4\> \c\!
}\end{music}}\]
Repeats

Section “Repeats” in Notation Reference

Adding volta brackets to additional staves

The Volta_engraver by default resides in the Score context, and brackets for the repeat are thus normally only printed over the topmost staff. This can be adjusted by adding the Volta_engraver to the Staff context where the brackets should appear; see also the “Volta multi staff” snippet.

\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff { \with { \consists "Volta_engraver" } { c'2 g' e' a' } }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure’s extent. This snippet shows how the Measure_counter_engraver may be used to simulate this notational practice. Here, the engraver has been added to a Dynamics context.

This snippet presents a legacy method: starting from LilyPond 2.23.3, \set Score.centerBarNumbers = ##t is enough.

\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

% http://lsr.di.unimi.it/LSR/Item?id=964
%=> http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357.html

\layout {
  \context {
    \Score
    \% Changing the defaults from engraver-init.ly
    measureBarType = "!"
    startRepeatBarType = "[[:"
    endRepeatBarType = "[:[]"
    doubleRepeatBarType = "[:[]][[:"
  }
}

\% example:
{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
Cross-staff tremolos

Since \repeat tremolo expects exactly two musical arguments for chord tremolos, the note or chord which changes staff within a cross-staff tremolo should be placed inside curly braces together with its \change Staff command.

\new PianoStaff <<
\new Staff = "up" \relative c'' { 
  \key a \major 
  \time 3/8 
  s4. 
}
\new Staff = "down" \relative c'' { 
  \key a \major 
  \time 3/8 
  \voiceOne
  \repeat tremolo 6 { 
    <a e'>32 
    { 
      \change Staff = "up"
      \voiceTwo
      <cis a' dis>32 
    }
  }
} >>
Engraving tremolos with floating beams

If a tremolo’s total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the `gap-count` property of the `Beam` object, and the size of the gaps between beams and stems is set with the `gap` property.

```latex
\relative c'' { 
  \repeat tremolo 8 \{ a32 f \}
  \override Beam.gap-count = \#1 
  \repeat tremolo 8 \{ a32 f \}
  \override Beam.gap-count = \#2
  \repeat tremolo 8 \{ a32 f \}
  \override Beam.gap-count = \#3
  \repeat tremolo 8 \{ a32 f \}

  \override Beam.gap-count = \#3
  \override Beam.gap = \#1.33 
  \repeat tremolo 8 \{ a32 f \}
  \override Beam.gap = \#1
  \repeat tremolo 8 \{ a32 f \}
  \override Beam.gap = \#0.67
  \repeat tremolo 8 \{ a32 f \}
  \override Beam.gap = \#0.33
  \repeat tremolo 8 \{ a32 f \}
}
```

Isolated percent repeats

Isolated percents can also be printed.

```ly
\makePercent =
#(define-music-function \( note \) \( ly: music? \))
  "Make a percent repeat the same length as NOTE."
  (make-music 'PercentEvent
    'length (ly: music-length note)))
\relative c'' { 
  \makePercent s1
}
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.
Numbering groups of measures

This snippet demonstrates the use of the \Measure_counter_engraver to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a Staff context is used; another possibility is a Dynamics context.

The counter is begun with \startMeasureCount and ended with \stopMeasureCount. Numbering will start by default with 1, but this behavior may be modified by overriding the count-from property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

\layout {
  \context {
    \Staff
    \consists \Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
}
Percent repeat count visibility

Percent repeat counters can be shown at regular intervals by setting the context property `repeatCountVisibility`.

```latex
\relative c'' {  
  \set countPercentRepeats = ##t  
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)  
  repeat percent 10 { c1 } \break  
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)  
  repeat percent 6 { c1 d1 }  
}
```

Percent repeat counter

Measure repeats of more than two repeats can get a counter when the convenient property is switched, as shown in this example:

```latex
\relative c'' {  
  \set countPercentRepeats = ##t  
  \repeat percent 4 { c1 }  
}
```
Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

\{  
relative c'' {  
c4 c c c c c c c c c c  
\repeat segno 2 {  
c4 c c c c c c  
\alternative {  
\volta 1 {  
c4 c c c c c c c c c c  
  % If you don't use \break at Coda, use \noBreak here  
  % and after \bar "" below.  
  \noBreak  
  \section % double bar line  
  \cadenzaOn % pause bar count  
  \stopStaff % remove staff lines  
  % Increasing the unfold counter will expand the staff-free space  
  \repeat unfold 6 {  
    s1  
    \bar ""  
  }  
  % Place JumpScript where the staff would normally be.  
  %once \override Score.JumpScript.outside-staff-priority = ##f  
  %once \override Score.JumpScript.Y-offset = 0  
  \startStaff % resume bar count  
  \cadenzaOff % show staff lines again  
  }  
\}  
\sectionLabel "Coda"  
% Show Coda on a new line  
\break  
\repeat unfold 8 { c4 c c c }  
\fine  
\} \%

D.S. % al %
e poi la Coda
Coda

Setting the double repeat default for volte

There are three different styles of double repeats for volte, that can be set using `doubleRepeatBarType`.

```latex
\relative c'' {
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = '#":..:
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = '#":|.|:
  \repeat volta 2 { c1 }
  \set Score.doubleRepeatBarType = '#":|.:'
  \repeat volta 2 { c1 }
}
```

Shortening volta brackets

By default, the volta brackets will be drawn over all of the alternative music, but it is possible to shorten them by setting `voltaSpannerDuration`. In the next example, the bracket only lasts one measure, which is a duration of 3/4.

```latex
\relative c'' {
  \time 3/4
  c4 c c
  \set Score.voltaSpannerDuration = #(ly:make-moment 3/4)
  \repeat volta 5 { d4 d d }
  \alternative {
    { e4 e e }
    { f4 f f }
    { g4 g g }
  }
}
```

Volta below chords

By adding the `Volta_engraver` to the relevant staff, volte can be put under chords.

```latex
\score {
  \<<
```
Volta multi staff

By adding the Volta_engraver to the relevant staff, volte can be put over staves other than the topmost one in a score.

\begin{verbatim}
voltaMusic = \relative c' \{
    \repeat volta 2 { c'1 }
    \alternative { c' }
}
\end{verbatim}

By adding the Volta_engraver to the relevant staff, volte can be put over staves other than the topmost one in a score.
Volta text markup using repeatCommands

Though volte are best specified using \repeat volta, the context property repeatCommands must be used in cases where the volta text needs more advanced formatting with \markup.

Since repeatCommands takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax #(list (list 'volta textIdentifier)). Start- and end-repeat commands can be added as separate list elements:

\begin{verbatim}
\set Score.repeatCommands = #((volta "1.2.3..." end-repeat)
\end{verbatim}

\begin{verbatim}
\set Score.repeatCommands = #((volta "4." end-repeat)
\end{verbatim}

\begin{verbatim}
\set Score.repeatCommands = #((volta "4." end-repeat)
\end{verbatim}

\begin{verbatim}
\set Score.repeatCommands = #((volta "4." end-repeat)
\end{verbatim}

\begin{verbatim}
\set Score.repeatCommands = #((volta "4." end-repeat)
\end{verbatim}
Simultaneous notes

Section “Simultaneous notes” in Notation Reference

Additional voices to avoid collisions

In some instances of complex polyphonic music, additional voices are necessary to prevent collisions between notes. If more than four parallel voices are needed, additional voices can be added by defining a variable using the Scheme function `context-spec-music`.

```scheme
voiceFive = #(context-spec-music (make-voice-props-set 4) 'Voice)
```

Changing a single note’s size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.
Inside the chord (within the brackets < >), before the note to be altered, place the \tweak command, followed by font-size and define the proper size like # -2 (a tiny note head).

```
\relative c' {
  \<tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  \markup { A tiny e }_\markup { A big c }
}
```

A tiny e

A big c

**Changing partcombine texts**

When using the automatic part combining feature, the printed text for the solo and unison sections may be changed:

```
\new Staff <<
  \set Staff.soloText = "girl"
  \set Staff.soloIIText = "boy"
  \set Staff.aDueText = "together"
  \partCombine
    \relative c'' {
      g4 g r r
      a2 g
    }
    \relative c'' {
      r4 r a( b)
      a2 g
    }
>>
```

```
girl boy together
```

**Clusters**

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}
```

```
\new Staff \fragment
\new Staff \makeClusters \fragment
>>
```
Combining two parts on the same staff

The part combiner tool (\partCombine command) allows the combination of several different parts on the same staff. Text directions such as “solo” or “a2” are added by default; to remove them, simply set the property printPartCombineTexts to f.

For vocal scores (hymns), there is no need to add “solo/a2” texts, so they should be switched off. However, it might be better not to use it if there are any solos, as they won’t be indicated. In such cases, standard polyphonic notation may be preferable.

This snippet presents the three ways two parts can be printed on a same staff: standard polyphony, \partCombine without texts, and \partCombine with texts.

%%%% Combining pedal notes with clef changes

\begin{verbatim}
musicUp = \relative c' { \
  \time 4/4 
  a4 c4.( g8) a4 | 
  g4 e' g,( a8 b) | 
  c b a2. 
}

musicDown = \relative c' { 
  g4 e4.( d8) c4 | 
  r2 g'4( f8 e) | 
  d2 stemDown a
}

\score { 
  << 
    \new Staff \with { instrumentName = "Standard polyphony" } 
      << \musicUp \ \musicDown >> 
  \new Staff \with { 
      instrumentName = "PartCombine without text" 
      printPartCombineTexts = ##f 
    }
  \partCombine \musicUp \musicDown 
  \new Staff \with { instrumentName = "PartCombine with text" } 
    \partCombine \musicUp \musicDown 
  >> 
  \layout { 
    indent = 6.0\cm 
  \context { 
}
\end{verbatim}
Displaying complex chords
Here is a way to display a chord where the same note is played twice with different accidentals.

```latex
\fixA = {
  \once \override Stem.length = #11
}\fixB = {
  \once \override NoteHead.X-offset = #1.7
  \once \override Stem.length = #7
  \once \override Stem.rotation = #'(45 0 0)
  \once \override Stem.extra-offset = #'(-0.1 . -0.2)
  \once \override Flag.style = #'no-flag
  \once \override Accidental.extra-offset = #'(4 . -.1)
}\relative c' { << { \fixA <b d!>8 } \ \ { \voiceThree \fixB dis } >> s}
```

Forcing horizontal shift of notes
When the typesetting engine cannot cope, the following syntax can be used to override typesetting decisions. The units of measure used here are staff spaces.

```latex
\relative c' << 
  { <d g>2 <d g>
}
```
Making an object invisible with the 'transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be over-ridden by using the prefer-dotted-right property of NoteCollision.
Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘ignore-collision property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

\override \relative c' {
  \new Staff <<
    \new Voice { \ignore \stemDown f2 g }
    \new Voice { c2 \stemDown c, }
  }
}

Two \partCombine pairs on one staff

The \partCombine function takes two music expressions each containing a part, and distributes them among four Voices named “two”, “one”, “solo”, and “chords” depending on when and how the parts are merged into a common voice. The voices output from \partCombine can have their layout properties adjusted in the usual way. Here we define extensions of \partCombine to make it easier to put four voices on a staff.

soprano = { d'4 | cis' b' e' d'8 cis' | cis'2 b } 
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 } 
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 } 
bass = { fis8 gis | a4 gis g fis | eis fis b,2 }

\new Staff <<
  \key b\minor
  \clef alto
  \partial 4
  \transpose b b'

Staff notation

Section “Staff notation” in Notation Reference

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

```latex
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
 \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

```latex
\score {
  <<
    \new Staff \relative c'' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c'' {
      \new Staff {
        c1 | c
        <<
        { c1 | d }
      }
      \new Staff {
        \once \omit Staff.TimeSignature
        c1 | b
      }
    }
  >>
  c1
```
Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of Staff.explicitKeySignatureVisibility as is shown in the example.

\score { 
  \new StaffGroup \relative c'\'' { 
    \new Staff 
    \key f \major 
    c1 c'"Unwanted extra space" \break 
    \once \omit Staff.TimeSignature 
    \once \omit Staff.TimeSignature 
    c1 | c 
    \new Staff { 
      \key f \major 
      \once \omit Staff.TimeSignature 
      c1 | c 
    } 
    \break 
    c1 | c'"Fixed here" \break 
    \once \omit Staff.TimeSignature 
    \new Staff { 
      \once \set Staff.explicitKeySignatureVisibility = #end-of-line-invisible 
      \key f \major 
      \once \omit Staff.TimeSignature 
      c1 | c 
    } 
    \break 
  } 
} 

Unwanted extra space
Adding indicators to staves which get split after a break

This snippet defines the `\splitStaffBarLine`, `\convUpStaffBarLine` and `\convDownStaffBarLine` commands. These add arrows at a bar line, to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

\begin{verbatim}
#(define-markup-command (arrow-at-angle layout props angle-deg length fill) (number? number? boolean?)
  (let* ((PI-OVER-180 (/ (atan 1 1) 34))
         (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
         (angle-rad (degrees->radians angle-deg))
         (target-x (* length (cos angle-rad)))
         (target-y (* length (sin angle-rad))))
    (interpret-markup layout props
      (markup
       #:translate (cons (/ target-x 2) (/ target-y 2))
       #:rotate angle-deg
       #:translate (cons (/ length -2) 0)
       #:concat (#:draw-line (cons length 0)
                  #:arrow-head X RIGHT fill))))

splitStaffBarLineMarkup = \markup \with-dimensions #'(0 . 0) #'(0 . 0) {
  \combine
  \arrow-at-angle #45 #(sqrt 8) ##t
  \arrow-at-angle #-45 #(sqrt 8) ##t
}

Adding orchestral cues to a vocal score

This shows one approach to simplify adding many orchestral cues to the piano reduction in a vocal score. The music function \cwhile takes four arguments: the music from which the cue is to be taken, as defined by \addQuote, the name to be inserted before the cue notes, then either \#UP or \#DOWN to specify either \voiceOne with the name above the staff or \voiceTwo with the name below the staff, and finally the piano music in parallel with which the cue notes are to appear. The name of the cued instrument is positioned to the left of the cued notes. Many passages can be cued, but they cannot overlap each other in time.

\cwhile = 
\(\text{(define-music-function)}\)
\(\text{(instrument name dir music)}\)
\(\text{(string? string? ly:dir? ly:music?)}\)
\#{
\cDuring $instrument #dir {
\once \override TextScript.self-alignment-X = #RIGHT
\once \override TextScript.direction = $dir
<->\markup { \tiny #name }
$music
}
#})

\flute = \relative c'' {
\transposition c'
  s4 s4 e g
}
\addQuote "flute" { \flute }
clarinet = \relative c' { 
  \transposition bes 
  fis4 d d c 
} 
\addQuote "clarinet" { \clarinet }

singer = \relative c'' { c4. g8 g4 bes4 } 
words = \lyricmode{ here's the lyrics }

pianoRH = \relative c' { 
  \transposition c' 
  \cueWhile "clarinet" "Clar." #DOWN { c4. g8 } 
  \cueWhile "flute" "Flute" #UP { g4 bes4 } 
}

pianoLH = \relative c { c4 <c' e> e, <g c> }

\score { 
  \new Staff { 
    \new Voice = "singer" { 
      \singer 
    } 
  } 
  \new Lyrics { 
    \lyricsto "singer" 
    \words 
  } 
  \new PianoStaff << 
    \new Staff { 
      \new Voice { 
        \pianoRH 
      } 
    } 
    \new Staff { 
      \clef "bass" 
      \pianoLH 
    } 
  >> 
  >> 
}
Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks, often consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly.

```latex
\cell{c''} {
  r8 f8\glissando
  \glissandoSkipOn
  f4 g a a8\noBeam
  \glissandoSkipOff
  a8

  r8 f8\glissando
  \glissandoSkipOn
  g4 a8
  \glissandoSkipOff
  a8 |

  r4 f\glissando \<
  \glissandoSkipOn
  a4\f \>
  \glissandoSkipOff
  b8\! r |
}
Alternative bar numbering

Two alternative methods for bar numbering can be set, especially for when using repeated music.

```latex
\relative c'\{
  \set Score.alternativeNumberingStyle = #'numbers
  \repeat volta 3 \{ c4 d e f \}
  \alternative \{
    \{ c4 d e f | c2 d \break \}
    \{ f4 g a b | f4 g a b | f2 a | \break \}
    \{ c4 d e f | c2 d \}
  \}
  c1 \break
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \repeat volta 3 \{ c, d e f \}
  \alternative \{
    \{ c4 d e f | c2 d \break \}
    \{ f4 g a b | f4 g a b | f2 a | \break \}
    \{ c4 d e f | c2 d \}
  }
  c1
```

```latex
\relative c\{

\f\linebreak
\linebreak
\linebreak
\linebreak
\linebreak
\linebreak
\linebreak
```

```latex
\relative c\{

\f\linebreak
\linebreak
\linebreak
\linebreak
\linebreak
\linebreak
```

```latex
\relative c\{

\f\linebreak
\linebreak
\linebreak
\linebreak
\linebreak
\linebreak
```

```latex
\relative c\{

\f\linebreak
\linebreak
\linebreak
\linebreak
\linebreak
\linebreak
```
Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The \ambitusAfter function allows for changing this placement. Syntax is \ambitusAfter grob-interface (see Graphical Object Interfaces (http://lilypond.org/doc/v2.22/Documentation/internals/graphical-object-interfaces) for a list of possible values for grob-interface.)

A common use case is printing the ambitus between key signature and time signature.

\new Staff \with {
  \consists Ambitus_engraver
} \relative {
  \ambitusAfter key-signature
  \key d \major
  es'8 g bes cis d2
}
Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

% http://lsr.di.unimi.it/LSR/Item?id=964

\layout {
  \context {
    \Score
    %% Changing the defaults from engraver-init.ly
    measureBarType = #'"!"
    startRepeatBarType = #"[|:
    endRepeatBarType = #"[:]"
    doubleRepeatBarType = #":\[|:
    }
  }
}

%% example:
{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
  \repeat volta 2 { \repeat unfold 2 c' }
  \alternative {
    { c' }
    {
      %% v2.18 workaround
      \once\override \Score.VoltaBracket.shorten-pair = #'(1 . -1)
      c'
    }
  }
  \bar "|."
Changing the number of lines in a staff

The number of lines in a staff may changed by overriding the StaffSymbol property line-count.

```plaintext
upper = \relative c'' {
    c4 d e f
}

lower = \relative c {
    \clef bass
    c4 b a g
}

\score {
    \context PianoStaff <<
        \new Staff {
            \upper
        }
        \new Staff {
            \override Staff.SymbolStaffSymbol.line-count = #4
            \lower
        }
    >>
}
```

Changing the staff size

Though the simplest way to resize staves is to use \#(set-global-staff-size xx), an individual staff’s size can be changed by scaling the properties 'staff-space and fontSize.

```plaintext
<<
    \new Staff {
        \relative c'' {
            \dynamicDown
            c8\ff c c c c c c c
        }
    }
    \new Staff \with {
        fontSize = #-3
        \override Staff.SymbolStaff-space = #(magstep -3)
    }
}
Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```latex
\set-global-staff-size 20
```

```latex
\score {
  \repeat unfold 12 { s1 \break }
}
\layout {
  indent = 0\in
  context {\Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
  context {\Score
    \remove "Bar_number_engraver"
  }
}

% uncomment these lines for "letter" size
%
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%

% uncomment these lines for "A4" size
\{ 
\paper { 
#(set-paper-size "a4")
ragged-last-bottom = ##f
line-width = 180
left-margin = 15
bottom-margin = 10
top-margin = 10
}
\}

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```lilypond
\new Staff \with { \
  \override StaffSymbol.line-count = #8 \
  \override KeySignature.flat-positions = #'((-7 . 6)) \
  \override KeyCancellation.flat-positions = #'((-7 . 6)) \
  \override KeySignature.sharp-positions = #'((-6 . 7)) \
  \override KeyCancellation.sharp-positions = #'((-6 . 7)) 
%
\override Clef.stencil = # (lambda (grob)(grob-interpret-markup grob 
#( \musicglyph "clefs.C" \
  \translate #'(-3 . -2) 
  \musicglyph "clefs.F" 
#)))( \clefPosition = #3 \middleCPosition = #3 \middleCClefPosition = #3 )
{ 
  \key d\minor f bes, f bes, 
}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```lilypond
\relative c' { 
  c1-10 
  c1-50 
  c1-36 
  c1-29 
}
```

Cross staff stems

This snippet shows the use of the Span_stem_engraver and \crossStaff to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.
\layout {
  \context {
    \PianoStaff
    \consists "Span_stem_engraver"
  }
}

\new PianoStaff <<
\new Staff {
  <b d'>4 r d'16\> e'8. g8 r!\!
  e'8 f' g'4 e'2
}
\new Staff {
  \clef bass
  \voiceOne
  \autoBeamOff
  \crossStaff { <e g>4 e, g16 a8. c8} d
  \autoBeamOn
  g8 f g4 c2
}
>>

Display bracket with only one staff in a system

If there is only one staff in one of the staff types ChoirStaff or StaffGroup, by default the bracket and the starting bar line will not be displayed. This can be changed by overriding collapse-height to set its value to be less than the number of staff lines in the staff.

Note that in contexts such as PianoStaff and GrandStaff where the systems begin with a brace instead of a bracket, another property has to be set, as shown on the second system in the example.

\score {
  \new StaffGroup <<
    % Must be lower than the actual number of staff lines
    \override StaffGroup.SystemStartBracket.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
  \new Staff {
    c'1
  } 
} 
>>

\score {
  \new PianoStaff <<
}
Extending a TrillSpanner

For TrillSpanner, the minimum-length property becomes effective only if the set-spacing-rods procedure is called explicitly.

To do this, the springs-and-rods property should be set to ly:spanner::set-spacing-rods.

\relative c' {
\key c \minor
\time 2/4
c16( as') c, -. des-.
\once \override TrillSpanner.minimum-length = #15
\once \override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
\afterGrace es4
\startTrillSpan { d16[( \stopTrillSpan es)]}
c( c' g es c g' es d
\hideNotes
c8)
\}

Extending glissandi across repeats

A glissando which extends into several \alternative blocks can be simulated by adding a hidden grace note with a glissando at the start of each \alternative block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function which takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

\repeatGliss = #((define-music-function (grace)
(ly:pitch?)
#{}
\score {
  \relative c'' {
    \repeat volta 3 { c4 d e f \glissando }
    \alternative {
      \repeatGliss f g2 e }
      \repeatGliss f e2 d }
  }
}

\music = \relative c' { 
  \voiceOne
  \repeat volta 2 {
    g a b c \glissando }
  \alternative {
    \repeatGliss c \once \omit StringNumber e1\2 }
  }
}

\score { 
  \new StaffGroup <<
  \new Staff <<
    \new Voice { \clef "G_8" \music }
  >>
  \new TabStaff <<
    \new TabVoice { \clef " moderntab" \music }
  >>
  >>
}
Flat Ties

The function takes the default Tie.stencil as an argument, calculating the result relying on the extents of this default.

Further tweaking is possible by overriding Tie.details.height-limit or with \shape. It’s also possible to change the custom-definition on the fly.

%% http://lsr.di.unimi.it/LSR/Item?id=1031

```lisp
#(define ((flared-tie coords) grob)
  (define (pair-to-list pair)
    (list (car pair) (cdr pair)))
  (define (normalize-coords goods x y dir)
    (map
      (lambda (coord)
        ;(coord-scale coord (cons x (* y dir)))
        (cons (* x (car coord)) (* y dir (cdr coord))))
     goods))
  (define (my-c-p-s points thick)
    (make-connected-path-stencil
      points
      thick
      1.0
      1.0
      #f
      #f))

  ;; outer let to trigger suicide
  (let ((sten (ly:tie::print grob)))
    (if (grob::is-live? grob)
      (let* ((layout (ly:grob-layout grob))
             (line-thickness (ly:output-def-lookup layout 'line-thickness))
             (thickness (ly:grob-property grob 'thickness 0.1))
             (used-thick (* line-thickness thickness))
             (dir (ly:grob-property grob 'direction))
             (xex (ly:stencil-extent sten X))
             (yex (ly:stencil-extent sten Y))
             (lenx (interval-length xex))
             (leny (interval-length yex))
             (xtrans (car xex))
             (ytrans (if (> dir 0) (car yex) (cdr yex))))
```
(uplist
  (map pair-to-list
      (normalize-coords coords lenx (* leny 2) dir))))

(ly:stencil-translate
  (my-c-p-s uplist used-thick)
  (cons xtrans ytrans))
')()')

#(define flare-tie
  (flared-tie '((0 . 0)(0.1 . 0.2) (0.9 . 0.2) (1.0 . 0.0))))

  a4-\a
Forcing measure width to adapt to MetronomeMark’s width

By default, metronome marks do not influence horizontal spacing.

This can be solved through a simple override, as shown in the second half of the example.

```latex
\example = {
    \texttt{\tempo "Allegro"}
    \R1*6
    \texttt{\tempo "Rall."}
    \R1*2
    \texttt{\tempo "A tempo"}
    \R1*8
}
```

```latex
\compressMUMRests {
    \example
    \R1
    \R1
    \texttt{\override Score.MetronomeMark.extra-spacing-width = #'(-3 . 0)}
    \example
}
```
Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

\relative c' {
  \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f"'d,
}

Inципит

When transcribing mensural music, an incipit at the beginning of the piece is useful to indicate the original key and tempo. While today musicians are used to bar lines in order to faster recognize rhythmic patterns, bar lines were not yet invented during the period of mensural music; in fact, the meter often changed after every few notes. As a compromise, bar lines are often printed between the staves rather than on the staves.

%% With 2.23, this throws:
%% programming error: Loose column does not have right side to attach to.
%% Likely "Hidden BarLine during note yields programming error"

Inserting score fragments above a staff, as markups

The \markup command is quite versatile. In this snippet, it contains a \score block instead of texts or marks.

```latex
\markup { \new Staff \with { \remove "Time_signature_engraver" } 
{ \clef bass 
<c, g, d g>1 
} 
\layout { \ragged-right = ##t \indent = 0\cm } 
}
```

```latex
\header { 
\title = "Solo Cello Suites" 
\subtitle = "Suite IV" 
\subsubtitle = \markup { Originalstimmung: \raise #0.5 \tuning } 
}
```

```latex
\relative c' { 
\time 4/8 
\tuplet 3/2 \{ c8 d e \} \tuplet 3/2 \{ c d e \} 
\tuplet 3/2 \{ c8 d e \} \tuplet 3/2 \{ c d e \} 
g8 a g a 
g8 a g a 
}
```

Solo Cello Suites
Suite IV
Originalstimmung:

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the stringOneTopmost-context-property. For a context-wide setting this could be done in layout as well.

```latex
%\layout { 
% \context { 
% \Score 
% stringOneTopmost = ##f 
% }
```
Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

music = \relative c {  
c4 d e f  
g4 a b c  
d4 e f g  
}

<<  
\new Staff {  
  \clef "G_8"  
  \music  
}  
\new TabStaff \with {  
  \tablatureFormat = #fret-letter-tablature-format  
}  
{  
  \music  
}
Making glissandi breakable

Setting the breakable property to #t in combination with after-line-breaking allows a glissando to break if it occurs at a line break:

\begin{verbatim}
\glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}
\relative c'' {
  \override Glissando.breakable = ##t
  \override Glissando.after-line-breaking = ##t
  f1\glissando |
  \break
  a4 r2. |
  f1\glissando
  \once \glissandoSkipOn
  \break
  a2 a4 r4 |
}
\end{verbatim}

Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the line-positions property of the StaffSymbol object.

\begin{verbatim}
\override Staff.StaffSymbol.line-positions =
\end{verbatim}
Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```plaintext
<<
\context Voice = "foo" {
  \clef bass
  c4 r g r
c4 r g r
c4 r g r
c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t
  \hide PercentRepeat
  \override PercentRepeatCounter.staff-padding = #1
  \repeat percent 4 { s1 }
}
>>
```

Mensurstriche layout (bar lines between the staves)

*Mensurstriche,* bar lines between but not through staves, can be printed by setting `measureBarType` to "-span|" and using a grouping context that allows span bars, such as `StaffGroup`.

