

New features in 2.11 since 2.10

- Horizontal spacing now follows object outlines more accurately. This allows tighter horizontal spacing.

- Objects that belong outside of the staff are now positioned automatically to avoid collisions.

this goes above the previous markup

this doesn't collide with the c

this goes below the dynamic

f

A musical staff in treble clef with a common time signature 'C'. It contains a series of notes. Above the staff, the text 'this goes above the previous markup' is positioned. Below the staff, the text 'this goes below the dynamic' is positioned, with a dynamic marking '*f*' below it.

- Staves are spaced vertically using a skyline algorithm. This helps to avoid uneven vertical spacing.