```plaintext
\layout {
  \context {
    \Staff
      measureBarType = "-span|"
  }
}
music = \fixed c'' { 
c1
d2 \section e2
f1 \fine
}
\new StaffGroup <<
  \new Staff \music
```
Modifying the Ottava spanner slope

It is possible to change the slope of the Ottava spanner.

```latex
\relative c'' { 
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print 
  \override Staff.OttavaBracket.bound-details = 
    #'(left . ((Y . 0) 
      (attach-dir . ,LEFT) 
      (padding . 0) 
      (stencil-align-dir-y . ,CENTER))) 
    (right . ((Y . 5.0) ; Change the number here 
      (padding . 0) 
      (attach-dir . ,RIGHT) 
      (text . ,(make-draw-dashed-line-markup 
        (cons 0 -1.2))))) 
  \override Staff.OttavaBracket.left-bound-info = 
    #ly:horizontal-line-spanner::calc-left-bound-info-and-text 
  \override Staff.OttavaBracket.right-bound-info = 
    #ly:horizontal-line-spanner::calc-right-bound-info 
  \ottava #1 
  c1 
  c''''1 
}
```

Nesting staves

The property `systemStartDelimiterHierarchy` can be used to make more complex nested staff groups. The command `\set StaffGroup.systemStartDelimiterHierarchy` takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace`, and `SystemStartSquare`.

```latex
\new StaffGroup 
\relative c'' << 
```
Non-traditional key signatures

The commonly used \key command sets the keyAlterations property, in the Staff context.

To create non-standard key signatures, set this property directly. The format of this command is a list:

\set Staff.keyAlterations =
#`(((octave . step) . alter) ((octave . step) . alter) ...)

where, for each element in the list, octave specifies the octave (0 being the octave from middle C to the B above), step specifies the note within the octave (0 means C and 6 means B), and alter is ,SHARP ,FLAT ,DOUBLE-SHARP etc.

Alternatively, using the more concise format for each item in the list (step . alter) specifies the same alteration holds in all octaves.

For microtonal scales where a “sharp” is not 100 cents, alter refers to the alteration as a proportion of a 200-cent whole tone.

\include "arabic.ly"
\relative do' {
\set Staff.keyAlterations = #`((0 . ,SEMI-FLAT)
   (1 . ,SEMI-FLAT)
   (2 . ,FLAT)
   (5 . ,FLAT)
   (6 . ,SEMI-FLAT))

%\set Staff.extraNatural = ##f
Numbering groups of measures

This snippet demonstrates the use of the Measure_counter_engraver to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a Staff context is used; another possibility is a Dynamics context.

The counter is begun with \startMeasureCount and ended with \stopMeasureCount. Numbering will start by default with 1, but this behavior may be modified by overriding the count-from property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {
    g'4 f' e' d'
  }
  \stopMeasureCount
}
Staff notation

Orchestra, choir and piano template

This template demonstrates the use of nested StaffGroup and GrandStaff contexts to sub-group instruments of the same type together, and a way to use \transpose so that variables hold music for transposing instruments at concert pitch.

\set-global-staff-size 17
\paper {
  indent = 3.0\cm % add space for instrumentName
  short-indent = 1.5\cm % add less space for shortInstrumentName
}

Print ChordNames with same root and different bass as slash and bass-note

To print subsequent ChordNames only differing in its bass note as slash and bass note use the here defined engraver. The behaviour may be controlled in detail by the chordChanges context property.

```lisp
(define Bass_changes_equal_root_engraver
  (lambda (ctx)
    "For sequential @code{ChordNames} with same root, but different bass, the root markup is dropped: D D/C D/B -> D /C /B
    The behaviour may be controlled by setting the @code{chordChanges} context-property."
    (let ((chord-pitches '())
        (last-chord-pitches '())
        (bass-pitch #f))
      (make-engraver
       ((initialize this-engraver)
(let ((chord-note-namer (ly:context-property ctx 'chordNoteNamer)))
  ;; Set 'chordNoteNamer, respect user setting if already done
  (ly:context-set-property! ctx 'chordNoteNamer
    (if (procedure? chord-note-namer)
        chord-note-namer
        note-name->markup)))))

(listeners
  ((note-event this-engraver event)
    (let* ((pitch (ly:event-property event 'pitch))
            (pitch-name (ly:pitch-notename pitch))
            (pitch-alt (ly:pitch-alteration pitch))
            (bass (ly:event-property event 'bass #f))
            (inversion (ly:event-property event 'inversion #f)))
      ;; Collect notes of the chord
      ;; - to compare inversed chords we need to collect the bass note
      ;;  as usual member of the chord, whereas an added bass must be
      ;;  treated separate from the usual chord-notes
      ;; - notes are stored as pairs containing their
      ;;  pitch-name (an integer), i.e. disregarding their octave and
      ;;  their alteration
      (cond (bass (set! bass-pitch pitch))
            (inversion
              (set! bass-pitch pitch)
              (set! chord-pitches
                (cons (cons pitch-name pitch-alt) chord-pitches)))
            (else
              (set! chord-pitches

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with \override LyricText.extra-offset = #'(0 . dy) and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

<<
\new Staff <<
\new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
Quoting another voice

The quotedEventTypes property determines the music event types which should be quoted. The default value is (note-event rest-event tie-event beam-event tuplet-span-event), which means that only the notes, rests, ties, beams and tuplets of the quoted voice will appear in the \quoteDuring expression.

In the following example, a 16th rest is not quoted since rest-event is not in quotedEventTypes.

For a list of event types, consult the “Music classes” section of the Internals Reference.

```latex
\set fontSize = #-4
\set NoteColumn.ignore-collision = ##t
\override Stem.length-fraction = #(magstep -4)
```
Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

\addQuote clarinet {
  \transposition bes
  \repeat unfold 8 \{ d'16 d' d'8 \}
}

\addQuote sax {
  \transposition es'
  \repeat unfold 16 \{ a8 \}
}

\quoteTest = {
  \% french horn
  \transposition f
  g'4
  << \quoteDuring "clarinet" \{ \skip 4 \} s4~"clar." >>
  << \quoteDuring "sax" \{ \skip 4 \} s4~"sax." >>
  g'4
}

{\new Staff \with {
  instrumentName = \markup { \column { Horn "in F" } }
}}

\quoteTest
\transpose c' d' << \quoteTest s4~"up a tone" >>

\Horn\in\F\quad clar.\quad sax.\quad clar.\quad sax.
\quad up a tone
Removing brace on first line of piano score

This snippet removes the first brace from a PianoStaff or a GrandStaff.

It may be useful when cutting and pasting the engraved image into existing music.

It uses \alterBroken.

```
someMusic = {
    once \override Staff.Clef.stencil = ##f
    once \override Staff.TimeSignature.stencil = ##f
    repeat unfold 3 c1 \break
    repeat unfold 5 c1 \break
    repeat unfold 5 c1
}

\score {
    new PianoStaff
    <<
        new Staff = "right" \relative c' \someMusic
        new Staff = "left" \relative c' { \clef F \someMusic }
    >>
    layout {
        indent=75
        context {
            \PianoStaff
            \alterBroken transparent #'(#t) SystemStartBrace
        }
    }
}
```

Removing the first empty line

The first empty staff can also be removed from the score by setting the VerticalAxisGroup property remove-first. This can be done globally inside the \layout block, or locally inside
the specific staff that should be removed. In the latter case, you have to specify the context
(Staff applies only to the current staff) in front of the property.

The lower staff of the second staff group is not removed, because the setting applies only to
the specific staff inside of which it is written.

```latex
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    \% To use the setting globally, uncomment the following line:
    \% \override VerticalAxisGroup.remove-first = ##t
  }
}
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
c1
  }
  \new Staff {
    \% To use the setting globally, comment this line,
    \% uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
}}>>
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
c1
  }
  \new Staff {
    R1 \break
    R
  }
}}>>
```

![Music notation examples]

![Music notation examples]
Setting system separators

System separators can be inserted between systems. Any markup can be used, but \slashSeparator has been provided as a sensible default.

\paper {
    system-separator-markup = \slashSeparator
    line-width = 120
}

notes = \relative c' {
    c1 | c \break
    c1 | c \break
    c1 | c
}

\book {
    \score {
        \new GrandStaff <<
        \new Staff \notes
        \new Staff \notes
        >>
    }
}

Staff notation

Tick bar lines
'Tick' bar lines are often used in music where the bar line is used only for coordination and is not meant to imply any rhythmic stress.

\relative c' {  
  \set Score.measureBarType = #"''"  
  c4 d e f  
  g4 f e d  
  c4 d e f  
  g4 f e d  
  \bar "|."  
}

Time signature in parentheses
The time signature can be enclosed within parentheses.

\relative c'' {  
  \override Staff.TimeSignature.stencil = #(lambda (grob)  
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))  
  \time 2/4  
  a4 b8 c  
}

Time signature in parentheses - method 3
Another way to put the time signature in parenthesis

\relative c'' {  
  \override Staff.TimeSignature.stencil = #(lambda (grob)  
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))  
  \time 2/4  
  a4 b8 c  
}

Tweaking clef properties
Changing the Clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines middleCClefPosition must also be specified, with positive or negative values moving middle C up or down respectively, relative to the staff’s center line.

For example, \clef "treble_8" is equivalent to setting the clefGlyph, clefPosition (the vertical position of the clef itself on the staff), middleCPosition and clefTransposition. Note
that when any of these properties (except middleCPosition) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

```latex
\{ 
% The default treble clef 
\key f \major 
c'1 
% The standard bass clef 
\set Staff.clefGlyph = \"clefs.F\" 
\set Staff.clefPosition = #2 
\set Staff.middleCPosition = #6 
\set Staff.middleCClefPosition = #6 
\key g \major 
c'1 
% The baritone clef 
\set Staff.clefGlyph = \"clefs.C\" 
\set Staff.clefPosition = #4 
\set Staff.middleCPosition = #4 
\set Staff.middleCClefPosition = #4 
\key f \major 
c'1 
% The standard choral tenor clef 
\set Staff.clefGlyph = \"clefs.G\" 
\set Staff.clefPosition = #-2
\set Staff.clefTransposition = #-7
\set Staff.middleCPosition = #1 
\set Staff.middleCClefPosition = #1 
\key f \major 
c'1 
% A non-standard clef 
\set Staff.clefPosition = #0 
\set Staff.clefTransposition = #0 
\set Staff.middleCPosition = #-4 
\set Staff.middleCClefPosition = #-4 
\key g \major 
c'1 \break

% The following clef changes do not preserve 
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = \"clefs.F\" 
\set Staff.clefPosition = #2 
c'1 
\set Staff.clefGlyph = \"clefs.G\" 
c'1 
\set Staff.clefGlyph = \"clefs.C\" 
c'1 
\set Staff.clefTransposition = #7 
\set Staff.clefPosition = #4 
\set Staff.middleCPosition = #4 
\set Staff.middleCClefPosition = #4 
\key f \major 
c'1 
\set Staff.clefGlyph = \"clefs.F\" 
\set Staff.clefPosition = #2 
c'1 
\set Staff.clefGlyph = \"clefs.G\" 
c'1 
\set Staff.clefGlyph = \"clefs.C\" 
c'1 
\set Staff.clefTransposition = #7 
\set Staff.clefPosition = #4 
\set Staff.middleCPosition = #4 
\set Staff.middleCClefPosition = #4 
\key f \major 
c'1 
\set Staff.clefGlyph = \"clefs.F\" 
\set Staff.clefPosition = #2 
c'1 
\set Staff.clefGlyph = \"clefs.G\" 
c'1 
\set Staff.clefGlyph = \"clefs.C\" 
c'1 
\set Staff.clefTransposition = #7
```
Two \partCombine pairs on one staff

The \partCombine function takes two music expressions each containing a part, and distributes them among four Voices named “two”, “one”, “solo”, and “chords” depending on when and how the parts are merged into a common voice. The voices output from \partCombine can have their layout properties adjusted in the usual way. Here we define extensions of \partCombine to make it easier to put four voices on a staff.

soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b }
alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 }
bass = { fis8 gis | ais fis b | eis fis b,2 }

Using marklines in a Frenched score

Using MarkLine contexts (such as in LSR1010 (https://lsr.di.unimi.it/LSR/Item?id=1010)) in a Frenched score can be problematic if all the staves between two MarkLines are removed in one system. The Keep_alive_together_engraver can be used within each StaffGroup to keep the MarkLine alive only as long as the other staves in the group stay alive.

bars = {
    \tempo "Allegro" 4=120

Editorial annotations

Section “Editorial annotations” in Notation Reference

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' { 
  c4-1 d-2 f-4 e-3
}
```

Adding links to objects

To add a link to a grob stencil you can use \add-link as defined here. It works both with \override and \tweak.

Drawback: point-and-click is disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command. Note that the links are not displayed and are not clickable from inside the LSR.

```
#(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
        (let* ((x-ext (ly:stencil-extent stil X))
               (y-ext (ly:stencil-extent stil Y))
               (url-expr `(url-link ,url-strg ,x-ext ,y-ext))
               (new-stil
                (ly:stencil-add
                 (ly:make-stencil url-expr x-ext y-ext)
                 stil)))
        (ly:grob-set-property! grob 'stencil new-stil))))

Adding markups in a tablature

By default, markups do not show in a tablature. To make them appear, simply use the command \revert TabStaff.TextScript.stencil

% http://lsr.di.unimi.it/LSR/Item?id=919
% by P.P.Schneider on June 2014

\begin{verbatim}
\score {
  \new TabStaff {
    \repeat unfold 2 << \high \ \low \ \pulse >> 
  }
  \layout {
    \context { 
      \TabStaff 
      \clef moderntab 
      \revert TextScript.stencil 
      \override TextScript.font-series = #'bold 
      \override TextScript.font-size = #-2 
      \override TextScript.color = #red 

    } 
    \context { 
      \Score 
      proportionalNotationDuration = #(ly:make-moment 1/8) 
    } 
  }
}
\end{verbatim}

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff; that behavior, however, may be disabled. Attention needs to be paid to situations where fingerings and stems are in
the same direction: by default, fingerings will avoid only beamed stems. That setting can be changed to avoid no stems or all stems; the following example demonstrates these two options, as well as how to go back to the default behavior.

\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##f
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##t
  a[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = #only-if-beamed
  a[-1 b]-2 g-0 r
}

Alternative bar numbering

Two alternative methods for bar numbering can be set, especially for when using repeated music.

\relative c'{
  \set Score.alternativeNumberingStyle = #'numbers
  \repeat volta 3 { c4 d e f | }
    \alternative {
      { c4 d e f | c2 d \break }
      { f4 g a b | f4 g a b | f2 a | \break }
      { c4 d e f | c2 d }
    }
  c1 \break
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \repeat volta 3 { c,4 d e f | }
    \alternative {
      { c4 d e f | c2 d \break }
      { f4 g a b | f4 g a b | f2 a | \break }
      { c4 d e f | c2 d }
    }
  c1
}
Analysis brackets above the staff

Simple horizontal analysis brackets are added below the staff by default. The following example shows a way to place them above the staff instead.

```plaintext
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

relative c'' {
  \once \override HorizontalBracket.direction = \up
c2\startGroup
d2\stopGroup
}
```

Analysis brackets with labels

Text markup may be added to analysis brackets through the text property of the HorizontalBracketText grob. Adding different texts to brackets beginning at the same time requires the \textcommand.

Bracket text will be parenthesized after a line break.

```plaintext
\paper { tagline = "#f" }

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
```
Applying note head styles depending on the step of the scale

The shapeNoteStyles property can be used to define various note head styles for each step of the scale (as set by the key signature or the tonic property).

This property requires a set of symbols, which can be purely arbitrary (geometrical expressions such as triangle, cross, and xcircle are allowed) or based on old American engraving tradition (some Latin note names are also allowed).

That said, to imitate old American song books, there are several predefined note head styles available through shortcut commands such as \aikenHeads or \sacredHarpHeads.

This example shows different ways to obtain shape note heads, and demonstrates the ability to transpose a melody without losing the correspondence between harmonic functions and note head styles.

```
\key c \major
c2 d
e2 f
g2 a
b2 c
```
Blanking staff lines using the \whiteout command

The \whiteout command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

Changing a single note’s size in a chord

Individual note heads in a chord can be modified with the \tweak command inside a chord, by altering the font-size property.

Inside the chord (within the brackets < >), before the note to be altered, place the \tweak command, followed by font-size and define the proper size like #-2 (a tiny note head).
Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.
(cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue)))

%Compare pitch and alteration (not octave).
(define (pitch-equals? p1 p2)
  (and
   (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
   (= (ly:pitch-notename p1) (ly:pitch-notename p2)))))

(define (pitch-to-color pitch)

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, it must be used within a chord construct <>), even for single notes. Orientation for string numbers and right-hand fingerings may be set in a similar way.

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
  \set stringNumberOrientations = #'(up left down)
  <f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <<\rightHandFinger #1 e\rightHandFinger #2 c'\rightHandFinger #4 >
}
Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The outside-staff-priority property must be set to #f, as otherwise this would take precedence over the avoid-slur property. Changing the fraction 2/3 adjusts the horizontal position.

\relative c'\ {
  \after 2*2/3 \turn c2( d4) r |
  \after 4 \turn c4.( d8)
  \after 4
  { 
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
    \once \hideNotes
cis8\turn \noBeam
  } 
d4.( e8)
}

Creating blank staves

To create blank staves, generate empty measures then remove the Bar_number_engraver from the Score context, and the Time_signature_engraver, Clef_engraver and Bar_engraver from the Staff context.

#(set-global-staff-size 20)

\score {
  
  \repeat unfold 12 { s1 \break }
}

\layout {
  \indent = 0\in
  \context {
    \Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
% uncomment these lines for "letter" size
{%
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##t
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%
%
% uncomment these lines for "A4" size
{%
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##t
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```latex
\relative c' { 
c1-10
c1-50
c1-36
c1-29
}
```

![Diagram of double-digit fingerings]

Default direction of stems on the center line of the staff

The default direction of stems on the center line of the staff is set by the `Stem` property `neutral-direction`.

```latex
\relative c'' { 
a4 b c b
\override Stem.neutral-direction = #up
a4 b c b
\override Stem.neutral-direction = #down
a4 b c b
}
```

![Diagram of default stem directions]

Different font size settings for instrumentName and shortInstrumentName

Choose different font sizes for instrumentName and shortInstrumentName as a context override.

```
InstrumentNameFontSize =
#(define-music-function (font-size-pair)(pair?)
"Sets the @code{font-size} of @code{InstrumentName}.
```

```latex
InstrumentNameFontSize =
```

The font-size for the initial @code{instrumentName} is taken from the first value in @var{font-size-pair}. @code{shortInstrumentName} will get the second value of @var{font-size-pair}.

";; This code could be changed/extended to set different values for each occurrence of `shortInstrumentName'

#\{"
  \override InstrumentName.after-line-breaking =

>>
Drawing boxes around grobs

The print-function can be overridden to draw a box around an arbitrary grob.

\relative c' {
  \override TextScript.stencil = #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
  c4""foo"

  \override Stem.stencil = #(make-stencil-boxer 0.05 0.25 ly:stem::print)
  \override Score.RehearsalMark.stencil =
  #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
  b8

  \revert Stem.stencil
  \revert Flag.stencil
  c4. c4
  \mark \default
  c1
}
Drawing circles around note heads

Here is how to circle a note.

\circle =
\once \override NoteHead.stencil = \(\lambda\ (\text{grob})\)
\(\begin{array}\{l\}
\text{let*} \quad (\text{note (ly:note-head::print grob)})
\quad (\text{combo-stencil (ly:stencil-add note}
\quad \quad (\text{circle-stencil note 0.1 0.8})))))
\quad (\text{ly:make-stencil (ly:stencil-expr combo-stencil)}
\quad \quad (\text{ly:stencil-extent note X})
\quad \quad (\text{ly:stencil-extent note Y})))
\end{array}\)

\{ \circle c'\'' \}

\begin{tikzpicture}
\fill [red, fill opacity=0.2] circle (0.1); \fill [blue, fill opacity=0.2] circle (0.1);
\end{tikzpicture}

Drawing circles around various objects

The \circle markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

\relative c' \{
\set Score.rehearsalMarkFormatter =
\(\lambda\ (\text{mark context})\)
\(\quad (\text{make-circle-markup (format-mark-numbers mark context)})\)
\mark \default
\}

\relative d'' \markup {
\override #'(thickness . 3) \{
\circle \text{finger} 2
\}
\override Score.BarNumber.break-visibility = \text{all-visible}
\override Score.BarNumber.stencil =
\(\lambda\ (\text{make-stencil-circler 0.1 0.25 ly:text-interface::print})\)
\}

\begin{tikzpicture}
\fill [red, fill opacity=0.2] circle (0.1); \fill [blue, fill opacity=0.2] circle (0.1);
\end{tikzpicture}

Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

\begin{tikzpicture}
\fill [red, fill opacity=0.2] circle (0.1); \fill [blue, fill opacity=0.2] circle (0.1);
\end{tikzpicture}
The appearance of grid lines can be changed by overriding some of their properties.

```latex
\score { 
  \new ChoirStaff << 
  \new Staff { 
    \relative c'' {

    c8 c c
  }
}
} >>
\layout {
  \context {\Score
    \consists "Grid_line_span_engraver"
    % center grid lines horizontally below note heads
```
\override NoteColumn.X-offset = #-0.5
}
\context { 
  \Staff 
  \consists "Grid_point_engraver"
  gridInterval = #(ly:make-moment 1/8)
  \% set line length and positioning:
  \% two staff spaces above center line on hidden staff
  \% to four spaces below center line on visible staff
  \override GridPoint.Y-extent = #'(2 . -4)
}
ragged-right = ##t
}

\Hammeron and pull off

Hammer-on and pull-off can be obtained using slurs.
\new TabStaff { 
  \relative c' { 
    d4( e\2)
    a( g)
  }
}

\Hammeron and pull off using chords

When using hammer-on or pull-off with chorded notes, only a single arc is drawn. However
"double arcs" are possible by setting the doubleSlurs property to #t.
\new TabStaff { 
  \relative c’ { 
    \% chord hammer-on and pull-off
    \set doubleSlurs = ##t
    <g’ b>8( <a c> <g b>)
  }
}
Hammer on and pull off using voices

The arc of hammer-on and pull-off is upwards in voices one and three and downwards in voices two and four:

```
\new TabStaff {
  \relative c' {  
    << { \voiceOne g2( a ) } 
    \ \ { \voiceTwo a,( b) } 
    >> \oneVoice  
  }
}
```

Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the line-positions property of the StaffSymbol object.

```
{  
  \override Staff.StaffSymbol.line-positions =  
  #'(-4 -2 -0.2 0 0.2 2 4)  
  d'4 e' f' g'  
}
```

Marking notes of spoken parts with a cross on the stem (Sprechstimme)

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the \speakOn keyword, and end it with the \speakOff keyword.

```
speakOn = {  
  \override Stem.stencil =  
  #(lambda (grob)  
    (let*  
      ((x-parent (ly:grob-parent grob X))  
        (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))  
      (if is-rest?  
        empty-stencil  
        (ly:stencil-combine-at-edge  
          (ly:stem::print grob)  
          Y))
```
Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```latex
\% context Voice = "foo" {
  \% clef bass
  c4 r g r
  c4 r g r
  c4 r g r
  c4 r g r
}
\% context Voice = "foo" {
  \% set countPercentRepeats = ##t
  \% hide PercentRepeat
  \% override PercentRepeatCounter.staff-padding = #1
  \% repeat percent 4 { s1 }
}
```
Measure spanner

Measure spanners are an alternate way to print annotated brackets. As opposed to horizontal brackets, they extend between two bar lines rather than two notes. The text is displayed in the center of the bracket.

\paper { tagline = ##f }
\layout {
  \context {\Staff
    \consists Measure_spanner_engraver
  }
}

<<
\new Staff \relative c' { \key d \minor R1*2 \tweak text "Answer" \startMeasureSpanner \tuplet 3/2 8 { a16[ b c] d[ c b] c[ d e] f[ e d] } e8 a gis g fis f e d- d c b e \stopMeasureSpanner }
\new Staff \relative c' { \key d \minor \tweak text "Subject" \tweak direction #DOWN \startMeasureSpanner \tuplet 3/2 8 { d16[ e f] g[ f e] f[ g a] bes[ a g] } a8 d cis c b bes a g- g f e a \stopMeasureSpanner \tweak text "Counter-subject" \tweak direction #DOWN \startMeasureSpanner f8 e a r r16 b, c d e fis g e a gis a b c fis, b a gis e a4 g8 \stopMeasureSpanner }
>>
Numbering groups of measures

This snippet demonstrates the use of the \Measure_counter_engraver to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a Staff context is used; another possibility is a Dynamics context.

The counter is begun with \startMeasureCount and ended with \stopMeasureCount. Numbering will start by default with 1, but this behavior may be modified by overriding the count-from property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
Positioning fingering indications precisely

Generally the options available for positioning the fingering of chords work well by default, but if one of the indications needs to positioned more precisely the following tweak may be used. This is particularly useful for correcting the positioning when intervals of a second are involved.

```latex
\relative c' {
  \set fingeringsOrientations = #'(down right up)
  <c-d \tweak extra-offset #'(-0.3 . 0)-2 a'-5>4
  \set fingeringsOrientations = #'(up)
  <c-d \tweak extra-offset #'(0 . 1.1)-2 a'-5>4
  <c-d \tweak extra-offset #'(0 . 1)-5>4
}
```
Positioning text markups inside slurs

Text markups need to have the outside-staff-priority property set to false in order to be printed inside slurs.

\relative c' { 
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(\markup { \halign #-10 \natural } d4.) c8
}

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

{ 
  b1-\markup { 
    \line { ingiriumusnocte }
  }
  f'\markup { 
    \override #'(text-direction . -1)
    \line { ingiriumusnocte }
  }
}

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

stringNumberSpanner =
  #(define-music-function (StringNumber) (string?)
    #(
      \override TextSpanner.style = #'solid
      \override TextSpanner.font-size = #-5
      \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
      \override TextSpanner.bound-details.left.text = 
        \markup { \circle \number $StringNumber } 
    )
    )

\relative c { 
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```plaintext
parallelogram = #(ly:make-stencil (list 'embedded-ps
"gsave
  currentpoint translate
  newpath
  0 0.25 moveto
  1.3125 0.75 lineto
  1.3125 -0.25 lineto
  0 -0.75 lineto
  closepath
  fill
  grestore" )
  (cons 0 1.3125)
  (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

\relative c'' { \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d }
```

Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the layer property to control which objects are masked by the white background. In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the
time signature by setting the whiteout property of TimeSignature. To do this TimeSignature
is moved to a layer above Tie, which is left in the default layer of 1, and StaffSymbol is moved
to a layer above TimeSignature so it is not masked.

\begin{music}
\begin{override}
\Score{\StaffSymbol.layer = #4}
\Staff{\TimeSignature.layer = #3}
b'2 b'~
\once \override \Staff{\TimeSignature.whiteout = ##t}
\time 3/4
b' r4
\end{override}
\end{music}

Section “Text” in Notation Reference

Adding a QR code

This snippet lets you draw a QR-code, for example to provide a link to the composer’s, or the music editor’s website. Actually encoding the URL into a QR-code is not done here (this just draws the QR-code from a grid of "black" or "white" values), but see the code for a short Python snippet you can use to avoid having to fill for each small square if it’s black or white.

%% (snippet author: Jean Abou Samra <jean@abou-samra.fr>)

Adding markups in a tablature

By default markups does not show in a tablature.

To make them appear, simply use the command \revert TabStaff.TextScript.stencil

\% http://lsr.di.unimi.it/LSR/Item?id=919
\% by P.P.Schneider on June 2014

high = \{ r4 r8 <g c'> q r8 r4 \}

low = \{ c4 r4 c8 r8 g,8 b, \}

pulse = \{ s8^"1" s^-"2" s^-"3" s^-"4" \}

\score {\new TabStaff {\repeat unfold 2 << high \low \pulse >>}
\layout {\context {\TabStaff

\markup \qr-code \lilypondDotOrg
\markup \vspace #5
\markup \override \{width . 15\} \qr-code \lilypondDotOrg

\ verbatim }
Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))

% use it in the title block:
\header {
  title = "Including the date!"
  subtitle = \date
}

\score {
  \relative c'' {
    c4 c c c
  }
}

% and use it in a \markup block:
\markup {
  \date
}

Including the date!

20-07-2024
Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing = #'(basic-distance .1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa aa }
>>

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the Staff.InstrumentName.self-alignment-X property. The \layout variables indent and short-indent define the space in which the instrument names are aligned before the first and the following systems, respectively.

\paper { left-margin = 3\cm }

\score {
  \new StaffGroup <<

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
      }
    }
shortInstrumentName = "Left"
}

{ c'1 \break c'1 }

\new Staff \with {
\override InstrumentName.self-alignment-X = #CENTER
instrumentName = \markup \center-column {
  Centered
  "instrument name"
}
shortInstrumentName = "Centered"
}

{ g'1 g'1}

\new Staff \with {
\override InstrumentName.self-alignment-X = #RIGHT
instrumentName = \markup \right-column {
  "Right aligned"
  "instrument name"
}
shortInstrumentName = "Right"
}

{ e'1 e'1 }

>>

\layout {
  ragged-right = ##t
  indent = 4\cm
  short-indent = 2\cm
}

Left aligned instrument name

Centered instrument name

Right aligned instrument name
Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

\score { 
  \new Staff { 
    \relative c'' 
    \new Voice = "vocal" { 
      c d- \markup default d e 
      c d- \markup "right aligned" d e 
      c d- \markup "center aligned" d e 
      c d- \markup "reset to default" d e 
    } 
  } 
  \new Lyrics \lyricsto "vocal" { 
    word word word 
    \set lyricMelismaAlignment = #RIGHT 
    word word word 
    \set lyricMelismaAlignment = #CENTER 
    word word word 
    \unset lyricMelismaAlignment 
    word word word 
  } 
} 

Blanking staff lines using the \whiteout command

The \whiteout command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

\layout { 
  \ragged-right = ##f 
} 

\relative c' { 

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```scheme
\paper { tagline = #f }

hairpinWithCenteredText =
#(define-music-function (text) (markup?)
  #{
    \once \override Voice.Hairpin.after-line-breaking =
    #(lambda (grob)
      (let* ((stencil (ly:hairpin::print grob))
        (par-y (ly:grob-parent grob Y))
        (dir (ly:grob-property par-y 'direction))
        (staff-line-thickness
deviation (ly:output-def-lookup (ly:grob-layout grob) 'line-thickness))
        (new-stencil (ly:stencil-aligned-to
deviation (ly:stencil-align-to stencil X CENTER))
          Y dir)
        (ly:stencil-align-to
          grob interchange-markup
device (make-fontsize-markup
device (magnification->font-size
deviation (+ (ly:staff-symbol-staff-space grob)
               (// staff-line-thickness 2)))
                      text)) X CENTER))
        (staff-space (ly:output-def-lookup
device (ly:grob-layout grob) 'staff-space))
        (par-x (ly:grob-parent grob X))
        (dyn-text (grob:has-interface par-x 'dynamic-text-interface))
        (dy-text-stencil-x-length
device (if dyn-text
          (interval-length
            (ly:stencil-extent (ly:grob-property par-x 'stencil) X))
          0))
        (x-shift
```
(if dyn-text
  (-
    (+ staff-space dyn-text-stencil-x-length)
    (* 0.5 staff-line-thickness)) 0)))

(ly:grob-set-property! grob 'Y-offset 0)
(ly:grob-set-property! grob 'stencil
  (ly:stencil-translate-axis
    new-stencil
    x-shift X)))))
#

hairpinMolto = \hairpinWithCenteredText \markup { \italic molto }

hairpinMore = \hairpinWithCenteredText \markup { \larger moltissimo }

\layout { ragged-right = ##f }

\relative c' {
  \hairpinMolto c2< c\f
  \hairpinMore c2\ppppp< c\f
  break
  \hairpinMolto c2^< c\f
  \hairpinMore c2\ppppp< c\f
}

Changing ottava text

Internally, \ottava sets the properties ottavation (for example, to 8va or 8vb) and middleCPosition. To override the text of the bracket, set ottavation after invoking \ottava.

Short text is especially useful when a brief ottava is used.
}
Changing the default text font family

The default font families for text can be overridden with make-pango-font-tree.

\%
You may have to install additional fonts.

    DejaVu Serif: \bold bold
    \italic italic
    \italic \bold { bold italic }
Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a \markup block.

\markup \piuF = \markup { \italic \pi`u \ dynamic f }

\layout { \ragged-right = ##f }

\relative c'' { 
  c2\f c--\piuF
}

Combining two parts on the same staff

The part combiner tool (\partCombine command) allows the combination of several different parts on the same staff. Text directions such as “solo” or “a2” are added by default; to remove them, simply set the property printPartCombineTexts to f.

For vocal scores (hymns), there is no need to add “solo/a2” texts, so they should be switched off. However, it might be better not to use it if there are any solos, as they won’t be indicated. In such cases, standard polyphonic notation may be preferable.

This snippet presents the three ways two parts can be printed on a same staff: standard polyphony, \partCombine without texts, and \partCombine with texts.
musicUp = \relative c'' { 
    \time 4/4
    a4 c4.( g8) a4 |
    g4 e' g,( a8 b) |
    c b a2.
}
musicDown = \relative c'' { 
    g4 e4.( d8) c4 |
    r2 g'4( f8 e) |
    d2 \stemDown a  
}

\score {
    \new Staff \with { instrumentName = "Standard polyphony" }
        \new Staff \with { 
            instrumentName = "PartCombine without text"
            printPartCombineTexts = ##f
        }
    \partCombine \musicUp \musicDown
    \new Staff \with { instrumentName = "PartCombine with text" }
        \partCombine \musicUp \musicDown
}
Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a \markup block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the make-dynamic-script function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as \dynamicUp or \dynamicDown.

\begin{verbatim}
paren = 
  #(define-event-function (dyn) (ly:event?)
    (make-dynamic-script
      #{ \markup \concat
          \normal-text \italic \fontsize #2 (
            \pad-x #0.2 #(ly:music-property dyn 'text)
          \normal-text \italic \fontsize #2 )
      })
    )

\relative c'' {
  c4\paren\f c c \dynamicUp c\paren\p
}
\end{verbatim}

Creating text spanners

The \startTextSpan and \stopTextSpan commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the TextSpanner object to modify its output.

\begin{verbatim}
\paper { ragged-right = ##f }

\relative c'' {
  \override TextSpanner.bound-details.left.text = "bla"
  \override TextSpanner.bound-details.right.text = "blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'dashed-line
  \override TextSpanner.bound-details.left.text = \markup { \draw-line #'(0 . 1) }
}
\end{verbatim}
\override TextSpanner.bound-details.right.text = 
\markup { \draw-line #'(0 . -2) }
\once \override TextSpanner.bound-details.right.padding = #-2

\relative c'' { \startTextSpan 
  d' \stopTextSpan 
}

\set Staff.middleCPosition = #-13
\override TextSpanner.dash-period = #10
\override TextSpanner.dash-fraction = #0.5
\override TextSpanner.thickness = #10
\relative c'' { \startTextSpan 
  d' \stopTextSpan 
}

Demonstrating all headers

All header fields with special meanings.

\header {
  \copyright  = "copyright"
  \title = "title"
  \subtitle = "subtitle"
  \composer = "composer"
  \arranger = "arranger"
  \instrument = "instrument"
  \meter = "meter"
  \opus = "opus"
  \piece = "piece"
  \poet = "poet"
  \texidoc = "All header fields with special meanings."
  \copyright = "public domain"
  \enteredby = "jcn"
  \source = "urtext"
}

\layout {
  \ragged-right = ##f
}

\score {
  \relative c'' { c1 | c | c | c }
}

\score {
  \relative c'' { c1 | c | c | c }
}
Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

% PostScript is a registered trademark of Adobe Systems Inc.

\relative c' { 
a4-\markup { \postscript "3 4 moveto 5 3 rlineto stroke" }
-a\markup { \postscript "[ 0 1 ] 0 setdash 3 5 moveto 5 -3 rlineto stroke " }

b4-\markup { \postscript "3 4 moveto 0 0 1 2 8 4 20 3.5 rcurveto stroke" }
s2
a'1
}
Formatting lyrics syllables

Markup mode may be used to format individual syllables in lyrics.

```latex
mel = \relative c' \{ c4 c c c \}
lyr = \lyricmode {
  Lyrics \markup { \italic can } \markup { \with-color \red contain } \markup { \fontsize #8 \bold Markup! }
}
```

```
\new Voice = melody \mel
\new Lyrics \lyricsto melody \lyr
```

Lyrics can contain Markup!

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```latex
\lyrics {
  wa~o~a
}
```

wa_o_a

Lyrics alignment

Horizontal alignment for lyrics can be set by overriding the self-alignment-X property of the LyricText object. #1 is left, #0 is center and #1 is right; however, you can use #LEFT, #CENTER and #RIGHT as well.

```latex
\layout { \ragged-right = ##f }
\relative c' \{ 
  c1 
  c1 
  c1
}
```

```latex
\addlyrics {
  \once \override LyricText.self-alignment-X = #LEFT
  "This is left-aligned"
  \once \override LyricText.self-alignment-X = #CENTER
  "This is centered"
  \once \override LyricText.self-alignment-X = #1
  "This is right-aligned"
}
```

This is left-aligned This is centered This is right-aligned
Markup list

Text that can spread over pages is entered with the `\markuplist` command.

Il y avait en Westphalie, dans le château de M. le baron de Thunder-ten-tronckh, un jeune garçon à qui la nature avait donné les mœurs les plus douces. Sa physionomie annonçait son âme. Il avait le jugement
assez droit, avec l’esprit le plus simple ; c’est, je crois,
pour cette raison qu’on le nommait Candide. Les
anciens domestiques de la maison soupçonnaient qu’il
était fils de la sœur de monsieur le baron et d’un bon et
honnête gentilhomme du voisinage, que cette
demoiselle ne voulut jamais épouser parce qu’il n’avait
pu prouver que soixante et onze quartiers, et que le
reste de son arbre généalogique avait été perdu par
l’injure du temps.

Monsieur le baron était un des plus puissants
seigneurs de la Westphalie, car son château avait une
porte et des fenêtres. Sa grande salle même était ornée
d’une tapisserie. Tous les chiens de ses basses-cours
composaient une meute dans le besoin; ses
palefreniers étaient ses piqueurs; le vicaire du village
était son grand-aumônier. Ils l’appelaient tous
monseigneur, et ils riaient quand il faisait des contes.
Multi-measure rest markup

Markups attached to a multi-measure rest will be centered above or below it. Long markups
attached to multi-measure rests do not cause the measure to expand. To expand a multi-measure
rest to fit the markup, use an empty chord with an attached markup before the multi-measure
rest. Text attached to a spacer rest in this way is left-aligned to the position where the note
would be placed in the measure, but if the measure length is determined by the length of the
text, the text will appear to be centered.

\relative c' {
  \compressMME rests {

    R1*30\\markup { [MABEL] }
    \textLengthOff 
    c4\\markup { CHORUS } d f c
  }
}

Of the ubiquity of markup objects

Text objects are entered either as simple strings between double quotes or as \markup blocks
that can accept a variety of advanced text formatting and graphical enhancements.

As such, markup blocks may be used:
- in any TextScript object (attached to notes with -, ~ or _),
- any TextMark introduced with the \textMark and \textEndMark command, or other similar
   objects such as MetronomeMark introduced with \tempo,
- as standalone markup blocks, entered at the top level outside of any \score block,
- in any definition inside the \header block (e.g. title, subtitle, composer) or in some variables
  defined inside the \paper block such as evenHeaderMarkup for page numbers.

\markup may additionally be used for lyrics, in chord names, and as dynamics. In fact, it is
possible to use \markup to customize the appearance of virtually any object, as demonstrated
in this example using various methods.

\end{center}

\subsection*{Outputting the version number}

It is possible to print the version number of LilyPond in markup.

\verbatiminput{version-number-lilypond}

Processed with LilyPond version 2.24.4

\subsection*{Piano template with centered lyrics}

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

\verbatiminput{piano-template-lilypond}

\verbatiminput{lyrics-lilypond}

\verbatiminput{upper-lilypond}
\clef treble
\key c \major
\time 4/4
a4 b c d
}

lower = \relative c {
\clef bass
\key c \major
\time 4/4
a2 c
}

text = \lyricmode {
Aaa Bee Cee Dee
}

\score {
\new PianoStaff <<
\new Staff = upper { \new Voice = "singer" \upper }
\new Lyrics \lyricsto "singer" \text
\new Staff = lower { \lower }
>>
\layout { }
\midi { }
}

Printing bar numbers with changing regular intervals

Using the set-bar-number-visibility context function, bar number intervals can be changed.
\relative c' {
\override Score.BarNumber.break-visibility = #end-of-line-invisible
\context Score \applyContext #(set-bar-number-visibility 4)
\repeat unfold 10 c'1
\context Score \applyContext #(set-bar-number-visibility 2)
\repeat unfold 10 c
}
Printing marks on every staff

Although marks are normally only printed above the topmost staff, they may also be printed on every staff.

\score {
<<
\new Staff { \mark \default c''1 \textMark "molto" c' }
\new Staff { \mark \default c'1 \textMark "molto" c' }
>>
\layout {
\context {
\Score
\remove \Mark_engraver
\remove \Text_mark_engraver
\remove \Staff_collecting_engraver
}
\context {
\Staff
\consists \Mark_engraver
\consists \Text_mark_engraver
\consists \Staff_collecting_engraver
}
}
}

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

{ 
b1\markup {
  \line { ing i r u m i m u s n o c t e }
} 
f'\markup {
  \override #'(text-direction . -1)
  \line { ing i r u m i m u s n o c t e }
} 
}
Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with \
\texttt{\override LyricText-extra-offset = #'(0 . 8.6)} and there are similar commands to move \
the extenders and hyphens. The offset needed is established with trial and error.

\begin{verbatim}
<< \new Staff <<
   \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\end{verbatim}

\begin{verbatim}
\new Lyrics \with {
   \override LyricText-extra-offset = #'(0 . 8.6)
   \override LyricExtender-extra-offset = #'(0 . 8.6)
   \override LyricHyphen-extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la _ _ _ la }
\end{verbatim}

Stand-alone two-column markup

Stand-alone text may be arranged in several columns using \texttt{\markup} commands:

\begin{verbatim}
\markup { 
   \fill-line { 
      \hspace #1
      \column { 
         \line { O sacrum convivium }
         \line { in quo Christus sumitur, } 
         \line { recolitur memoria passionis ejus, } 
         \line { mens impletur gratia, } 
         \line { futurae gloriae nobis pignus datur. } 
         \line { Amen. }
      }
      \hspace #2
      \column \italic { 
         \line { O sacred feast }
         \line { in which Christ is received, } 
         \line { the memory of His Passion is renewed, } 
         \line { the mind is filled with grace, } 
         \line { and a pledge of future glory is given to us. } 
         \line { Amen. }
      }
      \hspace #1
   }
}
\end{verbatim}
O sacrum convivium in quo Christus sumitur, recolitur memoria passionis ejus, mens impletur gratia, futurae gloriae nobis pignus datur. Amen.

O sacred feast in which Christ is received, the memory of His Passion is renewed, the mind is filled with grace, and a pledge of future glory is given to us. Amen.

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

\relative c {
    \clef "treble_8"
    \stringNumberSpanner "5"
    \textSpannerDown
    a8\startTextSpan
    b c d e f\stopTextSpan
    \stringNumberSpanner "4"
    g\startTextSpan
    bes4 a g2\stopTextSpan
}

Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";;" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
    "Add a box around STENCIL, producing a new stencil."
    (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
           (y-ext (interval-widen (ly:stencil-extent stencil Y) padding)))
      ... )
)
(y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
(x-rule (make-filled-box-stencil
          (interval-widen x-ext thickness) (cons 0 thickness))))
;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
(set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
(set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
(set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
  @code{box-padding} and @code{font-size} properties to determine line
  thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding))
        (m (interpret-markup layout props arg)))
    (NWS-box-stencil m thickness pad)))

% Test it:
\relative c' {
  c1\markup { \NWS-box ABCD }
  c1\markup { \NWS-box \note {4} #1.0 }
}

\clef ledger
\time 4
\noteheads.s0
\noteheads.s2

\markup { \NWS-box ABCD }

UTF-8

Various scripts may be used for texts (like titles and lyrics) by entering them in UTF-8 encoding,
and using a Pango based backend. Depending on the fonts installed, this fragment will render
Bulgarian (Cyrillic), Hebrew, Japanese and Portuguese.

    }
Volta text markup using repeatCommands

Though volte are best specified using \repeat volta, the context property repeatCommands must be used in cases where the volta text needs more advanced formatting with \markup.

Since repeatCommands takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax #\(\text{(list (list 'volta textIdentifier))}\). Start- and end-repeat commands can be added as separate list elements:

\voltaAdLib = \markup { 1. 2. 3... \text \italic { ad lib. } }

\relative c' { 
  c1 \set Score.repeatCommands = #\(\text{(list (list 'volta \voltaAdLib) 'start-repeat)}\)
  c4 b d e \set Score.repeatCommands = #'((volta #f) (volta "4.")) end-repeat)
  f1 \set Score.repeatCommands = #'((volta #f))
Vocal music

Section “Vocal music” in Notation Reference

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Adding indicators to staves which get split after a break

This snippet defines the \splitStaffBarLine, convUpStaffBarLine and convDownStaffBarLine commands. These add arrows at a bar line, to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

```
#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?)
  (let* ()
    (PI-OVER-180 (/ (atan 1 1) 34))
    (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
    (angle-rad (degrees->radians angle-deg))
    (target-x (* length (cos angle-rad)))
    (target-y (* length (sin angle-rad))))
  (interpret-markup layout props
    (markup
      #:translate (cons (/ target-x 2) (/ target-y 2))
      #:rotate angle-deg
      #:translate (cons (/ length -2) 0)
      #:concat (#:draw-line (cons length 0)
        #:arrow-head X RIGHT fill))))
```
\begin{verbatim}

Adding orchestral cues to a vocal score

This shows one approach to simplify adding many orchestral cues to the piano reduction in a vocal score. The music function \cueWhile takes four arguments: the music from which the cue is to be taken, as defined by \addQuote, the name to be inserted before the cue notes, then either #UP or #DOWN to specify either \voiceOne with the name above the staff or \voiceTwo with the name below the staff, and finally the piano music in parallel with which the cue notes are to appear. The name of the cued instrument is positioned to the left of the cued notes. Many passages can be cued, but they cannot overlap each other in time.

\cueWhile =
#(define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
  #{
    \cueDuring $instrument #dir {
      \once \override TextScript.self-alignment-X = #RIGHT
      \once \override TextScript.direction = $dir
  }
Vocal music

\markup \tiny \name
$music$

  >>
}
Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:
<<
new Staff \new Voice = melody \relative c' {
  c4 d e f
  g4 f e d
  c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }
\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing = '#'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the lyricMelismaAlignment property.
\score {

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. AmbitusNoteHead grobs also have ledger lines.

LaTeX code:

```latex
<<
\new Staff {
  \relative c' {
    \new Voice = "vocal" {
      c d-\markup default d e
c d-\markup "right aligned" d e
c d-\markup "center aligned" d e
c d-\markup "reset to default" d e
    }
  }
}\new Lyrics \lyricsto "vocal" {
  word word word\set lyricMelismaAlignment = #RIGHT
  word word word\set lyricMelismaAlignment = #CENTER
  word word word\unset lyricMelismaAlignment
}
>>
```

LaTeX code explanation:

- \new Staff \relative c' defines a staff with a relative clef at C'.
- \new Voice = "vocal" defines a voice named "vocal".
- \c d-\markup default d e creates a slur from C to D.
- \c d-\markup "right aligned" d e creates a slur from C to D with right alignment.
- \c d-\markup "center aligned" d e creates a slur from C to D with center alignment.
- \c d-\markup "reset to default" d e resets the slur style to default.
- \new Lyrics \lyricsto "vocal" sets lyrics for the "vocal" voice.
- \set lyricMelismaAlignment = #RIGHT sets the alignment of melismas to right.
- \set lyricMelismaAlignment = #CENTER sets the alignment of melismas to center.
- \unset lyricMelismaAlignment resets the alignment of melismas to default.

LaTeX code output:

![Ambitus example](image)

LaTeX code:

```latex
<<
\new Staff {\relative c' { \time 2/4 c4 f' }}
\new Staff {\relative c' { \time 2/4 \key d \major cis4 as' }}
>>
```
Ambitus after key signature

By default, ambitus are positioned at the left of the clef. The \ambitusAfter function allows for changing this placement. Syntax is \ambitusAfter grob-interface (see Graphical Object Interfaces (http://lilypond.org/doc/v2.22/Documentation/internals/graphical-object-interfaces) for a list of possible values for grob-interface.)

A common use case is printing the ambitus between key signature and time signature.

\new Staff \with { 
  \consists Ambitus_engraver
} \relative { 
  \ambitusAfter key-signature 
  \key d \major 
  e8' g bes cis d2 
}

Ambitus with multiple voices

Adding the Ambitus_engraver to the Staff context creates a single ambitus per staff, even in the case of staves with multiple voices.

\new Staff \with { 
  \consists "Ambitus_engraver"
} 
<< 
\new Voice \relative c' \{ 
  \voiceOne 
  c4 a d e 
  f1 
} 
\new Voice \relative c' \{ 
  \voiceTwo 
  e8 f g as 
  b1 
} 
>>
Ancient notation template – modern transcription of gregorian music

This example demonstrates how to do modern transcription of Gregorian music. Gregorian music has no measure, no stems; it uses only half and quarter note heads, and special marks, indicating rests of different length.

```verbatim
\include "gregorian.ly"

chant = \relative c' { 
  \set Score.timing = ##f 
  f4 a2 \divisioMinima 
  g4 b a2 f2 \divisioMaior 
  g4( f) f( g) a2 \finalis 
}

verba = \lyricmode { 
  Lo -- rem ip -- sum do -- lor sit a -- met 
}

\score { 
  \new GregorianTranscriptionStaff << 
  \new GregorianTranscriptionVoice = "melody" \chant 
  \new GregorianTranscriptionLyrics = "one" \lyricsto melody \verba 
  >> 
}

8. Today if ye will hear his voice *

harden not your hearts: as in the provocation * and as in the day of temptation in the wilderness.

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```
\layout {
  \context {
    \Lyrics
      \override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f
  }
}

aliceSings = \markup { \smallCaps "Alice" }

eveSings = \markup { \smallCaps "Eve" }

<<
  \new Staff <<
  \new Voice = "alice" {
    f'4\aliceSings g' r2 |
    s1 |
    f'4\aliceSings g' r2 |
    s1 | \break
    % ...

  \voiceOne
  s2 a'8\aliceSings a' b'4 |
  \oneVoice
  g'1
}
  \new Voice = "eve" {
    s1 |
```
Changing stanza fonts

Fonts can be changed independently for each stanza, including the font used for printing the stanza number.

%{
You may have to install additional fonts.

Red Hat Fedora

dejavu-fonts-all

Debian GNU/Linux, Ubuntu

fonts-dejavu-core
fonts-dejavu-extra
Chant or psalms notation

This form of notation is used for Psalm chant, where verses aren’t always the same length.

\stemOff = \hide Staff.Stem
\stemOn = \undo \stemOff

\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn

    \stemOn a'2 \section
    \stemOff a'\breve g'4 a'4
    \stemOn f'2 \section
    \stemOff a'\breve \markup { \italic flexe } \markup { \italic flexe }
    \stemOn g'2 \fine
  }
}
Forcing hyphens to be shown

If LilyPond does not think there is space for a hyphen, it will be omitted. The behaviour can be overridden with the minimum-distance property of LyricHyphen.

\relative c'' {
  c32 c c c
  c32 c c c
  c32 c c c
  c32 c c c
}
\addlyrics {

  syl -- lab word word
  \override LyricHyphen.minimum-distance = #2.0
  syl -- lab word word
  \revert LyricHyphen.minimum-distance
  syl -- lab word word
}

Formatting lyrics syllables

Markup mode may be used to format individual syllables in lyrics.

mel = \relative c'' { c4 c c c }
lyr = \lyricsmode {
  Lyrics \markup { \italic can } \markup { \with-color #red contain }
  \markup { \fontsize #8 \bold Markup! }
}

<<<<
\new Voice = melody \mel
\new Lyrics \lyricsto melody \lyr
>>>>

Lyrics can contain \textbf{Markup}!

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

\lyrics {
  wa~o~a
}
Hymn template

This code shows one way of setting out a hymn tune when each line starts and ends with a partial measure. It also shows how to add the verses as stand-alone text under the music.

} \% End paper block
This is line one of the first verse
This is line two of the same
And here’s line three of the first verse
And the last line of the same

**Lyrics alignment**

Horizontal alignment for lyrics can be set by overriding the `self-alignment-X` property of the `LyricText` object. #~1 is left, #0 is center and #1 is right; however, you can use #LEFT, #CENTER and #RIGHT as well.

```
layout { ragged-right = ##f }
relative c'' {
    c1
    c1
}
```

```
\addlyrics {
    \once \override LyricText.self-alignment-X = #LEFT
    "This is left-aligned"
    \once \override LyricText.self-alignment-X = #CENTER
    "This is centered"
    \once \override LyricText.self-alignment-X = #1
    "This is right-aligned"
}
```

This is left-aligned This is centered This is right-aligned

**Marking notes of spoken parts with a cross on the stem**

(Sprechstimme)

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the `\speakOn` keyword, and end it with the `\speakOff` keyword.

```
speakOn = {
```
\override Stem.stencil =
#(lambda (grobal)
    (let* ((x-parent (ly:grob-parent grobal x))
        (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
      (if is-rest?
          empty-stencil
          (ly:stencil-combine-at-edge
           (ly:stem::print grobal)
           Y
           (~ (ly:grob-property grobal 'direction))
           (grob-interpret-markup grobal
            (markup #:center-align #:fontsize -4
                #:musicglyph "noteheads.s2cross")
            -2.3)))))
}
speakOff = {
    \revert Stem.stencil
    \revert Flag.stencil
}

\score {
    \new Staff {
        \relative c'' {

Obtaining 2.12 lyrics spacing in newer versions

The vertical spacing engine changed since version 2.14. This can cause lyrics to be spaced differently.

It is possible to set properties for Lyric and Staff contexts to get the spacing engine to behave as it did in version 2.12.

Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

\[
\text{melody} = \text{\relative c''} \\
\text{\clef \treble} \\
\text{\key c \major} \\
\text{\time 4/4} \\
\text{a b c d}
\]

\[
\text{text} = \text{\lyricmode} \\
\text{Aaa Bee Cee Dee}
\]

\[
\text{upper} = \text{\relative c''} \\
\]
\clef treble
\key c \major
\time 4/4
\note a4 b c d
}

lower = \relative c { \clef bass \key c \major \time 4/4 \note a2 c }
}

\score { << \new Voice = "mel" \autoBeamOff \melody \\
\new Lyrics \lyricsto mel \text \new PianoStaff << \new Staff = "upper" \upper \new Staff = "lower" \lower >> >> \context { \Staff \RemoveEmptyStaves }
} \midi { }

\score { << \new Voice = "mel" \autoBeamOff \melody \\
\new Lyrics \lyricsto mel \text \new PianoStaff << \new Staff = "upper" \upper \new Staff = "lower" \lower >> >> \context { \Staff \RemoveEmptyStaves }
}
\midi { }

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with \override LyricText.extra-offset = #'(0 . dy) and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

<< \new Staff << \new Voice = "voc" \relative c' \stemDown \note a bes c8 b c4 }
>> \new Lyrics \with {
\override LyricText.extra-offset = #'(0 . 8.6)

  \global
  \bassnotes
>>
\new Lyrics \lyricsto "bass" \basswords
>>
>>
}
```

```
\relative c' {
  \clef treble
  \key c \major
  \time 4/4
  a4 b c d
}
```

```
\lyricmode {
  Aaa Bee Cee Dee
}
```
Single staff template with notes, lyrics, chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

verseI = \lyricmode {
  \set stanza = "1."
  This is the first verse
}

verseII = \lyricmode {
  \set stanza = "2."
  This is the second verse.
}

theChords = \chordmode {
  \% insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {
  \key c \major
  \clef treble
  \% Type notes for melody here
  c4 d8 e f4 g
  \bar "|."
}

\score {
  \context ChordNames { \theChords }
}
\context FretBoards { \theChords }
\new Staff {
  \context Voice = "voiceMelody" { \staffMelody }
}
\new Lyrics = "lyricsI" {
  \lyricsto "voiceMelody" \verseI
}
\new Lyrics = "lyricsII" {
  \lyricsto "voiceMelody" \verseII
}

1. This is the first verse
2. This is the second verse.

Single staff template with notes and lyrics

This small template demonstrates a simple melody with lyrics. Cut and paste, add notes, then words for the lyrics. This example turns off automatic beaming, which is common for vocal parts. To use automatic beaming, change or comment out the relevant line.

\text = \lyricmode {
  Aaa Bee Cee Dee
}

\score{<<
  \new Voice = "one" {
    \autoBeamOff
    \melody
  }
  \new Lyrics \lyricsto "one" \text
  >>
}

Skips in lyric mode

The \s syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the \skip command is recommended.

\<<
  \relative c' \{ a1 | a \}
  \new Lyrics \lyricmode \{ \skip 1 bla1 \}
\>>

Skips in lyric mode (2)

Although \s skips cannot be used in \lyricmode (it is taken to be a literal “s”, not a space), double quotes (") or underscores (_) are available.

So for example:

\<<
  \relative c' \{ a4 b c d \}
  \new Lyrics \lyricmode \{ a4 "" _ gap \}
\>>

Using arpeggioBracket to make divisi more visible

The \arpeggioBracket can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.

\include "english.ly"

\score {
  \relative c' \{
    \key a \major
    \time 2/2
    \new Voice = "upper"
    \arpeggioBracket
      a2( b2
      <b d>1\arpeggio)
      <cs e>\arpeggio ~
  \}
}
Using tags to produce mensural and modern music from the same source

Using tags, it is possible to produce both mensural and modern notation from the same music. In this snippet, a function `menrest` is introduced, allowing mensural rests to be pitched as in the original, but with modern rests in the standard staff position. Tags can also be used where other differences are needed: for example using “whole measure rests” (R1, R\breve{}, etc.) in modern music, but normal rests (r1, r\breve{}, etc.) in the mensural version. Converting mensural music to its modern equivalent is usually referred to as “transcription”.

```lily
menrest = #(define-music-function (note)
 (ly:music?)
#{
  \tag #'mens $(make-music 'RestEvent note)
  \tag #'mod $(make-music 'RestEvent note 'pitch '())
}"
```

```lily
MenStyle = {
  \autoBeamOff

Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties alignBelowContext and alignAboveContext to control the positioning of lyrics and ossias.

\paper {
Vertically centered common lyrics

In a vocal piece where there are several (two, four or more) lines of lyrics and common lyrics for all voices at some point, the common lyrics may be made to appear vertically centered, as shown in the following example:

```
dropLyrics = {
\override LyricText.extra-offset = #'(0 . -4.5)
\override LyricHyphen.extra-offset = #'(0 . -4.5)
\override LyricExtender.extra-offset = #'(0 . -4.5)
\override StanzaNumber.extra-offset = #'(0 . -4.5)
```
Vocal music

\raiseLyrics = {
    \revert LyricText.extra-offset
    \revert LyricHyphen.extra-offset
    \revert LyricExtender.extra-offset
    \revert StanzaNumber.extra-offset
}

\skipFour = \repeat unfold 4 { \skip 8 }

\lyricsA = \lyricmode{
    The first verse has
    \dropLyrics
    \set stanza = ": All:
    the com--mon-- words
    \raiseLyrics
    used in all four.
}

\lyricsB = \lyricmode{
    In stanza two, \skipFour also appear.
}

\lyricsC = \lyricmode{
    By the third verse, \skipFour are getting dull.
}

\lyricsD = \lyricmode{
    Last stanza, and \skipFour get used once more.
}

\melody = \relative c' {
    c4 d e f |
    g f e8( e f) d |
    c4 e d c |
}

\score {
    \new Voice = m \melody

}

The first verse has
In stanza two, All: the common words
By the third verse, All: the common words
Last stanza, and get used once more.

get used in all four.

al-so ap-pear.
are get-ting dull.
Vocal ensemble template

Here is a standard four-part SATB vocal score. With larger ensembles, it is often useful to include a section which is included in all parts. For example, the time signature and key signature are almost always the same for all parts. Like in the “Hymn” template, the four voices are regrouped on only two staves.

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in “Vocal ensemble template”. This demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, tenorMusic), then the changes will also apply to the piano reduction.

Vocal ensemble template with verse and refrain

This template creates a score which starts with a solo verse and continues into a refrain for two voices. It also demonstrates the use of spacer rests within the `\global` variable to define meter changes (and other elements common to all parts) throughout the entire score.

```latex
\global = {
  \key g \major

  % verse
  \time 3/4
  s2.*2
  \break

  % refrain
  \time 2/4
  s2*2
  \bar "\|
}

SoloNotes = \relative g' {
  \clef "treble"

  % verse
  g^4 g g | g^4 g g |

  % refrain
```

dum dum dum dum
Section “Chord notation” in Notation Reference

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the BassFigureAlignmentPositioning.direction property (exclusively in a Staff context). Choices are #UP (or #1), #CENTER (or #0) and #DOWN (or #-1).

This property can be changed as many times as you wish. Use \once \override if you don’t want the override to apply to the whole score.

```
bass = {
    \clef bass
    g4 b, c d
e d8 c d2
}
```

contiuno = \figuremode {
    <,>4 <6>/4 <5>/4
    \override Staff.BassFigureAlignmentPositioning.direction = #UP
    \%\bassFigureStaffAlignmentUp
    < _+ >4 <6>
    \set Staff.useBassFigureExtenders = ##t
    \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
    \%\bassFigureStaffAlignmentDown
    <4>/4. <4>/8 < _+>4
}

```
\score {
    <<
        \new Staff = bassStaff \bass
        \context Staff = bassStaff \continuo
    >>
}
```

Adding bar lines to ChordNames context

To add bar line indications in the ChordNames context, add the Bar_engraver.

```
\new ChordNames \with {
    \override BarLine.bar-extent = #'(-2 . 2)
    \consists "Bar_engraver"
}
\chordmode {
    f1:maj7 f:7 bes:7
}
```
F♭ | F⁷ | B♭⁷

Adjusting figured bass alteration glyphs

In figured bass, specially designed glyphs for 6\, 7\, and 9\ are used by default. Similarly, specially designed glyphs for symbols 2\+, 4\+, and 5\+ are used by default if plus signs appear after the number.

To change that, pass an alist to figuredBassPlusStrokedAlist and set the glyph in question to #f (or omit it).

\figures {
  \set figuredBassPlusDirection = #RIGHT
  <6\> <7\> <9\> r
  <2\+> <4\+> <5\+> r

  \set figuredBassPlusStrokedAlist =
    #''((2 . "figbass.twoplus")
      ;; (4 . "figbass.fourplus")
      ;; (5 . "figbass.fiveplus")
      (6 . "figbass.sixstroked")
      ;; (7 . "figbass.sevenstroked")
      ;; (9 . "figbass.ninestroked")
    )
  <6\> <7\> <9\> r
  <2\+> <4\+> <5\+> r
}

C⁷sus4  C⁷|sus4

Changing the chord names to German or semi-German notation

The english naming of chords (default) can be changed to german (\germanChords replaces B and Bes with H and B) or semi-german (\semiGermanChords replaces B and Bes with H and Bb).

\chordmode {
  cl/c | cis/cis
  bl/b | bis/bis | bes/bes
}
Changing the positions of figured bass alterations

Accidental and plus signs can appear before or after the numbers, depending on the figuredBassAlterationDirection and figuredBassPlusDirection properties.

If plus signs appear after the number, specially designed glyphs are provided for some figures.
Chord name exceptions

The property chordNameExceptions can be used to store a list of special notations for specific chords.

\% modify maj9 and 6(add9)
\% Exception music is chords with markups
chExceptionMusic = {
  <c e g b d'>1\markup { \super "maj9" }
  <c e g a d'>1\markup { \super "6(add9)" }
}

\% Convert music to list and prepend to existing exceptions.
chExceptions = #(append
  (sequential-music-to-chord-exceptions chExceptionMusic #t)
  ignatzekExceptions)

theMusic = \chordmode {
  g1:maj9 g1:6.9
  \set chordNameExceptions = #chExceptions
  g1:maj9 g1:6.9
}

\layout {
  \ragged-right = ##t
}

  \new Voice \theMusic
>>

chord name major7

The layout of the major 7 can be tuned with majorSevenSymbol.
Chord names alternative

Chord names are generated from a list of pitches. The functions which construct these names can be customised.

Here are shown chords following Ignatzek (pp. 17-18, 1995), used by default since LilyPond 1.7.20, compared with an alternative Jazz chord notation and Harald Banter’s (1987) notation. A smaller font is used in the latter case, as these tend to be overly verbose.

This mirrors the mechanism originally used in early LilyPond versions (pre-1.7); not having been properly maintained, however, some features have been lost (mainly chord exception lists) and bugs have been introduced.

```
\chords {
  c:7+
  \set majorSevenSymbol = \markup { j7 }
  c:7+
}

C\^\, C^j7
```

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context-property maximumFretStretch is set to 4, though. Resulting in a warning about "No string for pitch ..." and the note is omitted. You may set maximumFretStretch to an appropriate value or explicitly assign string-numbers to all notes of a chord.

```lilypond
%% The code below will print two warnings, which may be omitted by uncommenting:
%#(for-each (lambda (x) (ly:expect-warning "No string for pitch")) (iota 2))

mus = {
    "c' bes'",
    "c'\2 bes'",
    \set maximumFretStretch = 5
    "c' bes'",
    "c'\2 bes'\1"
}

<<
\new FretBoards \mus
\new TabVoice \mus
>>
```

Clustering

Clusters are a device to denote that a complete range of notes is to be played.

```lilypond
fragment = \relative c' {  
c4 f <e d'>4  
<g a>8 <e a> a4 c2 <d b>4  
e2 c  
}

<<
\new Staff \fragment
\new Staff \makeClusters \fragment
>>```
Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, it must be used within a chord construct <>, even for single notes. Orientation for string numbers and right-hand fingerings may be set in a similar way.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set stringNumberOrientations = #'(up left down)
  <\f\3 a\2 c\1>1
  \set strokeFingerOrientations = #'(down right up)
  <c\rightHandFinger #1 e\rightHandFinger #2 c'\rightHandFinger #4 >
}
```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn’t detect collisions between staves using \override Staff.Beam.collision-voice-only = ##t

```
\new PianoStaff <<
  \new Staff = up
  \relative c' {
    <<
      { r4
        \override Stem.cross-staff = ##t
    }
  }
```
Customizing the chord grid style

Custom divisions of chord squares can be defined through the measure-division-lines-alist and measure-division-chord-placement-alist properties of ChordSquare. These are both alists. Their keys are measure divisions, namely lists which give the fraction of the measure that each chord (or rest, or skip) represents. More precisely, a measure division alist is made of positive, exact numbers adding up to 1, for example: '(1/2 1/4 1/4). The exactness requirement means that, e.g., 1/2 is valid but not 0.5.

The values in measure-division-lines-alist are lists of lines, which are represented as (x1 y1 x2 y2). The line starts at the point (x1 . y1) and ends at (x2 . y2). Coordinates are expressed in the [-1, 1] scale relative to the extent of the square.

The values in measure-division-chord-placement-alist are lists of (x . y) pairs giving the placement of the respective chords.

This example defines a peculiar chord grid style that has a rule for measures divided in three equal parts.

\paper {
  line-width = 10\cm
  ragged-right = ##f
}

\new ChordGrid \with {
  \override ChordSquare.measure-division-lines-alist =

Customizing the no-chord symbol

By default, rests in a ChordNames context cause the “N.C.” symbol to be printed. This markup can be customized.

<<
\chords {
  R1
  \set noChordSymbol = "---"
  R1
  \set noChordSymbol = \markup \italic "Ssh!"
  R1
} {
  R1*3
}>>

\chordimage

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

\begin{verbatim}
\fixA = {
  \once \override Stem.length = #11
}\end{verbatim}

\begin{verbatim}
\fixB = {
  \once \override NoteHead.X-offset = #1.7
  \once \override Stem.length = #7
  \once \override Stem.rotation = #'(45 0 0)
  \once \override Stem.extra-offset = #'(-0.1 . -0.2)
}\end{verbatim}

\once \override Flag.style = #'no-flag
\once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
  << { \fixA \d>8 } \ \ { \voiceThree \fixB \dis } >> \\
}

\relative c' {
  \new Staff \relative c'' { c1 c1 } \\
  \new FiguredBass \bassfigures
}

\relative c' {
  << { \fixA <b d>8 } \ \ { \voiceThree \fixB \dis } >> \\
}

\relative c' {
  \new Staff \relative c'' { c1 c1 } \\
  \new FiguredBass \bassfigures
}

---

Manually break figured bass extenders for only some numbers

Figured bass often uses extenders to indicate continuation of the corresponding step. However, in this case LilyPond is in greedy-mode and uses extenders whenever possible. To break individual extenders, one can simply use a modifier \! to a number, which breaks any extender attributed to that number right before the number.

\bassfigures = \figuremode {
  \set useBassFigureExtenders = ##t
  \<6 4>4 \<6 4>! > <6 4>! | <6>! <4>! > <6 4>! > <6 4>
}

\relative c' {
  \new Staff \relative c'' { c1 c1 } \\
  \new FiguredBass \bassfigures
}

---

Print ChordNames with same root and different bass as slash and bass-note

To print subsequent ChordNames only differing in its bass note as slash and bass note use the here defined engraver. The behaviour may be controlled in detail by the chordChanges context property.

#(\define Bass_changes_equal_root_ engraver
  (lambda (ctx)

Accordion-discant symbols

This snippet has been obsoleted by predefined markup commands, see 'Discant symbols' in the Notation Reference. It’s still useful as a simple demonstration of how to combine symbols: the placement of the symbols added with \markup can be tweaked by changing the \translate-scaled arguments. \translate-scaled is used here rather than \translate in order to let the positioning of the symbol parts adapt to changes of font-size.

\layout { ragged-right = ##t }

% 16 voets register  
\accBasson = ~\markup {  
   \combine  
   \discant  
   \translate-scaled #'(0 . 0.5) \dot

    r8 s32 f' [ bes f] s e[ a e] s d[ g d] s16 e32[ a]    
      <<    
        { r16 <f bes> r <e a> r <d g> }    
      \   
      { d r a r bes r}    
    >> |    
    <cis e a>1    
  }

\new Staff \relative {  
```
## Keyboards

The treble clef with a staff and notes:

\[ \text{\textbackslash clef treble} \]
\[ \text{\textbackslash freeBass "1"} \]
\[ \text{\textbackslash bass \textbackslash stdBass "Master"} \]
\[ \text{\textbackslash << \{ \text{r16 } \text{f, bes d} \text{"b" } r \text{< e a c} \text{"am" } r \text{<d g bes} \text{"gm" } | \text{<e a cis} \text{"a" } \} \text{\textbackslash \text{"\textbackslash "} \} \text{\textbackslash >>}} \]

### Changing the text for sustain markings

Staff.pedalSustainStrings can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.

\[ \text{sustainNotes } = \{ \text{c4}\text{sustainOn } \text{d e}\text{sustainOff}\text{sustainOn } f\text{sustainOff} \} \]

\[ \text{\textbackslash relative c' } \{ \text{\textbackslash sustainNotes} \text{\textbackslash set Staff.pedalSustainStrings } = \text{"P" } \text{"P-" } \text{"-"} \} \]
\[ \text{\textbackslash sustainNotes} \text{\textbackslash set Staff.pedalSustainStrings } = \text{"d" } \text{"de" } \text{"e"} \]
\[ \text{\textbackslash sustainNotes} \text{\textbackslash set Staff.pedalSustainStrings } = \text{"M" } \text{"M-" } \text{"-"} \]
\[ \text{\textbackslash sustainNotes} \text{\textbackslash set Staff.pedalSustainStrings } = \text{"Ped" } \text{"*Ped" } \text{"*"} \]
\[ \text{\textbackslash sustainNotes} \}

### Clusters

Clusters are a device to denote that a complete range of notes is to be played.

\[ \text{\textbackslash fragment } = \text{\textbackslash relative c' } \{ \]
Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, it must be used within a chord construct $\langle\rangle$, even for single notes. Orientation for string numbers and right-hand fingerings may be set in a similar way.

```
relative c' {
  \set fingeringOrientations = #'(left)
  \set fingeringOrientations = #'(down)
  \set fingeringOrientations = #'(down right up)
  \set fingeringOrientations = #'(up)
  \set fingeringOrientations = #'(left)
  \set fingeringOrientations = #'(down)
  \set stringNumberOrientations = #'(up left down)
  \set strokeFingerOrientations = #'(down right up)
}
```

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using \hideNotes.
This example is measure 235 of the Ciaconna from Bach’s 2nd Partita for solo violin, BWV 1004.
\relative c' { << 
{ d16( a') s a s a[ s a] s a[ s a] }
\ \ 
{ \slurUp 
bes,16[ s e]( 
\hideNotes a) 
\unHideNotes f[( 
\hideNotes a) 
\unHideNotes fis]( 
\hideNotes a) 
\unHideNotes g[( 
\hideNotes a) 
\unHideNotes gis]( 
\hideNotes a) 
} 
>> }

Cross-staff chords - beaming problems workaround
Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn’t detect collisions between staves using \override Staff.Bean.collision-voice-only = ##t 
\new PianoStaff << 
\new Staff = up 
\relative c' { << 
{ r4 
\override Stem.cross-staff = ##t 
\override Stem.length = #19 \% this is in half-spaces, 
\% so it makes stems 9.5 staffspaces long 
\override Stem.Y-offset = #-6 \% stems are normally lengthened 
\% upwards, so here we must lower the stem by the amount 
\% equal to the lengthening - in this case (19 - 7) / 2 
\% (7 is default stem length) 
e e e e } 
{ s4 
\change Staff = "bottom" 
\override NoteColumn.ignore-collision = ##t
Cross-staff tremolos

Since \repeat tremolo expects exactly two musical arguments for chord tremolos, the note or chord which changes staff within a cross-staff tremolo should be placed inside curly braces together with its \change Staff command.

\new PianoStaff <<
\new Staff = "up" \relative c''' {
    \key a \major
    \time 3/8
    s4.
}
\new Staff = "down" \relative c''' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
        <a e'>32
        {
            \change Staff = "up"
            \voiceTwo
            <cis a' dis>32
        }
    }
}
>>
Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.

\paper { ragged-right = ##f }
\relative c' { 
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.shorten-pair = #'(-7 . -2)
  c2\sostenutoOn c
  c2\sostenutoOff c
  \once \override Staff.PianoPedalBracket.edge-height = #'(0 . 3)
  c2\sostenutoOn c
  c2\sostenutoOff c
}

\[ \begin{array}{c}
Sost. Ped. \quad Sost. Ped. \quad \underline{Sost. Ped.} \\
\end{array} \]

Indicating cross-staff chords with arpeggio bracket

An arpeggio bracket can indicate that notes on two different staves are to be played with the same hand. In order to do this, the PianoStaff must be set to accept cross-staff arpeggios and the arpeggios must be set to the bracket shape in the PianoStaff context.

(Debussy, *Les collines d’Anacapri*, m. 65)

\new PianoStaff << 
\set PianoStaff.connectArpeggios = ##t 
\override PianoStaff.Arpeggio.stencil = 
ly:arpeggio::brew-chord-bracket
\new Staff { 
  \relative c' { 
    \key b \major 
    \time 6/8 
    b8-(\arpeggio fis'-.\> cis-. 
    e-. gis-. b-.)!\fermata\laissezVibrer \bar "\|"
  }
}
\new Staff { 
  \relative c' { 
    \clef bass 
    \key b \major 
    << 
      \{ <a e cis>2.\arpeggio 
    \} \\ 
    { \{ a, e a,>2. 
    >> 
  }
}
Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments are notated in \key c \major. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a \transpose section.

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration.'

```latex
\relative c' { 
  \override LaissezVibrerTieColumn.tie-configuration = \#'((-7 . ,DOWN) 
          (-5 . ,DOWN) 
          (-3 . ,UP) 
          (-1 . ,UP))
  \<c d e f>4\laissezVibrer r <c d f g>4\laissezVibrer r8
}
```
Piano template (simple)

Here is a simple piano staff with some notes.

```latex
upper = \relative c' { \\
    \clef treble \\
    \key c \major \\
    \time 4/4 \\
    a4 b c d 
}
lower = \relative c { \\
    \clef bass \\
    \key c \major \\
    \time 4/4 \\
    a2 c 
}
\score { \\
    \new PianoStaff \with { instrumentName = "Piano" } \\
    \new Staff = "upper" \upper \\
    \new Staff = "lower" \lower \\
} \\
layout { } \\
midi { }
```

Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```latex
upper = \relative c' { \\
    \clef treble \\
    \key c \major \\
    \time 4/4 \\
    a4 b c d 
}
```
lower = relative c \{
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}\n
text = \lyricmode \{
  Aaa Bee Cee Dee
}\n
\score \{
  new PianoStaff <<
    new Staff = upper { new Voice = "singer" \upper }

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in “Vocal ensemble template”. This demonstrates one of the strengths of LilyPond — you can use a music definition more than once. If any changes are made to the vocal notes (say, tenorMusic), then the changes will also apply to the piano reduction.

Section “Percussion” in Notation Reference

Adding drum parts

Using the powerful pre-configured tools such as the \drummode function and the DrumStaff context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

\drh = \drummode { 
    cymc4."crash" hhc16"h.h." hh hhc8 hho hhc8 hh16 hh 
    hhc4 r4 r2 
} 
\drl = \drummode { 
    bd4 sn8 bd bd4 << bd ss >> 
    bd8 tommh tommh bd toml toml bd tomfh16 tomfh 
} 
\timb = \drummode { 
    timh4 ssh timl8 ssh r timh r4 
    ssh8 timl r4 cb8 cb 
} 

\score { 
  << 
    \new DrumStaff \with { 
        instrumentName = "timbales" 
        drumStyleTable = #timbales-style 
        \override StaffSymbol.line-count = #2 
        \override BarLine.bar-extent = #'(\-1 . 1)

Customized drum notation in printed and MIDI output

Customized drum “pitch” names (suitable for a custom drum style, for example) may be used both in printed and MIDI output by defining such variables as drumPitchNames, drumStyleTable and midiDrumPitches, as demonstrated here. In short, this snippet:

- defines some "pitch" names,
- defines how they will be rendered,
- tells LilyPond to use them for layout,
- assigns pitches to the names,
- tells LilyPond to use them for MIDI output.

%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#custom-percussion-staves
%%
%% To use custom drum pitch names for your score and midi you need to follow
%% this route:

%%% LAYOUT:
%%% (1) Define a name and put it in 'drumPitchNames'
%%% This can be done at toplevel with
It's possible to add an alias as well. Therefore put them into a top-level list, where each entry should be of the form:

```
(define my-style
  '(my-name
    note-head-style-or-default
    articulation-type-or-#f
    staff-position))
```

Example:
```
(define my-style
  '(my-name default tenuto -1)
  ; ...
)
```

(3) Tell LilyPond to use these custom definitions, with
```
drumStyleTable = #(alist->hash-table my-style)
```
in a `layout` or `with block`

Now we're done for layout. Here is a short but complete example:
```
\new DrumStaff
  \with { drumStyleTable = #(alist->hash-table my-style) }
  \drummode { my-name }
```

%%

%% MIDI:

%% (1) Again at top-level, assign a pitch to your custom note name

```
midiDrumPitches.my-name = ges
```

Note that you have to use the name, which is in drumPitchNames, no alias

(2) Tell LilyPond to use this pitch(es), with
```
drumPitchTable = #(alist->hash-table midiDrumPitches)
```

Example:
```
\score {
  \new DrumStaff
    \with { drumStyleTable = #(alist->hash-table my-style)
      drumPitchTable = #(alist->hash-table midiDrumPitches)
    }
    \drummode { my-name4 }
    \layout {}
    \midi {}
  }
```

%%

%% TESTING

To test whether all is fine, run the following sequence in terminal:
```
lilypond my-file.ly
```
%% midi2ly my-file.midi
%% gedit my-file-midi.ly
%%
%% This will do the following:
%% 1. create pdf and midi
%% 2. transform the midi back to a .ly-file
%% (note: midi2ly is not always good in correctly identifying enharmonic pitches)
%% 3. open this file in gedit (or use another editor)
%% Now watch what you’ve got.
%%

}
```

```latex
{ 
   \melody 
   \drum 
}
```
High and Low woodblock example

Two Woodblocks, entered with ‘wbh’ (high woodblock) and ‘wbl’ (low woodblock). The length of the barline has been altered with an \override command otherwise it would be too short. The positions of the two stafflines also have to be explicitly defined.

\paper { tagline = ##f }

% These lines define the position of the woodblocks in the stave;
% if you like, you can change it or you can use special note heads
% for the woodblocks.
#define mydrums '((hiwoodblock default #f 3) (lowwoodblock default #f -2))

woodstaff = {
% This defines a staff with only two lines.
% It also defines the positions of the two lines.
\override Staff.StaffSymbol.line-positions = #'(2 3)

% This is necessary; if not entered,
% the barline would be too short!
\override Staff.BarLine.bar-extent = #'(1.0 . 1.5)
% small correction for the clef:
\set DrumStaff.clefPosition = 0.5
}

\new DrumStaff {
% with this you load your new drum style table
\set DrumStaff.drumStyleTable = #(alist->hash-table mydrums)

\woodstaff

\drummode {
\time 2/4
wbl18 16 16 8-> 8 |
wbl18 16 16-> ~ 16 16 r8 |
}
Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments are notated in \key c \major. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a \transpose section.

\header {
  title = "Song"
  subtitle = "(tune)"

---

\texttt{PianoRH} and \texttt{PianoLH} define voices for the piano with different clefs and keys. The \texttt{piano} block combines these to create two staffs: an upper and a lower staff. Similarly, \texttt{Bass} and \texttt{bass} define a bass guitar and a bass line, respectively. The \texttt{up} block represents a drumming pattern with different drum sounds.

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized.

The bar lines can no longer be printed at the Score level; to allow independent bar lines in each part, the Timing_translator is moved from the Score context to the Staff context.

If bar numbers are required, the Bar_number_engraver should also be moved, since it relies on properties set by the Timing_translator; a \with block can be used to add bar numbers to the relevant staff.

Fretted strings

Section “Fretted string instruments” in Notation Reference

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.
\relative c'' {
  c4-1 d-2 f-4 e-3
}

Adding fingerings to tablatures

To add fingerings to tablatures, use a combination of \markup and \finger.

one = \markup { \finger 1 }
two = \markup { \finger 2 }
threeTwo = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 2
  }
}
threeFour = \markup {
  \override #'(baseline-skip . 2)
  \column {
    \finger 3
    \finger 4
  }
}

\score {
  \new TabStaff {
    \tabFullNotation
    \stemUp
    e8\4\one b2 <g\3 e'\1>\[^>\][ b2 e4]
    <a\3 fis'\1>\[^>\]^\threeTwo[ b2 e4]
  }
}
Adding markups in a tablature

By default markups does not show in a tablature.

To make them appear, simply use the command \revert TabStaff.TextScript.stencil

\% http://lsr.di.unimi.it/LSR/Item?id=919
\% by P.P.Schneider on June 2014

high = \{ r4 r8 <g c'> q r8 r4 \}

</tr>
</tbody>
</table>

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff; that behavior, however, may be disabled. Attention needs to be paid to situations where fingerings and stems are in the same direction: by default, fingerings will avoid only beamed stems. That setting can be changed to avoid no stems or all stems; the following example demonstrates these two options, as well as how to go back to the default behavior.

\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##f
Automatic Fretboards Barre

When automatic fretboards are used, barre indicators will be drawn whenever one finger is responsible for multiple strings.

If no finger indications are given in the chord from which the automatic fretboard is created, no barre indicators will be included, because there is no way to identify where bars should be placed.

\new FretBoards { 
  <f,-1 c-3 f-4 a-2 c'-1 f'-1>1
  <f, c f a c' f'>1
}

Changing fret orientations

Fret diagrams can be oriented in three ways. By default the top string or fret in the different orientations will be aligned.

\include "predefined-guitar-fretboards.ly"

<< 
\chords { 
  c1 
  c1 
  c1 
} 
\new FretBoards { 
  \chordmode { 
    c1 
    \override FretBoard.fret-diagram-details.orientation = #"landscape"
    c1 
    \override FretBoard.fret-diagram-details.orientation = #"opposing-landscape"
    c1 
  } 
}
Chord glissando in tablature

Slides for chords are indicated by default in both Staff and TabStaff.

String numbers are necessary for TabStaff because automatic string calculations are different for chords and for single notes.

```latex
\new Voice {
  c'1
  c'1
  c'
}
>>

\begin{diagram}
\begin{tabular}{ccc}
\includegraphics[width=0.2\textwidth]{c}\hline
\includegraphics[width=0.2\textwidth]{c}\hline
\includegraphics[width=0.2\textwidth]{c}\hline
\end{tabular}
\end{diagram}
```

\begin{music}
\score { <<
  \new Staff {
    \clef "treble_8"
    \myMusic
  }
  \new TabStaff \myMusic
>>}

\score { <<
  \new Staff {
    \clef "treble_8"
    \myMusic
  }
  \new TabStaff \with { \override Glissando.style = #'none } {
    \myMusic
  }
>>}
```

\begin{music}
\end{music}
ChordChanges for FretBoards

FretBoards can be set to display only when the chord changes or at the beginning of a new line.
```
\include "predefined-guitar-fretboards.ly"

myChords = \chordmode {
  c1 c1 \break
  \set chordChanges = ##t
  c1 c1 \break
  c1 c1
}
```

<<
```
\new ChordNames { \myChords }
\new FretBoards { \myChords }
\new Staff { \myChords }
>>
```

Chords with stretched fingering for FretBoards and TabVoice

Sometimes chords with a stretched fingering are required. If not otherwise specified the context-property maximumFretStretch is set to 4, though. Resulting in a warning about "No string for
pitch ..." and the note is omitted. You may set `maximumFretStretch` to an appropriate value or explicitly assign string-numbers to all notes of a chord.

Customizing fretboard fret diagrams

Fret diagram properties can be set through `fret-diagram-details`. For FretBoard fret diagrams, overrides are applied to the FretBoards.FretBoard object. Like Voice, FretBoards is a bottom level context, therefore can be omitted in property overrides.

\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }
  \guitar-tuning
  \"x;1-1-(;3-2;3-3;3-4;1-1-);"

% shorthand
oo = #\define-music-function
  \grob-path value
  \list? scheme?
  #\{ \once \override $\grob-path = \#value \}

<<
\new ChordNames {
  \chordmode { c1 | c | c | d }
}
\new FretBoards {
  % Set global properties of fret diagram
  \override FretBoards.FretBoard.size = #'1.2
  \override FretBoard.fret-diagram-details.finger-code = #'in-dot
  \override FretBoard.fret-diagram-details.dot-color = #'white
  \chordmode {
    c
    \oo FretBoard.size #'1.0
    \oo FretBoard.fret-diagram-details.barre-type #'straight
    \oo FretBoard.fret-diagram-details.dot-color #'black
    \oo FretBoard.fret-diagram-details.finger-code #'below-string
    c'
    \oo FretBoard.fret-diagram-details.barre-type #'none
    \oo FretBoard.fret-diagram-details.number-type #'arabic
    \oo FretBoard.fret-diagram-details.orientation #'landscape
    \oo FretBoard.fret-diagram-details.mute-string #"M"
    \oo FretBoard.fret-diagram-details.label-dir #LEFT
    \oo FretBoard.fret-diagram-details.dot-color #'black
    c'
    \oo FretBoard.fret-diagram-details.finger-code #'below-string
    \oo FretBoard.fret-diagram-details.dot-radius #0.35
    \oo FretBoard.fret-diagram-details.dot-position #0.5
    \oo FretBoard.fret-diagram-details.fret-count #3
  d
}

Customizing markup fret diagrams

Fret diagram properties can be set through `ret-diagram-details`. For markup fret diagrams, overrides can be applied to the `Voice.TextScript` object or directly to the markup.

```
\chords { c1 | c | c | d }
\new Voice = "mel" {
  \textLengthOn
  % Set global properties of fret diagram
  \override TextScript.size = #'1.2
  \override TextScript.fret-diagram-details.finger-code = #'in-dot
  \override TextScript.fret-diagram-details.dot-color = #'white

  %% C major for guitar, no barre, using defaults
  % terse style
  c'1\markup { \fret-diagram-terse "x;3-3;2-2;o;1-1;o;" }

  %% C major for guitar, barred on third fret
  % verbose style
  % size 1.0
  % roman fret label, finger labels below string, straight barre
  c'1\markup {
    \override #'(size . 1.0) {
      \override #'(fret-diagram-details . (
        (number-type . roman-lower)
        (finger-code . in-dot)
        (barre-type . straight)))) {
        \fret-diagram-verbose #'((mute 6)
          (place-fret 5 3 1)
          (place-fret 4 5 2)
          (place-fret 3 5 3)
          (place-fret 2 5 4)
          (place-fret 1 3 1)
          (barre 5 1 3))
    }
  }
```
%%% C major for guitar, barred on third fret
%%% verbose style
%%% landscape orientation, arabic numbers, M for mute string
%%% no barre, fret label down or left, small mute label font
\markup{\override\fret-diagram-details . (\fret-diagram-verbose\#'(mute 6)
(place-fret 5 3 1)
(place-fret 4 5 2)
(place-fret 3 5 3)
(place-fret 2 5 4)
(place-fret 1 3 1)
(barre 5 1 3))}

%%% simple D chord
%%% terse style
%%% larger dots, centered dots, fewer frets
%%% label below string
\markup{\override\fret-diagram-details . (\fret-diagram-terse "x;x;o;2-1;3-2;2-3;"�
)}
Defining predefined fretboards for other instruments

Predefined fret diagrams can be added for new instruments in addition to the standards used for guitar. This file shows how this is done by defining a new string-tuning and a few predefined fretboards for the Venezuelan *cuatro*.

This file also shows how fingerings can be included in the chords used as reference points for the chord lookup, and displayed in the fret diagram and the TabStaff, but not the music.

These fretboards are not transposable because they contain string information. This is planned to be corrected in the future.

\% add FretBoards for the Cuatro
\% Note: This section could be put into a separate file
\% predefined-cuatro-fretboards.ly
\% and \ included into each of your compositions

\% end of potential include file /predefined-cuatro-fretboards.ly

```latex
\storePredefinedDiagram #default-fret-table \dSix
\storePredefinedDiagram #default-fret-table \dMajor
\storePredefinedDiagram #default-fret-table \aMajSeven
\storePredefinedDiagram #default-fret-table \dMajSeven
\storePredefinedDiagram #default-fret-table \gMajor

\% end of potential include file /predefined-cuatro-fretboards.ly
```

```latex
#(set-global-staff-size 16)

  }
}

Fingerings, string indications, and right-hand fingerings

This example combines left-hand fingering, string indications, and right-hand fingering.

#(define RH rightHandFinger)

\relative c { 
  \clef "treble_8"
  <c-3\5\RH #1 >4 
  <e-2\4\RH #2 >4 
  <g-0\3\RH #3 >4 
  <c-1\2\RH #4 >4
}

Flamenco notation

For flamenco guitar, special notation is used:

- a golpe symbol to indicate a slap on the guitar body with the nail of the ring finger
- an arrow to indicate (the direction of) strokes
• different letters for fingering (”p”: thumb, “i”: index finger, “m”: middle finger, “a”: ring finger and “x”: little finger)

• 3- and 4-finger rasgueados; stroke upwards with all fingers, ending with an up- and down using the index finger

• abanicos: strokes (in tuples) with thumb (down), little and index finger (both up). There’s also an abanico 2 where middle and ring finger are used instead of the little finger.

• alza pua: fast playing with the thumb

Most figures use arrows in combination with fingering; with abanicos and rasgueados, note-heads are printed only for the first chord.

This snippet contains some header-like code that can be copied as ‘flamenco.ly’ and included in source files.

Alternate fretboard tables can be created. These would be used in order to have alternate fretboards for a given chord.

In order to use an alternate fretboard table, the table must first be created. Fretboards are then added to the table.

The created fretboard table can be blank, or it can be copied from an existing table.

The table to be used in displaying predefined fretboards is selected by the property `\predefinedDiagramTable`.

`\include "predefined-guitar-fretboards.ly"

% Make a blank new fretboard table
%(define custom-fretboard-table-one
  (make-fretboard-table))

% Make a new fretboard table as a copy of default-fret-table

  %pinched harmonics (PH)
  \harmonicByFret #7 d2\4
}
Guitar slides

Unlike glissandos, slides may go from an imprecise point of the fretboard to a specific fret. A good way to do this is to add a hidden grace note before the note which is actually played, as demonstrated in the following example.

%% Hide fret number: useful to draw slide into/from a casual point of the fretboard.
hideFretNumber = {
    \once \hide TabNoteHead
    \once \hide NoteHead
    \once \hide Stem
    \once \override NoteHead.no-ledgers = ##t
    \once \override Glissando.bound-details.left.padding = #0.3
}

music= \relative c' {
\grace \hideFretNumber d8 \glissando s2 } g2
\grace \hideFretNumber g8 \glissando s2 } d2 |

\grace \hideFretNumber e'8 \glissando s } b4 \markup \tiny { Slide from }
\grace \hideFretNumber b'8 \glissando s2 } g4 |

\score {
  \new Staff {
    \clef "G_8"
    \music
  }
  \new TabStaff {
    \music
  }
}

\include "predefined-guitar-fretboards.ly"
<<
\new ChordNames {

}

Guitar strum rhythms

For guitar music, it is possible to show strum rhythms, along with melody notes, chord names and fret diagrams.
f4 f8 f4 f8 f
g4 g8 g4 g8 g
c4 c8 c c4 c8 c
\new Voice = "melody" {
    \relative c'' {
        c2 e4 e4
        f2. r4
        g2. a4
        e4 c2.
    }
}
\new Lyrics {
    \lyricsto "melody" {
        This is my song.
        I like to sing.
    }
}

Hammer on and pull off

Hammer-on and pull-off can be obtained using slurs.
\new TabStaff {
    \relative c' {
        d4( e\2)
        a( g)
    }
}

Hammer on and pull off using chords

When using hammer-on or pull-off with chpered notes, only a single arc is drawn. However 
"double arcs" are possible by setting the doubleSlurs property to #t.
\new TabStaff {
    \relative c' {
        d4( e\2)
        a( g)
    }
}
Hammer on and pull off using voices

The arc of hammer-on and pull-off is upwards in voices one and three and downwards in voices two and four:

\[ \text{Hammer on and pull off using voices} \]

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

1) modify #’padding or #’extra-offset values (as shown in the first snippet)

2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

\[ \text{How to change fret diagram position} \]
Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments are notated in \key c \major. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a \transpose section.

\header {

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration.'

\relative c' {
    <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
    <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8
    <c d e f>4\laissezVibrer r
}\override LaissezVibrerTieColumn.tie-configuration
    = #'((-7 . ,DOWN)
        (~5 . ,DOWN)
        (~3 . ,UP)
        (~1 . ,UP))
    <c d e f>4\laissezVibrer r
}
Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost-context-property`. For a context-wide setting this could be done in `layout` as well.

```markdown
\%\layout {
% \context {
% \Score
%   stringOneTopmost = ##f
% }
% \context {
% \TabStaff
%   tablatureFormat = #fret-letter-tablature-format
% }
%}
%

m = {
  \cadenzaOn
  e, b, e gis! b e'
  \bar "||"
}

<<
\new Staff { \clef "G_8" <>_"default" \m <>_"italian (historic)"\m }
\new TabStaff
{
  \m
  \set Score.stringOneTopmost = ##f
  \set TabStaff.tablatureFormat = #fret-letter-tablature-format
  \m
}
>>
```

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```
\texttt{music = \relative c { \c4 d e f}}
```
Open string harmonics in tablature

This snippet demonstrates open-string harmonics.

```plaintext
openStringHarmonics = {
    \textSpannerDown
    \override TextSpanner.staff-padding = #3
    \override TextSpanner.dash-fraction = #0.3
    \override TextSpanner.dash-period = #1

    \markup "1st harm."
    \harmonicByFret #12 e,\6

}

\score { <<
\new Staff
\with { \omit StringNumber } { \new Voice { \clef "treble_8"
openStringHarmonics
}
} 
}
Placement of right-hand fingerings

It is possible to exercise greater control over the placement of right-hand fingerings by setting a specific property, as demonstrated in the following example.

#(define RH rightHandFinger)

\relative c {  
  \clef "treble_8"

  \set strokeFingerOrientations = #'(up down)  
  <<<\RH #1 e\RH #2 g\RH #3 c\RH #4 >4

  \set strokeFingerOrientations = #'(up right down)  
  <<<\RH #1 e\RH #2 g\RH #3 c\RH #4 >4

  \set strokeFingerOrientations = #'(left)  
  <<<\RH #1 e\RH #2 g\RH #3 c\RH #4 >2
\set strokeFingerOrientations = #'(right)
c\RH #1

Polyphony in tablature

Polyphony is created the same way in a TabStaff as in a regular staff.

upper = \relative c' {\time 12/8 \key e \minor \voiceOne r4. r8 e, fis g16 b g e' b c b a g fis e}

lower = \relative c {\key e \minor \voiceTwo r16 e d c b a g4 fis8 e fis g a b c}

score {
<< \StaffGroup = "tab with traditional" << \Staff = "guitar traditional" << \clef "treble_8" \Voice = "upper" \upper \Voice = "lower" \lower >> \TabStaff = "guitar tab" << \TabVoice = "upper" \upper \TabVoice = "lower" \lower >> >>}
Slides in tablature

Slides can be typeset in both Staff and TabStaff contexts:

\begin{verbatim}
slides = {
  c'8\glissando d'8\3
  c'8\glissando d'8\3
  \hideNotes
  \grace { g16\glissando }
  \unhideNotes
  c'4\3
  \afterGrace d'4\3\glissando {
  \stemDown \hideNotes
  g16 }
  \unhideNotes
}
\end{verbatim}

\begin{verbatim}
\score {
  \new Staff { \clef "treble_8" \slides }
  \new TabStaff { \slides }
}
\end{verbatim}

Stem and beam behavior in tablature

The direction of stems is controlled the same way in tablature as in traditional notation. Beams can be made horizontal, as shown in this example.
String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
    #(define-music-function (StringNumber) (string?))
    
    \override TextSpanner.style = #'solid
    \override TextSpanner.font-size = #-5
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    \markup { \circle \number $StringNumber }
```

```
\relative c {  
    \clef "treble_8"
    \stringNumberSpanner "5"
    \textSpannerDown
    a8\startTextSpan
    b c d e f\stopTextSpan
    \stringNumberSpanner "4"
    g\startTextSpan a
    bes4 a g2\stopTextSpan
}
```
Unfretted strings

Section “Unfretted string instruments” in Notation Reference

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices. The solution is to add invisible notes to one of the voices, using \hideNotes.

This example is measure 235 of the Ciaconna from Bach’s 2nd Partita for solo violin, BWV 1004.

\relative c' {
<<
{
    d16(a') s a s a[ s a] s a[ s a]
}
\%
{
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[]{
    \hideNotes a)
    \unHideNotes fis]{
    \hideNotes a)
    \unHideNotes g[]{
    \hideNotes a)
    \unHideNotes gis]{
    \hideNotes a)
}
}>>
}

Dotted harmonics

Artificial harmonics using \harmonic do not show dots. To override this behavior, set the context property harmonicDots.

\relative c'''' {
\time 3/4
\key f \major
\set harmonicDots = ##t
<bes f'\harmonic>2. ~
<bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
<fis cis'\harmonic>2. 
<bes f'\harmonic>2. 
}
Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' { 
  c4\snappizzicato
  <c' e g>4\snappizzicato
  <c' e g>4\snappizzicato
  <c, e g>4\snappizzicato
}
```

String quartet template (simple)

This template demonstrates a simple string quartet. It also uses a `\global` section for time and key signatures

```
global= { 
  \time 4/4
  \key c \major
}

violinOne = \new Voice \relative c' { 
  c2 d 
  e1 
  \bar "|." 
}

violinTwo = \new Voice \relative c' { 
  g2 f 
  e1 
  \bar "|." 
}

viola = \new Voice \relative c' { 
  \clef alto 
  e2 d 
  c1 
  \bar "|." 
}
```
String quartet template with separate parts

The “String quartet template” snippet produces a nice string quartet, but what if you needed to print parts? This new template demonstrates how to use the \tag feature to easily split a piece into individual parts.

You need to split this template into separate files; the filenames are contained in comments at the beginning of each file. piece.ly contains all the music definitions. The other files – score.ly, vn1.ly, vn2.ly, vla.ly, and vlc.ly – produce the appropriate part.

Do not forget to remove specified comments when using separate files!

%% piece.ly

Winds

Section “Wind instruments” in Notation Reference

Changing the size of woodwind diagrams

The size and thickness of woodwind diagrams can be changed.

\relative c' { 
  \textLengthOn 
  \markup \woodwind-diagram 
    #'piccolo 
    #'() 
  \markup \override #'(size . 1.5) { 
    \woodwind-diagram 
    #'piccolo 
    #'() 
  } 
  \markup \override #'(thickness . 0.15) { 
    \woodwind-diagram 
    #'piccolo 
    #'() 
  } 
}

Fingering symbols for wind instruments

Special symbols can be achieved by combining existing glyphs, which is useful for wind instruments.

centermarkup = { 
  \once \override TextScript.self-alignment-X = #CENTER 
  \once \override TextScript.X-offset =#(lambda (g) (+ (ly:self-alignment-interface::centered-on-x-parent g) (ly:self-alignment-interface::x-aligned-on-self g))))
Flute slap notation

It is possible to indicate special articulation techniques such as a flute “tongue slap” by replacing
the note head with the appropriate glyph. For that we can draw the accent-like note head with
\markup.

\slap =
\{(define-music-function \music-fn (\ly:music?) \{
\temp \override \ly:score-context \notehead = \ly:text-interface::print
\temp \override \ly:notehead \text = \markup
\temp \translate '1 . 0
\temp \override \ly:notehead \thickness = 1.4
\overlay {
\temp \draw-line '(-1.2 . 0.4)
\temp \draw-line '(-1.2 . -0.4)
}
\temp \override \ly:notehead \stem-attachment = \lambda (\grob) (
\let* ((\stem (\ly:grob-object \grob 'stem))
 (\dir (\ly:grob-property \stem 'direction UP))
 (is-up (eqv? \dir UP))
 (cons \dir (if \is-up 0 -0.8)))
\music
\revert \ly:notehead\}
\}
Graphical and text woodwind diagrams

In many cases, the keys other than the central column can be displayed by key name as well as by graphical means.

Recorder fingering chart

The following example demonstrates how fingering charts for wind instruments can be realized.

centermarkup = {
}
\once \override TextScript.self-alignment-X = #CENTER
\once \override TextScript.X-offset = #(\lambda (g)
  (+ (ly:alignment-interface::centered-on-x-parent g)

Ancient notation

Section “Ancient notation” in Notation Reference

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the BassFigureAlignmentPositioning.direction property (exclusively in a Staff context). Choices are #UP (or #1), #CENTER (or #0) and #DOWN (or #−1).

This property can be changed as many times as you wish. Use \once \override if you don’t want the override to apply to the whole score.

```lilypond
bass = { 
clef bass
G4 B, C D
E D8 C D2 }
```

```lilypond
continuo = \figuremode { 
<_{>4 <6>4 <5/>4
\override Staff.BassFigureAlignmentPositioning.direction = #UP
%\bassFigureStaffAlignmentUp
<_+>4 <6>
\set Staff.useBassFigureExtenders = ##t
\override Staff.BassFigureAlignmentPositioning.direction = #DOWN
%\bassFigureStaffAlignmentDown
<4>4. <4>8 <_+>4
}
```

```lilypond
\score { 
<<
\new Staff = bassStaff \bass
\context Staff = bassStaff \continuo
>>
}
```

Ancient notation template – modern transcription of gregorian music

This example demonstrates how to do modern transcription of Gregorian music. Gregorian music has no measure, no stems; it uses only half and quarter note heads, and special marks, indicating rests of different length.

\include "gregorian.ly"

\begin{verbatim}
chant = \relative c' {
    \set Score.timing = ##f
    f4 a2 \divisioMinima
    g4 b a2 f2 \divisioMaior
    g4( f) f( g) a2 \finalis
}

verba = \lyricmode {
    Lo -- rem ip -- sum do -- lor sit a -- met
}

\score {
    \new GregorianTranscriptionStaff <<
    \new GregorianTranscriptionVoice = "melody" \chant
    \new GregorianTranscriptionLyrics = "one" \lyricsto melody \verba
    >>
}
\end{verbatim}

\override Staff.Custos.style = #'medicaea
c1~"medicaea" \break
<d a' f'>1
Incipit

When transcribing mensural music, an incipit at the beginning of the piece is useful to indicate the original key and tempo. While today musicians are used to bar lines in order to faster recognize rhythmic patterns, bar lines were not yet invented during the period of mensural music; in fact, the meter often changed after every few notes. As a compromise, bar lines are often printed between the staves rather than on the staves.

Using tags to produce mensural and modern music from the same source

Using tags, it is possible to produce both mensural and modern notation from the same music. In this snippet, a function \texttt{menrest} is introduced, allowing mensural rests to be pitched as in the original, but with modern rests in the standard staff position. Tags can also be used where other differences are needed: for example using “whole measure rests” (R1, R\breve, etc.) in modern music, but normal rests (r1, r\breve, etc.) in the mensural version. Converting mensural music to its modern equivalent is usually referred to as “transcription”.

\texttt{menrest} = #(define-music-function (note)
  (ly:music?)
  #(\tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '()))
#)

\texttt{MenStyle} = {
  \autoBeamOff
  \override NoteHead.style = #'petrucci
  \override Score.BarNumber.transparent = ##t
  \override Stem.neutral-direction = #up
}

finalis = \section

\texttt{Music} = \relative c'' {
  \set Score.tempoHideNote = ##t
  \key f \major
  \time 4/4
  g1 d'2 \menrest bes4 bes2 a2 r4 g4 fis2.
  \finalis
}

\texttt{MenLyr} = \lyricmode { So farre, deere life, deare life }
\texttt{ModLyr} = \lyricmode { So far, dear life, dear life }

\score {
  \keepWithTag #'mens {
    <<
      \new MensuralStaff 
      { 
        \new MensuralVoice = Cantus
        \clef "mensural-c1" \MenStyle \Music 
      } 
      \new Lyrics \lyricsto Cantus \MenLyr
    >>
  } 
}

\score {

    \new Staff
  }
Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```
upline = \tweak stencil
  #(lambda (grob)
    (grob-interpret-markup grob #{ \markup \draw-line #'(0 . 1) #})
  )

\relative c' {
  a'4^\upline a( c d')_\upline
}
```
World music

Section “World music” in Notation Reference

Arabic improvisation

For improvisations or taqsim which are temporarily free, the time signature can be omitted and `cadenzaOn` can be used. Adjusting the accidental style might be required, since the absence of bar lines will cause the accidental to be marked only once. Here is an example of what could be the start of a hijaz improvisation:

```
\include "arabic.ly"

\relative sol' {
   \key re \kurd
   \accidentalStyle forget
   \cadenzaOn
   sol4 sol sol sol fad mib sol1 fad8 mib re4. r8 mib1 fad sol
}
```

Makam example

Makam is a type of melody from Turkey using 1/9th-tone microtonal alterations. Consult the initialization file `ly/makam.ly` for details of pitch names and alterations.

```
% Initialize makam settings
\include "makam.ly"

\relative c' {
   \set Staff.KeyAlterations = #'((6 .,( KOMA)) (3 ., BAKIYE))
   c4 cc db fk
gbm4 gfc gfb efk
fk4 db cc c
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{b1^\markup {
   \line { i n g i r u m i m u s n o c t e }
}}
f'_\markup {
   \override #'(text-direction . -1)
   \line { i n g i r u m i m u s n o c t e }
}
Turkish Makam example

This template uses the start of a well-known Turkish Saz Semai that is familiar in the repertoire in order to illustrate some of the elements of Turkish music notation.

\paper { tagline = ##f }  
  
\% Initialize makam settings 
\include "turkish-makam.ly"

Contexts and engravers

Section “Changing defaults” in Notation Reference
Section “Contexts and engravers” in Learning Manual

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the BassFigureAlignmentPositioning.direction property (exclusively in a Staff context). Choices are #UP (or #1), #CENTER (or #0) and #DOWN (or # -1).

This property can be changed as many times as you wish. Use \once \override if you don’t want the override to apply to the whole score.

\begin{verbatim}
bass = {
  \clef bass
  g4 b, c d
  e d8 c d2
}
continuo = \figuremode {
  <,>4 <6>4 <5/>4
  \override Staff.BassFigureAlignmentPositioning.direction = #UP
  \%bassFigureStaffAlignmentUp
  <._+>4 <6>
  \set Staff.useBassFigureExtenders = ##t
  \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
  \%bassFigureStaffAlignmentDown
  <4>4. <4>8 <._+>4
}
\score {
  \new Staff = bassStaff \bass
  \context Staff = bassStaff \continuo
}
\end{verbatim}

Adding an extra staff

An extra staff can be added (possibly temporarily) after the start of a piece.

\begin{verbatim}
\score {
  \new Staff \relative c'' {
    c1 | c | c | c | c
  }
  \new StaffGroup \relative c'' {
    \new Staff {

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of `Staff.explicitKeySignatureVisibility` as is shown in the example.

\score {
\new StaffGroup \relative c'' { 
  \new Staff 
  \key f \major 
  c1 c"Unwanted extra space" \break 
  << { c1 | c } 
  \new Staff { 
    \key f \major 
    \once \omit Staff.TimeSignature 
    c1 | c 
  } 
  } 
  >> 
  c1 | c"Fixed here" \break 
  << { c1 | c } 
  \new Staff { 
    \once \set Staff.explicitKeySignatureVisibility = #end-of-line-invisible 
    \key f \major 
    \once \omit Staff.TimeSignature 
    c1 | c 
  } 
}
LilyPond can alter the stem direction of the middle note on a staff so that it follows the melody, by adding the Melody_engraver to the Voice context.

The context property suspendMelodyDecisions may be used to turn off this behavior locally.

```lilypond
\relative c' \{ 
  \time 3/4 
  a8 b g f b g |
  \set suspendMelodyDecisions = ##t 
  a b g f b g |
  \unset suspendMelodyDecisions 
  c b d c b c |
}
```

```
\layout { 
  \context { 
    \Voice 
    \consists "Melody_engraver"
    \autoBeamOff
  } 
}
```
### Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure’s extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

This snippet presents a legacy method: starting from LilyPond 2.23.3, `\set Score.centerBarNumbers = ##t` is enough.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
  \new Staff {
  \pattern
  }
  \new Staff {
  \pattern
  }
  \new Dynamics {
    \startMeasureCount s1*7
    \stopMeasureCount
  }
>>
```

![Example notation with centered measure numbers](image)
Changing MIDI output to one channel per voice

When outputting MIDI, the default behavior is for each staff to represent one MIDI channel, with all the voices on a staff amalgamated. This minimizes the risk of running out of MIDI channels, since there are only 16 available per track.

However, by moving the `Staff_performer` to the `Voice` context, each voice on a staff can have its own MIDI channel, as is demonstrated by the following example: despite being on the same staff, two MIDI channels are created, each with a different `midiInstrument`.

```
\score { 
  \new Staff <<
    \new Voice \relative c''' { 
      \set midiInstrument = #"flute"
      \voiceOne
      \key g \major
      \time 2/2
      r2 g-"Flute" -
      g fis -
      fis4 g8 fis e2 -
      e4 d8 cis d2 
    }
  \new Voice \relative c'' { 
    \set midiInstrument = #"clarinet"
    \voiceTwo
    b1-"Clarinet"
    a2. b8 a
    g2. fis8 e 
    fis2 r 
  }
  >>
  \layout { }
  \midi {
    \context { 
      \Staff 
      \remove "Staff_performer"
    } 
    \context { 
      \Voice 
      \consists "Staff_performer"
    }
    \tempo 2 = 72 
  }
}
```
Changing time signatures inside a polymetric section using \scaleDurations

The measureLength property, together with measurePosition, determines when a bar line is needed. However, when using \scaleDurations, the scaling of durations makes it difficult to change time signatures. In this case, measureLength should be set manually, using the ly:make-moment callback. The second argument must be the same as the second argument of \scaleDurations.

\layout {
\context {\Score {\remove "Timing_translator"}}
\context {\Staff {\consists "Timing_translator"}}}

\new Staff {\scaleDurations 8/5 {
\time 6/8
\set Timing.measureLength = #(ly:make-moment 6/5)
b8 b b b b b
\time 2/4
\set Timing.measureLength = #(ly:make-moment 4/5)
b4 b
}}
\new Staff {\clef bass \time 2/4 c2 d e f}

Chant or psalms notation

This form of notation is used for Psalm chant, where verses aren’t always the same length.

\stemOff = \hide Staff.Stem
\stemOn = \undo \stemOff

\score {
\new Staff \with {\remove "Time_signature_engraver"}
}
Creating blank staves

To create blank staves, generate empty measures then remove the Bar_number_engraver from the Score context, and the Time_signature_engraver, Clef_engraver and Bar_engraver from the Staff context.

```latex
\set-global-staff-size 20
```

```latex
\score {  
  \repeat unfold 12 { s1 \break }  
}  
\layout {  
  indent = 0\in  
  \context {  
    \Staff  
    \remove "Time_signature_engraver"  
    \remove "Clef_engraver"  
    \remove "Bar_engraver"  
  }  
  \context {  
    \Score  
    \remove "Bar_number_engraver"  
  }  
}  

% uncomment these lines for "letter" size  
%
\paper {  
  #(set-paper-size "letter")  
  ragged-last-bottom = ##f  
  line-width = 7.5\in  
  left-margin = 0.5\in  
  bottom-margin = 0.25\in  
  top-margin = 0.25\in  
}  
%}
```
\% uncomment these lines for "A4" size
\%
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
\%}
Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```lilypond
\new Staff \with { 
  \override StaffSymbol.line-count = #8 
  \override KeySignature.flat-positions = #'((-7 . 6)) 
  \override KeyCancellation.flat-positions = #'((-7 . 6)) 
  \% presumably sharps are also printed in both octaves 
  \override KeySignature.sharp-positions = #'((-6 . 7)) 
  \override KeyCancellation.sharp-positions = #'((-6 . 7)) 
}

\override Clef.stencil = # (lambda (grob) (grob-interpret-markup grob) #( \markup \combine \musicglyph "clefs.C" \translate #'(-3 . -2) \musicglyph "clefs.F" #}))
clefPosition = #3 
middleCPosition = #3 
middleCClefPosition = #3

\key d\minor
f bes, f bes,

Cross staff stems

This snippet shows the use of the Span_stem_engraver and \crossStaff to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

```
Contexts and engravers

\new Staff {
    \clef bass
    \voiceOne
    \autoBeamOff
    \crossStaff \{ <e g>4 e, g16 a8. c8} d
    \autoBeamOn
    g8 f g4 c2
}

>>

\textbf{Defining an engraver in Scheme: ambitus engraver}

This example demonstrates how the ambitus engraver may be defined on the user side, with a Scheme engraver. This is basically a rewrite in Scheme of the code from lily/ambitus-engraver.cc.

\texttt{#(use-modules (oop goops))}

%%%%
%%%% Grob utilities
%%%%
%%%% These are literal rewrites of some C++ methods used by the ambitus engraver.

Displaying a whole GrandStaff system if only one of its staves is alive

In orchestral scores sometimes single or groups of instruments are silent for a while and their staves can be removed for that time (with \removeEmptyStaves).

When they play again it is often preferred to show the staves of all instruments of such a group. This can be done adding the Keep_alive_together_engraver in the grouper (e.g., a GrandStaff or a StaffGroup).

In the example the violins are silent in the 2nd system and in the 3rd system. Only the first violin plays the last measure but the staff of the second violin is also displayed.

Engravers one-by-one

The notation problem, creating a certain symbol, is handled by plugins. Each plugin is called an Engraver. In this example, engravers are switched on one by one, in the following order:

- note heads,
- staff symbol,
- clef,
- stem,
- beams, slurs, accents,
- accidentals, bar lines, time signature and key signature.

Engravers are grouped. For example, note heads, slurs, beams etc. form a Voice context. Engravers for key signature, accidentals, bar line, etc. form a Staff context.

Mensurstriche layout (bar lines between the staves)

\textit{Mensurstriche}, bar lines between but not through staves, can be printed by setting \texttt{measureBarType} to \texttt{"-span|"} and using a grouping context that allows span bars, such as \texttt{StaffGroup}.

\layout {
  \context {
    \Staff
    measureBarType = "-span|"
  }
}

\texttt{music = \fixed c'\'} { 
  c1
Nesting staves

The property `systemStartDelimiterHierarchy` can be used to make more complex nested staff groups. The command `\set StaffGroup.systemStartDelimiterHierarchy` takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace`, and `SystemStartSquare`.

\new StaffGroup
\relative c'' <<
\override StaffGroup.SystemStartSquare.collapse-height = #4
\set StaffGroup.systemStartDelimiterHierarchy = #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
                                                 (SystemStartSquare b) ) c ) d)

>>
Numbering groups of measures

This snippet demonstrates the use of the Measure_counter_engraver to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a Staff context is used; another possibility is a Dynamics context.

The counter is begun with \startMeasureCount and ended with \stopMeasureCount. Numbering will start by default with 1, but this behavior may be modified by overriding the count-from property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 { c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 { g'4 f' e' d'
  }
  g'4 f'
Print ChordNames with same root and different bass as slash and bass-note

To print subsequent ChordNames only differing in its bass note as slash and bass note use the here defined engraver. The behaviour may be controlled in detail by the chordChanges context property.

```lisp
#(define Bass_changes_equal_root_engraver
    (lambda (ctx)
      "For sequential @code{ChordNames} with same root, but different bass, the root markup is dropped: D D/C D/B -> D /C /B
      The behaviour may be controlled by setting the @code{chordChanges} context-property."
      (let ((chord-pitches '())
            (last-chord-pitches '())
            (bass-pitch #f))
        (make-engraver
         ((initialize this-engraver)
          (let ((chord-note-namer (ly:context-property ctx 'chordNoteNamer)))
            ;; Set 'chordNoteNamer, respect user setting if already done
            (ly:context-set-property! ctx 'chordNoteNamer
             (if (procedure? chord-note-namer)
                chord-note-namer
                note-name->markup))))
         (listeners
          ((note-event this-engraver event)
           (let* ((pitch (ly:event-property event 'pitch))
                   (pitch-name (ly:pitch-notename pitch))
                   (pitch-alt (ly:pitch-alteration pitch))
                   (bass (ly:event-property event 'bass #f))
                   (inversion (ly:event-property event 'inversion #f)))
            ...)))
    )
)
Collect notes of the chord
- to compare inversed chords we need to collect the bass note
- as usual member of the chord, whereas an added bass must be
treated separate from the usual chord-notes
- notes are stored as pairs containing their
pitch-name (an integer), i.e. disregarding their octave and
their alteration

Removing bar numbers from a score

Bar numbers can be removed entirely by removing the Bar_number_engraver from the Score context.

\layout {
  \context {\Score
    \omit BarNumber
    \% or:
    \%
    \remove "Bar_number_engraver"
  }
}

\relative c'' { 
c4 c c c \break
c4 c c c
}
Use square bracket at the start of a staff group

The system start delimiter SystemStartSquare can be used by setting it explicitly in a StaffGroup or ChoirStaff context.

```latex
\score { 
\new StaffGroup { << 
\set StaffGroup.systemStartDelimiter = #'SystemStartSquare 
\new Staff { c'4 d' e' f' } 
\new Staff { c'4 d' e' f' } 
>> }
}
```

Using marklines in a Frenched score

Using MarkLine contexts (such as in LSR1010 (https://lsr.di.unimi.it/LSR/Item?id=1010)) in a Frenched score can be problematic if all the staves between two MarkLines are removed in one system. The Keep_alive_together_engraver can be used within each StaffGroup to keep the MarkLine alive only as long as the other staves in the group stay alive.

```latex
\set GlobalEngravers = ##f \set StaffAttributes = \default \set ScoreAttributes = \default \set StaffAttributes = \default \set ScoreAttributes = \default
```

```latex
\score { 
\new StaffGroup { << 
\set StaffGroup.systemStartDelimiter = #'SystemStartSquare 
\new Staff { c'4 d' e' f' } 
\new Staff { c'4 d' e' f' } 
>> }
}
```

```latex
\score { 
\new StaffGroup { << 
\set StaffGroup.systemStartDelimiter = #'SystemStartSquare 
\new Staff { c'4 d' e' f' } 
\new Staff { c'4 d' e' f' } 
>> }
}
```

```latex
\set GlobalEngravers = ##f \set StaffAttributes = \default \set ScoreAttributes = \default \set StaffAttributes = \default \set ScoreAttributes = \default
```

```latex
\score { 
\new StaffGroup { << 
\set StaffGroup.systemStartDelimiter = #'SystemStartSquare 
\new Staff { c'4 d' e' f' } 
\new Staff { c'4 d' e' f' } 
>> }
}
```

```latex
\new MarkLine { c'4 d' e' f' } 
\new MarkLine { c'4 d' e' f' } 
```

```latex

Tweaks and overrides

Section “Changing defaults” in Notation Reference
Section “Tweaking output” in Learning Manual

Adding an ottava marking to a single voice

If you have more than one voice on the staff, setting octavation in one voice transposes the position of notes in all voices for the duration of the ottava bracket. If the octavation is only intended to apply to one voice, the `Ottava_spanner_engraver` should be moved to `Voice` context.

```
\layout {  
  \context {  
    \Staff  
    \remove Ottava_spanner_engraver  
  }  
  \context {  
    \Voice  
    \consists Ottava_spanner_engraver  
  }  
  }  

\clef bass  
<< { <g d'>1- q2 <c' e'> } \  
\{  
  r2.  
  \ottava -1  
  <b,,, b,,,>4 ~ |  
  q2  
  \ottava 0  
  <c e>2  
} >>  
}
```

Adding links to objects

To add a link to a grob stencil you can use `add-link` as defined here. It works both with `\override` and `\tweak`.

Drawback: point-and-click is disturbed for the linked grobs.

Limitation: Works for PDF only.
The linked objects are colored with a separate command. Note that the links are not displayed and are not clickable from inside the LSR.

```lisp
#:define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))

Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks, often consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly.

\begin{verbatim}
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
  \override NoteHead.no-ledgers = ##t
}

\begin{verbatim}
glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}
\end{verbatim}

\begin{verbatim}
relative c'' {
  r8 f8\glissando
  \glissandoSkipOn
  f4 g a a8\noBeam
  \glissandoSkipOff
  a8
}\end{verbatim}
Adjusting grace note spacing

The space given to grace notes can be adjusted using the spacing-increment property of Score.GraceSpacing.

```plaintext
graceNotes = {
    /\grace { c4 c8 c16 c32 }
    c8
}

/\relative c'' {
    c8
    /\graceNotes
    /\override Score.GraceSpacing.spacing-increment = #2.0
    /\graceNotes
    /\revert Score.GraceSpacing.spacing-increment
    /\graceNotes
}
```

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

```plaintext
% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
    c4 d e f
g4 f e d
c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }
```
Tweaks and overrides

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
g4 f e d
c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing = 
    #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }

\begin{music}
\begin{music}
\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
g4 f e d
c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing = 
    #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
\end{music}

Alterning the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the beamed-lengths property of the details of the Stem. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

\relative c' {
  \override Stem.details.beamed-lengths = #'(2)
a8[ a] a16[ a] a32[ a]
  \override Stem.details.beamed-lengths = #'(8 10 12)
a8[ a] a16[ a] a32[ a] r8
  \override Stem.details.beamed-lengths = #'(8)
a8[ a]
  \override Stem.details.beamed-lengths = #'(8.5)
a8[ a]
  \revert Stem.details.beamed-lengths
  a8[ a] a16[ a] a32[ a] r16
\}

\begin{music}
\begin{music}
\end{music}

Alternative bar numbering

Two alternative methods for bar numbering can be set, especially for when using repeated music.
Analysis brackets above the staff

Simple horizontal analysis brackets are added below the staff by default. The following example shows a way to place them above the staff instead.

```plaintext
\layout {
    \context { ...
```

Analysis brackets with labels

Text markup may be added to analysis brackets through the `text` property of the `HorizontalBracketText` grob. Adding different texts to brackets beginning at the same time requires the `\tweak` command.

Bracket text will be parenthesized after a line break.

```tex
\paper { tagline = ##f }

\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{\once \override HorizontalBracketText.text = "a"
  c'' \startGroup d'' \stopGroup
  \once \override HorizontalBracketText.text = "a'"
  e'' \startGroup d'' \stopGroup | 
  c'' \tweak HorizontalBracketText.text `markup \bold \huge "b"
  \startGroup 
  d'' \stopGroup 
  e'' \tweak HorizontalBracketText.text "a"
  \startGroup 
  d'' \stopGroup \stopGroup | 
  c'' \tweak HorizontalBracketText.text foo \startGroup 
  d'' e'' f'' | \break 
  g'' a'' b'' c'' \stopGroup
}
Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```latex
\relative c' {
  \stemDown
  \slurUp
  \slurNotes
  \once \override Slur.eccentricity = #3.0
  \slurNotes
}
```

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```latex
\relative c'' {
  c2.
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  \override BreathingSign.text
  c2. \breathe c4
  \bar "|."}
```
Changing a single note’s size in a chord

Individual note heads in a chord can be modified with the \tweak command inside a chord, by altering the font-size property.

Inside the chord (within the brackets < >), before the note to be altered, place the \tweak command, followed by font-size and define the proper size like #\text{-2} (a tiny note head).

\relative c' {
  \tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  \markup { A tiny e } \markup { A big c }
}

A tiny e

A big c

Changing beam thickness and spacing

To make beams thicker or thinner alter the Beam.beam-thickness property. To adjust the spacing between beams alter the Beam.length-fraction property.

\relative f' {
  \override Beam.beam-thickness = #0.4
  \override Beam.length-fraction = #0.8
  c32 c c c
  \revert Beam.beam-thickness % 0.48 is default thickness
  \revert Beam.length-fraction % 1.0 is default spacing
  c32 c c c
  \override Beam.beam-thickness = #0.6
  \override Beam.length-fraction = #1.3
  c32 c c c
}

Changing form of multi-measure rests

If there are ten or fewer measures of rests, a series of longa and breve rests (called in German “Kirchenpausen” - church rests) is printed within the staff; otherwise a simple line is shown. This default number of ten may be changed by overriding the expand-limit property.

\relative c'' {
  \compressMMRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = #3
    R1*2 | R1*5 | R1*9
  }
}

}
Changing properties for individual grobs

The `applyOutput` command allows the tuning of any layout object, in any context. It requires a Scheme function with three arguments.

```scheme
(define (mc-squared grob grob-origin context)
  (let ((sp (ly:grob-property grob 'staff-position)))
    (ly:grob-set-property! grob 'stencil
      (grob-interpret-markup grob
        #{ lower
          \markup \lower #0.5
        )}))

case sp
 ((-5) "m")
 ((-3) "c ")
 ((-2) #{ teenage \bold 2 #})
  (else "bla")) #})

\relative c' {<d f g b>2
  \applyOutput Voice.NoteHead #mc-squared
  <d f g b>2
}
```

Changing text and spanner styles for text dynamics

The text used for crescendos and decrescendos can be changed by modifying the context properties `crescendoText` and `decrescendoText`.

The style of the spanner line can be changed by modifying the 'style property of `DynamicTextSpanner`. The default value is 'dashed-line, and other possible values include 'line, 'dotted-line and 'none.

```latex
\relative c'' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
  a2 a\mf
}
```
Changing the default text font family

The default font families for text can be overridden with `make-pango-font-tree`.

```
You may have to install additional fonts.

Red Hat Fedora

dejavu-fonts-all

Debian GNU/Linux, Ubuntu

fonts-dejavu-core
fonts-dejavu-extra
```

```
paper {
    % change for other default global staff size.
    myStaffSize = #20
    %
    run
        lilypond -dshow-available-fonts
        to show all fonts available in the process log.
    %)

    %(define fonts
        (make-pango-font-tree "DejaVu Serif"
            "DejaVu Sans"
            "DejaVu Sans Mono"
            (/ myStaffSize 20))
    )

    {
        g''4~\markup {DejaVu Serif: \bold bold
            \italic italic
            \italic \bold { bold italic }
        }
        g4_\markup {
            \override #'(font-family . sans) {
                DejaVu Sans: \bold bold
                \italic italic
                \italic \bold { bold italic }
            }
        }
        g''2~\markup {
            \override #'(font-family . typewriter) {
                DejaVu Sans Mono: \bold bold
                \italic italic
                \italic \bold { bold italic }
            }
        }
    }
```
Changing the staff size

Though the simplest way to resize staves is to use \#(set-global-staff-size xx), an individual staff’s size can be changed by scaling the properties 'staff-space and fontSize.

<<
\new Staff {
\relative c’ {
  \dynamicDown
c8\ff c c c c c c c
}
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} {
  \clef bass
c8 c c c c\f c c c
}
>>

Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

\score {
\new Staff \relative c’ {
  \tempo 4 = 160
c4 e g b
c4 b d c
  \set Score.tempoHideNote = ##t
  \tempo 4 = 96
d,4 fis a cis
d4 cis e d
}
\layout { }
}
Changing the text for sustain markings

Staff.pedalSustainStrings can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.

sustainNotes = { c4\sustainOn d e\sustainOff \sustainOn f \sustainOff }
Controlling the vertical ordering of scripts

The vertical ordering of scripts is controlled with the `script-priority` property. The lower this number, the closer it will be put to the note. In this example, the TextScript (the `sharp` symbol) first has the lowest priority, so it is put lowest in the first example. In the second, the `prall trill` (the Script) has the lowest, so it is on the inside. When two objects have the same priority, the order in which they are entered determines which one comes first.

```
\relative c'' {
  \once \override TextScript.script-priority = #-100
  a2\prall\markup { \sharp }
}
```

Controlling tuplet bracket visibility

The default behavior of tuplet bracket visibility is to print a bracket unless there is a beam of the same length as the tuplet.

To control the visibility of tuplet brackets, set the property `bracket-visibility` to either `#t` (always print a bracket), `if-no-beam` (only print a bracket if there is no beam), or `#f` (never print a bracket). The latter is in fact equivalent to omitting the `TupletBracket` object altogether from the printed output.

```
music = \relative c'' {
  \tuplet 3/2 { c16[ d e ] f8}
  \tuplet 3/2 { c8 d e }
  \tuplet 3/2 { c4 d e }
}
```

\new Voice {
  \relative c' {

Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The \relative c'' \{ \after 2*2/3 \turn c2( d4) r | \after 4 \turn c4.( d8) \after 4 \{ \once \set suggestAccidentals = ##t \once \override AccidentalSuggestion.outside-staff-priority = ##f \once \override AccidentalSuggestion.avoid-slur = #'inside \once \override AccidentalSuggestion.font-size = -3 \once \override AccidentalSuggestion.script-priority = -1 \once \hideNotes cis8\turn \noBeam \} d4.( e8) \}

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
% presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (\lambda (grob) (\textbf{grob-interpret-markup} grob
    #{
      \musicglyph "clefs.C"
      \translate #'(-3 . -2)
      \musicglyph "clefs.F"
    #}))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{,
  \key d\minor
  f bes, f bes,
}

Creating double-digit fingerings
Creating fingerings larger than 5 is possible.
\relative c' {
  c1\-10
  c1\-50
  c1\-36
  c1\-29
}

Creating text spanners
The \startTextSpan and \stopTextSpan commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the TextSpanner object to modify its output.
\paper { \ragged-right = #\#f }
Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn’t detect collisions between staves using \override Staff.Beam.collision-voice-only = ##t

\new PianoStaff <<
  \new Staff = up
  \relative c' {
    <<
      r4
      \override Stem.cross-staff = ##t
      \override Stem.length = #19 \%
      \override Stem.Y-offset = #-6 \%
  }
Tweaks and overrides

% upwards, so here we must lower the stem by the amount
% equal to the lengthening - in this case (19 - 7) / 2
% (7 is default stem length)

\e e e }  
{ s4 \\
\change Staff = "bottom"
\override NoteColumn.ignore-collision = ##t
c, c c
}

\new Staff = bottom
\relative c' {
  \clef bass
  \voiceOne
  g8 a g a g a g a
}

\new PianoStaff <<
\new Staff {
  <b d'>4 r d'16> e'8. g8 r! 
  e'8 f' g'4 e'2
}
\new Staff {
  \clef bass
  \voiceOne
  \autoBeamOff
  \crossStaff { <e g>4 e, g16 a8. c8} d
  \autoBeamOn
  g8 f g4 c2

Cross staff stems

This snippet shows the use of the Span_stem_engraver and \crossStaff to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

\layout {
  \context {
    \PianoStaff
    \consists "Span_stem_engraver"
  }
}

Custodes

Custodes may be engraved in various styles.
\layout { ragged-right = ##t }

\new Staff \with { \consists "Custos_engraver" } \relative c' { 
  \override Staff.Custos.neutral-position = #4

  \override Staff.Custos.style = #'hufnagel
  \ci "hufnagel" \break
  <d a' f'\>1

  \override Staff.Custos.style = #'medicaea
  \ci "medicaea" \break
  <d a' f'\>1

  \override Staff.Custos.style = #'vaticana
  \ci "vaticana" \break
  <d a' f'\>1

  \override Staff.Custos.style = #'mensural
  \ci "mensural" \break
  <d a' f'\>1
}
Customizing fretboard fret diagrams

Fret diagram properties can be set through 'fret-diagram-details. For FretBoard fret diagrams, overrides are applied to the FretBoards.FretBoard object. Like Voice, FretBoards is a bottom level context, therefore can be omitted in property overrides.

```ly
\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }
  #guitar-tuning
  ";x;1-1-(;3-2;3-3;3-4;1-1-);"

% shorthand
 oo = #(define-music-function
  (grob-path value)
  (list? scheme?)
  #\{ \once \override $grob-path = #value \})
<<
\new ChordNames {
  \chordmode { c1 | c | c | d }
}
\new FretBoards {
  % Set global properties of fret diagram
  \override FretBoards.FretBoard.size = #'1.2
  \override FretBoard.fret-diagram-details.finger-code = #'in-dot
  \override FretBoard.fret-diagram-details.dot-color = #'white
  \chordmode {
    c
      \oo FretBoard.size #'1.0
      \oo FretBoard.fret-diagram-details.barre-type #'straight
      \oo FretBoard.fret-diagram-details.dot-color #'black
      \oo FretBoard.fret-diagram-details.finger-code #'below-string
      c'
      \oo FretBoard.fret-diagram-details.barre-type #'none
      \oo FretBoard.fret-diagram-details.number-type #'arabic
      \oo FretBoard.fret-diagram-details.orientation #'landscape
      \oo FretBoard.fret-diagram-details.mute-string #"M"
      \oo FretBoard.fret-diagram-details.label-dir #LEFT
      \oo FretBoard.fret-diagram-details.dot-color #'black
      c'
      \oo FretBoard.fret-diagram-details.finger-code #'below-string
      \oo FretBoard.fret-diagram-details.dot-radius #0.35
      \oo FretBoard.fret-diagram-details.dot-position #0.5
      \oo FretBoard.fret-diagram-details.fret-count #3
    d
  }
}
\new Voice {
```
Customizing markup fret diagrams

Fret diagram properties can be set through \"fret-diagram-details\". For markup fret diagrams, overrides can be applied to the Voice.TextScript object or directly to the markup.

\<
\chords \{ c1 | c | c | d \}
\new Voice = "mel" {

Display bracket with only one staff in a system

If there is only one staff in one of the staff types ChoirStaff or StaffGroup, by default the bracket and the starting bar line will not be displayed. This can be changed by overriding collapse-height to set its value to be less than the number of staff lines in the staff.
Note that in contexts such as PianoStaff and GrandStaff where the systems begin with a brace instead of a bracket, another property has to be set, as shown on the second system in the example.

\score {
  \new StaffGroup <<
    \override StaffGroup.SystemStartBracket.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
    \new Staff {
      c'1
    }
  >>
}
\score {
  \new PianoStaff <<
    \override PianoStaff.SystemStartBrace.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
    \new Staff {
      c'1
    }
  >>
}

Displaying grob ancestry

When working with grob callbacks, it can be helpful to understand a grob’s ancestry. Most grobs have parents which influence the positioning of the grob. X- and Y-parents influence the horizontal and vertical positions for the grob, respectively. Additionally, each parent may have parents of its own.

Unfortunately, there are several aspects of a grob’s ancestry that can lead to confusion:

- The types of parents a grob has may depend on context.
- For some grobs, the X- and Y-parents are the same.
- A particular ancestor may be related to a grob in multiple ways.
- The concept of generations is misleading.

For example, the System grob can be both parent (on the Y-side) and grandparent (twice on the X-side) to a VerticalAlignment grob.

This macro prints (to the console) a textual representation of a grob’s ancestry.

When called this way:

\once \override NoteHead.before-line-breaking = #display-ancestry c

The following output is generated:

NoteHead
X,Y: NoteColumn
  X: PaperColumn
  X,Y: System
Y: VerticalAxisGroup
  X: NonMusicalPaperColumn
  X,Y: System
Y: VerticalAlignment
  X: NonMusicalPaperColumn
  X,Y: System

Dynamics custom text spanner postfix
Postfix functions for custom crescendo text spanners. The spanners should start on the first note of the measure. One has to use \mycresc, otherwise the spanner start will rather be assigned to the next note.

% Two functions for (de)crescendo spanners where you can explicitly
% give the spanner text.
Dynamics text spanner postfix

Custom text spanners can be defined and used with hairpin and text crescendos. `<` and `>` produce hairpins by default, `\cresc` etc. produce text spanners by default.

% Some sample text dynamic spanners, to be used as postfix operators
crpoco =
  #(make-music 'CrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text "cresc. poco a poco")

\relative c' {
  c4\cresc d4 e4 f4 |
  g4 a4\! b4\crpoco c4 |
  c4 d4 e4 f4 |
  g4 a4\! b4\< c4 |
  g4\dim a4 b4\decresc c4\!
}
Extending a TrillSpanner

For TrillSpanner, the minimum-length property becomes effective only if the set-spacing-rods procedure is called explicitly.

To do this, the springs-and-rods property should be set to ly:spanner::set-spacing-rods.

\relative c' {
  \key c\minor
  \time 2/4
  c16( as') c,-- des--.
  \once \override TrillSpanner.minimum-length = #15
  \once \override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
  \afterGrace es4
  \startTrillSpan { d16[ ( \stopTrillSpan es)] } } c( c' g es c g' es d
  \hideNotes
  c8)
}

Extending glissandi across repeats

A glissando which extends into several \alternative blocks can be simulated by adding a hidden grace note with a glissando at the start of each \alternative block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function which takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

repeatGliss = $(define-music-function (grace) (ly:pitch?) #{}
  % the next two lines ensure the glissando is long enough
  % to be visible
  \once \override Glissando.springs-and-rods
  = #ly:spanner::set-spacing-rods
  \once \override Glissando.minimum-length = #3.5
  \once \hideNotes
  \grace $grace \glissando
  #)}

\score {
  \relative c'' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
      { \repeatGliss f g2 e }
      { \repeatGliss f e2 d }
    }
  }
}

  c2\sostenutoOn c 
  c2\sostenutoOff c 
}
Tweaks and overrides

Flat Ties

The function takes the default Tie.stencil as an argument, calculating the result relying on the extents of this default.

Further tweaking is possible by overriding Tie.details.height-limit or with \shape. It’s also possible to change the custom-definition on the fly.

%% http://lsr.di.unimi.it/LSR/Item?id=1031

Horizontally aligning custom dynamics (e.g. "sempre pp", "piu f", "subito p")

Some dynamic expressions involve additional text, like “sempre pp”. Since dynamics are usually centered under the note, the \pp would be displayed way after the note it applies to.
To correctly align the “sempre pp” horizontally so that it is aligned as if it were only the \pp, there are several approaches:

- Simply use \once\override DynamicText.X-offset = #-9.2 before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...
- Add some padding (#:hspace 7.1) into the definition of your custom dynamic mark so that after LilyPond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.
- Shift the dynamic script \once\override DynamicText.X-offset = .... Drawback: \once\override is needed for every invocation!
- Set the dimensions of the additional text to 0 (using #:with-dimensions '(0 . 0) '(0 . 0)). Drawback: For LilyPond, “sempre” has no extent now. This means it might put other stuff there, causing collisions (which are not detected by LilyPond’s collision detection algorithm!). There also seems to be some spacing, so it is not exactly the same alignment as without the additional text.
- Add an explicit shift directly inside the scheme function for the dynamic script.
- Set an explicit alignment inside the dynamic script. By default, this won’t have any effect, only if one sets X-offset! Drawback: One needs to set DynamicText.X-offset, which will apply to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center of \pp.

\paper {
  ragged-right = ##f
  indent = 2.5\cm
}
%
% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
% etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }
%
% Solution 2: Using a dynamic script & shifting with
% \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

1) modify #:padding or #:extra-offset values (as shown in the first snippet)

2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

\harmonies = \chordmode
{
  a8:13
  % THE FOLLOWING IS THE COMMAND TO MOVE THE CHORD NAME
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s2.
  % THIS LINE IS THE SECOND METHOD
  s4 s4 b4:13
}

\score
{ <<
    \new ChordNames \harmonies
    \new Staff
    {a8~\markup { \fret-diagram "6-x;5-0;4-2;3-0;2-0;1-2;" } }
    % THE FOLLOWING IS THE COMMAND TO MOVE THE FRET DIAGRAM
    \once \override TextScript.extra-offset = #'(10 , 0)
    b4.-\markup { \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" } b4. a8\break
    % HERE IS THE SECOND METHOD
    << { a8 b4.- b4. a8}
      { s4 s4 s4~\markup { \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" } }
    >>
} >>

\begin{music}{A^9_{13}}

\begin{music}{x}
\end{music} \hspace{1cm} \begin{music}{x}
\end{music}

Inserting a caesura

Caesura marks can be created by overriding the ‘text’ property of the BreathingSign object.

A curved caesura mark is also available.
\begin{music}{relative c'}}
\end{music} \hspace{1cm} \begin{music}{relative c'}}
\end{music}

\begin{music}{c8 e4. \breathe g8. e16 c4}
\end{music} \hspace{1cm} \begin{music}{g8 e'4. \breathe g8. e16 c4}
\end{music}
### Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with `full-size-change`.

```latex
\relative c' {
    \clef "treble"
    c1
    \clef "bass"
    c1
    \clef "treble"
    c1
    \override Staff.Clef.full-size-change = ##t
    \clef "bass"
    c1
    \clef "treble"
    c1
    \revert Staff.Clef.full-size-change
    \clef "bass"
    c1
    \clef "treble"
    c1
}
```

![Example notation showing clef changes](image)

### Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```latex
\relative c'' {
    \override TextSpanner.bound-padding = #1.0
    \override TextSpanner.style = #'line
    \override TextSpanner.bound-details.right.arrow = ##t
    \override TextSpanner.bound-details.left.text = "fof"
    \override TextSpanner.bound-details.right.text = "gag"
    \override TextSpanner.bound-details.right.padding = #0.6
    \override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    \override Glissando.bound-details.right.arrow = ##t
    \override Glissando.arrow-length = #0.5
    \override Glissando.arrow-width = #0.25

    a8\startTextSpan gis a4 b\glissando b,
    g'4 c\stopTextSpan c2
}
```

![Example notation showing line arrows](image)
Making an object invisible with the 'transparent property

Setting the transparent property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```
\relative { 
  \time 2/4 
  << 
    { 
      \once \hide Stem 
      \once \override Stem.length = #8 
      b'8 ~ 8\noBeam 
      \once \hide Stem 
      \once \override Stem.length = #8 
      g8 ~ 8\noBeam 
    } 
    \\ 
    { 
      b8 g g e 
    } 
  } 

<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>\times 2 \n</td>
<td>\times 4 \n</td>
</tr>
<tr>
<td>-----------------</td>
<td>-----------------</td>
</tr>
</tbody>
</table>

Making glissandi breakable

Setting the breakable property to #t in combination with after-line-breaking allows a glissando to break if it occurs at a line break:

```
glissandoSkipOn = { 
  \override NoteColumn.glissando-skip = ##t 
  \hide NoteHead 
  \override NoteHead.no-ledgers = ##t 
} 

\relative c' { 
  \override Glissando.breakable = ##t 
  \override Glissando.after-line-breaking = ##t 
  f1\glissando | 
  \break 
  a4 r2. | 
  f1\glissando 
  \once \glissandoSkipOn 
  \break 
  a2 a4 r4 | 
}
Manually controlling beam positions

Beam positions may be controlled manually, by overriding the positions setting of the Beam grob.

\relative c' {
\time 2/4
% from upper staff-line (position 2) to center (position 0)
\override Beam.positions = #'(2 . 0)
c8 c
% from center to one above center (position 1)
\override Beam.positions = #'(0 . 1)
c8 c
}

Measure-centered bar numbers

For film scores, a common convention is to center bar numbers within their measure. This is achieved through setting the centerBarNumbers context property to true. When this is used, the type of the bar number grobs is CenteredBarNumber rather than BarNumber.

This example demonstrates a number of settings: the centered bar numbers are boxed and placed below the staves.

\layout {
\context {
\Score
centerBarNumbers = ##t
barNumberVisibility = #all-bar-numbers-visible
\override CenteredBarNumber.stencil
  = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
\override CenteredBarNumberLineSpanner.direction = #DOWN
}
}

\new StaffGroup <<
\new Staff \relative c' {
  d4-. f8( e d4) bes'-> |
Mensurstriche layout (bar lines between the staves)

*Mensurstriche*, bar lines between but not through staves, can be printed by setting `measureBarType` to "-span|" and using a grouping context that allows span bars, such as `StaffGroup`.

```
\layout {
  \context {
    \Staff
    measureBarType = "-span|
  }
}

music = \fixed c'' { 
  c1
d2 \section e2
  f1 \fine
}
```

```
\new StaffGroup <<
\new Staff \music
\new Staff \music
>>
```
Modifying the Ottava spanner slope

It is possible to change the slope of the Ottava spanner.

```latex
\relative c'' { 
  \override Staff.OttavaBracket.stencil = \ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details = #''{(left . ((Y . 0) 
    (attach-dir . ,LEFT) 
    (padding . 0) 
    (stencil-align-dir-y . ,CENTER))) 
  (right . ((Y . 5.0) ; Change the number here 
    (padding . 0) 
    (attach-dir . ,RIGHT) 
    (text . ,(make-draw-dashed-line-markup 
      (cons 0 -1.2)))})
  \override Staff.OttavaBracket.left-bound-info = 
    \ly:horizontal-line-spanner::calc-left-bound-info-and-text
  \override Staff.OttavaBracket.right-bound-info = 
    \ly:horizontal-line-spanner::calc-right-bound-info
}\ottava #1
  c1
  c'''1
}
```

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be over-ridden by using the prefer-dotted-right property of NoteCollision.

```latex
\new Staff \relative c' << 
  \override Staff.NoteCollision.prefer-dotted-right = ##f 
  f2. f4 
  \override Staff.NoteCollision.prefer-dotted-right = ##t 
  f2. f4 
} \infra { e4 e e e e e e e e e e e e e }
>>
```
Moving slur positions vertically

The vertical position of a slur can be adjusted using the positions property of Slur. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

\relative c' { 
  \stemDown
  e4( a)
  \override Slur.positions = #'(1 . 1) e4( a)
  \override Slur.positions = #'(2 . 2) e4( a)
  \override Slur.positions = #'(3 . 3) e4( a)
  \override Slur.positions = #'(4 . 4) e4( a)
  \override Slur.positions = #'(5 . 5) e4( a)
  \override Slur.positions = #'(0 . 5) e4( a)
  \stemUp
  \override Slur.positions = #'(-5 . -5) e4( a)
  \stemDown
  \revert Slur.positions
  e4( a)
}
Overriding articulations by type

Sometimes you may want to affect a single articulation-type. Although it is always possible to use `\tweak`, it might become tedious to do so for every single sign of a whole score. The following shows how to tweak articulations with a list of custom settings. One use-case might be to create a style sheet.

With 2.16.2 and above it is possible to put the proposed function, `\customScripts`, into a `\layout-block`.

% Code by David Nalesnik and Thomas Morley

```lisp
#(define-custom-script-tweaks ls)
(lambda (grob)
  (let* ((type (ly:event-property grob 'cause)
           (ly:grob-property grob 'articulation-type))
         (tweaks (assoc-ref ls type)))
    (if tweaks
        (for-each
         (lambda (x) (ly:grob-set-property! grob (car x) (cdr x)))
         tweaks)))))

customScripts =
#(define-music-function (settings) (list?)
#(\override Script.before-line-breaking =
  #(custom-script-tweaks settings)
```
revertCustomScripts = \revert Script.before-line-breaking

% Example:

% Predefine a list of desired tweaks.
#(define my-settings-1
'(  (staccato . ((color . (1 0 0))
         (padding . 0.5)))
  (accent . ((font-size . 0)
         (color . (1 0 0))))

Overriding articulations of distinct type

Sometimes you may want to affect a single articulation type. Although it is always possible to use `\tweak`, it might become tedious to do so for every single sign of a whole score. The following shows how to tweak articulations with a list of custom settings. One use case might be to create a style sheet.

With 2.16.2 it is possible to put the proposed function, `\customScripts`, into a `\layout` block.

% Code by David Nalesnik and Thomas Morley

```lilypond
#(define (custom-script-tweaks ls)
  (lambda (grob)
    (let* ((type (ly:prob-property (ly:grob-property grob 'cause) 'articulation-type))
           (tweaks (assoc-ref ls type)))
      (if tweaks
          (for-each
           (lambda (x) (ly:grob-set-property! grob (car x) (cdr x)))
           tweaks)))))

customScripts =
#(define-music-function (settings)(list?)
#{
  \override Script.before-line-breaking =
  #(custom-script-tweaks settings)
#})

revertCustomScripts = { \revert Script.before-line-breaking }
```

% Predefine a list of desired tweaks.

```lilypond
#(define my-settings-1
  '("staccato" . ((color . (1 0 0))(padding . 0.5)))
```
Percent repeat count visibility

Percent repeat counters can be shown at regular intervals by setting the context property `repeatCountVisibility`.

```
\relative c' {
  \set countPercentRepeats = ##t
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
  \repeat percent 10 { c1 } \break
  \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
}
```

\repeat percent 6 { c1 d1 }

\relative c' {
  \once \override Arpeggio.positions = #'(-5 . 0)
  \once \override Arpeggio.positions = #'(0 . 5)
  \once \override Arpeggio.positions = #'(-5 . 5)
  \once \override Arpeggio.positions = #'(0 . 5)
  \once \override Arpeggio.positions = #'(-5 . 5)
}

\relative c'' {
  \override MultiMeasureRest.staff-position = #~2
  \override MultiMeasureRest.staff-position = #0
  \override MultiMeasureRest.staff-position = #2
  \override MultiMeasureRest.staff-position = #3
  \override MultiMeasureRest.staff-position = #6
  \revert MultiMeasureRest.staff-position
  \break
% In two Voices, odd-numbered voices are under the top line
<< { R1 } \ \ { a1 } >>
% Even-numbered voices are under the bottom line
<< { a1 } \ \ { R1 } >>
% Multi-measure rests in both voices remain separate
<< { R1 } \ \ { R1 } >>

% Separating multi-measure rests in more than two voices
% requires an override
<< { R1 } \ \ { R1 } \ \ \\once \override MultiMeasureRest.staff-position = #0
{ R1 }
>>

% Using compressed bars in multiple voices requires another override
% in all voices to avoid multiple instances being printed
compressMMRests
<< \\revert MultiMeasureRest.direction
{ R1*3 }
\ \ \\revert MultiMeasureRest.direction
{ R1*3 }
>>

Positioning text markups inside slurs

Text markups need to have the outside-staff-priority property set to false in order to be printed inside slurs.
\relative c' {'
\override TextScript.avoid-slur = #'inside
\override TextScript.outside-staff-priority = ##f
\markup { \natural \align #-10 \d4.} \c2 c8
}
Printing bar numbers inside boxes or circles

Bar numbers can also be printed inside boxes or circles.

\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

  \override Score.BarNumber.font-size = #2

  \override Score.BarNumber.stencil = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
  \repeat unfold 5 { c1 }

  \override Score.BarNumber.stencil = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
  \repeat unfold 4 { c1 } \bar "|."}

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the direction property of MetronomeMark or RehearsalMark appropriately.

\layout {
  \indent = 0
  \ragged-right = ##f
}

{ % Metronome marks below the staff
  \override Score.MetronomeMark.direction = #DOWN
  \tempo 8. = 120
  c''1

  % Rehearsal marks below the staff
  \override Score.RehearsalMark.direction = #DOWN
  \mark \default
  c''1
}

\tempo \tempo 8. 8 = 120
A
Printing note names with and without an octave marker

The NoteNames context can be used to print the text value of notes. The printOctaveNames property turns on or off the representation of the octave of the note.

```latex
scale = \relative c' {
  a4 b c d
e4 f g a
}

\new Staff {
  \context NoteNames {\set printOctaveNames = ##f}
}
\new Staff {
  \context NoteNames {\set printOctaveNames = ##t}
}
```

Printing tuplet brackets on the note head side

Whichever option you choose for controlling the tuplet bracket visibility, it will show or hide the tuplet bracket irrespectively of tuplet bracket placement (stem side or note head side). However, when placing the tuplet bracket on the note head side some authors recommend always printing the tuplet bracket. The option visible-over-note-heads can be used to achieve this.

```latex
music = \relative c'' {
  \tupletNeutral \tuplet 3/2 { c16[ d e } f8
  \tupletUp \tuplet 3/2 { c8 d e }
}

\new Voice {
  \relative c' {
    \time 2/4
    \override TupletBracket.visible-over-note-heads = ##t
    \override Score.TextMark.non-musical = ##f
    { \textMark \markup "default" \music }
    \override TupletBracket.bracket-visibility = #'if-no-beam
    { \textMark \markup \typewriter "'if-no-beam" \music }
```
Proportional strict notespacing

If strict-note-spacing is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

\relative c' <<
\override Score.SpacingSpanner.strict-note-spacing = ##t
\set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
\new Staff {
  c8[ c \clef alto c c \grace{ d16 } c8 c] c4
  \grace{ c16[ c16] } c2
}
\new Staff {
  c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
  c1
}

Removing brace on first line of piano score

This snippet removes the first brace from a PianoStaff or a GrandStaff.

It may be useful when cutting and pasting the engraved image into existing music.

It uses \alterBroken.

\[\text{someMusic} = \{
  \once \override Staff.Clef.stencil = ##f
  \once \override Staff.TimeSignature.stencil = ##f
  \repeat unfold 3 c1 \break
  \repeat unfold 5 c1 \break
  \repeat unfold 5 c1
\}\]
\score {
  \new PianoStaff <<
    \new Staff = "right" \relative c' \someMusic
Removing connecting bar lines on StaffGroup, PianoStaff, or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves, i.e. a SpanBar is printed. This behaviour can be overridden on a staff-by-staff basis.

```latex
\relative c' {\new StaffGroup <<
  \new Staff {
    e1 | e
    \once \override Staff.BarLine.allow-span-bar = ##f
    e1 | e | e
  }
  \new Staff {
    c1 | c | c
    \once \override Staff.BarLine.allow-span-bar = ##f
    c1 | c
  }
  \new Staff {
    a1 | a | a | a | a
  }
}
Removing the first empty line

The first empty staff can also be removed from the score by setting the `VerticalAxisGroup` property `remove-first`. This can be done globally inside the `\layout` block, or locally inside the specific staff that should be removed. In the latter case, you have to specify the context (`Staff` applies only to the current staff) in front of the property.

The lower staff of the second staff group is not removed, because the setting applies only to the specific staff inside of which it is written.

```latex
\layout {
  \context {
    \Staff \RemoveEmptyStaves
    \% To use the setting globally, uncomment the following line:
    \% \override VerticalAxisGroup.remove-first = ##t
  }
}
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    \% To use the setting globally, comment this line,
    \% uncomment the line in the \layout block above
    \override Staff.\VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
>>
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
}
Rest styles

Rests may be used in various styles.

\new Staff \relative c { 
  \omit Score.TimeSignature 
  \cadenzaOn

  \override Staff.Rest.style = #'mensural 
  r\maxima^{\markup \texttt{typewriter} \{ mensural \} } 
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128 
  \bar "" 
  \break

  \override Staff.Rest.style = #'neomensural 
  r\maxima^{\markup \texttt{typewriter} \{ neomensural \} } 
  r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128 
  \bar "" 
  \break 

  \override Staff.Rest.style =#'classical 
  r\maxima^{\markup \texttt{typewriter} \{ classical \} } 
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128 
  \bar "" 
  \break

  \override Staff.Rest.style =#'z 
  r\maxima^{\markup \texttt{typewriter} \{ z-style \} } 
  r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128 
  \bar "" 
  \break }
Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians.

The standard support for this using \repeat percent is unsuitable here since the first beat has to be an ordinary note or rest.

This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the r4 in the definitions with a rest of the appropriate duration).

```
% Macro to print single slash
rs = {
  \once \override Rest.stencil = \ly:percent-repeat-interface::beat-slash
  \once \override Rest.thickness = #0.48
  \once \override Rest.slope = #1.7
  r4
}

% Function to print a specified number of slashes
comp = #(define-music-function (count) (integer?)
  #{
    \override Rest.stencil = \ly:percent-repeat-interface::beat-slash
    \override Rest.thickness = #0.48
    \override Rest.slope = #1.7
  }
```
Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `break-align-orders` property of the `BreakAlignment` grob.

The value of `break-align-orders` is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving key-cancellation before staff-bar; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

\new Staff {
  \override Score.BreakAlignment.break-align-orders =
    ##((left-edge ambitus breathing-sign clef staff-bar
      key-cancellation key-signature time-signature custos)
        (left-edge ambitus breathing-sign clef key-cancellation
          staff-bar key-signature time-signature custos)
        (left-edge ambitus breathing-sign clef key-cancellation
          key-signature staff-bar time-signature custos))
    \key des \major
    c'1
    \bar "||"
    \key bes \major
    c'1
}

Setting hairpin behavior at bar lines

If the note which ends a hairpin falls on a downbeat, the hairpin stops at the bar line immediately preceding. This behavior can be controlled by overriding the `to-barline` property.
Setting system separators

System separators can be inserted between systems. Any markup can be used, but \slashSeparator has been provided as a sensible default.

\paper {
  \system-separator-markup = \slashSeparator
  \line-width = 120
}\n
notes = \relative c' {
  c1 | c \break
  c1 | c \break
  c1 | c
}\n
\book {
  \score {
    \new GrandStaff <<
    \new Staff \notes
    \new Staff \notes
    >>
  }
}\n
Tweaks and overrides
Showing the same articulation above and below a note or chord

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, \c4_\fermata^\fermata only shows a fermata below. The fermata above gets simply ignored.

However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, 'add-stem-support would be required.

The solution is thus to write the note as a chord and add the articulations inside of <...>, using the direction modifiers ^ and _ as appropriate.

```latex
\relative c' {
  <>^"Wrong"
  c2_\fermata^\fermata % The second fermata is ignored!
  <e d'>2^\flageolet^\flageolet

  \stopStaff s1 \startStaff

  <>"Works if written inside a chord"
  <e \flageolet d'\flageolet>2
  <e \flageolet d'\flageolet>2
  <e \flageolet\flageolet>2
  <e \fermata\fermata>2
}
```

Wrong

Works if written inside a chord

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```latex
\stringNumberSpanner =
  #(define-music-function (StringNumber) (string?))
  #{
    \override TextSpanner.style = #'solid
    \override TextSpanner.font-size = #-5
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    \override TextSpanner.bound-details.left.text =
    \markup { \circle \number $StringNumber }
  }
```

```latex
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
```
Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘ignore-collision’ property of the NoteColumn object to #t. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

\override NoteColumn.ignore-collision = #t

Time signature in parentheses

The time signature can be enclosed within parentheses.

\override Staff.TimeSignature.stencil = #(lambda (grob) (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
\time 2/4

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

\override Staff.TimeSignature.stencil = #(lambda (grob)

\stemUp
g c e

Time signature printing only the numerator as a number (instead of the fraction)
Sometimes, a time signature should not print the whole fraction (for example, 7/4), but only the numerator (digit 7 in this case). This can be easily done by using \override Staff.TimeSignature.style = #'single-digit to change the style permanently. By using \revert Staff.TimeSignature.style, this setting can be reversed. To apply the single-digit style to only one time signature, use the \override command and prefix it with a \once.
\relative c'' { 
\time 3/4
\relative c |
\override Staff.TimeSignature.style = #'single-digit
\time 2/4

\once \override Staff.TimeSignature.style = #'single-digit
\time 5/4
c4 c c c c 
\time 2/4
c4 c 
}
Tweaking clef properties

Changing the Clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines middleCClefPosition must also be specified, with positive or negative values moving middle C up or down respectively, relative to the staff’s center line.

For example, \clef "treble_8" is equivalent to setting the clefGlyph, clefPosition (the vertical position of the clef itself on the staff), middleCPosition and clefTransposition. Note that when any of these properties (except middleCPosition) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

{ % The default treble clef
\key f \major
\note c'\n% The standard bass clef
\clef "bass_8"
\key f \major
\note c'\n}
Tweaks and overrides

\set Staff.clefGlyph = \"clefs.F\"
\set Staff.clefPosition = 2
\set Staff.middleCPosition = 6
\set Staff.middleCClefPosition = 6
\key g \major c'1
% The baritone clef
\set Staff.clefGlyph = \"clefs.C\"
\set Staff.clefPosition = 4
\set Staff.middleCPosition = 4
\set Staff.middleCClefPosition = 4
\key f \major c'1
% The standard choral tenor clef
\set Staff.clefGlyph = \"clefs.G\"
\set Staff.clefPosition = -2
\set Staff.clefTransposition = -7
\set Staff.middleCPosition = 1
\set Staff.middleCClefPosition = 1
\key f \major c'1
% A non-standard clef
\set Staff.clefPosition = 0
\set Staff.clefTransposition = 0
\set Staff.middleCPosition = -4
\set Staff.middleCClefPosition = -4
\key g \major c'1 \break

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = \"clefs.F\"
\set Staff.clefPosition = 2
\set Staff.clefGlyph = \"clefs.G\"
\set Staff.clefGlyph = \"clefs.C\"
\set Staff.clefTransposition = 7
\set Staff.clefTransposition = 0
\set Staff.clefPosition = 0
\set Staff.clefPosition = 0
\set Staff.middleCPosition = 0
\set Staff.middleCClefPosition = 0
%
% Return to the normal clef:

\set Staff.middleCPosition = 0
\key g \major c'1
}
Tweaks and overrides

The layout of grace expressions can be changed throughout the music using the functions `add-grace-property` and `remove-grace-property`.

The following example undefines the Stem direction for this grace, so that stems do not always point up, and changes the default note heads to crosses.

\relative c' {
  \new Staff {
    $\text{(remove-grace-property 'Voice 'Stem 'direction)}$
    $\text{(add-grace-property 'Voice 'NoteHead 'style 'cross)}$
    \text{\new Voice { }
        \acciaccatura { f16 } g4
        \grace { d16 e } f4
        \appoggiatura { f,32 g a } e2
    }
  }
}

Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the stencil property of Flag. Valid values are `modern-straight-flag`, `old-straight-flag` and `flat-flag`.

testnotes = {
  \autoBeamOff
  c8 d16 c32 d64 \acciaccatura { c8 } d64 r4
}

\score {
  \relative c' {
    \time 2/4
    \testnotes
    \override Flag.stencil = #modern-straight-flag
    \testnotes
    \override Flag.stencil = #old-straight-flag
    \testnotes
  }
}
Using `ly:grob-object` to access grobs with `\tweak`

Some grobs can be accessed “laterally” from within another grob’s callback. These are usually listed as “layout objects” in the “Internal properties” section of a grob-interface. The function `ly:grob-object` is used to access these grobs.

Demonstrated below are some ways of accessing grobs from within a NoteHead callback, but the technique is not limited to NoteHeads. However, the NoteHead callback is particularly important, since it is the implicit callback used by the `\tweak` command.

The example function defined below (“display-grobs”) is probably not that useful, but it demonstrates that the grobs are indeed being accessed.

Example console output:

```
#Grob Accidental () #Grob Stem
#(define (notehead-get-accidental notehead)
  ;; notehead is grob
  (ly:grob-object notehead 'accidental-grob))

#(define (notehead-get-arpeggio notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'arpeggio)))

#(define (notehead-get-notecolumn notehead)
  ;; notehead is grob
  (ly:grob-parent notehead X))

#(define (notehead-get-stem notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'stem)))

#(define (display-grobs notehead)
  ;; notehead is grob
```
(let ((accidental (notehead-get-accidental notehead))
    (arpeggio (notehead-get-arpeggio notehead))
    (stem (notehead-get-stem notehead)))
  (format (current-error-port) "-2\&-a\n" (make-string 20 #\-))
  (for-each
    (lambda (x) (format (current-error-port) "-a\n" x))
    (list accidental arpeggio stem))))

\relative c' {
  %% display grobs for each note head:
  \override NoteHead.before-line-breaking = #display-grobs
  <c
  %% or just for one:
  \tweak before-line-breaking #display-grobs
  es
  g>1\arpeggio
}

Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

parallelogram = #(ly:make-stencil (list 'embedded-ps
  "gsave
    currentpoint translate
    newpath
    0 0.25 moveto
    1.3125 0.75 lineto
    1.3125 -0.25 lineto
    0 -0.75 lineto
    closepath
    fill
    grestore"
  )
  (cons 0 1.3125)
  (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

\relative c'' {
  \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d
}
Using the \tweak command to tweak individual grobs

With the \tweak command, every grob can be tuned directly. Here are some examples of available tweaks.

\relative c' {
  \time 2/4
  \set fingerOrientations = #'(right)
  <
    \tweak fontSize #3 c
    \tweak color #red d\tweak fontSize #8 -4
    \tweak style #'cross g
    \tweak duration-log #2 a
  >2
}

Vertically aligned dynamics and textscripts

All DynamicLineSpanner objects (hairpins and dynamic texts) are placed with their reference line at least 'staff-padding from the staff, unless other notation forces them to be farther. Setting 'staff-padding to a sufficiently large value aligns the dynamics.

The same idea, together with \textLengthOn, is used to align the text scripts along their baseline.

\set Staff.padding = #3
\textLengthOn = #1

music = \relative c' {
  a'2\p b\f
  e4\p f\f> g, b\p
  c2\markup { \huge gorgeous } c\markup { \huge fantastic }
}

\override DynamicLineSpanner.staff-padding = #3
\textLengthOn = #1
\override TextScript.staff-padding = #1

Changing the staff size

Though the simplest way to resize staves is to use \#(set-global-staff-size xx), an individual staff’s size can be changed by scaling the properties 'staff-space and fontSize.

\new Staff {
  \relative c'' {
    \dynamicDown
    c8\ff c c c c c c c
  }
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} {
  \clef bass
  c8 c c c c\f c c c
}

>>
Clip systems

This code shows how to clip (extract) snippets from a full score.

This file needs to be run separately with -dclip-systems; the snippets page may not adequately show the results. The result will be files named ‘base-from-start-to-end[-count].eps’.

If system starts and ends are included, they include extents of the System grob, e.g., instrument names.

Grace notes at the end point of the region are not included.

Regions can span multiple systems. In this case, multiple EPS files are generated.

\%(ly:set-option 'clip-systems)
\%(define output-suffix "1")

origScore = \score {
  \relative c' {
    \new Staff \with { \instrumentName = "Instrument" }

Creating blank staves

To create blank staves, generate empty measures then remove the Bar_number_engraver from the Score context, and the Time_signature_engraver, Clef_engraver and Bar_engraver from the Staff context.

```latex
#(set-global-staff-size 20)

\score {
  \repeat unfold 12 { s1 \break }
}
\layout {
  indent = 0\in
  \context {
    \Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}

% uncomment these lines for "letter" size
%
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%

% uncomment these lines for "A4" size
%
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
```
Demonstrating all headers

All header fields with special meanings.

Section “Titles and headers” in Notation Reference

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

% first, define a variable to hold the formatted date:

\[ \text{date} = \text{strftime} \ "\%d-%m-%Y" \ \text{(localtime (current-time))} \]

% use it in the title block:

\header {
  \title = "Including the date!"
  \subtitle = \date
}

\score {
  \relative c'' {
    c4 c c c
  }
}

% and use it in a \markup block:

\markup {
  \date
}

Including the date!
20-07-2024

20-07-2024

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the Staff.InstrumentName.self-alignment-X property. The \layout variables indent and short-indent define the space in which the instrument names are aligned before the first and the following systems, respectively.

}
Outputting the version number

It is possible to print the version number of LilyPond in markup.
\markup { Processed with LilyPond version \( \lfloor \text{lilypond-version} \rfloor \) }

Processed with LilyPond version 2.24.4
Spacing

Section “Spacing issues” in Notation Reference

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
  c4 d e f
g4 f e d
c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
  \new Voice = melody \relative c' {
    c4 d e f
g4 f e d
c1
  }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
  \override VerticalAxisGroup.nonstaff-relatedstaff-spacing = #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa }
>>

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff; that behavior, however, may be disabled. Attention needs to be paid to situations where fingerings and stems are in the same direction: by default, fingerings will avoid only beamed stems. That setting can be changed to avoid no stems or all stems; the following example demonstrates these two options, as well as how to go back to the default behavior.

\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingering.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 g'-0
  a8[-1 b]-2 g-0 r
  \override Fingering.add-stem-support = ##f
Page label

Page labels may be placed inside music or at top-level, and referred to in markups.

```latex
\label license
\markup "This snippet is available under the Creative Commons Public Domain Dedication license."

{\repeat volta 2 {
  \label startRepeat
  \repeat unfold 20 { c'2 2 }
  \pageBreak 2 2
}
\textEndMark \markup {
  \with-link #'startRepeat \line {
    To page \page-ref #'startRepeat "0" "?"
  }
}
}
\markup {
  See page \page-ref #'license "0" "?" for licensing information.
}

This snippet is available under the Creative Commons Public Domain Dedication license.
Proportional strict notespacing

If strict-note-spacing is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```plaintext
\relative c' {  
  \override Score.SpacingSpanner.strict-note-spacing = ##t  
  \set Score.proportionalNotationDuration = #(ly:make-moment 1/16)  
  new Staff {  
    c8[ c \clef alto c c \grace { d16 } c8 c] c4  
    c2 \grace { c16[ c16] } c2  
  }  
  new Staff {  
    c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4  
    c1  
  }  
} >>
```

Vertically aligned dynamics and textscripts

All DynamicLineSpanner objects (hairpins and dynamic texts) are placed with their reference line at least `staff-padding from the staff, unless other notation forces them to be farther. Setting `staff-padding to a sufficiently large value aligns the dynamics.

The same idea, together with `textLengthOn, is used to align the text scripts along their baseline.

```plaintext
music = \relative c' {  
  a'2\p b\f  
  e4\p f\f\> g, b\p
```
Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties alignBelowContext and alignAboveContext to control the positioning of lyrics and ossias.

```music
\paper{
  ragged-right = ##t
}

\relative c' <<
  \new Staff = "1" { c4 c s2 }
  \new Staff = "2" { c4 c s2 }
  \new Staff = "3" { c4 c s2 }
  \skip 2
  \lyrics {
    \set alignBelowContext = "1"
    lyrics4 below
  }
  \new Staff \with {
    alignAboveContext = "3"
    fontSize = #-2
    \override StaffSymbol.staff-space = #(magstep -2)
    \remove "Time_signature_engraver"
  }
  \tuplet 6/4 {
    \override TextScript.padding = #3
    c8[^"ossia above" d e d e f]
  }
}
>>}
>>

MIDI

Section “Creating MIDI output” in Notation Reference

Changing MIDI output to one channel per voice

When outputting MIDI, the default behavior is for each staff to represent one MIDI channel, with all the voices on a staff amalgamated. This minimizes the risk of running out of MIDI channels, since there are only 16 available per track.

However, by moving the Staff_performer to the Voice context, each voice on a staff can have its own MIDI channel, as is demonstrated by the following example: despite being on the same staff, two MIDI channels are created, each with a different midiInstrument.

\score { 
  \new Staff << 
    \new Voice \relative c''' { 
      \set midiInstrument = #"flute" 
      \voiceOne 
      \key g \major 
      \time 2/2 
      r2 g="Flute" ~ 
      g fis ~ 
      fis4 g8 fis e2 ~ 
      e4 d8 cis d2 
    } 
    \new Voice \relative c'' { 
      \set midiInstrument = #"clarinet" 
      \voiceTwo 
      b1="Clarinet" 
      a2. b8 a 
      g2. fis8 e 
      fis2 r 
    } 
  >> 
  \layout { } 
  \midi { 
    \context { 
      \Staff 
      \remove "Staff_performer" 
    } 
    \context { 
      \Voice 
      \consists "Staff_performer" 
    } 
    \tempo 2 = 72 
  } 
}
Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

```
\score { 
  \new Staff \relative c' { 
    \tempo 4 = 160 
    c4 e g b 
    c4 b d c 
    \set Score.tempoHideNote = ##t 
    \tempo 4 = 96 
    d,4 fis a cis 
    d4 cis e d 
  } 
  \layout { } 
  \midi { } 
}
```

Creating custom dynamics in MIDI output

The following example shows how to create a dynamic marking, not included in the default list, and assign it a specific value so that it can be used to affect MIDI output.

The dynamic mark \(rfz\) is assigned a value of 0.9.

```
#(define (myDynamics dynamic)
  (if (equal? dynamic "rfz")
      0.9
      (default-dynamic-absolute-volume dynamic)))
```

```
\score { 
  \new Staff { 
    \set Staff.midiInstrument = "cello" 
    \set Score.dynamicAbsoluteVolumeFunction = #myDynamics 
    \new Voice { 
      \relative { 
        a'4\pp b c-\rfz 
      } 
    } 
  } 
  \layout { } 
  \midi { } 
}
```
Customized drum notation in printed and MIDI output

Customized drum “pitch” names (suitable for a custom drum style, for example) may be used both in printed and MIDI output by defining such variables as drumPitchNames, drumStyleTable and midiDrumPitches, as demonstrated here. In short, this snippet:

- defines some "pitch" names,
- defines how they will be rendered,
- tells LilyPond to use them for layout,
- assigns pitches to the names,
- tells LilyPond to use them for MIDI output.

%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#custom-percussion-staves

```lilypond
%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#custom-percussion-staves

%% To use custom drum pitch names for your score and midi you need to follow
%% this route:
%%
%% %%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%% LAYOUT:
%% %%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%%
%% (1) Define a name and put it in 'drumPitchNames'
%%
%% This can be done at toplevel with
%%
%% drumPitchNames.my-name = #'my-name
%%
%% It's possible to add an alias as well.
%%
%% (2) Define how it should be printed
%%
%% Therefore put them into a top-level list, where each entry should
%%
%% be of the form:
%%
%% (my-name
%%  note-head-style-or-default
%%  articulation-type-or-#f
%%  staff-position)

%% Example:
%%
%% #(define my-style
%%  '(my-name default tenuto -1)
%%   ; ...
%% ))

%% (3) Tell LilyPond to use these custom definitions, with
%%
%% drumStyleTable = #(alist->hash-table my-style)
%%
%% in a \layout or \with block

%% Now we're done for layout. Here is a short but complete example:
%%
%% \new DrumStaff
%% \with { drumStyleTable = #(alist->hash-table my-style) }
%% \drummode { my-name }

%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
```
%% MIDI:
%%%%%%%%%%%%%%%%
%% %%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%% 
%% (1) Again at top-level, assign a pitch to your custom note name
%% midiDrumPitches.my-name = ges
%% Note that you have to use the name, which is in drumPitchNames, no alias
%% (2) Tell LilyPond to use this pitch(es), with
%% drumPitchTable = #(alist->hash-table midiDrumPitches)
%% 
%% Example:
%% \score { 
%% \new DrumStaff 
%% \with { 
%% drumStyleTable = #(alist->hash-table my-style)
%% drumPitchTable = #(alist->hash-table midiDrumPitches)
%% } 
%% \drummode { my-name4 } 
%% \layout {} 
%% \midi {} 
%% }
%% 
%%%%%%%%%%%%%%%%
%% TESTING
%%%%%%%%%%%%%%%%
%% To test whether all is fine, run the following sequence in terminal:
%% lilypond my-file.ly
%% midi2ly my-file.midi
%% gedit my-file-midi.ly
%% 
%% This will do the following:
%% 1. create pdf and midi
%% 2. transform the midi back to a .ly-file
%% (note: midi2ly is not always good in correctly identifying enharmonic pitches)
%% 3. open this file in gedit (or use another editor)
%% Now watch what you've got.
%% 
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
%% FULL EXAMPLE

Replacing default MIDI instrument equalization

The default MIDI instrument equalizer can be replaced by setting the instrumentEqualizer property in the Score context to a user-defined Scheme procedure that uses a MIDI instrument name as its argument along with a pair of fractions indicating the minimum and maximum volumes respectively to be applied to that specific instrument.

The following example sets the minimum and maximum volumes for flute and clarinet respectively:

\begin{verbatim}
#(define my-instrument-equalizer-alist '())
(set! my-instrument-equalizer-alist (append '(
   ("flute" . (0.7 . 0.9))
   ("clarinet" . (0.3 . 0.6)))
   my-instrument-equalizer-alist))

#(define (my-instrument-equalizer s)
   (let ((entry (assoc s my-instrument-equalizer-alist)))
      (if entry (cdr entry))))

score {
<<
  new Staff {
    key g \major
    time 2/2
    set Score.instrumentEqualizer = #my-instrument-equalizer
    set Staff.midiInstrument = "flute"
    new Voice \relative {
      r2 g'\mp g fis-
      4 g8 fis e2-
      4 d8 cis d2
    }
  }

  new Staff {
    key g \major
    set Staff.midiInstrument = "clarinet"
    new Voice \relative {
      b'1\p a2. b8 a
      g2. fis8 e
      fis2 r
    }
  }
>>
layout { }
midi { }\end{verbatim}
Templates

Ancient notation template – modern transcription of gregorian music

This example demonstrates how to do modern transcription of Gregorian music. Gregorian music has no measure, no stems; it uses only half and quarter note heads, and special marks, indicating rests of different length.

```
\include "gregorian.ly"

chant = \relative c' {
  \set Score.timing = ##f
  f4 a2 divisioMinima
  g4 b a2 f2 divisioMaior
  g4( f) f( g) a2 finalis
}

verba = \lyricmode {
  Lo -- rem ip -- sum do -- lor sit a -- met
}

\score {
  \new GregorianTranscriptionStaff <<
  \new GregorianTranscriptionVoice = "melody" \chant
  \new GregorianTranscriptionLyrics = "one" \lyricsto melody \verba
  >>
}

And here's line three of the first verse
And the last line of the same

Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments are notated in \key c \major. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a \transpose section.

Piano template (simple)

Here is a simple piano staff with some notes.

```
upper = \relative c'' { \\
\clef treble \\
\key c \major \\
\time 4/4 \\
  a4 b c d \\
}
```

```
lower = \relative c { \\
\clef bass \\
\key c \major \\
\time 4/4 \\
  a2 c \\
}
Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```latex
\begin{verbatim}
upper = \relative c'\ '' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score {
  \new PianoStaff \with { \instrumentName = "Piano" }
    \new Staff = "upper" \upper
    \new Staff = "lower" \lower
  >>
  \layout { }
  \midi { }
}
\end{verbatim}
```
Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

```latex
melody = \relative c'' {\
  \clef treble\
  \key c \major\
  \time 4/4\
  a b c d\
}

text = \lyricmode {\
  Aaa Bee Cee Dee\
}

upper = \relative c'' {\
  \clef treble\
  \key c \major\
  \time 4/4\
  a4 b c d\
}

lower = \relative c {\
  \clef bass\
  \key c \major\
  \time 4/4\
  a2 c\
}

\score {\
  \new Voice = "mel" { \autoBeamOff \melody }\

Score for diatonic accordion

A template to write a score for a diatonic accordion.

- There is a horizontal staff indicating if the accordion must be pushed (thick line) or pulled (thin line)
- There is a small rhythmic staff with lyrics that describes the bass buttons to press. The bar lines are made from gridlines
- The tabulator staff for diatonic accordions shows the geographic position of the buttons and not (as for every other instrument) the pitch of the notes; the keys on the melody-side of the accordion are placed in three columns and about 12 rows
In the tabulator staff notation the outermost column is described with notes between lines, the innermost column is described with notes between lines and a cross as accidental, and the middle column is described with notes on a line, whereby the row in the middle is represented on the middle line in the staff.

Some words to transpose piano notes to the diatonic accordion:

1. Every diatonic accordion is built for some keys only (for example, for the keys of C major and F major), so it is important to transpose a piano melody to match one of these keys. Transpose the source code, not only the output because this code is required later on to translate it once more to the tabulator staff. This can be done with the command displayLilyMusic.

2. You have to alternate the push- and pull-direction of the accordion regularly. If the player has a too long part to pull the accordion gets broken. On the other hand, some harmonies are only available in one direction. Considering this, decide which parts of the melody are the push-parts and which the pull-parts.

3. For each pull- or push-part translate the piano notes to the according tabulature representation.

\verse = \lyricmode { Wie gross bist du! Wie gross bist du! }

  \ germanChords
  \ set chordChanges = ###t
  bes8 bes8 bes8
  es2 f
  bes1
}

\NoStem = { \hide Stem }
\NoNoteHead = \hide NoteHead
\ZeroBeam = \override Beam.positions = #'(0 . 0)

\staffTabLine = \new Staff \with {
  \remove "Time_signature_engraver"
  \remove "Clef_engraver"
} {
  \override Staff.StaffSymbol.line-positions = '#(0)
  \hspace{0.5cm} % Shows one horizontal line. The vertical line
  \hspace{0.5cm} % (simulating a bar-line) is simulated with a gridline
  \set Staff.midiInstrument = #"choir aahs"
  \key c \major
  \relative c' '{
    \hspace{0.5cm} % disable the following line to see the noteheads while writing the song
    \NoNoteHead
    \override NoteHead.no-ledgers = ###t
    \hspace{0.5cm} % The beam between 8th-notes is used to draw the push-line
    \hspace{0.5cm} % How to fast write the push-lines:
    \hspace{0.5cm} % 1. write repeatedly 'c c c c c c c c |' for the whole length of the song
    \hspace{0.5cm} % 2. uncomment the line \NoNoteHead
    \hspace{0.5cm} % 3. compile
    \hspace{0.5cm} % 4. Mark the positions on which push/pull changes.
    \hspace{0.5cm} % In the score-picture click on the position
the push- or pull-part starts
(on the noteHead, the cursor will change to a hand-icon).
The cursor in the source code will jump just at this position.
a) If a push-part starts there, replace the 'c' by an 'e[

b) If a pull-part starts there, replace the 'c' by an 's'

5. Switch into 'overwrite-mode' by pressing the 'ins' key.

6. For the pull-parts overwrite the 'c' with 's'

7. For every push-part replace the last 'c' with 'e]'

8. Switch into 'insert-mode' again

9. At last it should look like e.g.

(s s e[ c | c c c c c c | c c c c c c] s s)

10. re-enable the line \NoNoteHead

\autoBeamOff
\ZeroBeam
s8 s s e[ c c c c c c] | s s s s s

Single staff template with notes, lyrics, and chords

This template allows the preparation of a song with melody, words, and chords.

\begin{verbatim}
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

\text = \lyricmode {
  Aaa Bee Cee Dee
}

harmonies = \chordmode {
  a2 c
}

\score {
  \new ChordNames {
    \set chordChanges = ##t
    \harmonies
  }
  \new Voice = "one" { \autoBeamOff \melody }
  \new Lyrics \lyricsto "one" \text
}
\end{verbatim}
Single staff template with notes, lyrics, chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

\begin{verbatim}
verseI = \lyricmode {
\set stanza = "1."
This is the first verse
}

verseII = \lyricmode {
\set stanza = "2."
This is the second verse.
}

theChords = \chordmode {
% insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {
\key c \major
\clef treble
% Type notes for melody here
  c4 d8 e f4 g
\bar "|." 
}

\score {
<<
  \context ChordNames { \theChords }
  \context FretBoards { \theChords }
  \new Staff {
    \context Voice = "voiceMelody" { \staffMelody }
  }
  \new Lyrics = "lyricsI" {
    \lyricsto "voiceMelody" \verseI 
  }
  \new Lyrics = "lyricsII" {
    \lyricsto "voiceMelody" \verseII 
  }
>>
\layout {} 
\midi { }
}\end{verbatim}
Single staff template with notes and chords

Want to prepare a lead sheet with a melody and chords? Look no further!

```latex
\begin{verbatim}
melody = \relative c' { \\
\clef treble \\
\key c \major \\
\time 4/4 \\
  f4 e8 [c] d4 g \\
a2 ~ a }

harmonies = \chordmode { \\
c4:m f:min7 g:maj c:aug \\
d2:dim b4:5 e:sus 
}
\end{verbatim}
```

```
\begin{verbatim}
\score { \\
<< \\
  \new ChordNames { \\
    \set chordChanges = ##t \\
    \harmonies \\
  } \\
  \new Staff \melody \\
>> \\
  \layout{ } \\
  \midi{ }
}
```

1. This is the first verse
2. This is the second verse.

Single staff template with notes and lyrics

This small template demonstrates a simple melody with lyrics. Cut and paste, add notes, then words for the lyrics. This example turns off automatic beaming, which is common for vocal parts. To use automatic beaming, change or comment out the relevant line.

```latex
\begin{verbatim}
melody = \relative c' { \\
\clef treble \\
\key c \major \\
\time 4/4 \\
  Cm Fm7 G^7 C+ D^9 B^5 E^{sus4}
```
```
Single staff template with only notes

This very simple template gives you a staff with notes, suitable for a solo instrument or a melodic fragment. Cut and paste this into a file, add notes, and you’re finished!

```
\score{
  \new Voice = "one" {
    \autoBeamOff
    \melody
  }
  \new Lyrics \lyricsto "one" \text

  \layout { }
  \midi { }
}

\score

\new Staff \melody
\layout { }
\midi { }
```

String quartet template (simple)

This template demonstrates a simple string quartet. It also uses a \global section for time and key signatures

```
global= {

  \new Voice = "quartet" {
    \autoBeamOff
    \melody
  }
  \new Lyrics \lyricsto "quad" \text

  \layout { }
  \midi { }

  \global = {
    \time 4/4
    \key c \major
  }
```

Aaa Bee Cee Dee

Aaa Bee Cee Dee
\time 4/4
\key c \major
}

violinOne = \new Voice \relative c'' {
c2 d
e1
\bar "|."}
}

violinTwo = \new Voice \relative c'' {
g2 f
e1
\bar "|."}
}

viola = \new Voice \relative c' {
\clef alto
e2 d
c1
\bar "|."}
}

cello = \new Voice \relative c' {
\clef bass
c2 b
a1
\bar "|."}
}

\score {
\new StaffGroup <<
\new Staff \with { instrumentName = "Violin 1" }
<< \global \violinOne >>
\new Staff \with { instrumentName = "Violin 2" }
<< \global \violinTwo >>
\new Staff \with { instrumentName = "Viola" }
<< \global \viola >>
\new Staff \with { instrumentName = "Cello" }
<< \global \cello >>
>>
\layout { }
\midi { }
}
String quartet template with separate parts

The “String quartet template” snippet produces a nice string quartet, but what if you needed to print parts? This new template demonstrates how to use the \tag feature to easily split a piece into individual parts.

You need to split this template into separate files; the filenames are contained in comments at the beginning of each file. piece.ly contains all the music definitions. The other files – score.ly, vn1.ly, vn2.ly, vla.ly, and vlc.ly – produce the appropriate part.

Do not forget to remove specified comments when using separate files!

%%% piece.ly
%%% (This is the global definitions file)

global = {
  \time 4/4
  \key c \major
}

Violinone = \new Voice {
  \relative c'' {
    c2 d e1
    \bar "|.
  }
}

Violintwo = \new Voice {
  \relative c' {
    g2 f e1
    \bar "|.
  }
}

Viola = \new Voice {
  \relative c' {
    \clef alto
  }
}
\begin{verbatim}
e2 d c1
\bar "|." 

Cello = \new Voice {
    \relative c' {
        \clef bass
        c2 b a1
        \bar "|." 
    }
}

music = {
    <<
        \tag #'score \tag #'vn1
        \new Staff \with { \instrumentName = "Violin 1" } << \global \Violinone >>

        \tag #'score \tag #'vn2
        \new Staff \with { \instrumentName = "Violin 2" } << \global \Violintwo >>

        \tag #'score \tag #'vla

Vocal ensemble template

Here is a standard four-part SATB vocal score. With larger ensembles, it is often useful to include a section which is included in all parts. For example, the time signature and key signature are almost always the same for all parts. Like in the “Hymn” template, the four voices are regrouped on only two staves.

```latex
\paper {
  top-system-spacing.basic-distance = #10
  score-system-spacing.basic-distance = #20
  system-system-spacing.basic-distance = #20
  last-bottom-spacing.basic-distance = #10
}

global = {
  \key c \major
  \time 4/4
}

sopMusic = \relative {
  \clef treble
  \denote \clef bass
  c''4 c c8[( b)] c4
}
sopWords = \lyricmode {
  hi hi hi hi
}

altoMusic = \relative {
  \clef treble
  \denote \clef bass
  e'4 f d e
}
altoWords = \lyricmode {
  ha ha ha ha
}

tenorMusic = \relative {
  \clef treble
  \denote \clef bass
  g4 a f g
}
tenorWords = \lyricmode {
  hu hu hu hu
}

bassMusic = \relative {
  \clef bass
  c4 c g c
}```
bassWords = lyricmode 
ho ho ho ho

\score {
  \new ChoirStaff <<
    \new Lyrics = "sopranos" \with {
      \override VerticalAxisGroup.staff-affinity = #DOWN
    }
    \new Staff = "women" <<
      \new Voice = "sopranos" {
        voiceOne << \global \sopMusic >>
      }
      \new Voice = "altos" {
        voiceTwo << \global \altoMusic >>
      }
    >>

    \context Lyrics = "basses" \lyricsto "basses" \bassWords
  }
Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in “Vocal ensemble template”. This demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, tenorMusic), then the changes will also apply to the piano reduction.

\paper {
  top-system-spacing.basic-distance = #10
  score-system-spacing.basic-distance = #20
  system-system-spacing.basic-distance = #20
  last-bottom-spacing.basic-distance = #10

Vocal ensemble template with lyrics aligned below and above the staves

This template is basically the same as the simple “Vocal ensemble” template, with the exception that here all the lyrics lines are placed using alignAboveContext and alignBelowContext.

```plaintext
global = {
    \key c \major
    \time 4/4
}

sopMusic = \relative c' { c4 c c8[[ b]] c4 }
sopWords = \lyricmode { hi hi hi hi }

altoMusic = \relative c' { e4 f d e }
altoWords = \lyricmode { ha ha ha ha }

tenorMusic = \relative c' { g4 a f g }
tenorWords = \lyricmode { hu hu hu hu }

bassMusic = \relative c {
```
Vocal ensemble template with verse and refrain

This template creates a score which starts with a solo verse and continues into a refrain for two voices. It also demonstrates the use of spacer rests within the \global variable to define meter changes (and other elements common to all parts) throughout the entire score.

\global = {

c4 c g c
}

\bassWords = \lyricmode {
    ho ho ho ho
}

\score {
    \new ChoirStaff <<
        \new Staff = "women" <<
            \new Voice = "sopranos" { \voiceOne << \global \sopMusic >> }
            \new Voice = "altos" { \voiceTwo << \global \altoMusic >> }
        >>
        \new Lyrics \with { alignAboveContext = #"women" }
